happy making!

## steps.

**step one:** think of your wish and then prep both wish wick pens by following the instruction icons shown on the label. Once your pens are ready, you can write your wish directly on the wick. Tip: Your wick has two sides so make sure to write on the flat, smooth side.

Our wish wick pens are non toxic, fast drying, water based paint pens with a fine tip- perfect for writing wishes!

**step two:** gather your wick clip, wick sticker, and wick. Place the wick into your wick clip by gently rocking the wick back and forth until it is fully secured in the clip. Then, place your wick sticker onto the bottom of your wick clip. Next, remove the second side of adhesive from your wick sticker and place the assembled wick into the bottom, center of your vessel(s).

besides being environmentally friendly and FSC certified, our wooden wicks produce a tantalizing crackling sound when burning, giving your space a cozy ambiance.

**step three:** open the kraft bag with wax before putting it into the microwave. Make sure the bag is standing straight (if your bag doesn't stand up straight in your microwave, slightly fold the top of the bag, while it still remains open). Microwave the wax for approximately 3 to 3 1/2 minutes or until the wax has fully liquified. For your safety: Do not put any metal objects in the microwave while liquifying the wax.

this is a 100% natural, plant-based soy wax. Not only is this wax skin-safe, but it also is clean burning and biodegradable.

*Use caution when removing the wax bag from the microwave as the contents will be hot. Once on a countertop, carefully stir your wax with the bamboo mixing spoon for just a few seconds.*

**step four:** pour your bottle(s) of fragrance oil directly into the wax and use the bamboo mixing spoon to stir the fragrance in for 2 to 3 minutes.

mixing the fragrance for 2-3 minutes is important because it allows the molecules to properly bond to the wax for maximum fragrance throw while burning your candle.

**step five:** after stirring, carefully, hold the bag straight and pour your wax + fragrance concoction into the vessel(s).

**step six:** let your candle(s) fully set on a flat surface for at least 24 hours.

**step seven:** once your candle is fully set, apply the provided candle label to the bottom of your candle(s). If you are giving as a gift, you can use the gift box and ribbon provided in this kit.

**step eight:** sit back, relax and enjoy your beautiful creation!

## directions for use.

light your candles and enjoy for 4 hours max. Cover your candle with the lid provided to prevent any dust from getting on it. Before relighting your candle, make sure the wax has set (solidified) and carefully trim the black carbon off of your wick for best performance. Never leave the candle unattended. Never leave children or pets alone in a room with a lit-up candle.
