W5R Work

PRODUCT DESCRIPTION

Robust, reliable, powerful: The Ledlenser W5R Work is the luminous powerhouse in trade professionals' toolboxes. The superior Ledlenser light beam ensures precise illumination even of larger work areas – either broadly via flood light or selectively via spot LED in the lamp head. Thanks to the integrated magnet and hook in the stand, the work light can be flexibly positioned and aligned at any time. The powerful battery can be charged quickly and easily via USB-C and can be replaced if necessary. Other clever features include a metal screw for tightening the foldable stand, a nubbed surface for a strong grip and a handy transport lock.

- Powerful work light with two light sources for wide-area (flood) or spot illumination
- Robust plastic housing with non-slip surface structure
- Flexible mounting and illumination thanks to hook, magnet, and folding mechanism
- Service-replaceable li-ion battery; easily rechargeable via USB-C, with battery and charge level indicator
- Transport lock prevents light from being accidentally turned on

FOOTNOTES

The information pertaining to scope of delivery, appearance, performance, dimensions and weight corresponds to the information available at the time of publication. In the interest of product development, we reserve the right to change scope of delivery, appearance, design and color without prior notice. Product images may vary from the actual products and may show optional accessories which can be purchased separately. Errors and omissions excepted.

1) Measurement values according to ANSI FL1 in the respective setting. If no setting is explicitly indicated, the values refer to luminous flux (lumens/lm) and lighting range (meters/m) on the highest setting, and to battery duration (hours/h) on the lowest setting. A boost function (if available) can be used several times, but only for short periods of time. If the light is equipped with (a) colored LED(s), the measurement values are given for the white light or the white LED. If the light has different energy modes, the measurement is made based on the "energy saving mode".

2) Calculated capacity value in watt-hours (Wh). This applies to the delivery state of the battery/ies inside the respective item, or for lights with rechargeable battery/ies, to the rechargeable battery/ies inside the product when fully charged.

5) Charging time varies by hardware used.
