

EASISOLV 415N

STAIN & HAZE REMOVER

EasiSolv™ 415N Stain & Haze Remover is used to dissolve all ink stains, emulsion residue/stains and ghost images from the screen printing mesh.

SPECIAL FEATURES:

- EasiSolv 415N is a reduced hazard stain remover which will contribute to a safer work environment compared to many hazardous ghost and haze removers.
- EasiSolv 415N dissolves stains fast (1-5 minutes), which provides a quicker alternative to stain removers that require hours of dry time to work effectively.
- EasiSolv 415N is a low odor product, providing a more pleasant environment for employees.
- EasiSolv 415N is a one-part liquid which works on all types of ink stains and eliminates the need for multiple products (including two-part systems).
- EasiSolv 415N is a ready to use, stable product which will not separate. This reduces the time required to treat a screen and eliminates additional handling and stirring.

APPLICATION FOR MANUAL USE:

- Remove all ink and emulsion from screen.
- Apply EasiSolv 415N to the ink and print side of the screen.
- Allow the product to dwell on the mesh for 1-5 minutes, depending on the nature of the stain.
- Flood rinse entire screen with low pressure rinse. Follow with a high pressure rinse on entire screen.
- *Prolonged contact time with EasiSolv 415N may cause mesh breakdown.

PHYSICAL AND CHEMICAL DATA:

Appearance & Odor:

Clear amber liquid with mild odor

Specific Gravity:

1.2 @ 20° C / 68° F

pH:

>13

VOC:

576 grams/liter

Flash Point:

93 ° C / 200 ° F

Ink Types:

Plastisol

UV

Conventional/Solvent

Waterbase

Product Family:

Textile
