happy making!

steps.

step one: use a knife to carefully cut the soap block into 4-6 smaller pieces.

this soap base is a creamy, moisturizing, and enriching custom blend of goat milk, shea butter, and coconut oil made from 100% sustainably sourced and natural ingredients.

step two: place the soap base into a microwave-safe bowl and heat in 30 seconds intervals until the soap is fully liquified. Do not overheat. Use caution when removing the bowl from the microwave as it may be hot.

tip: stirring your soap base in between microwaving intervals will help distribute the heat to avoid the risk of overheating.

step three: stir your soap gently a few times to make sure there are no big pieces left.

step four: pour your entire bottle of fragrance into the bowl and stir for 30-60 seconds.

this fragrance not only smells wonderful, but also includes mood boosting technology! This special blend helps you feel more soothed, calm, and reduces anxiety.

step five: add your mica and half the amount of your calendula petals and gently mix until ingredients are fully combined. (optional) You can mix the pearl mica separately with a small amount of Organic Sugar Cane Alcohol before adding it to the soap base. This can help avoid your mica clumping.

calendula flowers are both beautiful and functional! These power packed petals can be used to soothe most skin complaints (including eczema) and have anti-inflammatory properties that will rehydrate and replenish your skin.

step six: slowly pour your soap mixture into the mold so there is an equal amount across all four cavities. Spray your mold with some Organic Sugar Cane Alcohol before pouring to avoid the appearance of soap bubbles on your finished product.

step seven: sprinkle the remainder of your calendula petals on top of your soaps immediately. (Since these petals are natural, your botanicals may discolor over time)

step eight: let your soaps fully set on a flat surface until they are solid and they have thoroughly cooled before moving (even a little bit). Once cooled, they can be removed from the mold and are ready to use!

if you are giving your soaps as a gift, you can use the cream organza bag, hang tag and product ingredient label provided in this kit.

directions for use.

Wet the soap, and lather or massage your body and/or hands with it for about 10-20 seconds (or to your liking) and then rinse away with water. Some botanical may come off as the soaps are used, which is normal.
