RAINSTICK

Pre-Installation Checklist

ARCHITECTURAL

- A tiled shower floor; RainStick is not intended for bathtubs
- A curbed or sunken shower floor
- ☐ If it is intended to operate the shower in areas of hard water (above 200 ppm temporary hardness), a scale inhibitor/water softener shall be fitted.

ELECTRICAL

- GFCI-protected electrical circuit (120V, 60Hz)
- Waterproof connector accessible within the shower enclosure
- ☐ A WiFi 2.4 GHz network (Optional)

PLUMBING

- □ Hot water supply of 130°F (55°C) at the point of dispense (recommended), or 120°F (49°C) at minimum.
- ☐ Hot/cold inlets 1/2 inch diameter
- Minimum water pressure hot/cold inlets at 43.5 PSI (3 bar)
