PRODUCT DESCRIPTION

Extremely lightweight, extremely small, extremely handy – and perfect for flexible use in explosive environments. The Ledlenser EX4 was designed specifically for Ex-Zone 0/20. It is approved for the best possible gas and dust groups IIC and IIIC in zones 0, 1, 2 as well as 20, 21 or 22 (Ex ia op is IIC T4 Ga, Ex ia op is IIIC T₂₀₀135°C Da). At a mere 65 g it's easy to forget that you've got a full-blown Ledlenser in your pocket. Even better to always have it within reach in tricky situations.

- Extremely lightweight (65 g incl. batteries)
- Extremely small and handy (L 14.0 cm)
- Battery operated, uses 2x alkaline AAA
- Suitable for Ex-Zone 0/20 with gases up to IIC and T4 or dusts up to IIIC and T135°C

PRODUCT SERIES

The Ledlenser EX series

If you're working in explosive environments, safety is extremely important when it comes to electronics. Safety which is defined in the ATEX directives of the European Union. Lamps in the Ledlenser EX and iL series meet these standards in every respect. Designed specifically for contact with explosive gases, vapors and dust in the best possible groups IIC and IIIC. Featuring dust and water protection, and certified to ATEX and IECEx. Yet both lines - in accordance with the ATEX workplace directives - are designed for different types of explosion hazards. The Ex-series is suitable for areas where explosive atmospheres are regularly present (zones 0, 1, 20 or 21) and the iL- series for Zone 2/22. So you'll find the perfect lamp for any environment.

FOOTNOTES

The information pertaining to scope of delivery, appearance, performance, dimensions and weight corresponds to the information available at the time of publication. In the interest of product development, we reserve the right to change scope of delivery, appearance, design and color without prior notice. Product images may vary from the actual products and may show optional accessories which can be purchased separately. Errors and omissions excepted.

1) Measurement values according to ANSI FL1 in the respective setting. If no setting is explicitly indicated, the values refer to luminous flux (lumens/lm) and lighting range (meters/m) on the highest setting, and to battery duration (hours/h) on the lowest setting. A boost function (if available) can be used several times, but only for short periods of time. If the light is equipped with (a) colored LED(s), the measurement values are given for the white light or the white LED. If the light has different energy modes, the measurement is made based on the "energy saving mode".

4) Warranty period of five years from the date of purchase, seven years if the product is registered online on our website. The warranty is valid worldwide and legal warranty rights also apply. It covers defects in materials and workmanship. For the proper functioning of rechargeable batteries a different warranty period of 24 months applies. Excluded from this warranty are the product series "Solidline", Ledlenser K1 and Ledlenser K2. The warranty does not apply to Defects in batteries, holsters, pouches, remote switches, color filters, imprints or surface coatings. The guarantor is Ledlenser GmbH & Co. KG, Kronenstr. 5 - 7, 42699 Solingen, Germany. More information: ledlenser.com/warranty
