

# moon

## AFTER SUN

Looking to soothe sunburned skin. Look to **moon**, After-sun cosmetic care.

Yes, some vitamin D is essential, but excessive sun exposure can lead to short-term and long-term damage to your skin, accelerated aging and an increased risk of skin cancer. Sunburns can be painful and uncomfortable, causing redness, swelling, dryness and even blistering.

Simply apply moon on your sunburned or sun-exposed skin and let it dry - it's that easy! The more you use, the better the results. To maximize the healing benefits of moon, we recommend putting it in your cooler box or fridge and applying it while it's ice cold. The coolness will help to soothe sunburned skin and provide an added layer of relief.

### Benefits:

- Kills harmful bacteria and viruses: HOCl is a natural disinfectant that effectively kills harmful bacteria and viruses, making it an ideal solution for wound care and skincare.
- Promotes faster healing: HOCl has been shown to reduce inflammation and promote faster healing of wounds and skin irritations.
- Safe and non-irritating: HOCl is gentle and safe for all skin types, including sensitive skin, and does not cause irritation or other side effects.
- Maintains skin pH balance: HOCl helps to balance the pH of the skin, reducing the risk of dryness and irritation.
- Promotes healthy skin: Regular use of HOCl can help to promote healthy, hydrated, and radiant-looking skin.
