happy making!

steps.

step one: Take the round diffuser label out of your kit and apply it to the bottom of the diffuser bottle.

step two: Grab your all natural diffuser base and pour into your glass pitcher or bowl.

Breathe easier with this 100% natural diffuser base which has been designed for optimal + clean fragrance throw with no phthalates, parabens, sulfates or petroleum.

step three: Pour your bottle of fragrance oil into the diffuser base and use the stirring stick to stir the fragrance in for 2 to 3 minutes.

Mixing the fragrance for 2-3 minutes is important because it allows the molecules to properly bond to the base for maximum fragrance throw in your diffuser.

step four: Remove the diffuser collar and plug from the bottle and set aside. Place the funnel provided into the open diffuser bottle. Slowly pour your diffuser base & fragrance concoction into the bottle.

step five: Grab the diffuser collar and screw onto the neck of your diffuser bottle.

Quick tip: A clear plug has been provided with your kit in case you will be gifting or transporting your finished diffuser (without the reeds inside). The plug will help to ensure there is no liquid leakage in transport. If you will be using this product immediately, just store the plug in case you ever need to use it in the future.

step six: Take the fiber reeds out of the tube and place them into your diffuser. You can use 8-10 reeds depending on whether you prefer your fragrance throw to be mild or stronger.

To make your diffuser scent last, we recommend flipping the reeds every few days for optimal performance & longevity.

step seven: Viola! Sit back, relax and enjoy your beautiful creation!

Tip: If you are giving as a gift, you can wrap the reeds in a small bundle with the ribbon provided in addition to using the gift box for the bottle. Just remember to use the clear plug provided to prevent any diffuser base leakage during transport.

directions for use.

Give your reeds a few minutes to begin absorbing the oil, and begin diffusing fragrance. Spread and reposition your reeds if needed to help fragrance throw circulate.
