Introducing SANOT500—the purest and safest hypochlorous solution, a class of next-generation quality. SANOT500 is SABS and NRCS accredited, certified Halal and qualified as a medical grade and food grade anti-microbial agent against 99.999% of bacteria and germs. Hypochlorous acid is your body's very own immune molecule with additional benefits over and above its potent disinfecting capabilities; it holds native anti-inflammatory capabilities and the ability to stimulate cellular repair.

SANOT500, the mother product to all San-O-Brands is affordable, easy to apply and can be used in a number of areas across a broad range of industries via spraying, fogging, wiping or dipping. Its areas of application include (but not limited to):

- Agriculture and Aquaculture
- Air and ventilation disinfection,
- Animal husbandry and Veterinary
- Post-harvest, processing, and packaging (fruits, grains, and vegetables)
- Food processing and packing
- General hand, body and surface sanitation/disinfection
- Healthcare and medical applications
- Household and personal care
- Industrial areas, mining, oil and gas
- Oral care
- Public transport
- PPE (personal protective equipment)
- Restaurants and hospitality
- Topical applications
- Water and beverage process disinfection
- Wound care
- and more.

SANOT500 is effective against bacteria, germs, viruses, spores, fungi, bio-films, and yeast and is completely free from alcohol, ammonia, bleach, sulphates, fragrances, and pesticides.
