IMPORTANT TAX INFORMATION

Because of the Supreme Court decision called South Dakota vs Wayfair, states can require sellers from other states to collect and remit sales tax to a state, even if the seller does not have a physical presence in that state.

For that reason, we are required to collect taxes in the following states: **Arkansas, Georgia, Illinois, Indiana, Kentucky, Louisiana, Michigan, Minnesota, New Jersey, North Carolina, Ohio, and Virginia.** From time to time more states will require that we collect taxes, so we wanted to make you aware of this change.

Please include your state taxes in the sales tax column on your order form (page 36) if your state is listed in the Sales Tax By State.

At **Tomato Growers Supply Company**, the seeds you purchase are of excellent quality and should provide exceptional results. However, seeds are living products that are subject to environmental conditions, planting time, soils, and watering techniques. Seeds must be planted at the proper depth, in the right soil temperature, and with sufficient light during the growing period. There are many factors that influence how your seeds will perform once germinated. Disease, insects, and other pests can seriously impact your results as the seedlings grow- success will depend on the gardener's abilities and knowledge. Therefore, we represent that the seeds conform to federal and state standards and that our products will perform properly in the right growing conditions. Our liability is limited to the purchase price of the seeds.

If this warranty is not satisfactory, simply return the seeds to us undamaged and unopened for an immediate refund.

Visit <https://tomatogrowers.com/pages/returns-and-refunds-policy> to read our return policy.

Dear Gardening Friends and Family,

Welcome to Tomato Growers Supply Company's 40th Anniversary!!

We are celebrating our 40th year in business and we would like to offer our profound thanks to our customers throughout the years. We are excited about the new products we have selected, that we believe you will enjoy. Please take your time to look for new peppers, tomatoes, spinach, watermelon, carrot, broccoli and a number of flowers for your garden. Our 40'th anniversary King George hybrid pepper is very large, delicious, and exceptionally early - with plenty of disease resistance. Our new All America winning San Joaquin hybrid jalapeno pepper can produce up to 50 fruit per plant at one harvest! Our new Fresno type hybrid pepper Hernandez, has medium pungency and great productivity. Our carrot Coventry hybrid will be fun for everyone, as a baby carrot or fully grown. Tomatoes Early Doll hybrid, Lady Sophia, and Fantastico hybrid should impress. And don't miss out on the Dragonfly pepper which is a new hybrid purple pepper, that changes from green to purple to red. It is crispy and highly recommended by All America judges. Now, is an exciting time to choose the varieties that you love and new additions to your garden.

Thank you for your continued support over the last 40 years. May you and your family have a healthy and joyful season.

- Tracie & Danny

EARLY SEASON

EARLY FIRST PRIZE HYBRID

Taste the great flavor you have come to appreciate in First Prize, but expect a much earlier harvest. The "first early" fruit reach 4 to 7 ounces, and the indeterminate vines are productive over a long season. A good disease resistance package and plentiful harvests make this your choice for early maturity. Stake plants for best results. 56 days. 🌿

#5577 (20 seeds) \$3.45

SUGAR RUSH HYBRID

Named for the high levels of natural sugars contained in every bite, these super-sweet fruit are elongated and weigh up to 1 ounce. They measure 3/4 of an inch to 1 1/4 inches in length. Early maturity will make this one of the first tomatoes you can harvest in your garden, and likely the sweetest.

Indeterminate. 50-55 days. 🌿 🍷

#6204 (20 seeds) \$3.65

BETTER BUSH VFN HYBRID

Perfect for large containers or small gardens, this has long been a favorite choice for growing on patios, decks, and balconies. That is because the compact plants are attractive while yielding good-sized 8 oz. fruit with real tomato flavor. Stocky plants grow 3 to 4 ft. tall with an upright habit, making staking needs minimal. Compact indeterminate.

68 days. 🌿 🍷

#3270 (30 seeds) \$3.45

BUSH BEEFSTEAK

Compact, bushy plants yield an early abundance of big clusters of 6 to 8 oz. rich red, beefsteak-shaped fruit. Popular in the North because of its earliness, productivity, and large fruit size. Determinate. 62 days. 🍷 🌿 ❄️

#2538 (30 seeds) \$2.95

EARLY WONDER

This extra-early maturing, compact variety makes an impressive crop of round, dark-pink tomatoes with an average weight of 6 ounces. They have excellent, full tomato flavor, and earn their name since it is a wonder when an early variety tastes this good. Determinate. 55 days. 🍷 🍷

#3540 (30 seeds) \$3.55

BUSH EARLY GIRL VFFNT HYBRID

"Little sister" to Early Girl, this variety will surprise you with its huge yields on such small plants. 6 to 7 oz. fruit is larger than that of Early Girl and has a good flavor. Gardeners in short-season areas should be sure to try this one, which has even more disease resistance than the original. Compact determinate. 54 days. 🌿 🍷 ❄️

#3231 (20 seeds) \$3.55

CLEAR PINK EARLY

This compact plant becomes loaded with long trusses of perfectly round, smooth, beautiful clear pink tomatoes. The flavor is very good, sweet yet tangy, making this a wonderful addition to an early harvest. Heirloom variety of Russian origin.

Determinate. 58 days. 🍷

#2416 (30 seeds) \$3.45

EARLY GIRL VFF HYBRID

Comes in first as an early slicing tomato and our customers' favorite early variety. Dependable large harvests of flavorful, solid 4 to 6 oz. fruit. Disease resistance is good, contributing to its excellent performance in almost any climate. A proven variety for delicious, early tomatoes. Indeterminate. 52 days. 🌿 🍷

#2783 (30 seeds) \$3.95

FIREWORKS

What makes this variety really special is that it is one of the largest, earliest, red slicing tomatoes available, and it has excellent flavor. This combination is truly uncommon, but Fireworks is an exceptional variety. Its bright-red fruit are 6 to 8 ounces and borne quite heavily on vigorous plants. Indeterminate. 60 days. 🍷

#6002 (30 seeds) \$3.45

GLACIER

While this variety may not be able to withstand a glacier, it does set fruit well even in cold weather. In fact, it becomes loaded early in the season with very flavorful, 2 to 3 oz. red tomatoes. The taste is sweet yet rich, a combination found more commonly in larger and later-maturing tomatoes. Determinate. 58 days. 🍷 ❄️

#4518 (30 seeds) \$3.45

GREGORI'S ALTAI

Siberian variety that originated in the Altai Mountains on the Chinese border. Tall plants are heavy producers of 8 to 12 oz. pink-red beefsteak tomatoes. The flavor is sweet yet acidic and just delicious, with harvests continuing over an incredibly long season. Indeterminate. 67 days. 🍷 ❄️

#5582 (30 seeds) \$3.95

LEGEND

Introduced by Dr. James Baggett at Oregon State University, this very early variety sets large 8 oz. fruit that are glossy red and round with a very good flavor. Legend also has a strong resistance against the late blight fungus and sets fruit well under cool temperatures. We think this combination of great taste, earliness, and disease resistance makes Legend truly memorable. Determinate. 68 days. 🍷 🍷 ❄️

#3742 (30 seeds) \$3.65

MATINA

This very early variety bears loads of 2 to 4 oz. red fruit with terrific flavor. In fact, the taste is so good and intense that some gardeners say that it equals flavor normally found only in a huge beefsteak. Potato-leaved plants put on large clusters of abundant tomatoes, and continue to bear throughout a long season. Heirloom from Germany. Indeterminate. 58 days. 🌱🍅🌸
#5606 (20 seeds) \$3.45

NEW BIG DWARF

Compact plants only become about 2 ft. tall yet produce a very early harvest of flavorful, deep-pink tomatoes that grow up to 1 pound, but are more typically 8 to 12 ounces. Wonderful in the garden and also in containers, the plant stays small while delivering large and really delicious tomatoes. We consider this an heirloom tomato as it was created before 1915. Determinate. 60 days. 🌱🍅
#2522 (30 seeds) \$3.45

OREGON SPRING V

A cold-tolerant tomato developed by Oregon State University for short-season gardeners. Compact plants produce concentrated sets of medium-to-large fruit that are nearly seedless. Fruit is juicy and tender with full tomato flavor. Determinate. 58 days. 🌱🍅🌸
#2712 (30 seeds) \$3.25

POLEBIG HYBRID

For those who need an early tomato, Polebig can be your solution. Developed in Poland for earliness and crack resistance, this tomato has first early maturity, and also delivers 7 to 10 ounce tomatoes. Brilliant red fruit are meaty with good flavor. The strong vines can hold the fruit longer than other early varieties. Determinate. 59 days. 🌱🍅
#6891 (15 seeds) \$2.95

RED ROCKET

This compact, bushy plant seems to take off like a rocket when loads of bright red tomatoes ripen up early in the season. Fruit is in the 8 to 10 oz. range and very smooth and flavorful with a good blend of sugar and acid. Determinate. 60 days. 🌱🍅
#2373 (20 seeds) \$3.45

SILETZ

Deep-red, full-flavored slicing tomatoes are 8 to 10 ounces. Developed by Dr. James Baggett of Oregon State University, these plants yield well even in cool weather. Good acid taste and excellent interior fruit quality in a very early tomato. Determinate. 52 days. 🌱🍅🌸
#2831 (20 seeds) \$3.55

STUPICE

From Czechoslovakia, this is an extremely early cold-tolerant tomato that bears an abundance of 2 oz. flavorful and sweet tomatoes. This variety has become a garden favorite for its earliness, productivity, and truly wonderful taste. Indeterminate. 52 days. 🌱🍅🌸
#4782 (30 seeds) \$3.25

506 BUSH

Bright-red fruit grows on strong 18 inch tall vines that are drought tolerant and yield well. Medium-large tomatoes have a mild flavor with a hint of sweetness and are blemish-free. Determinate. 62 days. 🌱🍅
#2205 (30 seeds) \$3.95

DEBUT HYBRID

This variety has early maturity with exceptional size - 8 to 10 oz. Perhaps the best variety for those wanting a compact determinate plant that has great yield potential, flavor, and appearance. You can even grow this in a large container. The deep oblate fruit are picture perfect with a small blossom scar. (VFFASt) Determinate. 70 days 🌱🍅
#4850 (10 seeds) \$3.39

BOBCAT HYBRID

This high-yielding beefsteak has a bush growth habit and can be grown in a container. A sister of Better Bush, the dense foliage helps protect fruit from subburn. Flavor is excellent with the right balance of sugars and acids. Fruit set is somewhat concentrated, weighing 10 ounces on average. Plants benefit from support. Disease package F1, F2, Ss, TMV, V, S. Determinate. 68 days. 🌱🍅
#6883 (20 seeds) \$3.95

BOX CAR WILLIE

What this variety offers is a very heavy crop of good-sized, smooth red tomatoes with delicious flavor, ranging from 6 to 10 ounces. Because of their abundance and size, they could well be a mainstay of your crop, providing excellent-tasting fruit throughout a long season. Indeterminate. 80 days. 🌿🍷

#5932 (30 seeds) \$3.25

U-PICK HYBRID

We were surprised when our local customers began asking for this tomato seed to take home and plant in the Midwest. It is firm, yet very sweet, averaging 8 to 10 ounces. They hold the sweetness longer than other roadside market varieties we have tried. The vigorous determinate vines provide good shade for the fruit. 77 days. 🌿🍷

#6146 (20 seeds) \$3.35

BHN 589 VFHT HYBRID

This is the first BHN variety bred especially for great flavor. It also boasts a complete disease-resistance package including crack tolerance. Large to extra-large attractive fruit have real tomato taste making BHN 589 appealing to both home gardeners and farm marketers. Determinate. 75 days. 🌿🍷

#3941 (15 seeds) \$4.95

HEATMASTER HYBRID

Bred to perform in heat, this variety can produce fruit as the thermometer reaches up to 90 degrees. Excellent disease resistance and broad adaptability make this variety a perfect choice for the hotter regions of the country. Fruit are 7 to 8 oz., tasty and sweet. Determinate. 75 days. 🌿🍷

#4855 (10 seeds) \$3.39

BELLA ROSA VFNA HYBRID

This is not only a beautiful red tomato with a melodious name, it is a really serious performer. It is both heat tolerant and resistant to Tomato Spotted Wilt Virus, two very important benefits for many growers. In one Louisiana trial of virus-resistant tomatoes, Bella Rosa ranked up at the top for its productivity as well as its large fruit size and great flavor. Expect high yields of large, 10 to 12 oz. delicious tomatoes with bright-red flesh. Determinate. 75 days. 🌿🍷

#3709 (15 seeds) \$3.85

ABRAHAM LINCOLN (REGULAR)

This old-time variety really loads up with an abundance of 6 to 10 oz. round red tomatoes that are packed with great tomato flavor. They have a tender, fine texture and a fair amount of acid that is nicely tempered with sweetness. This variety has been popular since the early 1920's. Indeterminate. 77 days. 🌿🍷

#5508 (30 seeds) \$3.45

DESTINY HYBRID

This commercially bred variety is perfect for salsa, pico de gallo, canning, and fried green tomatoes. Plants are hardy with good leaf cover, and resist Yellow Leaf Curl virus. 7 to 9 ounce fruit. Large determinate. 73 days. 🍷

#2944 (20 seeds) \$3.25

BIG BEEF VFNTA HYBRID

ALL AMERICA SELECTIONS WINNER. One of the finest hybrids ever for home gardeners. Impressive yields of extra-large, 10 to 12 oz. smooth tomatoes with real old-time flavor. Its virtues include great disease resistance, early harvests and fruit that stays enormous even at the end of a long season. Indeterminate. 73 days. 🌿🍷

#3310 (30 seeds) \$3.75

ORANGE OXHEART

Big 10 to 12 ounce heart shaped, meaty fruit are sweet and juicy. Well balanced flavors and attractive color, make this a perfect addition in salads, or as a delicious juicy slice on a sandwich. Vigorous indeterminate vines benefit from growing in cages. 76 days. 🍷

#6049 (20 seeds) \$3.25

BETTER BOY VFN HYBRID

Rugged vines produce large crops of bright-red, 12 to 16 oz. smooth, flavorful fruit. Similar to Big Boy, but with additional disease resistance. Firm and perfect for slicing. One of the best tasting garden tomatoes available anywhere. Indeterminate. 75 days. 🌿🍷

#3201 (30 seeds) \$3.45

SWEET CHARLOTTE HYBRID

Perfect for a sandwich, in salads, or just sliced. Large determinate plants have enough vigor to offer high yield potential, and attractive 8 to 10 ounce fruit, with wonderful flavor. Widely adapted, and works well for market gardeners and home gardeners alike. Crack resistant. F, TMV, V and nematode resistant. 72 days. 🌿🍷

#4821 (20 seeds) \$3.45

PRECIOUS PINK HYBRID

These 6 to 8 ounce pink tomatoes have that old fashioned flavor and juicy flesh that people crave. Yield potential is impressive on the vigorous indeterminate vine. Tmv, F. Indeterminate. 72 days. 🌿🍷

#6540 (30 seeds) \$2.85

**ROMAN WARRIOR HYBRID**

Produces huge sets of blocky red, meaty fruits, 3 to 5 ounces in size, that are sweet and firm. Great for canning, for paste, sauce, or fresh. And with a standard disease package plus TYLCV and three types of nematode resistance they can keep producing under difficult conditions. Harvest over a long period of time. Semi-determinate. 75 days. 🌱🍅

#6111 (15 seeds) \$3.65

**GULF STATE MARKET**

This old market variety offers plenty of 6 to 8 oz. globe shaped tomatoes that are pink on the outside with a red interior. Fruit is smooth and flavorful. Very popular still in the Gulf states as a good all-around tomato. Indeterminate. 78 days.

#3248 (30 seeds) \$3.95

**HEINZ 1350 VF**

A leading variety for canning and fresh use because of heavy yields of uniform, 6 ounce fruit. Bright red color and crack resistant. 70 days.

#3775 (30 seeds) \$3.95

**POSEIDON 43 HYBRID**

In parts of Asia, pink tomatoes are considered the best because they are typically sweet with low acid levels. This variety offers very smooth, unblemished pink fruit that weigh about 8 ozs. each with a delicious, mild flavor. Indeterminate. 78 days.

#5033 (30 seeds) \$3.95

**BIG BOY HYBRID**

A long-time favorite because of its very large, smooth scarlet fruit with meaty flesh and great flavor. Heavy crops peak in mid season but continue until frost. Indeterminate. 78 days. 🌱🍅

#3670 (30 seeds) \$3.75

**BIG BRANDY HYBRID**

This terrific heirloom-hybrid is a result of crossing Brandywine with New Big Dwarf. The hybrid is much higher yielding and earlier to mature than its heirloom parents, with all of the great flavor and fewer blemishes. Regular-leaved plants bear pink beefsteaks that weigh 12 to 16 ounces and have all the wonderful taste of the original heirlooms. Indeterminate. 75 days. 🌱🍅

#2625 (15 seeds) \$3.45

**BIG RASPBERRY**

Imagine tremendous harvests of pretty pink-red scalloped tomatoes with great flavor, and you have the essence of what Big Raspberry offers. Perhaps the name comes from the fruit's rosy-pink color or from the way it covers the plant like raspberries on the bush. These meaty, sweet tomatoes become 6 to 10 ounces and really load up on vigorous potato-leaf plants. Heirloom variety. Indeterminate. 75 days. 🌱🍅

#3999 (20 seeds) \$3.95

**SUPER SIOUX**

Developed for hot climates, this variety produces 4 ounce bright red clusters of sweet tasty fruit, that have the old fashioned flavor and a tangy acid balance. The fruit also resist cracking due to a slightly thicker fruit wall. Semi-indeterminate. 70 days. 🌱🍅

#6121 (30 seeds) \$2.75

**BRANDYWINE RED
(LANDIS VALLEY STRAIN)**

This is the real Red Brandywine from Chester County, Pennsylvania, where it originated in 1885. The foliage of this variety is shaped like a regular tomato leaf and is not potato-leaved. It produces high yields of medium-sized, 8 oz. round, smooth red fruit that are juicy and loaded with intense tomato flavor. Expect high yields of this very flavorful tomato. Indeterminate. 78 days. 🌱🍅

#5940 (20 seeds) \$3.45

**BUFFALO STEAK VFNT HYBRID**

This great new garden tomato provides the winning combination of large, prolonged harvests and flavorful, deep-red tomatoes with a classic beefsteak shape. 6 to 7 oz. tomatoes are meaty with few seeds and have a wonderful silky texture and old-fashioned tomato taste. Vigorous plants start producing early and continue throughout a long growing season. Indeterminate. 75 days. 🌱🍅

#3130 (10 seeds) \$3.95

**BUSH CHAMPION II VFFA HYBRID**

This special variety was developed to honor Ball Seed Company's 100th year anniversary. While the compact plants grow only 24 inches tall, they yield plenty of big, meaty tomatoes that weigh in at 8 to 12 ounces. Their flavor is excellent, and plants thrive in almost any type of climate. Determinate. 70 days. 🌱🍅

#2768 (10 seeds) \$3.95

**PINK GIRL HYBRID**

Large, juicy, 8 oz. pink tomatoes with mild flavor and good crack resistance. Smooth fruit have a very pleasant taste with just the right amount of sweetness. Expect harvests to continue the entire summer. Indeterminate. 76 days. 🌱🍅

#3214 (20 seeds) \$3.25

CAMARO VFFFA HYBRID

This variety offers resistance to Tomato Yellow Leaf Curl Virus and the same disease-resistance package as Charger Hybrid, but with a stronger plant and even better fruit quality. Compact plants perform well even in hot weather, putting on heavy sets of deep-red, firm, round tomatoes that are an extra-large 10 to 14 oz. size. This is a good choice for both commercial planting as well as home gardens. Determinate. 72 days. 🌿🍅
#4232 (20 seeds) \$4.45

CARMELLO VFNT HYBRID

A classic French slicing tomato, this one is making a comeback after being absent from our inventory for many years. It has a deservedly great reputation both in America and Europe due to its wonderful flavor, perfect sugar/acid balance, and crack-resistant skin. Bright red juicy tomatoes are 10 to 12 ounces with a beautiful round shape. Expect very high yields on disease-resistant plants. Indeterminate. 75 days. 🌿🍅
#2354 (30 seeds) \$4.45

CELEBRITY VFFNTA HYBRID

ALL AMERICA SELECTIONS WINNER. Absolutely incredible set of exceptionally flavorful, firm 8 to 12 oz. fruit on strong vines with good cover and outstanding disease resistance. Large clusters of consistently large, beautiful tomatoes. Determinate. 70 days. 🌿🍅🔥
#3980 (30 seeds) \$4.25

CHAMPION II VFNT HYBRID

Especially bred as a luscious sandwich tomato, solid, meaty slices with just the right sweetness. High yields of large fruit, bigger than Early Girl and earlier than Better Boy. Outstanding performer. Indeterminate. 70 days. 🌿🍅
#2429 (30 seeds) \$3.95

CHARGER VFFFA HYBRID

Resistant to Tomato Yellow Leaf Curl Virus and 3 races of fusarium wilt, these healthy plants produce loads of extra-large 10 to 14 oz. red tomatoes with delicious flavor. In addition, the compact plants are well adapted to a wide range of climates, making them easy to grow even when conditions are less than ideal. This is an excellent-performing tomato for home gardens and commercial planting as well. Determinate. 72 days. 🌿🍅
#3506 (15 seeds) \$4.65

COSTOLUTO GENOVESE

Italian heirloom. Large, deep-red, juicy tomatoes are deeply ribbed but fully flavored and absolutely delicious. This variety is hearty and does well in hot weather, but continues to produce even when the weather turns cool. Indeterminate. 78 days. 🌿🍅🔥
#3747 (30 seeds) \$2.95

DIXIE RED VFFNA HYBRID

A great new tomato that is heat-tolerant as well as resistant to Tomato Spotted Wilt Virus and gray leaf spot. Large, smooth, round red tomatoes have good flavor and are perfect for slicing, salads, or canning. For the best fruit size and quality, little-to-no pruning is recommended. This high-yielding variety is well suited to commercial production in the Southeast, as well as to home gardeners everywhere. Determinate. 70 days. 🌿🍅🔥
#5695 (10 seeds) \$3.45

EVA PURPLE BALL

Huge yields of sweet, juicy round fruit that is delicious for salads, sandwiches, and a variety of other uses. Dark-pink fruit is smooth and usually about 2 inches across. Heirloom variety from Germany. Indeterminate. 70 days. 🌿🍅
#4611 (30 seeds) \$3.45

FIRST PRIZE VFNT HYBRID

Exclusive release of Tomato Growers Supply Company. Vigorous plants produce loads of delicious 10 to 12 oz. fruit, even when conditions are not ideal. A winner in our trials for its high yields, good disease resistance, mid-early maturity, and great flavor. First fruit mature low on the plant, which continues to bear tomatoes over a long season. Indeterminate. 75 days. 🌿🍅
#3300 (30 seeds) \$4.45

FLORIDA 47 R VFFA HYBRID

This variety has been well regarded as a top commercial tomato for years due to its heavy yields and tasty 10 oz. smooth, red fruit that hold up well after harvest. Backyard gardeners can enjoy these same great qualities by growing this reliable and productive tomato. For the best fruit size and quality, little-to-no pruning is recommended for these plants. Determinate. 70 days. 🌿🍅🔥
#4205 (10 seeds) \$3.45

FLORIDA 91 VFF HYBRID

Extra-large, 10 oz. smooth, round tomatoes ripen to a uniform red, and are produced as an incredible set of solid, flavorful fruit. Strong, healthy vines have heat-set capabilities and resistance to alternaria and gray leaf spot. A favorite with chefs and gardeners alike for its versatility and great flavor. Determinate. 72 days. 🌿🍅🔥
#3992 (10 seeds) \$3.45

GENUWINE HYBRID

Crossing two different heirlooms creates a variety that is much higher yielding and earlier maturing, while retaining great flavor and fewer blemishes. This cross combines Brandywine's sweet, rich taste and Costoluto Genovese's beautiful scallops, great production, and ability to set fruit in hot weather. Genuwine plants are regular-leaved and produce delicious 10 to 12 oz. fruits. Indeterminate. 70 days. 🌿🍅
#2542 (15 seeds) \$3.45

HEALTH KICK VFFA HYBRID

Named appropriately, this variety has fruit with 50% more lycopene than other common tomatoes. Besides being good for you, these plum-shaped tomatoes are extra large, 4 to 6 ounces, and excellent for salads or in cooking. Another important attribute is their resistance to Tomato Spotted Wilt Virus and bacterial speck. Determinate. 74 days. 🌱🍅

#6044 (20 seeds) \$4.35

HEINZ 1439 VFA

This is a great variety for canning or processing because it puts out a concentrated set of tomatoes that you can pick all at one time. Very heavy yields of beautiful bright-red, crack-resistant, 6 oz. fruit. Determinate. 70 days. 🌱🍅

#3776 (30 seeds) \$3.75

HOMESTEAD 24 F

Especially recommended for Southern gardeners, this variety sets large crops even in hot weather. Luscious, meaty tomatoes are medium-sized, smooth, and resistant to catfacing. Determinate. 80 days. 🌱🍅

#4955 (30 seeds) \$3.45

HONEY HYBRID

Wonderful, sweet, rich flavor is what gives this dark-pink tomato its name. Large yields of beautiful, smooth 8 oz. fruit keep coming all season long on vigorous, disease-resistant plants.

Indeterminate. 76 days. 🌱🍅
#5910 (30 seeds) \$3.55

BHN 602 VFFF HYBRID

Extra-large, bright red tomatoes weigh 10 to 12 ozs. and are shaped like perfectly smooth globes -- just right for slicing or canning. Expect good flavor and great production from these strong, vigorous plants with resistance to Tomato Spotted Wilt Virus, Verticillium Wilt, and three races of Fusarium Wilt. Determinate. 75 days. 🌱🍅🍅

#3468 (15 seeds) \$4.95

JET STAR VF HYBRID

Gardeners rate this variety as excellent, especially for its superior, very pleasant taste. Heavy yields of 8 oz. meaty fruit that is generally free of cracks. Vines offer good foliage cover. Not recommended for canning, as Jet Star is low in acid. Indeterminate. 72 days. 🌱🍅

#3316 (30 seeds) \$3.65

MOMOTARO HYBRID

This is the most popular tomato in Japan, where gardeners prefer their tomatoes pink and sweetly flavored. Hybrid plants produce abundant crops of round, medium-sized, perfectly smooth tomatoes with no blemishes or imperfections. Their taste is wonderful, intensely rich and sweet, with just the right amount of acid. Indeterminate. 74 days. 🌱🍅

#5149 (10 seeds) \$3.95

MOUNTAIN MAGIC VFF HYBRID

Great-tasting tomatoes and resistance to both early and late blight. Similar to the "Campari" tomato found in markets, it bears abundant, long clusters of 2 oz., round to deep round red tomatoes. Their wonderful flavor is a balance of bold acid with a generous amount of sugar, adding up to a real taste treat. Compact indeterminate. 72 days. 🌱🍅

#3213 (10 seeds) \$4.95

MOUNTAIN MERIT VFFFN HYBRID

ALL AMERICA SELECTIONS WINNER. The first full-sized tomato variety offering resistance to early blight, late blight and Tomato Spotted Wilt Virus plus other resistances for a powerful disease package. Deep-red, 8 to 12 oz. fruit is quite flavorful and great for slicing and sandwiches as well as canning for later. Productive plants put on an excellent crop with a harvest time that lasts 4 to 5 weeks. Determinate. 75 days. 🌱🍅

#2824 (15 seeds) \$4.65

EMPIRE HYBRID

Empire VFFNT tastes and looks a lot like Celebrity, but it has a larger plant that provides excellent cover for fruit. A great farmers market tomato. Determinate. 70 days. 🍅

#2946 (20 seeds) \$3.25

MOUNTAIN SPRING VFF HYBRID

Beautiful tomatoes are 8 to 10 ounces, bright red throughout, and resistant to cracking and blossom-end rot. Texture is firm, but softens upon ripening, and flavor is mild and pleasant. Very productive. Determinate. 72 days. 🌱🍅

#3225 (15 seeds) \$3.45

PHOENIX VFFA HYBRID

Heat-resistant variety bears large 8 oz., top-quality tomatoes that ripen uniformly to bright red. Excellent disease resistance and vigorous plants ensure a large harvest even when weather is very warm. This is a proven top performer in the South and other growing areas with high temperatures during the growing season. Determinate. 72 days. 🌱🍅

#2909 (15 seeds) \$4.75

PINK PING PONG

Amazing yields of sweet pink fruit that is about the size and shape of a ping-pong ball. The similarity ends there, however, as these tomatoes are delicious and juicy, bursting with superb flavor. Vines bear prolifically, ripening fruit right up to the end of the season. Indeterminate. 75 days. 🌱🍅

#3456 (30 seeds) \$3.65

ROSE DE BERNE

A lovely name describes this very beautiful dark-pink tomato that is shaped like a perfect globe, smooth and round with no blemishes. Fruits are 6 to 8 ounces with a thin skin, and filled with sweet flavor that is wonderfully balanced with a bit of zing. Very productive plants yield a heavy crop. Swiss heirloom. Indeterminate. 75 days. 🌱🍅

#5733 (30 seeds) \$3.45

LADY SOPHIA

Lady Sophia is destined to be queen of the pink tomato, once you have discovered the old fashioned flavor of its sweet and luscious flesh that people love. 10 to 12-ounce fruit are produced on large indeterminate plants. 79 days. 🍅

#2948 (20 seeds) \$3.45

MID SEASON

RUSSIAN ROSE

This Russian heirloom variety is aptly named as it bears fruit as pretty as a rose. The tomatoes are large, rose-pink globes with excellent, sweet, full tomato flavor. The average size is usually about 12 ounces with meaty flesh. Expect a good-sized crop of these top-quality tomatoes. Indeterminate. 78 days. 🌱🍷

#6130 (30 seeds) \$3.45

RUTGERS VFA

Gardeners throughout the country are rediscovering this old-fashioned classic for its terrific flavor and productivity. Disease resistance ensures large crops of crack-free, bright-red 6 to 8 oz. tomatoes with delicious, old-time taste. For many years, this was a favorite for canning because of its abundance, juiciness and deep-red color. Developed in the 1920's, but just right for today's gardens too. Determinate. 75 days. 🌱🍷

#4050 (30 seeds) \$3.55

SIOUX

Released in 1944 by the University of Nebraska, this heirloom is worth planting today for its incredible flavor and reliably large harvests, even in hot weather. Although this appears to be just a 6 oz. unassuming red tomato, you just have to grow it to believe how good it is — sweet yet tangy and full of those rich, complex flavors that make a delicious tomato memorable. Indeterminate. 70 days. 🌱🍷👤

#4242 (30 seeds) \$3.85

STELLAR VF HYBRID

What a fitting name for a beautiful round, red tomato with great yields and high resistance to late blight plus intermediate resistance to early blight and Septoria Leaf Spot. Stellar gives gardeners who experience high disease pressure a slicing tomato they can count on. Smooth, lovely fruit is medium-sized at 5 to 7 ounces, perfect for tucking into sandwiches or cutting up into salads. Determinate. 70 days. 🌱🍷

#4251 (15 seeds) \$5.85

SUPER FANTASTIC VF HYBRID

Tall, vigorous plants produce abundant harvests of large, round, juicy fruit. Smooth, solid, and meaty with absolutely delicious flavor that is a wonderful combination of sweet and acid. Well adapted to all growing areas. Indeterminate. 70 days. 🌱🍷

#3841 (20 seeds) \$3.25

SUPERSONIC VF HYBRID

Very large production of meaty, 8 to 12 oz. tomatoes with good flavor and solid structure tolerant to cracking. Especially popular in the Northeast. Vigorous vines grow best with some means of support. Indeterminate. 79 days. 🌱🍷

#3350 (30 seeds) \$3.55

TASTI-LEE VFFF HYBRID

Developed at the University of Florida by Dr. Jay Scott, this variety is notable for its potential as a commercial tomato bred especially for vine-ripe harvest and great flavor. This also suits it well to home gardens and to production for farmers' markets. Tomatoes have just the right balance of sugar and acid, and rich red color inside and out. Firm texture and juicy flesh make it wonderful for slices, salads, or chopping into salsa. Determinate. 75 days. 🌱🍷

#5755 (10 seeds) \$3.95

THESSALONIKI

Greek variety with beautifully smooth, 6 to 8 oz. red fruits. Tomatoes are juicy, with an excellent, old-fashioned acid tomato flavor. Good yields and crack resistance add to the appeal of this delicious variety. Indeterminate. 75 to 80 days. 🌱🍷

#5857 (30 seeds) \$3.75

GERMAN PINK

Deep pink beefsteak fruit have excellent, sweet flavor and are meaty with few seeds. Tomatoes weigh between 10 and 16 ounces and are fairly smooth in shape. Potato-leaved plants produce these large, delectable tomatoes early in the season. Heirloom variety. Indeterminate. 78 Days. 🍷

#4406 (30 seeds) \$3.95

HUSKY RED HYBRID

This member of the new Husky series yields medium-sized, 5 to 7 oz. bright red fruit with very good flavor. Although the plants grow only 4 feet tall, fruit continues to appear in surprising numbers throughout the growing season. Dwarf indeterminate. 68 days. 🌱🍷

#4526 (30 seeds) \$3.45

THINK PINK VFFNT HYBRID

One of the standouts of our 2016 tomato trials, Think Pink offers generous harvests of 6 to 8 oz. round, pink fruit with delectable taste and juicy, meaty texture. The flavor has that perfect balance between sweetness and acidity that just makes you want more. Vigorous plants offer very high yields and continue bearing from early in the season until the very end. Indeterminate. 72 days. 🌱🍷

#5192 (10 seeds) \$5.95

JETSETTER HYBRID

Short season gardeners especially will be happy for this variety that doesn't sacrifice size or flavor for early maturity. Tomatoes are at least 8 oz. and often larger with really good, rich flavor. Yields are plentiful on vigorous plants that have lots of disease resistance, offering even those in the South a great new early tomato. Indeterminate. 64 days. 🌱🍷

#4519 (20 seeds) \$3.45

WISCONSIN 55

Bred by the University of Wisconsin in the 1940's, this is an excellent and versatile tomato with great flavor and amount of sweetness. Smooth, large tomatoes are about 8 ounces and as pretty as can be. Plants are extremely productive and thrive in a wide range of growing conditions. Indeterminate. 78 days. 🌱🍷

#5956 (30 seeds) \$3.95

JOLENE HYBRID

Jolene is more than just a beautiful tomato with smooth shoulders and a pretty petite blossom scar. She offers large, 8-10 ounce fruit, that have excellent flavor, and beautiful deep red color. She also has a hidden strength - resistance to Fusarium Crown Rot, Verticillium wilt, and intermediate resistance to Tomato Yellow Leaf Curl virus. Trialing in a dozen states has proven the productivity potential of this new tomato, and particularly in the South Eastern US. Roadside farmers will appreciate the marketable yield potential. Determinate. 73 days. 🌱🍷👤

#6878 (20 seeds) \$3.95

SWEET CAROLINE HYBRID

This is a bush tomato that tastes wonderful and has big 8 to 10 ounce fruit. The flavor is great, and there is plenty of juicy goodness. The blossom scar is somewhat larger than other tomatoes, but what it misses in looks, it makes up for it with productivity and great flavor. VFF Determinate. 74 days. 🌱🍷

#6880 (20 seeds) \$3.45

ACE 55 VF

This variety is lower in acid than most other tomatoes and often recommended to people who are on a low-acid diet. However, these bright-red fruit include a good tart tomato flavor nicely complemented by a sweet taste. Tomatoes are medium-sized, round and produced in great abundance. Determinate. 80 days. 🍅

#4123 (30 seeds) \$3.95

ARKANSAS TRAVELER

Bred by University of Arkansas in 1968, this variety is well known for its ability to produce fruit in hot weather. Abundant crops of pink tomatoes that are 6 to 8 ounces and very flavorful. Indeterminate. 85 days. 🍅🍅

#3566 (30 seeds) \$3.10

BRADLEY

Large crops of pink, 8 to 10 oz. tomatoes that have a full, old-fashioned tomato flavor. Smooth, blemish-free fruit are borne in large numbers over a concentrated time period, making this variety a favorite in Southern states for canning and eating. Strong determinate. 80 days. 🍅🍅

#4515 (30 seeds) \$3.25

DRUZBA

An heirloom from Bulgaria, this variety bears large harvests of perfectly smooth and round, deep-red tomatoes that weigh between 4 and 6 ounces. Flavor is outstanding, with just the right combination of sweetness and tartness, and fruit is juicy and blemish-free. Indeterminate. 80 to 85 days. 🍅

#4813 (30 seeds) \$3.95

KALMAN'S HUNGARIAN PINK

A family heirloom of Kalman Lajvort, with the seed originally coming from Europe. 8 oz. pink, oval-shaped tomatoes have outstanding, rich, sweet flavor. Fruit is very meaty and can be used as a slicer as well as being almost like a large, juicy paste tomato. Indeterminate. 85 days. 🍅

#5737 (30 seeds) \$3.35

MARIZOL PURPLE

Large, smooth, dark-pink fruit have a purple tint and wonderful sweet flavor. Tomatoes range from 8 ozs. to 1 lb., although they may become as large as 2 lbs. Plants are vigorous and give big yields up until frost. Heirloom variety from the Black Forest region of Germany. Indeterminate. 80 days. 🍅

#6849 (30 seeds) \$3.65

MULE TEAM

A great choice for a "main crop," all-purpose tomato. Vigorous plants bear plenty of 8 to 12 oz. round, bright red tomatoes with excellent flavor and texture. Not only are harvests very abundant, but production continues right up until frost. Heirloom variety. Indeterminate. 80 days. 🍅🍅

#4620 (30 seeds) \$3.55

JAMESTOWN HYBRID

This new variety has heat set ability, plus it has plenty of resistance against bacterial leaf spot. Developed by the same folks who brought you Florida 47 & 91, but with improved flavor and a deep red crimson gene which imparts more red color and more lycopene than other tomatoes. Fruit reach 10 ounces and have wonderful flavor. The vigorous determinant plants have high yield potential. 79 days. 🍅🍅

#6205 (15 seeds) \$3.25

NEPAL

So named because the seed is originally from the Himalaya Mountains. Large, deep-red tomatoes weigh about 12 ounces and have an intense tomato flavor. Plants bear well even in cooler weather. Indeterminate. 80 days. 🍅

#5603 (30 seeds) \$3.25

RED ROSE

This cross between Brandywine and Rutgers produces good yields of 10 to 16 oz. delicious, dark-pink fruit. Disease and crack resistance are inherited from Rutgers, and the tomato's taste and texture is more like that of Brandywine. Indeterminate. 85 days. 🍅🍅

#5818 (30 seeds) \$3.65

ZAPOTEC PINK RIBBED

Heirloom tomato from the Zapotec Indians of Mexico, this is a beautiful, heavily ribbed, dark-pink fruit. Its pleated shape makes it wonderful when hollowed and stuffed, or sliced to show off its scalloped edges. The flavor is sweet and mild, and yields are prolific. Indeterminate. 80 days. 🍅🍅

#5827 (30 seeds) \$3.65

HENDERSON'S WINSALL

While there have been a lot of tomatoes distributed under the name of Winsall, this one is the original grown from stock seed we obtained from the USDA Seed Bank. The plants have regular tomato foliage and produce large 1 lb. or more pink fruit with absolutely scrumptious taste. Heirloom originating with the Henderson Seed Company in 1924. Indeterminate. 90 days. 🍅

#3404 (30 seeds) \$3.95

QUARTER CENTURY

Originally released in 1905, this heirloom tomato has some heat tolerance and cracking resistance. The attractive red fruit weigh 5 to 10 ounces, and have that great old fashioned flavor. Plants reach 3 to 4 feet in height. Determinate. 81 - 85 days. 🍅

#6895 (20 seeds) \$3.25

OXHEART PINK

This heart-shaped heirloom offers timeless old fashioned flavor. The fruit are very juicy and meaty, with deep-pink flesh. Plants produce fruit up to 12 ounces in weight, on robust indeterminate plants that are very productive. 75 days. 🌱🍷
#4904 (20 seeds) \$3.39

GERMAN RED STRAWBERRY

These big red oxheart tomatoes may be shaped like a strawberry but average 10 ounces and can grow to 1 pound. Tomatoes are meaty with an excellent taste that is on the acid side. Tall plants yield an abundance of these wonderful fruits. Heirloom variety. Indeterminate. 85 days. 🌱
#5481 (30 seeds) \$3.65

AMISH PASTE

Amish heirloom variety produces paste-type fruit with an oblong oxheart shape. 8 oz. tomatoes are solid with an outstandingly good, sweet flavor. Indeterminate. 85 days. 🌱🍷
#5056 (30 seeds) \$3.25

BULL'S HEART

This is a very old Russian variety bearing large, pink, oxheart-type tomatoes with excellent, sweet flavor. Strong plants produce abundantly, with some fruit growing to 2 pounds and more. Indeterminate. 87 days. 🌱🍷
#5591 (20 seeds) \$3.65

Q: What is the difference between determinate and indeterminate plants?

A: Determinate plants grow to a limited size. They grow into shorter, bushier plants that set one good load of fruit, and then they are done. Indeterminate plants grow larger, and have no natural size limits. Even as fruit are set, vines continue to grow. Plants can keep flowering continually, bearing fruit until the season ends.

WES

Large, heart-shaped red fruit has a meaty texture and outstanding rich flavor with just the right blend of sugar and acid. Tomatoes weigh about 12 ounces each and make beautiful meaty slices with very few seeds. Expect good production from these high-yielding plants. Heirloom variety. Indeterminate. 80 days. 🌱
#4437 (20 seeds) \$3.45

SHILLING GIANT

Huge, red heart-shaped tomatoes are absolutely luscious, hefty and solid, but still delicate inside with superb juicy flavor. Their shape may vary from an elongated globe to a true heart shape, but we still call this an oxheart for its wispy foliage and the fruit's meaty texture. Slice these for dinner, or when the harvest brings too many, cook them into a richly flavored sauce. Heirloom variety. Indeterminate. 80 days.
#3453 (20 seeds) \$3.55

KOSOVO

This wonderful variety came from a former U.N. worker in Kosovo who passed it down to Carolyn Male. Huge, deep-pink heart-shaped fruit has a sweet, rich flavor and is very meaty while still being juicy. Production is excellent and the tomatoes are simply beautiful, but it is the delectable and intense tomato flavor that really makes this one special. Tomatoes can grow up to 1 pound. Indeterminate. 75-80 days. 🍷
#4472 (20 seeds) \$3.55

ANNA RUSSIAN

Heirloom seed handed down to an Oregon woman along with the story that it came from a Russian immigrant. Large, juicy, pinkish-red heart-shaped tomatoes consistently weigh 1 pound or just under. Flavor is superb. Small foliage and wispy vines are typical of oxheart tomatoes, but this one is distinctive for its size and outstanding taste. Indeterminate. 70 days. 🌱🍷
#5235 (30 seeds) \$3.45

RUSSIAN 117

Huge, red heart-shaped fruit is often doubled and can weigh up to 1 pound and more. This one is well known for its excellent flavor, and is very juicy with solid meat and few seeds. It is also more productive than the typical oxheart type. Heirloom variety. Indeterminate. 90 days. 🌱
#5979 (20 seeds) \$3.55

HUNGARIAN HEART

Oxheart tomatoes have been popular for generations because of their excellently flavored, meaty, large tomatoes with very few seeds. The fruit of Hungarian Heart offer large, pink, heart-shaped tomatoes that become 1 pound and are just luscious. These plants are not shy bearers, but rather quite productive. Heirloom from Hungary. Indeterminate. 85 days. 🌱
#5836 (20 seeds) \$3.75

TRUST VFFT HYBRID

This variety has earned its reputation as one of the best greenhouse varieties in America. That is due to its heavy crops of large 8 to 10 oz. tomatoes that ripen to a uniform bright red. Firm fruits hold up well after harvest and plants are highly disease resistant, including protection against leaf molds. Indeterminate. 78 days. 🌱👤
#3102 (15 seeds) \$15.95

COBRA VFT HYBRID

A premier greenhouse tomato. Very productive plants bear 8 oz. uniformly red fruit that is resistant to splitting and perfect in appearance. Excellent flavor causes many growers to consider this the best tasting of the greenhouse-grown hybrids. Indeterminate. 70 days. 🌱
#2570 (10 seeds) \$10.95

BIG JUICY HYBRID

Big size, early maturity, sweet and juicy flesh make this greenhouse tomato one for those who want good taste. Fruit are deep oblate and average 10 to 15 ounces per fruit. Vigorous plants continue to grow and produce over a long period. VFFNTAST. Indeterminate. 67 days. 🌱👤
#4910 (15 seeds) \$10.95

BIGDENA VFFT HYBRID

Heavy yields of very flavorful, 8 to 10 oz. beautiful red tomatoes are what makes this greenhouse variety so desirable. Vigorous plants keep producing for a long season, and fruit is of the highest quality, unblemished and deep red both inside and out. Indeterminate. 77 days. 🌱
#6507 (10 seeds) \$15.95

Notice to customers: These Greenhouse tomato varieties are only for sale direct to growers and home garden greenhouse customers- not to resellers. We reserve the right to refuse sale to resellers.

BEEFSTEAK

AKER'S WEST VIRGINIA

A very pretty, large heirloom tomato, this one tastes as good as it looks. Large, vigorous plants produce big harvests of absolutely delicious red tomatoes brimming with sweet, rich flavor. Each tomato weighs about 1 pound, and is mostly smooth with very little cracking. Indeterminate. 85 days. 🌱🍅
#6050 (20 seeds) \$3.50

AUNT GINNY'S PURPLE

This heirloom beefsteak variety has flavor so excellent and rich that some folks claim it is equal to or better than Brandywine. Deep-pink tomatoes weigh 12 to 16 ounces and are mostly smooth with very little cracking. Potato-leaved plants are vigorous. Indeterminate. 75 to 85 days. 🌱🍅
#5587 (20 seeds) \$3.65

AUSSIE

This is one of those varieties to grow when you want a really big tomato to show off to your friends. This fruit is huge, at least a pound or two, and borne abundantly on large plants. Its flavor is as big as its size, bursting with a great blend of sugars and acids. Heirloom from Australia. Indeterminate. 85 days. 🌱🍅
#6033 (20 seeds) \$3.55

BEAUTY

While the name of this tomato speaks of its lovely scalloped appearance, it is the wonderful, old-fashioned tomato flavor that really sets it apart. Heavy crops of 12 to 16 oz. beefsteaks mature fairly early. Add to this outstanding productivity and ability to keep well after harvest, and you have one beautiful tomato! Indeterminate. 75 days. 🌱🍅
#5651 (20 seeds) \$3.65

BEEFMASTER VFN HYBRID

One of America's favorites for the solid, meaty, flavorful red fruit that weighs up to 2 pounds. Vigorous vines and outstanding fruit taste and quality. Indeterminate. 80 days. 🌱🍅
#5341 (30 seeds) \$3.65

BEEFSTEAK

Also known as Red Ponderosa or Crimson Cushion. Produces huge, delicious, ribbed fruit on vigorous vines. Grow in wire cages for best results. Indeterminate. 96 days. 🌱🍅
#5720 (30 seeds) \$3.25

BELIEVE IT OR NOT

What is unbelievable about this plant is an exceptional set of very large, bright-red tomatoes that can easily reach 2 pounds. This makes a wonderful sandwich tomato as well as a good all-around garden variety. Full, sweet tomato flavor and plenty of juice. Indeterminate. 85 days. 🌱🍅
#4236 (30 seeds) \$3.65

BIG ZAC™ HYBRID

This variety was bred by Minnie Zaccaria, a home gardener who crossed two heirloom tomatoes to create Big Zac. True to its name, it bears enormous 4 to 6 lb. fruit, and is a high-quality tomato in every respect—meaty and delicious as well as disease resistant. We are proud to offer this legendary heirloom-hybrid so you can enjoy its luscious flavor and maybe even win some bragging rights of your own. Indeterminate. 80 days. 🌱🍅
#3258 (15 seeds) \$3.95

BRANDYWINE

This variety is legendary for its very exceptional rich, succulent flavor. Large pink-red fruit can become 1½ pounds with creamy flesh. Vines grow quite tall and have potato-leaved foliage. An Amish heirloom since 1885. Indeterminate. 80 days. 🌱🍅
#5525 (30 seeds) \$3.35

BRANDYWINE SUDDUTH'S STRAIN

This is widely known as the original Pink Brandywine strain, obtained by Ben Quisenberry from Dorris Sudduth Hill, whose family had grown it for more than 80 years. Many gardeners consider this strain the best Brandywine with fruit that is superior. Its tomatoes are indeed special, 1 to 2 lb. pink beefsteaks with delectably complex, rich, sweet flavor. Indeterminate. 85 days. 🌱🍅
#5725 (30 seeds) \$2.95

CASPIAN PINK

Russian heirloom variety from the area between the Caspian and Black Seas. Large, pink beefsteak fruits average 10 to 12 ounces with a plentiful set and fairly early maturity for a tomato of this type. The sweet yet rich flavor is outstanding and has prompted some tasters to compare it favorably to Brandywine. Unlike Brandywine, this variety has regularly-shaped foliage. Indeterminate. 80 days. 🌱🍅
#5714 (30 seeds) \$2.95

CHAPMAN

Beautiful, deep-red fruit is quite large, weighing from 1 to 2 pounds with dense, meaty flesh and extraordinary flavor. Instead of being a shy bearer like some large beefsteaks, the plants of Chapman are prolific, yielding plenty of these huge tomatoes. Heirloom variety. Indeterminate. 80 days. 🌱🍅
#5436 (30 seeds) \$3.65

DESTER

Luscious pink beefsteaks weigh a pound or more and have a rich, sweet flavor that is unforgettable. This is a family heirloom variety brought over from Germany by Dr. Dester when he settled in Indiana. He gave seeds to an Amish woman who moved to Missouri and shared Dester seed with a farmer there who grew them for the local market.
Indeterminate. 80 days. 🌱🍅
#6072 (30 seeds) \$3.45

GERMAN GIANT

This family heirloom variety produces an abundance of deep-pink tomatoes that are just huge and brimming with luscious flavor. German Giant tomatoes are smooth in shape, 2 pounds or more, and full of that rich but sweet taste that makes a tomato scrumptious.
Indeterminate. 77 days. 🌱🍅
#5817 (30 seeds) \$3.65

GERMAN JOHNSON - REGULAR LEAF

An old-time favorite heirloom from North Carolina and Virginia features large, slightly ribbed pink-red tomatoes averaging 1 pound. They are meaty with few seeds and really excellent flavor, perfect for adding delicious taste to a sandwich or salad. Indeterminate. 80 days. 🌱🍅
#4872 (30 seeds) \$3.45

GERMAN JOHNSON - POTATO LEAF

This version of German Johnson features dark-pink, pretty beefsteak tomatoes that weigh 1 pound or more. It is their incredibly sweet flavor that really makes them special. We thought they were like eating watermelon with just a little extra acid mixed in. Indeterminate. 80 days. 🌱🍅
#4873 (30 seeds) \$3.25

GIANT BELGIUM

Developed in Ohio, this variety is distinctive for its fruit that averages 2 pounds, but has been known to grow to an enormous 5 pounds. Tomatoes are dark pink and solid meat with smooth blossom ends and a delicious sweet flavor. Some folks make wine from these very sweet tomatoes. Indeterminate. 90 days. 🌱🍅
#5520 (30 seeds) \$2.95

GOLIATH

Appropriately named, this variety does bear giant fruit on a really huge plant. Dark-pink, solid tomatoes are ribbed, have few seeds, and are very sweet with an acid component. It is not unusual for tomatoes to become a mammoth 3 pounds. Heirloom variety grown since the late 1800's. Indeterminate. 85 days. 🌱🍅
#5735 (20 seeds) \$3.10

GRANNY CANTRELL

This is a family heirloom passed on by Lettie Cantrell of Kentucky who first got the seeds from a soldier returning home from Germany during World War II. Large, meaty fruit are 1 pound or more and wonderful for fresh eating, slicing, or canning. Great flavor is sweet yet rich and has won this tomato honors in numerous taste tests. Indeterminate. 85 days. 🌱🍅
#5635 (30 seeds) \$3.35

ITALIAN SWEET

Large and luscious red beefsteak tomatoes grow on tall, potato-leaved plants. We got the stock seed for this variety from a 3 lb. tomato we bought at a farmer's market. The fruit was incredibly sweet and juicy, full of old-fashioned tomato flavor. Indeterminate. 85 days. 🌱🍅
#5611 (30 seeds) \$3.55

MAGNUM

Wonderful flavor, large size of 2 pounds or more, and perfect shape are the hallmarks of these red beefsteak tomatoes. Heirloom variety that was grown and distributed by the late Chuck Wyatt. Indeterminate. 80 days. 🌱🍅
#4422 (20 seeds) \$2.95

MARIANNA'S PEACE

These large, 1 to 2 lb. dark-pink tomatoes have luscious, full tomato flavor that features a good balance of acidity and sweetness. Vigorous vines are very productive, which is special for a potato-leaved plant. Indeterminate. 80 days. 🌱🍅
#3722 (30 seeds) \$3.25

MEXICO

Very large plants have an excellent set of huge, dark-pink fruit with outstanding taste. It is unusual to find a variety that bears such large fruit in generous numbers and maintains such superb taste. Expect steady, continuous production of tomatoes that weigh more than 1 pound throughout the growing season. This is a family heirloom. Indeterminate. 80 days. 🌱🍅
#5645 (30 seeds) \$3.25

MORTGAGE LIFTER

An old pink variety still in demand by gardeners. Well-shaped, large fruit is very meaty with few seeds; similar to Giant Belgium, but not quite as big. Folklore says variety named by a man who sold this crop to pay off a farm he was about to lose. Indeterminate. 85 days. 🌱🍅
#5673 (30 seeds) \$2.95

BEEFSTEAK

CHURCH

This heirloom tomato was a favorite of the late Chuck Wyatt and it still delivers an exceptional harvest of superior fruit. Large, 1 lb. beefsteaks are just delicious with rich, full tomato flavor and plenty of solid meat. The year we grew Church, it produced so many tomatoes that we had to turn some of them into sauce — it was scrumptious! Indeterminate. 85 days. 🍷 🍅
#5375 (15 seeds) \$3.65

BRANDYWINE, OTV

OTV Brandywine came from a natural cross between Yellow Brandywine and an unknown red tomato. "OTV" stands for "Off the Vine," an heirloom tomato newsletter once published by Carolyn Male and Craig LeHoullier. OTV Brandywine is red and sets more easily in warm weather. Fruit weighs about 1 pound and its flavor is delicious. Indeterminate. 85 days. 🍷 🍅
#5620 (20 seeds) \$3.65

BRANDYWINE (RED)

There are two tomatoes called Red Brandywine out in circulation now that are very similar to each other, with the exception of their leaf type. Both are heirloom varieties that offer red fruit with luscious, old-time, red tomato flavor. The tomatoes with ribbed shoulders are large, about 1 pound, and are produced abundantly throughout a long season. Indeterminate. 80 days.
#5062 Regular Leaf (30 seeds) \$3.35 🍷 🍅
#3642 Potato Leaf (30 seeds) \$3.35 🍷 🍅

PINK DELICIOUS HYBRID

This heirloom-style hybrid won a regional All America Selections award, based primarily on good flavor, and juicy flesh that can really impress on a sandwich, on a burger or sliced in a salad. The 11 ounce fruit have reduced cracking compared to similar varieties. Good disease package with hybrid vigor and strong productive vines. Indeterminate. 74 days. 🌿 🍅
#6892 (15 seeds) \$4.55

MRS. MAXWELL'S BIG ITALIAN

This heirloom variety was passed down from Mrs. Maxwell, who lived in Missouri and whose friend from Italy gave her the original seed. Tomatoes are 1 to 2 lb. dark-pink beefsteaks with luscious flavor and juicy, meaty texture, just right for eating fresh, canning, or even making sauce. Vigorous, potato-leaved plants are prolific and bear earlier than some other beefsteak types. Indeterminate. 80 days. 🍷 🍅
#5257 (20 seeds) \$3.35

MR. UNDERWOOD'S PINK GERMAN GIANT

Huge, 1½ to 2 lb. pink beefsteaks have an excellent, rich flavor that is sweet and delicious. In some gardens, these tomatoes routinely grow to 3 pounds. Vigorous plants offer plenty of these deeply ribbed, luscious fruits that are indeed giant. Heirloom variety. Indeterminate. 85 to 90 days. 🍷 🍅
#5505 (30 seeds) \$3.10

TIDWELL GERMAN

Large crops of 1 to 2 lb. pink, meaty beefsteak tomatoes with a sweet and exceptional flavor. The variety is a family heirloom from David Pendergrass of Tennessee, whose family has been growing this tomato since at least the 1920's. Indeterminate. 75 to 80 days. 🍷 🍅
#5895 (30 seeds) \$3.15

PATTY'S STRIPED BEEFSTEAK

You will be impressed with this bicolor tomato, which is one of the best tasting from our trial visits this year. It has heirloom eating quality, but it has been selected for better yield, larger fruit, and mouthwatering taste. You can take one step back in time to taste the heirlooms of years gone by, and then you can step into a breeder's breakthrough for greater productivity. It is simply a great selection from heirlooms. Indeterminate. 85 days.
#6888 (20 seeds) \$3.35

DELICIOUS

Huge, red fruit is smooth, nearly solid and often weighs more than 2 pounds. Excellent flavor, tiny seed cavities, and very little cracking. This is the variety that holds the world record for the largest tomato ever grown. Indeterminate. 77 days. 🍷 🍅
#3924 (30 seeds) \$3.15

PRUDEN'S PURPLE

Large, 10 to 16 oz., dark-pink fruits grow on potato-leaved vines and mature quite early for such large fruit. Delicious flavor and good production. Similar to Brandywine, but earlier. Heirloom variety. Indeterminate. 75 days. 🍷 🍅
#5450 (30 seeds) \$2.95

RICHARDSON

This heirloom tomato from the Richardson family of Tennessee is an enormous 1 to 2 lb. beefsteak tomato with wonderful flavor. The taste is delicious, sweet yet rich, and full of old-time tomato goodness. Indeterminate. 90 days. 🍷 🍅
#3107 (20 seeds) \$3.45

TODD COUNTY AMISH

This wonderful heirloom beefsteak was handed down from an Amish family living in Minnesota and has big, luscious, dark-pink tomatoes that slice into pure heaven on a plate. The flavor is rich yet sweet and just lovely. Indeterminate. 75 to 80 days. 🍷 🍅
#3037 (20 seeds) \$3.15

STUMP OF THE WORLD

This variety was part of the Ben Quisenberry Collection, which also contributed the variety Brandywine. Stump of the World is a bit smaller and more productive than Brandywine, but, like Brandywine, offers outstandingly rich, complex flavor. Heirloom variety. Indeterminate. 80 days. 🍷 🍅
#5511 (30 seeds) \$3.25

BRANDYWINE LIAM'S

A selection that occurred from the Brandywine cross that produced Lucky Cross, this one grows regular leaves and produces 1 to 2 lb. pink beefsteak tomatoes with the outstanding flavor for which Brandywines are famous. Silky smooth texture and better-than-average production make this heirloom stand out as a great choice for your garden. Indeterminate. 80 days. 🍷 🍅
#5397 (20 seeds) \$3.55

1884

Seed of this heirloom variety was supposedly discovered in a pile of debris after the Great Flood of 1884. It has survived to this day because of the huge, superbly flavored fruit it produces in generous numbers. Dark-pink tomatoes are at least 1 pound, and usually more toward 2 pounds. Indeterminate. 85 days. 🍷 🍅
#5385 (20 seeds) \$3.45

ROYAL HILLBILLY

We are pleased to offer this favorite of the late Darrell Merrell, who selected it from some variations of Hillbilly tomato. This one has a beautiful deep-pink color with a purple tinge and a flavor that Darrell Merrell called exquisite. Expect 1 lb. beefsteak tomatoes brimming with juice and flavor that is a complex blend of sweet and tart. Indeterminate. 85 days. 🍷 🍅
#3106 (20 seeds) \$3.55

GRANDMA MARY'S PASTE

This family heirloom variety has large, pointed, red paste tomatoes that are meaty and flavorful, just right for cooking into sauce or chopping up for fresh use. Expect abundant harvests, as these plants are prolific. Indeterminate. 70 days. 🌱🍅
#6099 (20 seeds) \$2.95

HUNGARIAN ITALIAN

Expect heavy yields of these top-quality pear-shaped paste tomatoes for making into sauce or other cooked tomato dishes. This is the only potato-leaved paste variety that we know of, and this foliage contributes to healthy plants that keep bearing right until frost. Indeterminate. 80 days. 🌱🍅
#6082 (20 seeds) \$2.95

ITALIAN RED PEAR

A very special pear-type tomato, this one is large and somewhat ribbed with thin skin and a delicious, slightly sweet flavor. Delicate and flavorful enough to eat fresh, but also perfect for cooking into a fragrant tomato sauce. Tomatoes can become about 6 ounces or more. Indeterminate. 80 days. 🌱🍅
#3253 (30 seeds) \$3.45

JERSEY DEVIL

This prolific variety has 4 to 6 inch long tapered red fruits shaped like banana peppers. The tomatoes are very meaty and sweet with few seeds — great for sauces, salsas, or even eating fresh. Color is a gorgeous bright red and yield is impressive. Indeterminate. 80 days. 🌱🍅
#5939 (30 seeds) \$3.35

LA ROMA III VFNA HYBRID

One of the best "Italian-type" tomatoes known for its outstanding vigor and uniformity has become even better. Big yields of 5 to 8 oz. fruit are produced on large, vigorous plants with excellent disease resistance. Expect larger fruit and healthier plants than with the standard Roma. Determinate. 76 days. 🌱🍅
#5183 (30 seeds) \$3.55

MAMA LEONE

This excellent, large, pointed plum tomato comes from Italy via a family who immigrated to New York. Expect a large harvest of these 5 to 6 oz. meaty, bright-red tomatoes with very few seeds. These are the perfect tomatoes to turn into a simmering pot of sauce full of rich tomato goodness. Indeterminate. 75 days. 🌱🍅
#5542 (30 seeds) \$3.55

MARGHERITA VF HYBRID

This tomato was named after Pizza Margherita, the classic summertime pie topped with mozzarella, tomato and fresh basil. The good news is these elongated 5 to 6 oz. paste tomatoes are also great for roasting or for tossing into pasta or sandwiches. Determinate. 72 days. 🌱🍅
#6003 (20 seeds) \$3.75

PLUM REGAL VFF HYBRID

Large yields of blocky 4 oz. plum tomatoes with an outstanding disease package, which includes resistance to Tomato Spotted Wilt Virus, late blight, and early blight as well. Beautiful deep-red fruit are resistant to cracking and have good flavor, solid texture, and few seeds. Determinate. 72 days. 🌱🍅
#5345 (10 seeds) \$3.10

SWEET GOLDEN ROMA HYBRID

Sweet Golden Roma caught our attention in trials, not just for the beautiful bright yellow color, but also for the fine eating quality. It is really tasty. It is also very productive. It looks beautiful in a salad, or on a sandwich. Can it, or turn it into a yellow tomato paste. Fruit are 4 to 5 ounces. Resistant to F2 and V. Determinate. 78 days. 🌱🍅
#6881 (20 seeds) \$3.75

BANANA LEGS

Banana Legs tomatoes are low in acid and have a meaty texture. A great tomato for making sauces, or cut up for salads. Fruit are up to 4 inches long and 1 ½ inches in diameter. As fruit mature to a bright yellow color, they occasionally appear to have light colored stripes, as some believe it is related to Speckled Roman tomato. Compact determinate. 75 days. 🍅
#2941 (20 seeds) \$3.25

PRINCIPE BORGHESE

This is the variety that Italians have long favored for drying. Small, plum-shaped tomatoes are only about 1½ inches long and meaty with very little juice and few seeds, lending them to the traditional sun drying. Small plants become extremely loaded with fruit. Determinate. 75 days. 🌱

#5282 (30 seeds) \$2.95

ROCKY

This is an incredibly large paste tomato, with each meaty fruit growing to 6 inches long and weighing between 8 and 12 ounces. They have a very well-balanced, full tomato flavor and are perfect for cooking into sauce or eating fresh. Heirloom variety. Indeterminate. 75 days. 🌱

#5070 (20 seeds) \$3.45

SPECKLED ROMAN

Truly special paste tomato is about 5 inches long and red with jagged golden stripes. Meaty, 6 to 8 oz. tomatoes are great for processing into sauce and paste, but are so flavorful that you will also want to enjoy some fresh in salads. Vigorous plants produce heavily. Indeterminate. 85 days. 🌱

#5348 (30 seeds) \$3.95

ROMA VF

One of the most popular varieties for paste, sauces and canning. Compact vines yield large harvests of 3 inch long, bright-red fruit that is pear-shaped. Thick walled and solid with few seeds and good flavor. Determinate. 78 days. 🌱

#5168 (30 seeds) \$3.45

SAN MARZANO

Excellent for canning, tomato paste, or puree. Rectangular pear-shaped, 3½ inch long fruit with mild flavor and meaty texture. Bright red color. Indeterminate. 80 days. 🌱

#5380 (30 seeds) \$3.15

CABO HYBRID

Indeterminate growth habit and strong roots allow Cabo to keep producing over an extended period. The saladette shaped fruit weigh 4 ounces, and are flavorful and prolific. 70 days. 🌱

#6562 (30 seeds) \$2.95

SUPER ITALIAN PASTE

Paste tomatoes shaped like banana peppers are about 6 inches long, deep orange-red and sweet with very little juice and few seeds. These tomatoes are all meat and make great paste and sauce. Heirloom variety. Indeterminate. 73 days. 🌱

#5013 (30 seeds) \$3.85

YAQUI VFFNA HYBRID

This impressive tomato variety features an extremely vigorous, compact plant that sets a tremendous amount of blocky plum tomatoes. Extra-large fruit is perfect for canning or for cooking into delicious sauce or paste. While we've grown a lot of paste tomatoes, this one stands out for both the quality and quantity of its fruit. You just won't believe how hard this little tomato plant works. Widely adaptable plants will grow just about anywhere. Determinate. 75 days. 🌱

#5568 (20 seeds) \$3.65

ANDIAMO HYBRID

This early maturing tomato is perfect for eating fresh, making salsa, paste and sauces. A real San Marzano type hybrid, with meaty red fruit and sweet flavor. The 5 inch fruit weigh about 6 ounces and really load up the fruit on the strong indeterminate vines. 65 days. 🌱

#6893 (20 seeds) \$2.95

BRAVEHEART HYBRID

Perfect little 1 oz. red cherries grow on medium-sized plants that are easier to manage than the very tall plants of some cherry tomatoes. Sweet, juicy fruit are thin-skinned yet crack-resistant with a delicious, rich flavor. Expect abundant and early harvests to extend all the way to the end of the growing season. Indeterminate. 60 days. 🌱🍅
#6372 (30 seeds) \$4.25

CEYLON

A tomato like you've probably never seen before, these small, ruffled, red fruit are unique in appearance, but distinctive in flavor also. Their taste is rich and assertive, slightly sweet with a bit of zing added in. Only about 2 inches across, these flattened scalloped tomatoes appear in great profusion. Indeterminate. 80 days. 🍅🌱
#3163 (30 seeds) \$3.35

TUMBLER HYBRID

This variety is superior for planting in hanging baskets and containers. Graceful cascading vines reach 12 to 18 inches in length and produce up to 6 pounds of deliciously sweet bite-size fruit. Attractive determinate plants produce fruit quickly, making this an idea choice for those with small gardening spaces. 55 days. 🍅
#6873 (20 seeds) \$3.95

GARDENER'S DELIGHT

This small-fruited variety, also known as Sugar Lump, rates high with gardeners for its big yields of sugar-sweet tomatoes. Crack resistant fruit is ¾ to 1½ inches across and arranged in clusters of 6 to 12. Indeterminate. 65 days. 🍅🌱
#4244 (30 seeds) \$3.25

GARNET

These great-tasting cherry tomatoes offer a unique new color that is a mix of brown and red with golden highlights. They are not just deep red nor are they black, but a rich, burnished shade of bronze. As pretty as they are to look at, what makes them truly special is their taste — sweet with a good measure of acid and a richness that fills your mouth with fabulous, earthy flavor. Vigorous, tall vines put on a very heavy set of these 1 inch, crack-resistant fruits. Indeterminate. 75 days. 🍅🌱
#6430 (20 seeds) \$3.45

GRAPE TOMATO

Long, grape-like clusters of brilliant red, elongated cherry tomatoes have earned this variety its name. Very sweet, complex flavor is delicious and has made these tomatoes a favorite of people everywhere. Vigorous vines are very productive, but none of these delectable little morsels will go to waste. Their taste is addictive! Indeterminate. 60 days. 🍅🌱🍷
#6721 (20 seeds) \$4.25

HUSKY CHERRY RED HYBRID

Big yields of flavorful, 1 inch cherry tomatoes are borne in large clusters on plants that become only 50 inches tall, yet continue to produce throughout an entire season. This is really a great-tasting cherry, sweet yet nicely balanced with acid. Dwarf indeterminate. 65 days. 🌱🍅
#6759 (20 seeds) \$3.45

JOLLY HYBRID

Abundant clusters of 1½ oz. pink fruit that is delicious, juicy, and sweet. Somewhat "peach" or oval shaped with a distinctive tip on the blossom end. Perfect as sweet additions to salads. Indeterminate. 70 to 75 days. 🌱🍅
#6963 (20 seeds) \$4.45

MICRO-TOM HYBRID

"World's smallest tomato variety," developed by Drs. J.W. Scott and B.K. Harbaugh at the University of Florida. Grows 5 to 8 inches tall and bears miniature tomatoes about the size of salad croutons. Plants are truly diminutive and wonderful for patios, windowsills or garden borders. Determinate. 85 days from seed. 🌱🍅
#6536 (20 seeds) \$3.95

PATIO F HYBRID

This dwarf variety is one of America's most popular varieties ever for growing on patios, decks, courtyards, or wherever garden space is limited. Plants only become about 2 feet tall, but produce large harvests of bright-red, 3 to 4 oz. flavorful tomatoes. Determinate. 70 days. 🌱🍅
#6334 (30 seeds) \$4.45

RAPUNZEL HYBRID

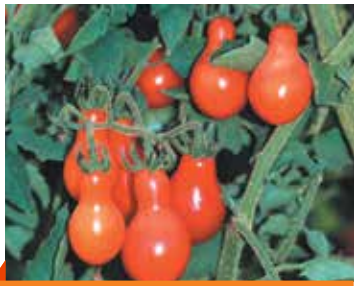

Just like its fairy tale namesake, Rapunzel puts out long, cascading trusses, each with up to 40 sweet, bright red cherry tomatoes that keep coming all summer long. The long stems are quite impressive when picked fully loaded with tomatoes, which can be enjoyed individually as they ripen. Indeterminate. 70 days. 🌱
#6545 (15 seeds) \$4.95

GLITTER HYBRID

Glitter was developed by the same breeder that created Juliet tomato. However the fruit color is a brilliant shimmering orange. Attractive trusses cascade from the plant and the vigorous indeterminate vines boast excellent productivity. With an average brix of 9% you can expect to enjoy natural sweetness that elevates this tomato to the top end of grape and cherry tomatoes. The one ounce fruit will likely be consumed before you have a chance to take them inside the house. Vines reach 5 to 6 feet and require staking. 70 days. 🌱
#6896 (15 seeds) \$3.25

SMALL-FRUITED

RED PEAR

Miniature pear-shaped tomatoes are 1¼ to 2 inches long and bright red. Flavorful and sweet, they are great for salads and as a companion to Yellow Pear. Indeterminate. 78 days. 🌱🍷🍷
#5320 (30 seeds) \$3.35

RED ROBIN

This popular dwarf variety of cherry tomato thrives in relatively small pots or hanging baskets set on sunny windowsills or outdoor patios. Plants only become 8 to 12 inches tall and bear masses of 1¼ inch full-flavored tomatoes with a touch of sweetness. It is a very rewarding harvest from a small tomato plant that can be grown in an 8-inch pot. Determinate. 55 days. 🌱🍷🍷
#6010 (30 seeds) \$3.55

RIESENTRAUBE

The name of this German heirloom variety means "giant bunch of grapes." Bouquet-type blossoms turn into bunches of 20 to 40 small, oval, red fruit with pointed ends. Flavor is excellent, offering taste found in larger tomatoes. Indeterminate. 80 days. 🌱🍷🍷
#6761 (30 seeds) \$3.25

ROSALITA

This pink grape tomato is the size and shape of a red grape tomato. Long clusters of small, oval fruit are deep rosy pink and abundantly produced on tall, vigorous plants. These tomatoes are as sweet as rosé wine, and a delightful choice for anyone who likes grape tomatoes. Indeterminate. 60 days. 🌱🍷🍷
#5815 (20 seeds) \$3.45

SPRITE

If you love grape tomatoes but don't have the space or supports to grow tall plants, Sprite offers a wonderful alternative. There is no sacrifice in fruit quality, size, productivity, or flavor. The small red oval grape tomatoes are borne in amazingly large numbers on compact plants. Their taste is refreshingly sweet and skins are thin and crisp, just like the original Grape tomatoes. Determinate. 60 days. 🌱🍷🍷
#5025 (30 seeds) \$3.45

SUGARY HYBRID

ALL AMERICA SELECTIONS AWARD WINNER. Very sweet, cherry-sized tomatoes are oval shaped with a pointed blossom end and a beautiful reddish-pink color. Fruit is produced in clusters on high-yielding semi-indeterminate vines, which means that plants stay more compact but continue to produce over a long season. Indeterminate. 60 days. 🌱🍷🍷
#3712 (20 seeds) \$3.95

SUPER SWEET 100 VF HYBRID

This is a home gardener favorite that has more disease resistance than Sweet 100 while keeping the same fabulous taste. Small, round 1 oz. cherry tomatoes are deliciously sweet with a high Vitamin C content. Long clusters of fruit load up on tall, vigorous plants and continue to bear until frost. Indeterminate. 65 days. 🌱🍷🍷
#6519 (30 seeds) \$3.95

SWEET APERITIF

With origins in England, this bright-red cherry tomato has gained popularity quickly because of its amazing taste and a 13.5 Brix (sugar measurement) rating that is exceptionally high. Even so, the flavor is well balanced with acid, so that fruit has a refreshingly tangy taste. Vigorous plants become completely loaded with bite-sized, ½ oz. tomatoes that will certainly be favorites for adding to salads or eating outdoors right off the vine. Indeterminate. 80 days. 🌱🍷🍷
#3215 (20 seeds) \$3.55

SWEET HEARTS FT HYBRID

This is one of the most popular hybrid grape tomatoes on the market today. Brilliantly red tomatoes, which are packed with sweet, irresistibly delicious flavor. The vigorous plants bear early and impressive yields with continuous sets of big clusters of fruit right up to the top of the plant. As a bonus, the tomatoes are crack resistant and have a good shelf life after harvest. High Brix (sugar) fruit weigh about ¼ oz. each. Indeterminate. 60 days. 🌱🍷🍷
#5711 (10 seeds) \$7.95

SWEET MILLION FNT HYBRID

An improved version of Sweet 100, this variety offers the same wonderful flavor and yields, but much better disease resistance and tolerance to cracking. Incredibly long clusters of 1 inch dark-red fruit grow on tall, vigorous plants. Indeterminate. 65 days. 🌱🍷🍷
#6503 (30 seeds) \$3.85

TUMBLING TOM YELLOW HYBRID

This yellow version of Tumbling Tom is superior for hanging baskets, containers and small space gardens. The graceful cascading vines reach up to 18 inches, and produce an abundance of 1 to 2 ounce yellow tomatoes, that are sweet and delicious. Plants are only 8 inches in width, so you can put them fairly close together. Resistant to fusarium, verticillium and nematodes. Determinate. 70 days. 🌱🍷🍷
#6558 (20 seeds) \$3.65

BRANDYSWEET PLUM

When Brandywine is part of a tomato's lineage, you can bet that its flavor will be outstanding. This variety that has Brandywine crossed with a cherry tomato is a winning combination with delicious, sweet taste. Slightly elongated pink cherries appear in abundance on potato-leaved plants. Indeterminate. 75 days.
#2752 (30 seeds) \$3.95

SWEET PEA CURRANT

This is one of the smallest and most uniform red currant tomatoes we've seen, and it has an excellent intensely rich but sweet flavor. Plants bear an abundance of these tiny fruit, arranged so closely on the trusses that they resemble beads on a necklace or peas in a pod. Indeterminate. 75 days. 🌱🍷
#5362 (30 seeds) \$3.45

SWEET TREATS FFT HYBRID

Large-fruited cherry tomato is deep pink with amazingly good, rich, sweet flavor and crisp texture. Highly productive plants grow long clusters of tomatoes that are crack resistant yet still very juicy. Great disease resistance and beautiful pink color make this variety a very special newcomer. Indeterminate. 70 days. 🌱🍷
#6353 (10 seeds) \$5.95

RED JELLY BEAN HYBRID

This early maturing bite-sized tomato has high sugars and produces heavy clusters of up to 25 fruit per cluster. Plants are indeterminate, and have a good disease resistance package. Better tolerance to cracking than others in this class. 68 days. 🌱🍷
#4399 (20 seeds) \$3.45

SWEET CHÉRI

This early maturing plant produces high yields of small red cherry tomatoes. They are very sweet and flavorful and are good for salads and snacks. The plant will require support, either from staking or cages. Indeterminate. 65 days. 🍷
#6890 (20 seeds) \$3.25

RED CHERRY LARGE

Produces one ounce cherry size fruit with excellent flavor. Great for salads or snacks. Fruit grow in clusters on vigorous indeterminate vines. Stake for best results. 75 days. 🍷
#6728 (30 seeds) \$2.95

PRINCESS YUM YUM HYBRID

This tomato demands recognition for a flavor worthy of the royal family. She has the highest sugar of all our trial garden tomatoes. She resists fusarium, powdery mildew, tomato mosaic virus, tomato yellow leaf curl virus, and LATE BLIGHT! She stands apart with her striking profile of long trailing brilliant red fruit clusters. Invite the Princess into your garden and you won't be disappointed. 78 days. 🌱🍷
#6868 (10 seeds) \$4.95

WILD CHERRY

Tiny cherry tomatoes, only about 1/2 inch diameter, are packed with an amazingly large tomato flavor. They burst with intense, rich tomato flavor perfectly balanced with sweetness. Bright, deep-red fruit load up on long trusses and are just right for snacking or salads. Indeterminate. 60 days. 🌱🍷🍷
#5759 (30 seeds) \$3.45

EGG YOLK

These beautiful yellow cherry tomatoes taste sweet and citrusy, but not acidic. Great for fresh eating or for salads. The 1 inch fruit weigh about an ounce with some cracking tolerance. This variety tends to keep producing even in the heat. The 4 to 5 foot plants are indeterminate. 70 days. 🍷
#6887 (20 seeds) \$3.25

CHERRY PRINCESS SWEETIE HYBRID

You will love these delicious red cherry treats, not just because they taste so yummy, but also because this variety is early and has tremendous yield potential. The 3/4 ounce fruit are bite-size, and it is hard not to eat them right off the vine. Indeterminate. 57 days. 🌱🍷
#6040 (20 seeds) \$2.95

CHERRY PRINCESS SWEET SURPRISE HYBRID

For those who want the Cherry Princess, but like her with a more complex flavor. Just order up Sweet Surprise. She has all the natural sugar and goodness of Cherry Princess Sweetie but with a different taste. Fruit are 3/4 to 1/3 of an ounce. Indeterminate. 60 days. 🌱🍷
#5872 (20 seeds) \$2.95

ELFIN

This open-pollinated version of Grape Tomato has the same wonderful sweet flavor, size, and shape as the original Grape, but has the advantage of shorter plants. Elfin's clusters of delicious, uniquely-flavored grape-shaped cherry tomatoes have a sweetness that is unmistakably 'grape.' Determinate. 60 days.
#6249 (20 seeds) \$3.95

UNICORN HYBRID

This cherry tomato is one of the best we have trialed. Fruit have good sugar/acid balance, and some cracking tolerance. Resistant to TMV, leaf mold, fusarium wilt, and intermediate resistance to root knot nematode. Great in salads or fresh off the vine. Be the first to have a Unicorn. Indeterminate. 76 days. 🌱🍷
#6894 (15 seeds) \$3.45

SMALL-FRUITED

SWEET 100 HYBRID

Huge, multiple-branched clusters of ½ inch very sweet fruit with high vitamin C content. Mouth-watering flavor. Vigorous vines bear abundantly until frost and need staking for best results. Indeterminate. 65 days. 🌿 🍷
#6490 (20 seeds) \$3.45

PORTER

Developed by a Texas seedsman. Pink fruited variety produces well in high temperatures. Egg-shaped fruit weighs about 1 oz. and has delicious taste for canning, juice or fresh eating. Indeterminate. 78 days.
#3139 (30 seeds) \$3.95

RED PLUM

Large harvests of small plum shaped fruit, perfect for salads. Indeterminate. 78 days.
#5042 (30 seeds) \$3.95

GOLD NUGGET

One of the earliest tomatoes for your garden is also one of the best tasting – mild and sweet with good texture. Golden Nugget offers one inch fruit that are borne on compact plants (20 to 26 inches) and have a concentrated fruit set. Fruit weight 1/2 to 3/4 of an ounce. Developed by James Baggett at Oregon State University, for cooler growing conditions. Determinate. 55 days. 🍷
#6879 (20 seeds) \$2.89

GOLDEN GEM HYBRID

Stunning golden color and a sugar content of 10% are what make this hybrid from China outstanding. Small cherry tomatoes are round to globe-shaped and crack-resistant, an important trait for cherry tomatoes. Fruit appears on tall plants capable of producing enormous harvests with up to 50 fruit per cluster. These tomatoes have a very special taste that is sweet, yet rich and fruity. Indeterminate. 65 days. 🌿
#6818 (20 seeds) \$4.65

TOMMY TOE

Round to slightly elongated-shaped cherry tomato is bright red and prolific with excellent flavor and plenty of juice. This variety practically grows itself, resisting most diseases and setting loads of fruit. Great for salads and can even be used for juice. Australian heirloom. Indeterminate. 70 days. 🍷
#5710 (30 seeds) \$3.35

FIRE FLY HYBRID

This little yellow cherry tomato is bigger than a currant tomato but smaller than most grape tomatoes 1/2 ounce. The fruit are super sweet and pale yellow. AAS Winner! Up to 500 fruits per plant. Indeterminate. 78 days. 🌿
#6870 (20 seeds) \$3.45

YELLOW CURRANT

A special South American species of tomato that bears long, grape-like clusters of tiny 1/3 inch yellow cherry tomatoes. They are sweet, yet have an intense tomato flavor. These tiny tomatoes have become favorites for salads, garnishes or just eating straight off the vine. Indeterminate. 70 days.
#6166 (30 seeds) \$3.95

TOTEM

Perfect for container growing, this dwarf tomato plant only becomes 10 to 12 inches tall, but produces lots of flavorful, small red tomatoes. Dark green, quilted leaves are attractive and fruit is abundant, making this a great variety for indoor gardening. Needs no staking. Determinate. 70 days.
#5804 (30 seeds) \$3.95

JULIET HYBRID

ALL-AMERICA SELECTIONS WINNER. Elongated cherry tomatoes grow in grape-like clusters and really load up on vigorous vines. The 1 ounce fruit has red, glossy skin and wonderful sweet flavor. As a bonus, the fruit is crack-resistant and holds on the vine better than most cherries. Expect high yields from plants that are tolerant to late blight and leaf spot. This variety is considered to be a 'big sister' variety of Santa. Indeterminate. 60 days. 🌿 🍷
#6916 (20 seeds) \$4.25

See pages
37 - 40
 for large quantity pricing!

YELLOW PING PONG

A yellow-fruited version of Pink Ping Pong, this one bears clusters of 2-inch golden-yellow fruit with about the same ping-pong size and shape. This variety is also a treat to eat, with deliciously sweet, juicy tomatoes that have a refreshing lemon-like finish to their flavor. Vigorous plants bear a great abundance of these very pretty golden fruits. Indeterminate. 75 days.
#5116 (30 seeds) \$3.95

TINY TIM

Just perfect for container growing or smaller gardens. Plants grow no more than 18 inches tall and can be grown in a 6-inch pot. Round, bright red cherry tomatoes are about 3/4 inch in diameter. Determinate. 60 days.
#6630 (30 seeds) \$3.95

GREEN GRAPE

Very short compact plants yield 3/4 to 1 inch fruit that is yellow-green when ripe and easy to harvest. Full of flavor, sweet and juicy, these cherry type tomatoes are a real taste treat. Prolific variety is sure to be a favorite in the garden. Determinate. 70 days. 🍷
#5251 (30 seeds) \$3.95

SUGAR BABY

Extremely early harvests of super-sweet tomatoes on compact plants make this variety a wonderful addition to anyone's garden. These 1 to 2 oz. tomatoes will likely be among the first of the season, and their sweet, delicious flavor is sure to be a delight. Plants are small, but very productive. Determinate. 54 days. 🍷
#6017 (30 seeds) \$3.95

SMALL-FRUITED CONTINUED

EARLY DOLL HYBRID

Early Doll is early maturing and has beauty that shines in several ways – excellent flavor, good production, great in salads, in a sandwich, and in your favorite salsa. 5 ounce fruit. Determinate. 55 to 58 days. 🌱🍅
#2945 (20 seeds) \$3.15

FANTASTICO HYBRID

This All America winner is a patio type tomato that produces delicious and sweet crack-resistant fruit in containers or hanging baskets. They are easy to pick, with high yield potential – up to 12 pounds of fruit per plant. Plants are 12 to 15 inches tall and spreading in the open garden. A baby plum tomato with ½ ounce fruit. Late blight tolerant. Determinate. 50 days. 🌱🍅
#2947 (10 seeds) \$3.75

BEAUTY KING

This wonderful large bicolor tomato is yellow with bold red stripes on the exterior and yellow with lovely red streaking inside. Very meaty fruit are usually about 1 pound, but can vary in size. Plants bear large harvests of these tomatoes with sweet, rich and delicious flavor that is quite outstanding. Brad Gates of Wild Boar Farms developed this variety by crossing Big Rainbow with Green Zebra. Indeterminate. 80 days. 🌱🍅
#5490 (30 seeds) \$3.45

BIG ZEBRA

A tomato that is red and green-striped is so unusual that it's safe to say that you've probably never seen anything like it before. Although deep red and green outside, its interior is green with pink extending up into the middle. The appearance is so striking and different that we couldn't help noticing it growing in a patch of Copia tomatoes. Fruit is medium to large with a mild, sweet flavor. Indeterminate. 85 days. 🌱🍅
#5213 (20 seeds) \$3.45

GOLD MEDAL

From the seed of the late tomato collector Ben Quisenberry, this classic heirloom variety has gorgeous 1 to 1½ lb. yellow and red striped fruit. Winner of many modern taste tests, it was listed in Quisenberry's 1976 seed list as "the sweetest tomato you ever tasted and a gourmet's joy when sliced." Indeterminate. 80 days. 🌱🍅
#3140 (30 seeds) \$3.45

COPIA

These very beautiful tomatoes are a stunning combination of fine-lined golden yellow and red stripes. While visually exciting, the real treat comes when you cut them open. Their gold flesh is streaked with red and is very juicy, flavorful, and sweet. A stabilized cross between Green Zebra and Marvel Stripe, these tomatoes weigh about 1 pound each. Indeterminate. 85 days. 🌱🍅
#4675 (20 seeds) \$3.25

MARVEL STRIPE

This heirloom variety has become one of gardeners' favorites for its beauty, size, and taste. Large yellow-orange fruit are streaked with ruby red and have a sweet, fruity taste that is absolutely delicious. Tomatoes weigh about 1 pound, although they often become 2 pounds or more. Indeterminate. 85 days. 🌱🍅
#6144 (30 seeds) \$3.25

DAGMA'S PERFECTION

This beautiful bi-colored heirloom tomato is distinctive among other yellow and red varieties because of its pastel coloring. It matures to a soft shade of pale yellow painted with subtle striping of light red. The 12 oz., slightly flattened fruit has delicious, rich flavor with nuances of tropical fruit. Indeterminate. 72 days. 🌱🍅
#5080 (30 seeds) \$3.65

HILLBILLY

Huge bicolor tomato is yellow-orange with red streaking. Fruits have sweet and fruity flavor and usually weigh from 1 to 2 pounds. Heirloom variety from West Virginia. Indeterminate. 85 days. 🌱🍅
#4998 (30 seeds) \$3.95

VIRGINIA SWEETS

This heirloom variety is simply one of the best tasting, best producing gold-red bicolors we have ever grown. On top of that, the tomatoes are stunningly beautiful and enormous, weighing at least 1 pound each. Golden yellow beefsteaks are colored with red stripes that turn into a ruby blush on top of the golden fruit. Flavor is sweet and rich, and harvests are abundant. Indeterminate. 80 days. 🌱🍅
#5425 (30 seeds) \$3.65

MR. STRIPEY (TIGERELLA)

Huge crops of red fruits with clearly defined yellow-orange stripes. 1-1/2 to 2 inch tomatoes have a rich, tangy flavor and are a beautiful novelty for adding whole or cutting into salads. Indeterminate. 56 days. 🌱🍅
#4735 (30 seeds) \$2.95

ORANGE RUSSIAN 117

This is the first bicolor oxheart tomato we have seen, and it exhibits the best qualities of both types. Tomatoes weigh 8 ozs. or more and are heart-shaped with smooth golden flesh marbled inside with streaks of red. They are delicious and sweet, somewhat fruity in flavor, and are meaty with very few seeds. 85 days.
#5539 (20 seeds) \$3.95

OAXACAN JEWEL

Beautiful bicolor fruit is golden yellow with ruby-colored streaking, earning this variety its name. Fruit size is somewhat variable from 6 ounces up to 1 pound, but this is one of the most strikingly beautiful bicolors we have seen. Rich, fruity taste is refreshing and almost melon-like, but also nicely accentuated with acid. Indeterminate. 80 days. 🌱🍷
#6064 (30 seeds) \$3.85

ISIS CANDY

This delightful variety produces yellow-gold cherry tomatoes with red marbling, which varies from just a red blush to extensive streaking. What is consistent, however, is the sweet taste that is also rich and fruity, and very delicious. Tomatoes are about ¾ inch across. Very productive plants bear throughout a long season. Indeterminate. 67 days. 🌱🍷
#5860 (30 seeds) \$3.35

MAMMOTH GERMAN GOLD

This variety is well named for its huge 2 lb. beefsteaks that are deep golden with red streaking. The coloration is distinctive from other bicolor tomatoes in that this variety is almost orange with more extensive red streaking, making for a very colorful fruit with excellent flavor. Heirloom variety. Indeterminate. 85 days. 🌱🍷
#6802 (30 seeds) \$3.45

SOLAR FLARE

Meaty red-fleshed beefsteak fruit are mildly sweet, and deliciously full flavored. Beautiful golden stripes are intermingled with deep red tones, providing a striking color on these 6 to 10 ounce fruit. Plants are vigorous and productive, with indeterminate vines. 75 days. 🍷
#6886 (20 seeds) \$3.25

PINK BERKELEY TIE-DYE

Gorgeous port wine-colored beefsteak has beautiful green stripes and deep, brick-red interior flesh. The fruit is 8 to 12 ounces with an exceptional flavor that is well balanced and rich. Fairly compact plants are vigorous, early to bear, and well adapted to almost all climates. We think this variety is likely to become a classic specialty tomato with both gardeners and chefs alike. Bred by Brad Gates of Wild Boar Farms. Indeterminate. 65-70 days. 🌱🍷
#4525 (30 seeds) \$3.75

SKYREACHER

Small, round, slicing tomatoes have orange stripes on a brick-red exterior. The 4 to 6 oz. crack-resistant fruit set in abundance and are blemish-free with a great, sweet flavor. Sturdy plants have a strong branching habit and perform well in a variety of conditions. Bred by Tom Wagner, a private tomato breeder who brought us Green Zebra, Green Grape, and many others. Indeterminate. 79 days. 🌱🍷
#5426 (30 seeds) \$3.75

PINEAPPLE TOMATO

This heirloom tomato is a standout in everyone's garden. Bicolored red and yellow fruit grows very large, up to 2 pounds, and is streaked with red both inside and out. The flavor is wonderful, rich, fruity and sweet. Strong vines bear an abundant crop. Indeterminate. 85 days. 🌱🍷
#5844 (30 seeds) \$3.15

GREEN BERKELEY TIE-DYE

Vivid shades of red, green, and amber come together in a kaleidoscope pattern on this amazing tomato. Red and green stripes color the outside while the interior is chartreuse marbled throughout with ruby red. Beautiful 8 to 12 oz. tomatoes have a tangy yet delicious flavor and grow on vigorous, productive plants well suited to most climates. Bred by Brad Gates of Wild Boar Farms. Indeterminate. 75 days. 🌱
#4625 (20 seeds) \$3.45

ANANAS NOIR

The name of this tomato is French for black pineapple because it arose out of a planting of Pineapple Tomato in a Belgian garden. Its fruit is the same 1 to 1½ lb. size as the Pineapple tomato, but the exterior is dark purple and green with pink-red splotches and a touch of yellow, while the inside is green streaked with pink. Sweet yet rich and delicious. Indeterminate. 80 days. 🌱🍷
#5617 (30 seeds) \$3.25

NORTHERN LIGHTS

What really sets this variety apart from other bicolor tomatoes is its smaller size of 8 to 12 ozs., making it a great choice for gardeners who want a more modest sized bicolor fruit. It has the same luscious sweet flavor and beautiful golden yellow exterior with a red blush on the blossom end that radiates to the center. Indeterminate. 75 days.
#6038 (30 seeds) \$3.95

OLD GERMAN

A bicolor variety featuring large yellow fruit with streaks of red throughout starting on the blossom end. Fruit often weighs more than 1 lb. and has luscious, sweet flavor. Heirloom from the Mennonites. Indeterminate. 75 days.
#5176 (30 seeds) \$3.95

BIG RAINBOW

Heirloom. Unique bicolor beefsteak tomato weighs 2 pounds and more. Ripe fruit has light yellow shoulders atop a golden-orange tomato with ruby red radiating from the blossom end. Some red streaks appear through the meaty flesh. Sweet flavor. Indeterminate. 90-100 days. 🌱🍷
#5562 (30 seeds) \$3.35

BLACK

Compact plants bear plenty of wonderfully rich, dark mahogany-brown tomatoes that weigh about 4 ounces each. Black tomatoes have a delicious blend of sugar and acid, and a distinctive, complex flavor. Some folks say this variety is one of the best tasting of the black tomatoes. Russian heirloom. Indeterminate. 75 days. 🌱🍅
#5785 (30 seeds) \$3.45

BLACK CHERRY

This is the first truly black cherry tomato, and our own original variety. It is not a plum, but a perfectly round cherry with classic black tomato flavor – sweet yet rich and complex. Fruit picks clean from the stem and is produced in abundance on vigorous, tall plants. These cherries are irresistibly delicious and a unique addition to the color spectrum of cherry tomatoes now available. Indeterminate. 65 days. 🌱🍅
#6148 (30 seeds) \$3.45

BLACK FROM TULA

Deep reddish-brown beefsteak tomato has a rich, sweet flavor that is delicious. Fruit is smooth in texture and weighs from 8 to 12 ounces. This outstanding variety is very productive and seems to set well even when weather turns hot. Russian heirloom. Indeterminate. 75-80 days. 🌱🍅
#6325 (30 seeds) \$3.25

BLACK KRIM

Dark brown-red tomatoes are large, 10 to 12 ounces, and very richly flavored and sweet, with just a hint of saltiness. Color is darker in hot weather, and fruit seems to set well even in the heat. Prone to cracking, but a very heavy producer. Heirloom from the Black Sea of Russia. Indeterminate. 75-90 days. 🌱🍅
#4864 (30 seeds) \$2.95

BLACK PEAR

Dark-brown tomatoes are shaped like miniature pears and flavored with an excellent, rich taste. Potato-leaved plants produce an abundance of these beautiful, 4 to 6 oz. fruit. Heirloom variety. Indeterminate. 80 days. 🌱🍅
#5136 (30 seeds) \$3.10

BLACK ZEBRA

This deep-burgundy tomato has jagged green stripes on the outside and solid mahogany-colored flesh inside. Sweet and juicy, its flavor also carries the rich complexity associated with black tomatoes. Vigorous plants produce an abundance of 3 to 4 oz. tomatoes. Indeterminate. 75 days. 🌱🍅
#3616 (20 seeds) \$2.95

CARBON

This is among the darkest of the “black” tomatoes that we’ve seen and one of the very best tasting tomatoes of any kind that we’ve sampled. Its flavor is exceptionally rich yet sweet and the essence of delicious summer tomato flavor. Medium to large, 8 to 12 oz. tomatoes are dark purplish-brown on the outside with a deep brick-red interior. Indeterminate. 80 days. 🌱🍅
#5663 (30 seeds) \$3.35

CHEROKEE CHOCOLATE

A stabilized version of Cherokee Purple, this 10 to 16 oz. mahogany-colored variety has excellent flavor and beautiful large fruit. Very productive plants are vigorous and yield a large harvest of these chocolate-colored tomatoes with the ample size and wonderful flavor associated with Cherokee Purple. Indeterminate. 75 days. 🌱🍅
#3550 (30 seeds) \$3.85

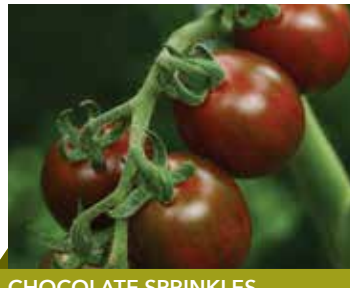

CHEROKEE CARBON HYBRID

A winning variety from the Heirloom Marriage® series that crosses two heirloom varieties to create an offspring that is higher yielding and earlier, but retains all the great flavor of the parents. This robust, deep-purple beefsteak is a cross of Cherokee Purple and Carbon, both famous for their unique and delicious flavors. 10 to 12 oz. unblemished tomatoes with exquisite taste. Indeterminate. 75 days. 🌱🍅
#3284 (15 seeds) \$3.75

CHEROKEE PURPLE

Very productive plants bear loads of 10 to 12 oz. dusky rose/purple fruit with deep brick-red interiors. The tomatoes are absolutely delicious with a pleasantly sweet and rich flavor. With thin skin and soft flesh, the fruit is somewhat perishable, but they taste so good they will be eaten quickly anyhow. Heirloom from Tennessee. Indeterminate. 80 days. 🌱🍅
#5207 (30 seeds) \$3.25

CHOCOLATE SPRINKLES FNT HYBRID

With a name like a confection and striped dark-chocolate grape-shaped tomatoes, this one is too tempting to pass up. The fruit is delightfully sweet with a rich, balanced flavor, perfect for snacking or adding on top of salads. Tall, disease-resistant plants bear huge crops of these delectable, crack-resistant cherry tomatoes. Indeterminate. 75 days. 🌱🍅
#6136 (10 seeds) \$3.55

INDIAN STRIPE

This heirloom variety bears 8 to 10 oz. burgundy-purple tomatoes that have an exquisite taste with the richness and complexity of fine wine. The fruit found growing in an Arkansas garden gets its name from the faint green stripes that fade as tomatoes ripen. Often compared to Cherokee Purple, but Indian Stripe bears more heavily and the fruit is a bit lighter in color. Indeterminate. 80 days. 🌱🍅
#5370 (30 seeds) \$3.25

JAPANESE TRIFELE BLACK

This Russian heirloom variety is well loved for its unusual appearance and outstanding, rich flavor. Pear-shaped, blemish-free fruit weigh 4 to 6 ounces and are beautiful deep mahogany-brown with green shoulders. Highly productive plants have potato-leaved foliage, which seems to contribute to excellent flavor. This tomato is famous for its incredible taste. Indeterminate. 75 days. 🌿
#5009 (30 seeds) \$3.25

BLACK PRINCE

Deep garnet round fruits really load up on these plants that stay fairly small. Tomatoes are medium-sized and full of juice and good, rich flavor. Originally from Siberia. This variety should be a favorite in most gardens. Indeterminate. 70 days.
#6347 (30 seeds) \$3.95

BLACK PLUM

Small elongated-oval fruits are deep mahogany and sweet and fruity. These are small, teardrop-shaped morsels of sweetness, wonderful for snacking off the vine or for adding to salads. 6-foot tall plants produce a steady, large crop. This is a unique and very tasty variety. Indeterminate. 82 days. 🌿
#6414 (30 seeds) \$3.95

PAUL ROBESON

One of the most highly regarded black tomatoes, this one features medium-sized deep-maroon fruits that are free of most blemishes and cracking. Their flavor is complex, sweet yet tangy, and characteristic of that distinctive richness that makes black tomatoes special. Russian heirloom. Indeterminate. 75 days. 🌿
#3148 (30 seeds) \$3.15

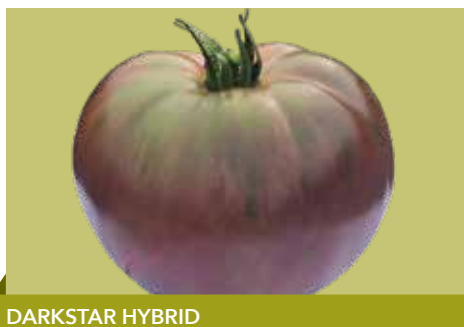

PURPLE CALABASH

This is the most truly purple tomato we know, not just pink-purple, but it is deep purple-burgundy. It is also uniquely shaped, extremely fluted and almost ruffled in appearance. Fruit is flattened, about 3 inches across, and flavor is described by some as distinctively winey and rich. Indeterminate. 80-90 days. 🌿
#5657 (30 seeds) \$3.95

NYAGOUS

These black tomatoes appear in clusters of round, smooth fruit that is 6 to 8 ozs. each. Their flavor is excellent, sweet yet full of that special black tomato richness. Production is very good and fruit is reliably blemish-free. Indeterminate. 80 days. 🌿
#5790 (30 seeds) \$3.95

DARKSTAR HYBRID

This new hybrid heirloom type combines the flavor of heirlooms with the productive quality of a commercial variety. The attractive, dark purple fruit weigh 7 to 10 ounces, and have deliciously sweet and tangy flesh. And Darkstar is resistant to **Late Blight**. The strong, 6 – 7 foot tall indeterminate vines will produce over a long period of time, with great productivity. 🌿
#6885 (15 seeds) \$4.55

TASMANIAN CHOCOLATE

This is an open-pollinated stabilized cross between New Big Dwarf and Paul Robeson. The result is a tomato with the same size, color, and shape of Paul Robeson growing on a dwarf-sized plant. Plants have dark green rugose foliage and grow 3 to 4 feet tall, bearing deep-maroon tomatoes with rich, complex flavor. This is one of the varieties shared by the Dwarf Tomato Project. Indeterminate. 75 days. 🌿
#4779 (30 seeds) \$3.95

BRANDYWINE BLACK

The origin of this tomato is believed to be from a hobby gardener who was also a dentist. His name was Harold Martin. He did not release the tomato in the 1920s when it was first selected, but it was released later by a person who inherited Dr. Martin's collection. Initially there were some concerns about the variability of the variety, and it has taken time for people to judge the plant. It is indeterminate and purple-maroon in color, weighing 5 to 8 ounces. It has a sweet fruity flavor. The current selection from the collection is a regular leaf type. 85 days. 🌿
#6587 (20 seeds) \$2.95

AUNT RUBY'S GERMAN GREEN

Large green beefsteaks ripen to pale green with a tint of yellow and have a pink blush underneath. The flavor is sweet yet spicy, and quite delicious. Fruit weighs from 12 to 16 ounces, and has a smooth shape. Heirloom variety. Indeterminate. 80 days. 🌱🍅
#5064 (30 seeds) \$2.95

GREEN GIANT

This is a potato-leaved variety that takes the well-known sweet, spicy flavor of green varieties up to a new level. Tomatoes weigh from 12 to 18 ounces and are ripe when they turn chartreuse green and soften slightly. They are smooth and beautiful with a complex, rich and well-balanced taste. Indeterminate. 85 days. 🌱🍅
#4357 (30 seeds) \$3.45

CHEROKEE GREEN

Yet another wonderful variation of Cherokee Purple, this one features green-fleshed fruit blushed with amber at the blossom end. Medium to large, 8 to 12 oz. tomatoes have a remarkable flavor that is complex and delicious. Combined with great productivity and disease tolerance, Cherokee Green is considered by many as the best tasting green tomato. Indeterminate. 75 days. 🌱🍅
#3217 (30 seeds) \$3.65

GREEN DOCTORS

Pretty little green cherry fruit have fabulous flavor, making Green Doctors a favorite new green variety. Small tomatoes are about 3/4 inch and borne on long trusses. This variety originated as a green variation of the white Dr. Carolyn tomato growing in the garden of Amy Goldman. Indeterminate. 75 days. 🌱🍅
#5404 (20 seeds) \$3.15

GREEN ZEBRA CHERRY

Round to slightly elongated striped green cherry tomatoes look like miniature Green Zebra with the same striping and green color, ripening with a hint of amber. Their flavor is excellent, with more delicious sweetness in its profile than that of Green Zebra. Indeterminate. 75 days.
#5502 (20 seeds) \$3.25

GREEN SAUSAGE

Compact, mounded plants bear loads of beautiful 4 inch long sausage-shaped tomatoes that are yellow with green stripes. Their rich, sweet flavor and firm texture make them wonderful as a specialty paste tomato. Think of using them to make a great-looking tomato sauce or a vibrantly green salsa. Determinate. 75 days. 🌱🍅
#4972 (30 seeds) \$3.45

GREEN ZEBRA

A unique and delicious salad tomato. 3 oz. green fruits ripen to amber-green with darker green stripes. The light-green flesh is very flavorful, sweet yet zingy. This one is a real taste treat. Indeterminate. 75 days. 🌱🍅
#4959 (30 seeds) \$3.15

MINT JULEP

This unique little tomato is a plum-shaped version of Green Zebra and was found as a naturally occurring variant. It has the same beautiful chartreuse green background and bright-yellow streaks as Green Zebra, but offers a sweeter taste. The variety was originally named Michael Pollan. Indeterminate. 75 days. 🌱🍅
#5038 (20 seeds) \$3.25

GREEN ZEBRA GIANT

This big sister of Green Zebra is mild and tasty with the same color and shape, but fruit reach 5- 6 inches and 8 to 9 ounces. Plants are very productive. Indeterminate. 80 days. 🍅
#6877 (20 seeds) \$2.89

AUNT GERTIE'S GOLD

This is not only one of the best-tasting yellow tomatoes, but it is one of the best-tasting tomatoes of any color. Fruit is typically about 1 pound with beautiful golden color. Sometimes their shape is a little rough, but their delicious taste is absolutely wonderful, fruity, and sweet yet complex. Heirloom variety from Virginia. Indeterminate. 75-80 days. 🌱👤
#5618 (30 seeds) \$3.45

JUBILEE

Plentiful harvests of bright golden-orange, large round fruit. Delicious taste and solid, smooth substance. Adds bright color to salads. This tomato's good looks and good taste make it a favorite with market gardeners. Indeterminate. 80 days.
#5312 (30 seeds) \$3.95

FLAMMÉ

Also known as Jaune Flammé, these beautiful orange salad tomatoes are very juicy and have a good, sweet flavor with fruity overtones. Tomatoes weigh 2 to 3 ounces and are a lovely persimmon-orange color both inside and out. Extremely productive heirloom from France. Indeterminate. 70 days. 🌱👤
#5082 (30 seeds) \$3.25

SUNSUGAR FT HYBRID

Very sweet, fruity-tasting orange cherry tomatoes are borne in long clusters on vigorous plants. Unlike many cherry tomatoes, this one has crack resistance while still keeping a thin skin. The taste of these tomatoes is such a delight that they're often picked and eaten in the garden instead of ever making it indoors. Indeterminate. 62 days. 🌱👤
#5859 (20 seeds) \$3.45

KELLOGG'S BREAKFAST

Lovely deep orange color on 1 lb. beefsteak-type fruit. Tomatoes have wonderful, rich flavor and are quite meaty with few seeds. Juice has the same bright color as orange juice and is delicious. Heirloom variety. Indeterminate. 80 days.
#5833 Regular Leaf (30 seeds) \$3.25 🌱👤
#5575 Potato Leaf (30 seeds) \$3.25 🌱👤

ORANGE STRAWBERRY

This is a large, beautiful orange oxheart fruit that is shaped like a strawberry and weighs from 8 ounces to 1 pound. The color is an intense and very deeply colored orange both inside and out. Flavor is also outstanding – exceptionally rich and sweet with just the right amount of acid. Indeterminate. 80 days. 🌱👤
#3625 (30 seeds) \$3.45

PERSIMMON

Beautiful, golden-orange tomatoes have one of the best flavors of all orange tomatoes. Average 5 inch diameter and between 1 and 2 pounds, quite meaty with few seeds. Vigorous plants bear well. Indeterminate. 80 days. 🌱👤
#6088 (30 seeds) \$3.35

HAWAIIAN PINEAPPLE

Golden-orange beefsteak fruit grow up to 1½ pounds and have a pineapple-like flavor when perfectly ripe. Fruits are deep orange and incredibly rich, fruity and sweet. Indeterminate. 90-95 days. 🌱👤
#3762 (20 seeds) \$3.45

SUN GOLD HYBRID

Very sweet, bright-orange cherry tomatoes taste not just sugary but also fruity and delicious. Vigorous growers, these tall plants bear long clusters of fruit. Try these for a real taste treat – you won't believe you're eating tomatoes! Indeterminate. 57 days. 🌱👤
#6313 (20 seeds) \$3.45

SUN ORANGE HYBRID

If you love Sun Gold or Sun Sugar, you will also love Sun Orange. It has unbelievably good flavor. The breeder has taken the same great flavor package, but increased the size of the fruit, and improved crack resistance. High yield potential is obvious once you see the elegant trusses brimming with fruit. Indeterminate. 65 days. 🌱👤
#6882 (10 seeds) \$3.75

ORANGE PIXIE HYBRID

An orange fruited version of Pixie Hybrid II. Plants are 18 inches tall at maturity and bear 1-1/4 inch yellow-orange fruits with meaty orange flesh and excellent flavor. Determinate. 52 days. 🌱🍅

#6201 (20 seeds) \$3.95

AMANA ORANGE

Huge orange beefsteak that can grow to 2 lbs. and more, with an average diameter of 5 inches. Flavor is mild and quite pleasant. Heirloom variety named for Amana, Iowa.

Indeterminate. 90 days. 🌱🍅

#3206 (30 seeds) \$3.95

VALENCIA

Heirloom variety from Maine offers beautiful, 8 to 10 oz. orange fruit with few seeds. Meaty and delicious, their flavor is sweet yet tangy. Valencia ripens earlier than many other orange tomatoes, making it a good choice for gardeners with shorter seasons.

Indeterminate. 76 days.

#6152 (30 seeds) \$3.95

WHITE

COYOTE

Delightful little cherry tomatoes are creamy ivory with hints of yellow and an absolutely unforgettable taste. The flavor is not only sweet but is also marked by a fruity complexity. They are so irresistible that you won't want to stop eating them at harvest time. Plants are large and quite prolific, bearing long clusters of these 1/2 inch delicious little treats. Heirloom variety originally from Mexico. Indeterminate. 65 days. 🌱🍅

#5546 (20 seeds) \$3.65

DR. CAROLYN

This wonderful ivory-colored cherry tomato originally appeared as a variation of Galina's. Dr. Carolyn Male first saved the seed, and so the variety was named in her honor. Round fruit are about 1 inch in diameter and ivory-white deepening to pale yellow. The flavor is not just sweet, but also complex and nicely balanced with acid. Indeterminate. 75 days. 🌱🍅

#6219 (20 seeds) \$2.95

HUGH'S

Heirloom variety from the Midwest. Tall, heavy plants grow very large, up to 2 1/2 lb. beefsteak tomatoes that are pale yellow with a touch of red on the blossom end. They are very meaty, thin-skinned and delicious, seemingly bursting with summer sweetness. Indeterminate. 90 days. 🌱🍅

#5534 (30 seeds) \$3.65

GREAT WHITE

Heirloom variety. Beautiful, large white beefsteak tomato with sweet flavor and lots of juice. Fruit is larger than that of White Beauty. Vigorous plants have heavy foliage that provides good protection against sunscald on the fruit. Indeterminate. 85 days. 🌱🍅

#5242 (30 seeds) \$2.95

WHITE QUEEN

This variety offers some of the nicest shape and whitest color of any of the white varieties. Beefsteak-type fruit weighs 8 to 12 ounces, and some fruit have a pink blush or streaks on their blossom ends. Tomatoes are juicy and sweet with a well-balanced flavor. Heirloom variety. Indeterminate. 85 days. 🌱🍅

#6834 (30 seeds) \$3.35

SNOW WHITE

Delightful ivory-colored cherry tomatoes ripen to pale yellow and are deliciously sweet without being sugary. This variety was hybridized by Joe Bratka and seed was given to us by a local friend who obtained it years ago in a seed swap. This is one you'll find yourself snacking on in the garden because it tastes so good. Indeterminate. 75 days. 🌱🍅

#6822 (20 seeds) \$2.95

WHITE BEAUTY

Creamy white color inside and outside make White Beauty a rarity. Extremely mild and sweet because of a high sugar content. Fruits average 8 ounces and are quite meaty with few seeds. Indeterminate. 85 days. 🌱🍅

#5190 (20 seeds) \$3.10

CREAM SAUSAGE

This variety was developed by Tom Wagner from heirloom stock. He focused on making a more productive plant and creating flavor that is great for making sauces. The cream to yellow colored fruit are nearly 3 inches long and are shaped like a sausage. The determinate 3 foot bush plants don't need to be staked. 75 days. 🌱🍅

BLUSH
Starts by ripening to yellow, then blushes with streaks of pink when ready to pick. Excellent flavor is sweet, fruity, and refreshing. Indeterminate. 75 days. 🌱
#3641 (30 seeds) \$3.25

GREEN TIGER
Attractive green fruit are ripe when stripes mature to a bright yellow. Flavor is bright and acidic with a complementary amount of sweetness, similar to Green Zebra. Indeterminate. 70 days. 🌱
#5670 (30 seeds) \$3.65

LUCKY TIGER
Elongated cherry type is part of the Artisan™ series and has a beautiful color combination of deep-green striping and a backdrop that develops from green to red when the fruit is ready to pick. The tomato's interior is marbled with red, and its flavor is sweet and rich with bright acidic notes. Indeterminate. 70 days. 🌱
#4239 (30 seeds) \$3.75

MAGLIA ROSA
This lovely variety was the very first one Artisan Seeds released, and its flavor is still highly rated. A beautiful light-pink and yellow-mottled tomato, named after the pink jersey worn by the lead rider in the Tour of Italy. Very productive plants, short enough to be grown in containers. The small tomatoes have wonderful flavor, sweet but balanced with acid, and lots of rich tomato taste. Pick these fruit while they are still light pink. Indeterminate. 55 days. 🌱
#4319 (30 seeds) \$3.45

PINK BUMBLE BEE
Dark-pink cherry tomatoes are striped with fine yellow bands. Fruit are rich, flavorful, and extra sweet. Indeterminate. 70 days. 🌱
#5770 (30 seeds) \$3.55

PINK TIGER
Deep pink is the background color for orange striping, making for a gorgeous color combination. Flavor is outstanding, with a great balance of sugar to acid and plenty of rich tomato taste added in. Indeterminate. 70 days. 🌱
#5680 (30 seeds) \$3.95

PURPLE BUMBLE BEE
Purple-to-black fruit are striped with mottled green highlights. Sweet but multi-dimensional black tomato flavor is sure to please. Indeterminate. 70 days. 🌱
#5806 (30 seeds) \$3.55

SUNRISE BUMBLE BEE
Deep yellow with red stripes on the outside and pink marbling inside. Bright flavor is sweet and pleasantly acidic. Indeterminate. 70 days. 🌱

Grafted plant on Superstrong rootstock

GRAFTING ROOTSTOCK

SUPER STRONG TOMATO ROOTSTOCK VFFNT HYBRID

This vigorous rootstock is resistant to a multitude of soil-borne diseases and nematodes. Use this rootstock to graft onto any heirloom or hybrid tomato plant and witness the greatly increased vigor and yields. The rootstock even boosts tolerance to fluctuating temperatures. This variety should only be used for rootstock because the small green fruit produced by rootstock are not good for consumption. Resistant to verticillium wilt, fusarium, nematodes, and tobacco mosaic virus. 🌱

#2911 (20 seeds) \$9.95

GRAFTING CLIPS

Silicone clips attach the scion to the rootstock of a grafted plant. Clips are now available in 3 sizes to accommodate different stem diameters.

#6936 20 clips \$6.95

Please specify size: 1.7 mm, 2.0 mm, 2.5 mm

20 clips \$8.95

Size: 3.5 mm

#6936 100 clips \$22.95

Please specify size: 1.7 mm, 2.0 mm, 2.5 mm

100 clips \$30.95

Size: 3.5 mm

Tips about Grafting Tomatoes:

- Test a few seeds of the rootstock for emergence compared to your scion.
- You may want to consider multiple sowings to try to match the rootstock and scion.
- The rootstock and scion diameters should be about the same size.
- The healing chamber should be maintained at 90% humidity, and should not be placed in full sun.
- Make sure to plant the grafted plants such that the soil is at least 1 inch below the graft.

INDIGO

INDIGO APPLE

Early ripening with gorgeous dark fruit. This variation of Indigo Rose is earlier and earns its name due to an especially good sweet tomato flavor. Indeterminate. 70 days. 🌱👤
#5319 (20 seeds) \$3.25

INDIGO BLUE BEAUTY

Beautiful 6 to 8 oz. beefsteak tomatoes begin as a stunning true blue where sunlight strikes the skin. The undersides will ripen from green to red when fruit are ready to harvest. Large yields of meaty tomatoes are flavorful and resistant to cracking. Indeterminate. 80 days. 🌱
#5333 (20 seeds) \$3.45

INDIGO BLUE BERRIES

Expect large yields of deep-purple cherry tomatoes that ripen to a brick red on the bottom. Easy to grow, with a delicious plum-like flavor. Indeterminate. 75 days. 🌱
#5368 (20 seeds) \$3.35

INDIGO CHERRY DROPS

Excellent, sweet flavor and incredibly large yields of 1 inch fruits are the hallmarks of this delightful cherry tomato bred by Dr. Jim Myers at Oregon State University. Indeterminate. 65 days. PVPAF. 🌱
#5762 (20 seeds) \$3.55

INDIGO CREAM BERRIES

A new and unique indigo tomato, this one features lovely white cherry tomatoes splashed with purple on their shoulders. Large harvests of tomatoes are packed with a delicate but complex flavor and are also resistant to sunburn and cracking. As a bonus, fruit hold up well on the plant once ripened and even after picking. Bred by Brad Gates of Wild Boar Farms. Indeterminate. 80 days. 🌱
#4086 (30 seeds) \$3.95

INDIGO GOLD BERRIES

Deliciously sweet and tangy cherry tomatoes start out as amethyst purple before ripening to a glowing golden with a hint of purple remaining at their tops. This variety started out as a selection from Indigo Blue Berries, and was bred by Brad Gates. Indeterminate. 75 days. 🌱
#5868 (20 seeds) \$3.55

INDIGO ROSE

The original "blue" tomato released in 2012 by Dr. Jim Myers at Oregon State University. Expect an abundance of these beautiful 1 to 2 oz. purple fruits with rosy undersides and deep, brick-red flesh. Indeterminate. 75 days. 🌱
#5301 (20 seeds) \$3.25

MIDNIGHT SNACK HYBRID

Breakthrough flavor is the hallmark of this new cherry tomato and it is a perfect choice for those who love indigo colors. Midnight Snack begins fruiting with red, and then changes to deep indigo with exposure to sunshine. Naturally occurring purple anthocyanin pigments create the dramatic color change. All America Selections judges noted the improved flavor. Indeterminate. 65-70 days. 🌱👤
#4833 (10 seeds) \$3.55

AZOYCHKA

This is a delightful small yellow beefsteak tomato that matures so early it will be one of the first varieties to ripen in your garden. Beautifully smooth, lemon-yellow fruit weighs about 8 ounces and is very flavorful, rich but sweet with a delicious hint of citrus. Heirloom variety from Russia. Indeterminate. 70 days. 🌱👤
#3680 (30 seeds) \$3.85

CUBAN YELLOW GRAPE

A profusion of tiny oval-shaped yellow grape tomatoes are produced on tall, vigorous plants. They are delightfully sweet but refreshing, and sure to be a favorite with kids and adults who like to snack right in the garden. Expect long clusters of fruit that can be picked individually with very little cracking. Indeterminate. 90 days. 🌱👤
#5127 (20 seeds) \$3.15

DIXIE GOLDEN GIANT

Fabulous, sweet fruity taste in a huge, clear lemon-yellow beefsteak tomato make this variety outstanding. Some of the 1 to 2 lb. fruit have a pink blush on their blossom ends. This is an heirloom variety that grows on large plants and yields a good harvest. Indeterminate. 85 days. 🌱👤
#5068 (30 seeds) \$3.10

DR. WYCHE'S YELLOW

This is undoubtedly one of the best tasting yellow tomatoes to be found, combining luscious sweetness with plenty of tangy tomato flavor. Golden-yellow fruit is beautiful, unblemished and smooth, and varies from 10 ounces to 1 pound. Huge, vigorous plants produce well. Indeterminate. 80 days. 🌱👤
#5744 (30 seeds) \$3.45

GALINA'S

Originally from Siberia, this very sweet golden-yellow cherry tomato is about the size of a quarter and produced in clusters. The flavor is not just sweet, but has a special depth of rich flavor. Once you try Galina's, you may find it becoming your favorite yellow cherry tomato. Potato-leaved plants yield heavily for a plentiful harvest. Indeterminate. 75 days. 🌱👤
#5882 (30 seeds) \$3.55

GARDEN PEACH

Abundant clusters of small yellow tomatoes with a pink blush. Skin is somewhat fuzzy, resembling a peach and the flavor is sweet and fruit-like. This one is delicious and must be grown to appreciate. Heirloom variety. Indeterminate. 75-85 days. 🌱👤
#5324 (30 seeds) \$3.25

See pages
37 - 40
 for large quantity pricing!

GOLDEN QUEEN, USDA STRAIN

This is from the USDA seed bank, and is the original Golden Queen described by the seedsman Livingston in 1882. Tomatoes are 8 to 12 ounces and yellow with a pronounced pink blush on the blossom end. This one is delicious, with a full tomato taste that is also sweet and most pleasant. Indeterminate. 75 days. 🌱👤
#5614 (30 seeds) \$3.65

LEMON BOY VFN HYBRID

The first lemon yellow, not golden, tomato variety, and still one of the best. Extremely vigorous plants produce large harvests of attractive fruit that weighs 8 ounces or more. Flavor is outstanding, mild and sweet, yet tangy and definitely not bland. This one is easy to grow and understandably one of our most popular yellow tomatoes. Indeterminate. 72 days. 🌱👤
#5600 (30 seeds) \$3.95

CAROLINA GOLD HYBRID

Big and beautiful golden yellow fruit that are 8 to 12 ounces, and have cracking tolerance. Low in acid. Resistant to VFF and grey wall. Determinate plants benefit from staking. 73 days. 🌱👤
#6551 (20 seeds) \$3.85

YELLOW JELLY BEAN HYBRID

Delicious yellow clusters of oblong fruit have just the right balance of sugars and acid. They also have a good disease resistance package (VFFASt) and keep producing on strong indeterminate vines for a long period. Fruit are bite-sized and very tasty. 71 days. 🌱🍷
#4377 (20 seeds) \$3.45

LILLIAN'S YELLOW HEIRLOOM

Beautiful, clear yellow beefsteak fruit weighs at least a pound with a flavor that is rich and complex, yet refreshingly sweet. Very meaty tomatoes have few seeds while still being juicy. The vigorous plants are potato-leaved. Considered one of the finest tasting yellow heirlooms and unique for its pale yellow, not golden, color. Indeterminate. 90 days. 🍷
#5640 (30 seeds) \$3.45

LIMMONY

These bright lemon-yellow beefsteak tomatoes have a fabulous tangy flavor that is actually sort of lemony, and very clean and crisp. This pronounced acid flavor sets it apart from many other yellow varieties, which are milder in taste. Fruit typically weigh 8 to 10 ounces, and are smooth and blemish-free with solid, meaty interiors. Heirloom from Russia. Indeterminate. 80 days. 🍷
#6024 (20 seeds) \$3.45

MOUNTAIN GOLD VFF

Expect large harvests of these beautiful, 8 to 12 oz., smooth, round, golden-yellow fruit. Their firmness allows for crack resistance and they hold up better than other yellow tomatoes both on the vine and after picking. Fruit has a sweet, mild flavor with just a little bite. Determinate. 71 days. 🍷🍷
#5716 (30 seeds) \$3.45

PORK CHOP

This tomato is a beautiful lemon yellow when ripe with a sweet flavor that has a refreshing citrus component. The 8 to 12 oz. tomatoes start off yellow with thin green stripes that disappear once they ripen to solid yellow. This is another great variety from Brad Gates of Wild Boar Farms. Indeterminate. 75 days. 🍷🍷
#6484 (30 seeds) \$3.45

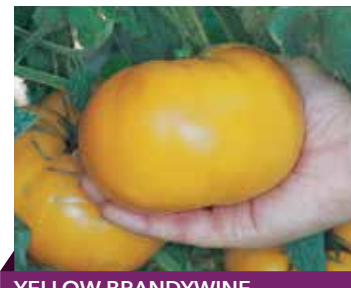

SWEET GOLD FT HYBRID

Vigorous vines produce abundant clusters of ½ oz. bright yellow-gold cherry tomatoes with delicious sweet flavor. These tomatoes are naturally sweeter than red cherry varieties with a fruitier taste. Once you taste them, you'll be spoiled forever. Indeterminate. 60 days. 🌱🍷
#5274 (15 seeds) \$3.65

YELLOW BRANDYWINE

Large yellow fruit of exceptional quality, creamy texture and delicious flavor. Fruit size is from 12 to 24 ounces, and tall vines have healthy, potato-leaved foliage. An extremely rich-tasting tomato, this one is also beautiful due to its smooth, not rough, shape. Indeterminate. 90 days. 🍷
#5214 (30 seeds) \$3.45

YELLOW BRANDYWINE PLATFOOT STRAIN

This special strain of Yellow Brandywine comes from Gary Platfoot of Ohio, who felt that it had special attributes. The main improvements of this strain are increased productivity and a smoother shape than regular Yellow Brandywine. Incredibly rich and delicious flavor in deep golden-yellow tomatoes that weigh from 1 to 2 pounds. Indeterminate. 85 days. 🍷🍷
#5248 (30 seeds) \$3.65

YELLOW PEAR

These miniature pear-shaped tomatoes are 1¼ to 2 inches long and clear yellow in color. They are delightfully sweet, considered by many as "garden candy." Baskets of these are as pretty as can be. Tall plants bear large and continuous harvests. Indeterminate. 78 days. 🍷🍷
#5862 (30 seeds) \$3.25

YELLOW STUFFER

A yellow-fruited stuffing tomato that looks just like a yellow bell pepper! Perfect for slicing or stuffing. Tall, vigorous vines bear profusely. Indeterminate. 76 days. 🍷
#5660 (30 seeds) \$3.15

PINEAPPLE PIG

Vigorous indeterminate vines produce delicious yellow fruit with a creamy and intense sweet flavor. Fruit are large, reaching up to one pound. Lower in acid than most tomatoes, the powerful flavor punch makes this variety particularly enjoyable. The fruit have a rose colored blush at peak ripeness near the blossom end. 75 days
#6107 (20 seeds) \$3.25

SUNNY BOY HYBRID

Bright yellow 8 to 12 ounce fruit are sweet and mild flavored with very few seeds. Somewhat firm fruit allows transport. Widely adapted plants do well under many different cultural conditions. Semi-determinate. 70 days. 🌱🍷
#6119 (30 seeds) \$2.75

CHEF'S CHOICE GREEN VFT HYBRID

ALL AMERICA SELECTIONS WINNER. This is one of the first green colored varieties with disease resistance, and it impressed judges in the All America Selections program. Green when ripe, tomatoes have yellow streaks and are 9 to 10 ounces with a wide, flat shape and a wonderful, sweet, citrus-like flavor. Crack resistant, but should be picked when they are still slightly firm. Indeterminate. 90 days. #5265 (30 seeds) \$3.45

CHEF'S CHOICE PURPLE HYBRID

Delicious 9 to 10 ounce fruit are firm and smooth, having excellent flavor and purple color all the way through. If you love Cherokee Purple you will also like this tomato. Vigorous indeterminate plants mature in 80 days. #6436 (30 seeds) \$3.45

CHEF'S CHOICE PINK VFT HYBRID

ALL AMERICA SELECTIONS WINNER. Potato-leaved plants produce impressive yields of 12 to 16 oz. beefsteak tomatoes with deep pink sweet, meaty flesh and an irresistibly good taste. These fruits have a perfect acid-to-sugar ratio resulting in flavor that is reminiscent of heirlooms. However, these hybrid plants are easier to grow and yield early harvests of delicious, crack-resistant beefsteak tomatoes. Indeterminate. 75 days. #5705 (30 seeds) \$3.45

CHEF'S CHOICE BLACK HYBRID

Many of you have come to love the Chef's Choice tomato series. The latest entry in the class is called Chef's Choice Black, a beefsteak type tomato with a dark green, brown, and black hues. The flesh is juicy and sweet. The disease resistant plants can produce 30 or more 8-10 ounce fruit on each plant, under good growing conditions. Winner of the 2019 All America Selections award, with a good disease package and with good crack tolerance. Requires staking. 75 days. #5795 (20 seeds) \$2.95

CHEF'S CHOICE BICOLOR HYBRID

AAS WINNER. The beautiful yellow color of the skin hides the internal crimson stripes that make the sliced fruit so attractive. Sweet and savory is how one judge defined the taste. Strong indeterminate vines produce up to 30 fruit that weigh 8 ounces each. Excellent for fresh harvest, and also preserving, since you are likely to have a great abundance of fruit. 75 days. #6585 (30 seeds) \$3.45

CHEF'S CHOICE ORANGE HYBRID

AAS WINNER. This crack-resistant hybrid originated with the heirloom Amana Orange and retains that wonderful old-fashioned flavor while adding some improvements. The hybrid has 9 to 12 oz. tomatoes that mature much earlier than Amana Orange and do not crack. The color both inside and out is a beautiful glowing orange that holds its intensity even when tomatoes are cooked, lending itself to creative uses by chefs. Vigorous plants are quite productive and are resistant to Tobacco Mosaic Virus and anthracnose. Indeterminate. 75 days. #5682 (30 seeds) \$3.45

CHEF'S CHOICE RED HYBRID

AAS WINNER. Judges raved about the productivity of this award winning beefsteak tomato. Firm fleshed fruit weigh 8 ounces and are 6 inches in width. Flavor is exceptional, with just the right balance of acids and sugars. Improved disease resistance and a strong 5-foot indeterminate vine offers impressive potential for yield and gardening success. 80 to 85 days. #6441 (30 seeds) \$3.45

CHEF'S CHOICE YELLOW HYBRID

AAS WINNER. Judges were excited by the citrus-like flavor and sweet delicate flesh, with perfect texture, in addition to the beautiful beefsteak shape. Fruit are 6 to 7 inches wide, and reach up to 10 ounces. In some trials each plant produced 30 or more fruit. Indeterminate vines reach 5 feet and have resistance to F,V, TMV, Scab, and cracking. 80 to 85 days. #6496 (30 seeds) \$3.45

Tracie's Cooking Corner: Fried Green Tomatoes

INGREDIENTS

- 3 green Destiny tomatoes.
- 1 teaspoon of salt
- 1 pinch of freshly ground pepper
- 2 large eggs
- 1 teaspoon of hot sauce
- 1/3 cup of milk or buttermilk
- 1/2 cup of cornmeal
- 3/4 cup of plain breadcrumbs
- 1 teaspoon of garlic
- 1 teaspoon of onion powder
- 1 1/2 cups of all purpose flour
- 1 tablespoon of sugar

DIRECTIONS

1. Begin by cutting green, totally unripened tomatoes into 1/4-inch slices. Place on a paper towel, and season with salt and freshly ground black pepper. Water from the tomato will spread into the paper towel over 20 minutes. Pat them dry.
2. In a bowl, place two large eggs, a teaspoon of hot sauce, and whisk. Add 1/3 cup of milk or buttermilk, 1/2 cup of cornmeal, 3/4 cup of breadcrumbs, 1 tsp garlic powder and onion powder.
3. In another bowl place 1 1/2 cups of flour. Sprinkle in 1 tablespoon of sugar. Put the green tomatoes one at a time in the mix with eggs, buttermilk and breadcrumbs. Then move them to the flour, covering each side. Place the flour covered tomatoes into a frying pan. Use vegetable oil or canola oil. Fry for 2-3 minutes per side.
4. Ready to serve!

AUNT MOLLY'S GROUND CHERRY

Native to the Americas, this ground cherry is a family heirloom variety that traveled here from Poland. Tiny, ½ inch fruit turn golden-orange when ripe and are encased in a papery tan-colored husk. They are delightfully fruity and sweet, and wonderful for pies, preserves, or salads. Plants will sprawl but are quite easy to grow. 70 days. 🌱🍷

#6583 (30 seeds) \$2.95

PURPLE TOMATILLO

A uniquely colored tomatillo that is enjoyed for the sweet yet tart flavor it gives Mexican dishes. These small fruit form inside papery husks and begin as pale green, then ripen to a rich, deep purple. Vigorous and productive plants. 75-85 days. 🌱🍷

#6273 (30 seeds) \$3.25

VERDE PUEBLA TOMATILLO

1 to 2 oz. round green fruit inside a tan-colored, papery husk. Plants give a continuous set of these tomato relatives that are used to make green Mexican salsa. Easy to grow. Indeterminate. 75 days. 🌱🍷

#6837 (30 seeds) \$3.35

PINEAPPLE TOMATILLO

This tomatillo has a sweet, fruity taste that reminds you of a pineapple. Short, spreading plants yield plenty of these tasty fruit which is wonderful in salsas, especially those made with fruit as an ingredient. 75 days. 🌱🍷

#6217 (30 seeds) \$3.55

CISNEROS TOMATILLO

Incredibly large tomatillo will amaze you with its size and productivity. This is easily twice the size of most tomatillos. Apple-green fruit have a papery husk that splits open as tomatillos mature and turn yellow-green. Use in the bright-green stage for the tarest flavor, or allow to ripen further for a sweeter taste. 75 days. 🌱🍷

#6701 (20 seeds) \$3.65

GRANDE RIO VERDE

This special selection of tomatillo will yield large fruit on a medium determinate plant. The fruit average 3 ounces, are globe shaped and have a high yield potential. Recommended for market gardeners and home gardeners. 75 days. 🌱🍷

#6731 (20 seeds) \$3.65

TOMA VERDE TOMATILLO

Round green tomatillos have a papery husk that is removed before preparing. Vining plants are easily grown and prolific. Flavor is sweet yet tart and wonderful in green Mexican salsa and other Mexican and Southwestern dishes. 75 days. 🌱🍷

#6292 (30 seeds) \$3.45

**PLUS
SERIES**

BETTER BOY PLUS HYBRID

Rather than call it Better Boy II, seed developers have decided to call it Better Boy Plus, because it is the same Better Boy with added features that will make it stronger and better than it was before. One new improvement is resistance to Tomato Spotted Wilt Virus (TSWV), which is increasingly important to gardeners throughout the United States and Canada. TSWV is spread by tiny insects called thrips, which fly all around the country with their tiny wings and dreadful sucking mouth parts. They carry a sinister virus that can wreak devastation on your tomato plants. And they are doing so in greater numbers each year! Because insecticides are largely ineffective, your simple solution is to plant Better Boy PLUS. But wait, you also receive new disease protection from Fusarium Crown and Root Rot, plus Tobacco Mosaic Virus. In addition, you will have improved flavor and sweetness that will almost make you do a handstand when you first try one. Keep in mind, all the previous resistances are still in place ASC, N, St, and V. So you hit the jackpot with your purchase of new Better Boy Plus! Indeterminate. 75 days. 🌱🍷

#2920 (15 seeds) \$3.95

BIG BEEF PLUS HYBRID

While it might seem impossible to improve Big Beef, in fact, it just got better. A new selection of Big Beef is available: Big Beef Plus. Big Beef was already a favorite, and one of the world's most popular indeterminate beefsteak tomatoes. The original Big Beef already has resistance to TMV, Asc, F 0-1, St, V1 and N (nematodes). The new Big Beef Plus is supercharged with all the original resistances, plus added resistance to Tomato Spotted Wilt Virus (TSWV), Tomato torrado virus, and Fusarium Crown and Root Rot. In certain parts of the US where TSWV is common, home gardeners are not able to successfully grow the original Big Beef. But, they can now grow Big Beef Plus. We are also pleased to learn that the Big Beef Plus has a deeper red color which indicates increased lycopene levels, a potent antioxidant. And remember, all of the original great flavor, yield potential, and disease resistance is preserved in Big Beef Plus. Indeterminate. 73 days. 🌱🍷

#2921 (15 seeds) \$3.95

CELEBRITY PLUS HYBRID

A new Celebrity tomato is now available with added resistance to Tomato Spotted Wilt Virus. If your garden has experienced this disease, you are well aware of the dramatic impact it has on Celebrity. Tomato Spotted Wilt Virus (TSWV) is an increasing threat to gardeners throughout the United States and Canada. It is spread by tiny insects called thrips, which are hard to control. If you like Celebrity, but hate the damage from TSWV, then your solution is Celebrity Plus tomato. You get the same great tasting 8 ounce tomatoes, and plenty of yield with wide adaptability. The total disease resistance package for Celebrity Plus is Tobacco Mosaic Virus 0-2, Alternaria stem canker, Fusarium 0-1, Stemphylium, Verticillium Wilt, Root Knot Nematode, plus Tomato Spotted Wilt Virus. What a great new combination! Strong Determinate. 70 days. 🌱🍷

#2922 (15 seeds) \$3.95

LEMON BOY PLUS HYBRID

Lemon Boy tomato is among the best-selling tomatoes in the US and Canada. It has many wonderful features, including great flavor, mild yet sweet and tangy fruit, and good productivity. We are proud to present a new and improved generation of Lemon Boy. The original disease resistance package for Lemon Boy included, Alternaria stem canker, Leaf Mold, Fusarium 0, Stemphylium, Verticillium Wilt, and Root knot nematode. Lemon Boy Plus has all of the original resistances PLUS, Tobacco Mosaic Virus, Tomato torrado virus, and Fusarium Crown and Root Rot. The fruit is sweeter, from 5.7 (Brix) to 6.6, while maintaining the 8 ounce or larger fruit. This new garden powerhouse has all the characteristics of the original Lemon Boy plus a sweet treat. And don't be surprised if Grandmother prefers the Lemon Boy Plus more than the original. Indeterminate. 73 days. 🌱🍷

Any changes or additions to these terms must be in writing and signed by an officer of Tomato Growers Supply Company.

SUN BEAUTY HYBRID

This variety was developed for single stem flower heads used by florists, and sold for cut flowers in supermarkets. It is day neutral and can be planted for year-round harvest in warmer climates and it is widely adapted. The attractive flower has dark orange petals with a black center, and is pollenless. Stems reaching 60 inches (155 cm). Maturity 80 days in winter and 55 days in summer. 🌱🌱
#SF60 (10 seeds) \$3.15

ALYSSUM WHITE

Beautiful, aromatic, low-maintenance, and short-statured, the Alyssum flower is an excellent choice for flower beds, pots, and borders. Attracts beneficial insects. Will grow as a perennial in zones 9 - 11. Plant seeds by broadcasting and do not cover—they require light to germinate. 56 to 63 days. 🌱
#F230 (200 seeds) \$2.95

BACHELOR BUTTON JUBILEE

Bachelor Button Jubilee produces beautiful blue blossoms on 2 foot tall plants. They are easy to grow, and produce attractive cut flowers that will brighten any room in your house. Plant a second round in mid-summer to have blossoms throughout the growing season. Plant ¼ inch deep after last frost. 60 days. 🌱
#F231 (100 seeds) \$2.95

CALIFORNIA POPPY

California poppies create a spectacular display of stunning golden cupped flowers during the early spring in Southern California's Antelope Valley. Sow in warm soil and cover the seed with a tiny amount of soil. Keep moist until seedlings emerge. Zones 5 - 10 are the best locations to grow this beautiful flower. 85 days. 🌱
#F232 (200 seeds) \$2.95

MARIGOLD SPARKY

French Marigold Sparky Mix has medium sized flowers with wavy petals. Flowers are a mix between gold, orange, red, yellow and bi-colored. Plants grow to 20 inches tall and are long-blooming. Recommended for containers, beds & borders, and pollinator gardens. Useful for pest control in your vegetable garden. Plant ¼ inch deep. 45 days. 🌱
#F234 (100 seeds) \$2.95

CHOCOLATE CHERRY

Chocolate Cherry has burgundy colored petals with a dark chocolate center. Flowers are 5 to 6 inches in width and look stunning in a bunch. Multi-branching. This heirloom can be used for cut flowers, that also have good vase life. Plants reach 6 feet in height. Direct seed at ½ inch deep after frost and once the soil reaches 50 degrees. 75 to 90 days. 🌱
#F235 (50 seeds) \$2.89

ZINNIA CALIFORNIA GIANT

These beautiful zinnia can produce 4-5 inch flowers, many of which are doubles. A wondrous array of pink, cherry, orange, purple, scarlet, and white will adorn your garden. Plants reach 4 feet in height. Direct seed ¼ deep when soil is 65 degrees or more. 50 days. 🌱
#F237 (100 seeds) \$2.89

LAVENDER VERA

Lavender vera is an herb and flower that is very attractive in the garden. It works as an herb for burns, insect bites, and ointments. It can just grow in a pot as an attractive flower, too. This variety flowers in the second year of growth as a perennial plant, which can survive in most parts of zones 5 to 9. It looks attractive as beds and borders in the garden as well. 🌱
#F233 (100 seeds) \$3.75

SUNFLOWER MARDI GRAS BLEND DWARF

Mardi Gras blend combines attractive yellows and deep reds to produce flowers that are 5 inches wide with a brilliant display. Multiple branches with strong stems create an explosion of color. Ideal for cut flowers. Flowers reach 2 to 3 feet in height. Plant ½ inch deep. 70 days. 🌱
#F236 (50 seeds) \$2.89

SWEET PEPPERS

ARISTOTLE HYBRID

These huge bell peppers start out dark green before ripening fully to red. Plants stay a fairly compact 20 to 24 inches tall, while bearing 3 to 4-lobed fruit that are an enormous 5 inches tall and 4½ inches wide. Plants are resistant to 3 races of bacterial leaf spot plus several pepper viruses. We think that this pepper should have a place in the garden for its contribution to wonderful salads, stir-fries, and the ultimate stuffed peppers. 72 days. 🌿 🍷
#9502 (20 seeds) \$5.45

BETTER BELLE II HYBRID

It's hard to imagine a bell pepper much finer than Better Belle, but this improved version offers wider adaptability and even better production than the original. Thick-walled, 4-lobed peppers are 4 inches tall and 5 inches wide, and start out green but mature to a bright, shiny red. Vigorous plants are Tobacco Mosaic Virus resistant. We love this variety for its top-quality fruit and dependably high yields. 75 days. 🌿 🍷
#9015 (20 seeds) \$4.85

SWEET ROASTER HYBRID

This widely adapted pepper produces an abundant set of fruit that mature from green to red on plants reaching up to 30 inches in height. There are so many fruit, you will be challenged to keep up with the green roasters while many turn to red for a sweeter and more complex flavor. Fruit are normally harvested between 6 and 7 inches in length, and 1 ½ inches in width. 75 days. 🌿 🍷
#9676 (20 seeds) \$2.69

BIG BERTHA PS HYBRID

One of the largest elongated bell peppers available. 3 to 4 lobes and thick walls. This improved variety sets more and even larger fruit than the original, and is resistant to Tobacco Mosaic Virus. Excellent in the Northeast as well as other areas. This is an outstanding performer and one of our very favorite peppers. 72 days. 🌿 🍷
#9013 (20 seeds) \$4.25

CALIFORNIA WONDER PS

High yields and extra-large fruit have made this the most popular open-pollinated bell pepper. Dark-green peppers are mostly 4-lobed and blocky, about 4½ inches long and 4 inches wide, with crisp, thick walls and sweet taste. Tall plants are Tobacco Mosaic Virus resistant and produce an abundance of peppers. 75 days. 🌿 🍷
#9254 (30 seeds) \$2.95

BOUNTY HYBRID

This hybrid Sweet Banana type lives up to its name in that it puts out an incredible harvest of huge peppers that measure nearly a foot long. Peppers are typically 9 to 10 inches long and 2 inches across, and turn from light yellow to orange and finally red. Sweet flavor for eating fresh or cooked. 65 days. 🌿 🍷
#9366 (20 seeds) \$4.35

BIANCA HYBRID

This is a premium ivory bell pepper with 3 to 4 lobes and blocky shape. It retains its creamy white color for an extended period before turning orange, and finally light red. Plants are vigorous, resistant to Tobacco Mosaic Virus and provide excellent cover for these very attractive fruit. 70 days. 🌿 🍷
#9352 (15 seeds) \$4.65

SWEET BELLA HYBRID

This blocky bell pepper offers more than just good taste and large size fruit. It resists 5 races of bacterial leaf spot, phytophthora blight, tobamo virus, and has great yield potential. The 4 to 4 ½ inch fruit ripen from green to red with thick walls. 73 days. 🌿 🍷
#9866 (20 seeds) \$4.45

See pages
37 - 40
 for large quantity pricing!

SWEET AMARILLO HYBRID

A new blocky bell pepper that matures from green to yellow. Bred for productivity, Sweet Amarillo really loads up the fruit. It can grow well in the garden or even your greenhouse. 77 days. 🌿 🍷
#9891 (30 seeds) \$3.25

JUPITER

Many commercial growers know about this pepper because of the jumbo sized fruit that sells quickly at the produce stand. However, home gardeners can now benefit from the productivity, large size, thick walls, and great taste. It has resistance to TMV as well. 75 days. 🍷
#9886 (30 seeds) \$2.79

CORNO DI TORO GIALLO (YELLOW)

The bull's horn golden yellow pepper is a classic Italian heirloom, great for grilling, stuffing, for salads or for eating raw. Peppery flavor is neither hot nor very sweet. Fruit reach 8 inches in length and 2 inches in width. 85 days. 🍷
#9799 (30 seeds) \$3.15

CHINESE GIANT

Old-fashioned bell pepper is huge - 5 to 6 inches deep and wide, but grows on a compact, bushy plant. When this variety is fully ripened, it turns bright red and is very sweet. Thick-walled, blocky fruit is absolutely perfect for making stuffed peppers. Early maturity and long harvests. 75 days. 🌱🍅
#9329 (30 seeds) \$3.25

CORNO DI TORO (RED)

Italian "bull's horn" colorful sweet peppers are 8 to 10 inches long and curved like a bull's horn. Ripen to deep red and are delicious fresh in salads, but more often are sauteed or grilled. Prolific tall plants. 68 days. 🌱🍅
#9602 (30 seeds) \$3.15

CARMEN HYBRID

AAS WINNER. Sweet peppers in the Italian bull's horn style mature at least a week earlier than comparative types, making them easier for shorter-season gardeners to grow. Beautiful fruit have the traditional horn shape and grow to 6 inches long and 2½ inches wide. 75 days. 🌱🍅
#9088 (15 seeds) \$4.45

CORNITO ROSSO HYBRID

A smaller version of Corno di Toro Red and Carmen, these very sweet peppers are 5 to 6 inches long and 2 inches wide. Although delicious cut up raw into salads, their flavor deepens and intensifies when peppers are roasted or grilled. Abundant harvests are ready early in the season and keep on coming well into Fall. 60 days green; 80 days red. 🌱🍅
#9174 (20 seeds) \$3.75

DRAGONFLY HYBRID

This All America winner is a sweet tasting pepper with brilliant colors. The fruit start green, then change to purple, and finish with red. They have thicker walls than other purple peppers, and the flesh is crispy and flavorful. The interior of the fruit is a bright green, offering a beautiful color contrast in salads. Resistant to Tobamovirus 0-2. 75 days. 🍅
#9930 (15 seeds) \$4.95

DELIRIO HYBRID

Beautiful tangerine orange bell peppers are blocky, 4-lobed, and early to mature. Fruit becomes an average 4 inches tall and wide. Strong plants are resistant to both Tobacco Mosaic Virus and Tomato Spotted Wilt Virus, which makes them easier to grow in a wide variety of climates. Colorful orange bell peppers are some of the sweetest and most nutritious peppers you will ever eat. 72 days. 🌱🍅
#9518 (20 seeds) \$4.75

PAPRI PLUS HYBRID

Papri Plus is perfect for making paprika at home. Simply cut the peppers in half, remove the seeds, and dry the peppers. Once they are dry, break them into small pieces to fit in a spice grinder. Fruit average 6 inches in length and 1 ½ inches in width. Maturing from green to red, paprika is better made from red peppers which are more flavorful. These peppers taste great fresh too. Almost no heat. 70 days to green fruit and 80 to 85 days to red. 🌱🍅
#9720 (20 seeds) 2.75

EARLY SUNSATIION HYBRID

Big, blocky bell peppers are a mature green in 70 days, then turn to a beautiful golden-yellow in just two more weeks. The peppers are about 4½ inches long and wide, and are smooth and consistently well shaped. As a bonus, plants are tolerant to most pepper viruses and 3 races of bacterial spot. Extra sweet when fully yellow. 🌱🍅
#9262 (15 seeds) \$3.85

ROUMANIAN RAINBOW

Very early, colorful bell peppers start out as ivory, turn persimmon orange, then finally mature to red. Fruit is typically in all 3 color stages at one time, making for a striking appearance in the garden. Peppers are 4 to 5 inches long and very sweet. Great production and continuous fruiting on short, compact plants. 60 days. 🍅
#9744 (20 seeds) \$3.45

CUBANELLE PS

Yellow-green, frying-type pepper. 6 inch long fruits have thin walls and waxy flesh. Excellent split and fried in olive oil but also a sweet and crisp addition to salads. 65 days. 🌱🍅
#9302 (30 seeds) \$2.95

GOLDEN CALWONDER

Golden-yellow at full maturity, these peppers are thick-walled, meaty, and really sweet. Square-shaped fruits are about 4 inches long and wide, and grow upright on healthy plants. Expect great production of these beautiful peppers. 73 days. 🌱🍅
#9054 (30 seeds) \$3.45

PIMENTO L

Large heart-shaped fruit is 4½ inches long and borne on 1½ ft. tall, strong, upright plants. Pimento peppers are often canned, pickled and otherwise processed. Tobacco mosaic virus resistant. 95 to 100 days. 🌱🍅
#9359 (20 seeds) \$2.95

SWEET PEPPERS

JIMMY NARDELLO

Although technically a frying pepper, this is one of the sweetest non-bell peppers you'll ever taste. Bright red, 6 to 8 inch long peppers are only about 1 inch wide and taper from the shoulder to tip, with a curving, somewhat wrinkled appearance. They are great for adding to salads or cooking into stir-fries. 80 days. 🌱🌱🌱
#9303 (20 seeds) \$2.95

KING ARTHUR HYBRID

Very large, 4-lobed blocky bell pepper is hard to beat for its earliness and large size. Fruit becomes 4½ inches long and wide, and seems to set well even in heat. Plants provide good foliage cover and are resistant to two types of bacterial spot and three pepper viruses. 60 days green; 75 days red. 🌱🌱🌱
#9842 (20 seeds) \$3.85

FLAVORBURST HYBRID

This beautiful bell pepper starts out light apple green and ripens to a clear golden yellow. Crisp, juicy fruit has excellent, sweet flavor in a very nice size that measures 5 inches long and 4 inches wide. This fruit turns yellow very early, but plants continue to produce new peppers all season long. 65 days green; 85 days yellow. 🌱🌱🌱
#9234 (20 seeds) \$4.65

GIANT ACONCAGUA

A pepper with flavor as sweet as apples. Oblong fruit grows up to a huge 12 inches long and is produced in great abundance. Delicious in salads, stuffed, stir-fried or roasted and peeled. Can be enjoyed at the light-green stage, but is sweetest when fully ripened to red. 70 days. 🌱🌱🌱
#9146 (20 seeds) \$3.75

ORANGE MARMALADE HYBRID

Yield potential is very high, and you also have protection from bacterial leaf spot races 1-3, 7 and 8, plus Tobacco Mosaic Virus. The blocky bell shaped fruit ripen from green to orange very quickly, and measure 3.5 by 4". Ripe green fruit are available in just 55 to 60 days from transplant, and mature orange fruit in 70 to 75 days. 🌱🌱
#9872 (15 seeds) \$4.95

MAJESTIC RED HYBRID

This impressively large red bell pepper has extra-thick walls and succulent sweet flavor. Its disease package is impressive too, including resistance to Tobacco Mosaic Virus, Phytophthora root rot, and Bacterial Spot, races 0-3, 5, 7, and 8. Shiny, firm peppers are 5 to 7 inches long and 3 inches wide, starting out green then ripening to bright red. Peppers feel heavy in the hand because they are so meaty and full of refreshing sweet pepper juice. 75 days green; 85 days red. 🌱🌱🌱
#9606 (20 seeds) \$4.55

TEQUILA HYBRID

This beautiful amethyst pepper from Holland sets early and grows to a blocky 4½ inches deep and 4 inches across. Peppers begin as lavender and stay that color for a long time before fading to a lovely orange, then finally red. Strong plants are Tobacco Mosaic Virus resistant and tolerant to blossom end rot. 72 days. 🌱🌱
#9579 (15 seeds) \$4.25

GIANT MARCONI HYBRID

Awarded for its earliness, yield, size and flavor, this is one of the biggest Italian-type sweet peppers you'll find anywhere. Peppers turn from green to red, and at 8 inches long with a lobed tip, they resemble a cross between a Marconi and a Lamuyo-type pepper. They are sweetest when red and are good for salads, but really are outstanding when grilled or roasted. 63 days. 🌱🌱
#9037 (20 seeds) \$4.55

RED BULL HYBRID

This extra-large, blocky bell pepper is very thick-walled and capable of becoming just huge. Peppers begin as dark green and ripen to a candy apple red, the stage when the fruit is sweetest. Strong plants are resistant to 3 races of bacterial spot, and continue to produce throughout a long season. Mature green in 70 to 75 days. 🌱🌱
#9333 (20 seeds) \$3.75

PIMIENTO ELITE HYBRID

Very prolific variety with bright red, 3-1/2 inch oval fruit that is less heart-shaped than Pimiento L. Plants are resistant to tobacco mosaic virus. 85 days. 🌱🌱
#9066 (20 seeds) \$3.95

RED BEAUTY HYBRID

A red bell pepper widely adapted to reliably turn red in almost any area of the country. Very thick-walled, heavy fruits are blocky, and about 4 inches long. Heavy yields of bright-red sweet peppers. Resistant to Tobacco mosaic virus. 🌱🌱
#9197 (20 seeds) \$3.95

RED KNIGHT HYBRID

Big, heavy, blocky peppers measure 4½ inches long and wide, and mature to red early in the season. This variety has protection against 3 races of bacterial leaf spot and 2 pepper viruses. 65 days to green; 78 days to red. 🌱🌱
#9324 (15 seeds) \$4.25

ORANGE SUN

Beautiful deep-orange bell pepper is from 4 to 5 inches long and not quite as wide. Thick walls and very sweet flavor make this a wonderful addition to salads, stir fries, or any use when gorgeous color and sweet taste are desired. 80 days. 🌱🌱
#9475 (20 seeds) \$2.95

SWEET BANANA

Profuse harvests of 5½ to 6 inch long, tapered peppers that are wonderful fried or cut up into salads. Light green at first, they turn yellow and orange, and finally ripen to red. Compact plants. 72 days. 🌱🌱
#9316 (30 seeds) \$2.95

KING OF THE NORTH IMPROVED

King of the North just got better. This improved variety is now 10 days earlier to mature. The three or four lobed fruit mature from green to red and have good flavor. 60 days. 🌱
#9933 (20 seeds) \$3.25

KING OF THE NORTH

Large bell peppers reliably turn red even where the season is short or weather is cool. Strong, sturdy plants become loaded with big, blocky peppers that are delicious at both green and red stages. Despite the name "King of the North," gardeners in all areas can succeed with this outstanding variety. 70 days.

🌱🍷🌿
#9933 (20 seeds) \$2.95

MINI BELLE PEPPER RED

These cute little miniature bell peppers are just an inch or two long and feature very sweet flavor. Best when harvested as fully red, they are great for putting out whole on platters or cut up as sweet additions to salads. Compact plants produce an impressive amount of peppers. 55 days.

🌱🍷🌿
#9405 (20 seeds) \$3.10

RAINBOW BELL PEPPER BLEND

When you buy a packet of the Rainbow blend, you get green, red, yellow, orange and purple colored bell peppers. The multitude of colors makes this a very popular mix. What a nice presentation at a farmer's market and what a nice treat for your friends and family. Average maturity 60 days.

🌱🍷🌿
#9890 (30 seeds) \$3.65

ORANGE KING

This sweet bell pepper starts green and turns to a bright and attractive orange color. Orange King pepper is great for salads, stir fry, or eating fresh for a delicious and healthy snack. Maturity 75 for green peppers, 87 days for orange.

🌱🍷🌿
#9920 (20 seeds) \$2.95

AJI DULCE #2

Looks just like a Red Habanero, but has little or no heat. This variety is popular in Latin American countries, because the pretty 2 in. long red peppers offer the same strong aromatic essence and flavor that is found in Habanero, with only a hint of heat. Tall plants produce an abundant harvest of tasty fruits. 85 - 90 days.

🌱🍷🌿
#9541 (15 seeds) \$3.25

SHEEPNOSE PIMENTO

Before bell peppers began to dominate sweet pepper offerings, people grew more pimento peppers for their meaty, sweet flesh and thick walls. This Ohio family heirloom could convince you to try them again. The fruit has a rich, aromatic flavor that is great for eating fresh, roasted, cooked, or canned. They are sturdy, 2½ inches long and wide, rounded and ribbed with few seeds. Easy to grow with big yield potential. 70 days.

🌱🍷🌿
#9473 (30 seeds) \$3.10

MAMA MIA GIALLO HYBRID

ALL AMERICA SELECTIONS WINNER. Bright yellow-gold Italian-type sweet peppers are 7 to 9 inches long with a tapered tip. These peppers are richly flavored, juicy, and meaty, making them wonderful for eating fresh, grilling, or roasting. If you've never tasted a perfectly ripe, roasted golden pepper, you are in for a special treat. This variety can be compared to Golden Marconi, but has earlier maturity. 80 days.

🌱🍷🌿
#9620 (30 seeds) \$4.25

OZARK GIANT

Colossal bell peppers can easily reach 8 inches long and are as sweet as can be, especially when they are left to turn bright red. Plants are sturdy and quite productive, but it is good to provide a support for plants because they can be weighed down by the abundance of heavy fruit. This is an old Ozark variety with great flavor and impressive size. 85 days.

🌱🍷🌿
#9106 (30 seeds) \$3.75

YUM-YUM MIX II HYBRID

Delicious little sweet peppers are nearly seedless and the perfect size for tucking into lunch boxes or adding to an appetizer tray. We offer this blend, which has an assortment of color types that include golden tangerine, red, and yellow. Plants will become loaded with large harvests, but the peppers keep well and still stay crunchy once harvested. What a great way to get kids (of all ages) to eat their vegetables!

🌱🍷🌿
#9659 (15 seeds) \$4.65

KEY WEST X3R HYBRID

Sweet cubanelle peppers are 6 to 7 inches long and excellent for frying or eating fresh in salads. Light green, 3-lobed peppers are most often eaten in the green stage, but when they turn red, they become even sweeter and more nutritious. Vigorous plants are resistant to three races of bacterial spot. 70 days.

🌱🍷🌿
#9008 (20 seeds) \$3.95

PIMENTO

This pepper is heart-shaped with thick walls. Some chefs prefer the mild flavor of the pimento. Fruit start out green and change to bright red with 3 x 2.5" diameter. Great for salads, grilling, freezing or canning. Plants reach 24 to 30 inches. 65-90 days.

🌱🍷🌿
#9921 (20 seeds) \$3.10

GYPSY HYBRID

AAS WINNER. Outstanding yield, good looks and flavor combine with earliness to make this pepper a winner. Wedge-shaped fruit is 3 to 5 inches long, pale yellow at first, maturing to orange-red; very sweet when ripe. Plants perform well in both hot and cool regions. 60 days.

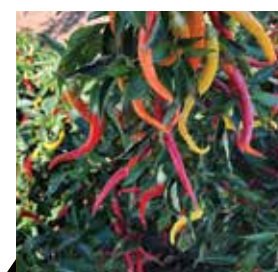

🌱🍷🌿
#9056 (30 seeds) \$4.95

NORTH STAR HYBRID

Early season 3 to 4-lobed blocky bell pepper that sets fruit even under adverse conditions. Recommended for the North and other short season areas. Deep green peppers mature to red. Tobacco mosaic resistant. 60 days.

🌱🍷🌿
#9631 (20 seeds) \$2.95

CAYENNE SWEETNESS HYBRID

Cayenne Sweetness looks hot and you will be tempted to think it is even after harvest, but it has neither heat or pungency, only the sweet taste of the true flavor of a cayenne. Bright 5 inch pods can be eaten fresh, or mixed in a salad. Cut them up and add to an omelet, or saute them with onions or shallots for a special side dish. 75 days.

🌱🍷🌿
#9894 (20 seeds) \$2.89

EARLY SUMMER HYBRID

Extra-large blocky bell peppers mature from green to bright yellow on sturdy plants that are highly productive. Thick-walled peppers are 4 to 5 inches long and nearly as wide. They are heavy and quite meaty, perfect for adding bright color and sweetness to salads and stir-fries, or try them roasted and charred on the grill. Plants are resistant to Tobacco Mosaic Virus. 70 days.

🌱🍷🌿
#9035 (20 seeds) \$3.85

SWEET PEPPERS

REVOLUTION HYBRID

This is an outstanding bell pepper variety that produces a concentrated set even in cool weather. Extra-large, blocky thick-walled peppers are four-lobed, about 4½ inches long and wide, with firm flesh turning from green to brilliant red. Resistant to phytophthora, 4 races of bacterial leaf spot, and cucumber mosaic virus. 72 days. 🌿 🍷 ❄️
#9463 (15 seeds) \$4.35

RED MARCONI

Deep-red, extremely sweet, 7 inch long Italian peppers are tapered with a blunt end. Often used for frying, but are also delicious when eaten fresh. Later to mature than a bell pepper, but also sweeter. Vigorous plants bear loads of high quality fruit. 90 days. 🍷 🍷
#9071 (30 seeds) \$3.25

YELLOW MONSTER

Huge, thick-walled elongated bell peppers start out green but ripen to a beautiful, bright golden yellow, at which stage they become extra sweet. These enormous peppers are delicious when eaten fresh, then take on an added dimension of flavor when stir-fried, grilled, or roasted. Average length is 8 inches, but it is not unusual for peppers to get even bigger. 90 days. 🍷
#9204 (20 seeds) \$3.35

ORANGE BLAZE HYBRID

AAS WINNER. Vigorous plants bear gorgeous 2 to 3-lobed peppers that turn bright orange quickly. The fruit is 3 to 4 inches long and 1½ inches wide with a very sweet flavor, providing early harvests of delicious peppers just right for cutting into salads or for use in cooked dishes. Plants are vigorous and highly disease resistant. 65-70 days. 🌿
#9414 (10 seeds) \$4.25

DIAMOND

Diamond pepper has thick flesh, with wonderful crisp flavor. The 3 to 4 lobed bell turns from a translucent ivory color, to slightly yellow, and then a scarlet red. Great for salads or fresh cut. The 24 inch plants are strong and productive. 75 days. 🍷
#9910 (20 seeds) \$2.95

SWEET PICKLE

Very compact plants are crowned by a profusion of upright peppers in colors of red, orange, yellow, and purple, all at the same time. Peppers are about 2 inches long and chunky, making for a spectacularly colorful display. While highly ornamental, this fruit is also very edible and sweet. As the name suggests, would be beautiful pickled in clear glass jars. 75 days. 🍷 🍷
#9520 (20 seeds) \$2.95

SUPER HEAVYWEIGHT HYBRID

This is a heavy pepper, and not only is it absolutely huge, it is also deliciously sweet, especially when it fully ripens to golden yellow. Thick walls and a high vitamin C content lend it well to using fresh in salads or for cooking or stuffing. 77 days. 🌿
#9266 (15 seeds) \$4.85

SWEET SUNSET HYBRID

AAS WINNER. Compact banana pepper is a high-yielding X3R variety that produces colorful, tasty peppers that are great fresh and also perfect for canning or pickling. Sweet banana peppers start out light yellow, then turn orange and finally red when mature. Average size is 7½ inches long and 1½ inches wide. Even though plants are compact, they produce early, often, and late into the season. 85 days. 🌿 🍷
#9182 (15 seeds) \$4.35

TOUCHDOWN HYBRID

A great disease-protection package offers resistance to 9 races of bacterial spot and contributes to a big production of premium-quality peppers. Strong, prolific plants can continuously set peppers that are extra large and blocky with thick walls and good, crisp flavor. They begin as green, then mature to a brilliant red. Tobacco Mosaic Virus resistant and widely adaptable to most growing areas. 72 days. 🌿 🍷
#9236 (20 seeds) \$4.55

NIKITA HYBRID

Blocky, thick-walled peppers start out creamy white before turning a beautiful shade of golden orange blushed with red. Peppers have a delicious, sweet flavor, wonderful for fresh salads or baked as a stuffed pepper. This variety is popular in Eastern Europe, where they love it for its color progression and sweet, crispy flesh. Plants are highly resistant to Potato Virus Y. 65 to 70 days. 🌿 🍷
#9192 (20 seeds) \$4.85

KING GEORGE HYBRID

King George offers the promise of great things to come. The vigorous and productive plants produce an abundance of Royal Jumbo and Extra Large fruit. Fruits mature early as they change from green to red. It is hard to have both size and early maturity with other peppers, but you can have both with the King! In addition the King has added protection from bacterial leaf spot, plus a tolerance to Phytophthora blight. Strong plants benefit from staking. 72 days. 🌿 🍷
#9932 (15 seeds) \$3.85

BISCAYNE HYBRID

This Cubanelle-type hybrid is more productive with higher quality fruit than standard strains. Light yellow-green peppers are 6-1½ long and 2-1½ inches wide with a blunt end. Wonderful for frying. Plants are medium to large, well-branched, and prolific. 65 days. 🌿 🍷
#9264 (15 seeds) \$3.85

CHOCOLATE BEAUTY HYBRID

Incredibly sweet and delicious, medium-large, 3 or 4-lobed bell peppers mature from green to an attractive chocolate color. Eat them at the fully ripe stage and you'll know that they're something special. Plants are tobacco mosaic virus resistant. 67 days to green, 85-88 days to chocolate. 🌿 🍷
#9095 (30 seeds) \$3.95

PURPLE BEAUTY

Blocky, thick-walled, dark purple bells set well not only in the crown, but also as limb set. Compact plants offer good foliage cover for the fruit. Beautiful in salads as well as stuffed. 70 days. 🍷
#9383 (30 seeds) \$3.95

SPANISH SPICE HYBRID

This favorite Mediterranean pepper has a fresh flavor that is neither hot nor sweet. Dark green peppers are 7 inches long and great for grilling or frying because their thin walls cook quickly. This variety is also known as Italic Hybrid. 65 days. 🌿
#9170 (30 seeds) \$5.65

**ANAHEIM TMR**

Also known as the "New Mexican Chile," this moderately pungent fruit is deep green, but turns red at full maturity. Peppers are 7½ inches long and 2 inches wide, and borne on tall, productive plants. Tobacco Mosaic Virus resistant. Excellent for canning, freezing or drying. 75 days. 🌱🍅

#9457 (30 seeds) \$2.95

**CAYENNE FIESTA BLEND**

This mix contains red, yellow, purple, green, and orange colored cayenne varieties. The small tapered three inch fruit are pungent. They are edible and make an excellent display for ornamental gardens. When dried, they keep their attractive colors. Plants grow up to 20 inches in height. 57 days. 🍅

#9878 (30 seeds) \$3.65

**LONGHORN HYBRID**

This chili pepper is different from others in its class, sporting 6 to 9 inch fruit that mature green to red and taper to a point, reminding us of its namesake – Texas Longhorn cattle. Pungency reaches 10,000 to 20,000 Scoville units, offering a punch for those who like it hot, and flavor just right for salsa. Plants grow to 40 inches and will require staking due to heavy yield potential. Does well in hot climates. 85 days. 🌱🍅

#9346 (15 seeds) \$3.35

**MARIACHI HYBRID**

An improved Santa Fe Grande type that offers earliness, superior size, milder flavor, and higher yields. Fleshly peppers, 4 in. long and 2 in. wide, ripen from yellow to red and have 500 to 600 Scoville units. Use them for salsas, sauces, and pickling, or try them stuffed and then grilled. Vigorous plants set fruit continuously throughout the season. 66 days. 🌱🍅

#9258 (20 seeds) \$4.85

**ANCHO 101**

When fresh and still green, these mildly hot, heart-shaped peppers are stuffed and made into chiles rellenos. When mature they are dark rust red, richly flavored, and often dried and ground into chili powder. Peppers become 4 inches long, tapering to a blunt point. 76 to 80 days. 🌱🍅

#9480 (30 seeds) \$2.95

**ANCHO SAN LUIS**

High-quality, uniform peppers are dark green, maturing to red, then mahogany. Mildly pungent peppers, 1,500 to 4,500 Scoville units, are 6 inches long and 3 inches wide. They are used fresh, but are also excellent for drying. 76 to 80 days. 🌱🍅

#9272 (20 seeds) \$2.95

**BHUT JOLOKIA (RED)**

Also known as the Ghost Pepper, this is one of the hottest peppers in the world, bearing extremely hot, red fruit about 2½ inches long. In 2007, Guinness World Book of Records named it the hottest pepper and listed it as 1,002,304 Scoville units. It has since been surpassed, but it's still plenty hot and should be handled with great care. Germination may take up to one month. 100 days. 🌱🍅

#9101 (10 seeds) \$4.45

**BIGGIE CHILE HYBRID**

This pepper follows the first hybrid Anaheim-type chile, and it is more productive with much larger fruit than other Anaheim varieties. Huge crops of 8 to 10 inch long, 4 oz. fleshy peppers appear over a lengthy harvest period. This is the classic "California green chile" and has a mild pungency. 68 days. 🌱🍅

#9512 (15 seeds) \$3.95

**CHICHEN ITZA HYBRID**

Fiery orange habanero type with 180,000 Scoville units and fruity taste matures 2 to 3 weeks earlier than open-pollinated habaneros. The peppers are also huge at 3 inches long and set in abundance on strong plants. 85 days. 🌱🍅

#9212 (15 seeds) \$4.25

**BOLIVIAN RAINBOW**

A beautiful ornamental pepper with purple foliage and flowers, it bears a profusion of fruit in a rainbow of colors on 2 to 3 ft. tall plants. The small, cone-shaped, 1 inch fruit starts out purple, but turns to yellow, orange, and finally to red, with all color stages on the plant at once. Very hot peppers are edible, but are mainly grown for their striking appearance. 80 days. 🌱🍅

#9127 (15 seeds) \$4.10

**BULGARIAN CARROT**

Beautiful, 3½ inch long, bright-orange peppers have the shape and color of a carrot, but are quite hot. Fruit is produced in abundance on short plants. The flavor of these chiles is not only hot, it is also fruity, lending itself to use in chutneys, salsas, sauces, and even hot pepper jelly. Bulgarian heirloom variety. 67 days. 🌱🍅

#9022 (30 seeds) \$3.15

**CAJUN BELLE HYBRID**

ALL AMERICA SELECTIONS WINNER. Awarded for its unique qualities and excellent performance, this variety offers miniature bell peppers with a spicy flavor that is a tasty blend of heat and sweet. Peppers are mostly 3-lobed, 2 inches wide and 3 inches long, turning from green to scarlet and finally to deep red. Expect abundant harvests of these peppers to use in salsas, Cajun cooking, or any recipe where you want a little kick. 60 days. 🌱

#9169 (10 seeds) \$2.85

HOT PEPPERS

CHILE DE ARBOL

A Cayenne type of pepper with pointed pods, 2 to 3 inches long and $\frac{3}{8}$ inch wide. They mature to dark red and are thin fleshed. Ranging from 15,000 to 30,000 Scoville units, they are usually ground into dry powder for red chile sauces or added to soups and stews. 80 days. 🌱🌶️
#9250 (30 seeds) \$3.55

GOLDEN CAYENNE

Beautiful, clear lemon-yellow cayenne peppers really load up on compact plants. Slightly curved peppers become about 4 inches long and $\frac{1}{2}$ inch wide. This is an unusual color in a hot pepper, making it a real standout in the garden. 72 days. 🌱🌶️
#9835 (30 seeds) \$2.95

SUPER CHILI HYBRID

The first hybrid chili pepper bred for increased yields and ornamental appeal. 2-1/2 inch cone shaped peppers have a thin, hot flesh that changes from green to orange to red. Borne upright on the semi-compact plant. Use fresh or dried in peppery ethnic dishes. 75 days. 🌱🌶️
#9163 (15 seeds) \$3.45

LONG RED SLIM CAYENNE

Bountiful harvest of pencil-shaped fruits that are 5 inches long and $\frac{1}{2}$ inch thick, but often curled and twisted. Flavor is red hot and best used in very hot dishes. Easily dried. 75 days. 🌱🌶️
#9425 (30 seeds) \$2.95

CAMPEÓN HYBRID

Large to extra-large jalapeno produces high yields of uniform, smooth peppers with the classic jalapeno shape ending in blunt tips. Peppers have a high pungency rating and are reliably hot. Large, vigorous plants are widely adaptable to a variety of climates and highly resistant to Potato Y virus and Bacterial Spot races 0-3 and 7-8. 75 days. 🌱🌶️
#9059 (20 seeds) \$3.75

JALAFUEGO HYBRID

One of the hottest and most productive jalapeno varieties on the market, this one yields 4-inch long peppers over a long season. These jalapenos are of top quality and turn out smooth and very dark green. Large, vigorous plants produce excellent yields and are resistant to Potato Y virus and 3 races of bacterial spot. 70 days. 🌱🌶️
#9280 (20 seeds) \$3.95

EXPLOSIVE EMBER

This ornamental pepper variety is the very essence of purple and makes a beautiful and colorful accent in the landscape or tucked into containers. Plants grow 10 to 14 inches tall and nearly as wide with deep amethyst fruit, stems, and flowers. Small, 1 inch peppers appear first as dark purple, then turn orange and finally mature to bright red. 85 days. 🌱🌶️
#9456 (30 seeds) \$3.65

EMERALD FIRE HYBRID

ALL AMERICA SELECTIONS WINNER. Extra-large and tasty jalapenos grow on vigorous, compact plants that set a huge amount of concentrated fruit. Thick-walled and glossy green, these 4 inch long peppers are great for stuffing, grilling, canning, or using in salsa. They have 2,500 Scoville units of heat, which is perfect for most tastes. Get your jalapeno recipes ready to make use of a very large harvest from these disease-resistant plants. 65 days. 🌱🌶️
#9590 (15 seeds) \$3.25

ROYAL BLACK

Absolutely beautiful ornamental pepper is the blackest of any pepper plant we've ever seen. Compact plants grow no more than 2 feet tall with deep purple-black foliage, dark stems, purple flowers, and jet-black tiny peppers. The effect is quite striking in the vegetable garden. Peppers are edible although very hot. 90 days. 🌱🌶️
#9342 (20 seeds) \$3.25

INFERNO HYBRID

Hybrid Hungarian hot wax pepper. Very productive plants bear 8-inch long, very hot banana peppers with medium-thick flesh. They mature from yellow to red and are larger than older, open-pollinated types of Hungarian Wax. Great for pickling. 60 days. 🌱🌶️
#9373 (15 seeds) \$3.85

HOLY MOLÉ HYBRID

ALL AMERICA SELECTIONS WINNER. The first hybrid pasilla pepper, which is best known for its distinctive nutty and spicy flavor in molé sauce. 7 to 9 inch long peppers start out green then mature to a dark chocolate color. They may be used fresh or dried, adding rich, smoky flavor but very little heat to dishes. 80 days. 🌱🌶️
#9447 (30 seeds) \$4.55

MESILLA HYBRID

Often seen in grocery stores labeled "finger-hots", these are bright green at first but later turn to red. Cayenne peppers are about 10 inches long and $1\frac{1}{2}$ inches wide, and are borne in abundance. Use them whenever good, spicy flavor is desired. 85 days. 🌱🌶️
#9123 (15 seeds) \$3.95

**JALAPENO M**

Fiery, thick-walled peppers grow 3 inches long and 1½ inches wide, with rounded tips. Dark green at first, then turning red. Good for fresh use or pickling; famous for nachos and other Tex-Mex dishes. 75 days. 🌱🌶️

#9348 (25 seeds) \$2.95

**JALORO**

This is the first yellow jalapeno pepper developed, from the Texas Agricultural Extension Service. Fruit is a beautiful golden-yellow before turning orange then red, making for a beautiful show on the compact plants. Peppers are just as hot as regular jalapenos. 70 days. 🌱🌶️

#9567 (30 seeds) \$3.25

**LARGE RED THICK CAYENNE**

Concentrated set of wrinkled, very pungent fruit, 6 inches long and 1¼ inches in diameter. Very pungent, even when small. Useful for sauce and drying. 76 days. 🌱🌶️

#9560 (30 seeds) \$2.95

**HUNGARIAN WAX**

Medium-hot peppers, especially good for pickling. Canary yellow, then bright red at full maturity. 6 to 8 inches long and 2 inches across. Plants are 20 to 24 inches tall. 70 days. 🌱🌶️

#9320 (30 seeds) \$2.95

**GOLDEN GREEK PEPPERONCINI**

This strain from Greece is somewhat rare and prized by those who want the peppers for pickling. Because they are smaller and lighter in color than the regular Pepperoncini, homemade jars of these golden peppers look more like the commercial product. Same hot flavor as the other Pepperoncini, and the perfect additions to Greek salads. 62 days. 🌱🌶️

#9313 (30 seeds) \$2.95

**GUAJILLO**

Medium-hot peppers with a distinctive flavor are 4 to 6 inches long and deep orange-red with brown tones. The name means "little gourd" for the rattling sound the seeds make in the dried pods, which are good for adding to salsas and sauces. 90 days. 🌱🌶️

#9638 (20 seeds) \$3.75

**GARDEN SALSA HYBRID**

The name of this pepper says it all, because it is just perfect for making into homemade salsa! The heat level is in the medium range, about the same as Jalapeno. Also useful for picante sauce and various other Mexican dishes. The smooth green peppers are 8 to 9 inches long and 1 inch wide, ripening to red. 73 days. 🌱🌶️

#9062 (20 seeds) \$3.85

**FLAMING FLARE HYBRID**

ALL AMERICA SELECTIONS WINNER. This is a Fresno-type pepper, bearing brilliant red fruit that are cone-shaped and about 4 inches long. In their green stage, they are fairly similar to a jalapeno, but the mature red peppers develop more heat and a complex flavor described as fruitier and smokier. Enjoy their unique flavor in hot sauce and salsas, as well as cut up fresh on tacos. Succeeds not only in hot, dry areas, but also in a wide range of growing conditions. 75 days. 🌱🌶️

#9330 (15 seeds) \$3.75

**MUCHO NACHO HYBRID**

Jumbo jalapeno that is not only longer than the standard jalapeno, but also wider, heavier, and hotter. Very vigorous plants are excellent producers of these 4 inch long peppers. Beautiful fruit ripen to red upon full maturity. 75 days. 🌱🌶️

#9543 (20 seeds) \$3.45

**NUMEX BIG JIM**

The largest of New Mexican varieties, this pepper has pods up to 12 inches long that weigh as much as 4 ounces. Their size makes them a favorite for chiles rellenos. Medium-hot pungency and plants set fruit under hot, dry conditions. 80 days. 🌱🌶️

#9522 (30 seeds) \$3.75

**NUMEX JOE E. PARKER**

This very productive version of NuMex 6-4 offers 6 to 7 inch thick-fleshed peppers that turn from green to red. They are relatively mild in flavor and ripen earlier than most other peppers of this type. 65 days. 🌱🌶️

#9224 (20 seeds) \$2.95

**PASILLA BAJIO**

8 to 10 inch long cylindrical peppers are thin walled, and dark green ripening to dark brown. They have less than 250 Scoville units and are mainly used dried for their rich, smoky flavoring in sauces. 75-80 days. 🌱🌶️

#9340 (30 seeds) \$3.25

HOT PEPPERS

TRICKED YOU HYBRID

This completely heat-free jalapeno is an improved version of the popular Fooled You Hybrid. Get jalapeno flavor without the heat or mix with hot jalapeno varieties to create the exact heat level you want in hot sauces and salsas. Improvements include disease resistance to Bacterial Spot, races 0-3, 7, and 8. Expect large harvests of these peppers that are 4½ inches long and 1½ inches wide. 90 days. 🌿 🍷
#9671 (15 seeds) \$4.25

TABASCO

Fiery hot, this is the one that has made Tabasco sauce famous. Green leaf strain that grows best in the South and East. Light yellow-green peppers turn to red and grow on tall plants. 80 days. 🍷 🍷
#9610 (30 seeds) \$2.95

SHISHITO

Small, thin-walled glossy green peppers are popular as tasty appetizers that are most often pan-fried in a little olive oil and sprinkled with salt. Usually the flavor is bright and a little sweet, but every so often a pepper will appear with a shot of spicy heat. It is said that 1 out of 10 to 20 peppers will be hot. It is this element of surprise that makes eating these peppers so much fun. Easy-to-grow plants have a spreading habit and produce very abundant harvests. 60 days. 🍷 🍷
#9564 (30 seeds) \$4.45

SUREÑO HYBRID

Excellent production, flavor, and size make this serrano-type pepper great for the home gardener as well as commercial production. Firm, large peppers are uniformly straight with a solid core and hold up well even after picking. Fairly compact plants yield an early harvest and are highly resistant to Potato Y virus. 75 days. 🌿 🍷
#9515 (30 seeds) \$4.45

FISH PEPPER

Very unusual and ornamental pepper plant is variegated both on the foliage and the peppers themselves. Both leaves and fruit are striped with creamy white and green, with the peppers eventually turning orange-red. Very hot fruit, 1 to 2 inches long, was used to season fish and shellfish in Baltimore and Philadelphia back in the 1930's and 1940's. 75 days. 🍷 🍷
#9763 (30 seeds) \$2.95

CHILTEPIN

This is a tiny pea-shaped chile that is no more than ¼ inch long and wide. This variety grows wild throughout Mexico and some parts of the Southwestern U.S. They are among the hottest peppers available, measuring about 100,000 Scoville units. The plants can grow to 4 feet and are capable of living for years where the climate allows. 95 days. 🍷
#9148 (20 seeds) \$2.95

CHILLY CHILI HYBRID

ALL AMERICA SELECTIONS WINNER. This ornamental pepper seems to explode in a riot of color, bringing bright orange and red to landscapes or containers. Chilly Chili is safe to use around children because the peppers are not pungent. 2 to 2½ inch long fruit are borne above the foliage and start out greenish-yellow, then turn to orange, and finally to dark red. Plants grow about 1 foot tall and wide. 🌿 🍷
#9375 (10 seeds) \$3.25

HERNANDEZ HYBRID

Hernandez is a hybrid Fresno type pepper that has a lot in common with a jalapeno. The fruit are conical, 2-3 inches in length, with thick flesh that can be eaten fresh, grilled, or minced in salsa. The flavor is tangy and smoky with a hint of sweetness. Plants reach 22 to 24 inches in height and the fruit have medium pungency. 75 days. 🌿 🍷
#9931 (20 seeds) \$3.45

PEPPERONCINI

4 inch long, slightly wrinkled peppers taper to a blunt, lobed end and are very popular for pickling. They have a mildly hot but exciting flavor, and are commonly jarred for use in Greek salads and salad bars. Expect an abundant harvest. 62 days. 🍷 🍷
#9278 (20 seeds) \$3.45

PIMIENTO DE PADRON

This pepper from Spain is traditionally used in its immature green stage, when it is picked quite small and fried in olive oil and served as a tapa. When harvested small, peppers are mild, but get hotter as they grow. At maturity, they are about 2½ inches long and 1¼ inches wide, deep red and fiery hot. 65 days. 🍷 🍷
#9133 (30 seeds) \$3.55

POBLANO L

Dark-green peppers mature to almost brown and are 5 inches long and 2½ inches wide with a slight taper and blunt end. These are a little longer and milder than Ancho 101, with Scoville units from 600 to 1,800. 75 to 80 days. 🍷 🍷
#9832 (30 seeds) \$3.95

PURPLE JALAPENO

The fruit of this jalapeno turns dark purple and stays that way for a long time before finally ripening to red. Peppers are somewhat larger than regular jalapeno, but with the same thick walls and fiery heat. Great for use in salsas. 75 days. 🍷 🍷
#9437 (30 seeds) \$3.25

**SUPER KHI**

Super Khi offers a beautiful ornamental plant with a semi-compact growth habit, sporting an abundance of hot chili peppers that are borne upright. The vigorous plants and pungent fruit provide a lasting source of delicious flavorings for Chinese or Thai dishes. Fruit mature from green to red, and are best harvested when red at 1.5 inches in length. 🌱🌶️

#9861 (20 seeds) \$3.50

**SPORT**

This is popular for its use as a pickled pepper to go on hot dogs and other sandwiches. It is especially well known as an essential condiment in a Chicago-style hot dog. Peppers resemble Tabasco peppers, but are larger, about 1½ inches long and ½ inch wide. Medium-hot. 75 days. 🌱🌶️

#9044 (20 seeds) \$2.90

**TRINIDAD PERFUME**

This wonderful seasoning pepper from Trinidad may look like a typical habanero, but it has no heat. What it does have is delectable pepper flavor that adds so much to make Caribbean dishes really special. Pendant peppers are 1 to 1½ inches long and mature to golden orange-yellow. Plants are tall and prolific. 80 to 85 days. 🌱🌶️

#9748 (15 seeds) \$3.25

**WHITE HABANERO**

These creamy white peppers are smaller than the typical habanero, only about 1½ inches long and ½ inch across, but with the same habanero heat and distinctive fruity flavor. Expect abundant harvests of these very hot peppers. 90 days. 🌱🌶️

#9857 (30 seeds) \$3.85

**FLAMING JADE HYBRID**

2016 ALL AMERICA SELECTIONS WINNER. This hybrid serrano combines big, extended harvests of large, firm peppers with resistance to 3 races of Bacterial Spot, Potato Virus Y, and nematodes. These peppers are 4 inches long and 1 inch wide with 3,000 Scoville units of heat, making them great for giving an extra kick to salsas and pico de gallo. 75 days. 🌱🌶️

#9635 (20 seeds) \$4.75

**CARIBBEAN RED**

Seed for this habanero variety was found in the Caribbean, and grows a fiercely hot pepper that is hotter than the regular orange habanero. Dried samples of Caribbean Red measured 445,000 Scoville units whereas regular habanero tested at about 260,000 Scovilles. This pepper must be used carefully, but is wonderful for salsas, marinades, and making your own hot sauce. Bright red fruits are about 1½ inches deep and 1 inch wide and have flavor with fruity overtones. 110 days to red. 🌱🌶️

#9240 (30 seeds) \$3.65

**LEMON DROP**

This popular seasoning pepper from Peru has a hot, citrusy flavor and is somewhat rare outside of South America. Robust plants become covered with the 2 inch long peppers that contain very few seeds and ripen to a beautiful bright sunshine yellow. True to their name, when peppers are cut open, they release a pleasant aroma of fresh lemons. These are very hot and easily dried for storage. 90 days. 🌱🌶️

#9193 (20 seeds) \$2.95

**MEDUSA**

Narrow, twisted, 2½ inch long peppers stand upright above diminutive plants, in a stunning display of color – ivory to yellow, orange, and finally bright red, with all color stages appearing together. Plants grow no taller than 6 to 8 inches and become covered with colorful peppers. Medusa is wonderful for planting in landscape borders or small containers. These peppers are non-pungent. 🌱🌶️

#9025 (10 seeds) \$2.95

**SCOTCH BONNET RED**

A *Capsicum chinense* very similar to Habanero, but later in maturity with fruit that is not quite as long. Tall, vigorous plants bear peppers that begin as green but mature to red. Fruity aroma and same blistering heat as the Habanero. Now available in red and orange varieties. 120 days. 🌱🌶️

#9526 (30 seeds) \$3.75

**SERRANO**

Very hot chile called for in many recipes. Candle-flame shaped fruit are 2¼ inches long, green, then red at full maturity. Borne on attractive 30 to 36 inch branching plants. Suitable for salsas and sauce recipes as well as eating fresh. 75 to 80 days. 🌱🌶️

#9609 (30 seeds) \$3.10

**TEPIN**

Also known as the common bird pepper, this is the tiny ovoid form that is about the size of a pea. Extremely hot, the sensation reportedly disappears rapidly. Plants are prolific, growing wild in parts of the southern U.S. 90 days. 🌱🌶️

#9800 (20 seeds) \$2.90

**SCOTCH BONNET ORANGE**

This form of Scotch Bonnet turns orange when fully ripe. While it resembles the habanero, its flavor is fruitier, making it a favorite in Caribbean cooking for pairing with tropical fruits. At 200,000 Scoville Units, it is searingly hot but delicious when combined with other food. 75 - 100 days. 75 - 100 days.

#9286 (30 seeds) \$3.75

HOT PEPPERS

PAQUIME HYBRID JALAPENO

Enormous jalapenos that are bigger than any we have trialed in the past. The fruit are nearly 5 inches long and produce great yields of outstanding fruit that turn from green to red. The heat does not linger on your tongue. Flavors and aroma are more complex than most jalapenos, so Paquime is really great for making salsa. It is also great for grilling or stuffing. 70 days to mature green fruit. 🌱🌱🌱🌱🌱
#9875 (20 seeds) \$4.45

NUMEX SUAVE ORANGE

Developed by the Chile Pepper Institute, this pepper has all the wonderful flavor of a habanero but with very little heat, only about 800 Scoville units. The distinctive habanero citrus-like aroma and flavor remains and many people can enjoy it better without the searing heat of a regular habanero. The word "suave" means smooth or mild in Spanish, and that is descriptive of the mellow flavor this variety delivers. 95 days. 🌱🌱🌱
#9735 (20 seeds) \$4.45

THAI HOT ORNAMENTAL

These compact, mound-shaped plants have tiny leaves and grow no more than 1 foot tall. They become covered with very hot, ½ to 1 inch long red fruit that is held upright on the plant, creating quite a showy display. 90 days. 🌱🌱🌱
#9580 (30 seeds) \$3.10

HABANADA

This new heatless habanero has all the exotic, floral flavor of the habanero pepper with absolutely none of the heat. Hence, the clever name: haba (for habanero) nada (Spanish for nothing). Expect abundant harvests of these 2 to 3 inch long peppers when the plants have heat, full sun, even watering, and not too much nitrogen. Harvest peppers when bright orange for their best flavor. Bred by Dr. Michael Mazourek of Cornell University. 70 days green; 90 days orange. 🌱🌱🌱
#9670 (15 seeds) \$3.45

HABANERO

A blistering-hot pepper 40 times hotter than Jalapeno! Among the most potent ones we sell. Wrinkled fruit is 1 inch long and 1½ inches wide, with a tapered end. Peppers begin as light green then turn to golden-orange and are loaded onto 36 inch tall plants. 90 to 100 days. 🌱🌱🌱
#9536 (30 seeds) \$3.65

HABANERO (BROWN)

This extra-large habanero is not only special for its size and productivity, it also ranks as one of the world's hottest peppers. Expect an impressive harvest of these 2½ inch long chocolate-brown peppers, but handle with care as these fruit are searingly hot. This is a beautiful and very tasty habanero. 85 days. 🌱🌱🌱
#9836 (20 seeds) \$2.95

HABANERO (RED)

This bright-red version of Habanero is one hot pepper – a staggering 285,000 Scoville units! The fruit shape and size are much like the regular Habanero, wrinkled 1 to 1½ inch long peppers with a tapered end. These peppers turn a brilliant red upon maturity and grow in abundance on 3½ foot tall plants. 90 to 100 days. 🌱🌱🌱
#9586 (20 seeds) \$2.95

MAYAN RED

Fruit of this unusual habanero average 3 to 4 inches in length with a slender width. Fruit have a fruity habanero flavor with high pungency. Sturdy plants reach 36 inches, and offer good cover against sunburn. Produced commercially in the Yucatan Peninsula, this variety is very productive. It even performs well in cooler climates. 90 days. 🌱
#9775 (20 seeds) \$3.45

ORANGE JALAPENO HYBRID

This pepper has a beautiful orange color that eventually turns to red as it fully matures. The red fruit are sweeter than the orange fruit. Plants reach 18 to 24 inches. Average pungency. 90 days. 🌱🌱
#9752 (15 seeds) Price pending crop arrival. Check website for availability.

CAROLINA REAPER

Ranked as the hottest pepper in the world by Guinness, and registering at over 1,500,000 scoville heat units, this is not a pepper for the timid. The fruit average 1.5 to 2 inches in length and have a nice fruity flavor if you are able to dilute the heat in your favorite dish to something you can eat. Fruit look like a little bumpy devil with a pointed tail. Reaper seeds are difficult to germinate and require a heating pad and thirty days just to sprout. 95 days.
#9783 (10 seeds) \$5.45

EARLY JALAPENO

Early maturity is the hallmark of this jalapeno. The 3 inch fruit are 1 ½ inches wide, and have plenty of pungency. Great for fresh salsa, or in cooking. 67 days. 🌱
#9819 (30 seeds) \$2.75

TAJIN HYBRID

Tajin produces excellent yields of 4 inch by 1.5 inch jalapeno fruit that are dark green in color. Pungency is medium to hot – 4,000 to 6,000 scovilles. 68 days. 🌱🌱
#9811 (20 seeds) \$2.95

**SEDONA SUN HYBRID**

These ornamental peppers put on a dazzling display in gardens or containers, with masses of bright lemon-yellow and deep apricot-orange fruit on small, spreading mounds. Plants grow 9 to 12 inches tall and spread up to 16 inches with the small, hot peppers held above the foliage. Space plants 12 to 14 inches apart in the garden, or grow in containers of your choice. 72 days. 🌱🔥

#9143 (10 seeds) \$3.25

**TIME BOMB HYBRID**

Hot cherry peppers start out dark green but turn to bright red when they are ready for harvest. Disease-resistant plants produce abundant harvests of these round to slightly pointy peppers. With a Scoville rating just above 1,000, these cherry peppers pack a pleasant heat and can be enjoyed as pickled peppers or as appetizers stuffed with cheese.

65 to 70 days. 🌱🔥
#9308 (15 seeds) \$3.95

**YELLOW MUSHROOM**

So named because of its shape resembling a mushroom, it is also sometimes known as a squash pepper for its resemblance to a patty-pan squash. Maturing to golden yellow, this is an extremely hot fruit.

Abundant harvests of these thin-skinned, 2 inch peppers. 80 days. 🌱🔥

#9626 (20 seeds) \$2.55

**HOT PAPER LANTERN**

This pepper is related to the habanero, but offers earlier maturity and larger fruit that ripens to bright fire-engine red. 3 to 4-inch elongated, crinkled fruits are as fiery hot as regular habaneros. Tall plants bear a great abundance of peppers that continue bearing all season and may be more reliable than habanero in colder climates.

90 days. 🌱🔥
#9450 (30 seeds) \$3.95

**ROULETTE HYBRID**

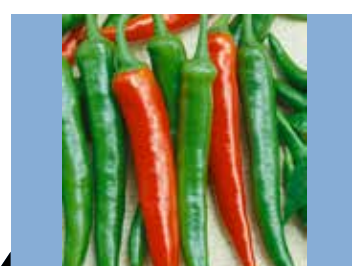

A 2018 All-America Selections winning habanero that has no heat. It offers all the flavors of a traditional habanero, but it will not trouble those who can't eat a hot pepper. In addition, the variety is early-maturing and produces up to 100 peppers per plant. Fruit matures to a brilliant red.

85 days. 🌱🔥
#9864 (10 seeds) \$2.95

**HOT SUNSET HYBRID**

ALL AMERICA SELECTIONS WINNER. A hot banana/Hungarian wax type of pepper that is earlier and more prolific than other versions. Delicious, thick-walled peppers are 7 inches long and very colorful, turning from yellow to orange and finally red. They are just right for grilling, roasting, pickling, or eating fresh. Tall plants are resistant to Tomato Spotted Wilt Virus as well as bacterial leaf spot races 0-3, 7 and 8. 65 days. 🌱🔥

#9017 (15 seeds) \$3.95

**THAI SCORPION HYBRID**

This may be just what you are looking for - a much hotter Thai hot pepper having between 75,000 and 85,000 scoville units of heat. You can grow Thai Scorpion in a container, but you will need support for the 26 to 30 inch tall plants that have very impressive and heavy yield. Peppers are pendant with good leaf cover protecting them from sunburn. The 5 to 6 inch fruit start as a dark green color and progress to a brilliant glossy red. 🌱🔥

#9909 (20 seeds) \$3.10

**MEXIBELL HYBRID**

All America winning bell pepper with mild pungency - yes it is a hot bell (100 to 1000 scoville units). Plants grow up to 24 inches tall, producing plenty of 3 and 4 lobed fruit that measure 3.5 by 3.75 inches. TMV tolerant. 70 days. 🌱🔥

#9900 (20 seeds) \$2.95

**SAHUARO HYBRID**

This large, green chile pepper is a more vigorous version of Big Chile and is the new generation of this popular type of pepper. Stronger, disease-resistant plants yield early harvests of huge chiles that can become 9 inches long. Average pungency is a mild 500 Scoville units. These peppers are great for roasting or used fresh in all your favorite spicy dishes. 68 days. 🌱🔥

#9493 (15 seeds) \$3.95

**CARRANZA HYBRID**

Many people have difficulties growing large size ancho peppers in hot areas. Carranza was bred to produce large peppers even in hot conditions, and that will make many growers and gardeners happy. Fruit reach 6 to 7 inches in length, and 3 inches in width, with just a touch of heat - 500 scoville units. Harvest fresh for poblano, or dry them for ancho. Color changes from dark green to red. 68 days. 🌱🔥

#9771 (15 seeds) \$4.15

**GIGANTIA JALAPENO HYBRID**

Wow. These smooth, giant, meaty peppers grow up to 5 inches in length. Fruit are meaty with medium heat. Great for stuffing or grilling or salsa. Plants reach 18 to 24 inches. 70 days. 🌱🔥

#9844 (20 seeds) \$3.75

**SAN JOAQUIN HYBRID**

All-America Selections is calling this jalapeno pepper a game changer. You can harvest up to 50 4-inch fruits per plant, and all at once! Perfect for canning, pickling or making stuffed and roasted peppers. Put them in your favorite soup or salsa. Because they can hold on the plant longer than most jalapenos, you can take that weekend trip and they will be there when you come home. Pungency 2500 to 6000 scovilles. 60 days. 🌱🔥

#9934 (15 seeds) \$3.95

BIQUINHO RED

Biquinho red peppers have a smoky and fruity taste and are perfect for pickling or garnish. Add them to some of your favorite dishes and wait for your guests to ask what the interesting flavor is. Fruit are 1 inch in length, turning from green to red. Plants grow up to 24 inches tall. 500 to 1000 units of scoville pungency. 90 days. 🌱

#9901 (20 seeds) \$3.95

BIQUINHO YELLOW

Biquinho yellow peppers are sometimes pickled and used in salads, or on pizza, or in sandwiches. They are great for eating fresh, or in soups. The Brazilian word Biquinho means little beak, and it refers to the tip of the 1 inch ripe fruit. The fruit turn from green to yellow as they mature. 500 to 1000 scoville units of pungency. Plants grow up to 24 inches tall. 85 days. 🌱

#9902 (20 seeds) \$3.95

BLAZING BANANA HYBRID

This early maturing banana pepper averages 9 inches in length and 1.75 to 2 inches in width. It produces a large and heavy set of peppers on a strong plant that protects the fruit. With excellent resistance to races 1-3 of bacterial leaf spot, you have a better chance of harvesting a large crop. 3,000 to 6,000 scoville units of pungency. Great for soups, stews, salsa, grilling and for a deli style sandwich. 70 days. 🌱🌿

#9904 (20 seeds) \$3.95

TRINIDAD SCORPION

This extremely hot pepper (1.2 million scoville units) with some individual plants reaching 2 million scoville units. It was the world record holder in 2012. Fruit are blistering hot with a fruity background flavor. Be sure and use caution when handling fruits, and make sure children do not handle them. A native of Trinidad and Tobago, the pointed tip of the fruit looks like a scorpion stinger. Germination takes a long time. 70% germination. 90 days. 🌱

#9906 (10 seeds) \$5.45

RED PETER

This rare pepper was discovered by journalist Frank Tolbert while he was working for the Dallas Morning News. He had an interest in chili peppers of all kinds. One of his favorites had an unusual shape. Some believe the fruit look anatomical. Frank made what he called some of the best chili in Texas using Red Peter peppers. Flavorful and fruity, Red Peters are good roasting peppers. They are also hot - 10,000 to 25,000 scoville units. The fruit are 4 to 6 inches in length and mature from green to red. Plants grow 20 to 30 inches in height. 80 - 85 days. 🌱

#9893 (10 seeds) \$4.69

SERRANO TAMPIQUENO

A traditional serrano heirloom that has three times more heat than an average jalapeno. However, the heat value is variable from plant to plant and it tends not to overpower your food, although it can be very hot. Fruit are 3 to 4 inches in length and change from green to red while maturing. Good for salsa, sauces and soups. 75 days. 🌱

#9908 (20 seeds) \$2.95

WICKED GHOST HYBRID

Blistering heat is the hallmark of this hybrid Ghost pepper. armed with more than 800,000 scoville units of heat. Be careful handling, consuming, and preparing. This bright red and pointed fruit is 2 1/2 inches in length and has higher yield potential than other open pollinated Ghost peppers. 90 days. 🌱🌿

#9935 (15 seeds) \$3.55

MOSQUETERO HYBRID

Very large ancho peppers are perfect for stuffing into chiles rellenos as well as use in chili and other dishes where mild to moderate heat is needed. Deep-green, flat and tapered peppers mature to 6 inches long and about 3 inches wide, with a high percentage of 2 lobes. Tall, large plants are high yielding and perform well even under cooler conditions. 90 days. 🌱

#9354 (15 seeds) \$4.15

PURPLE FLASH

Striking flashes of bright purple foliage stand out against almost black leaves while new growth is splashed with creamy white. Small glossy black peppers are hot and although mainly ornamental, are also edible. Plants grow about a foot tall with a slightly wider spread and a layered habit. Perfect for containers or planting in gardens, Purple Flash survives summer heat while still making an exotic display.

#9210 (20 seeds) \$3.95

**CIENFUEGOS YELLOW HYBRID**

Cienfuegos yellow is perhaps the most fragrant and fruity of the series. It still has the heat, ranging from 250,000 to 350,000 scoville units. High yield potential and early maturity are the hallmark of this impressive series. 80 - 85 days. 🌱🍴

#9897 (20 seeds) \$3.45

**CIENFUEGOS ORANGE HYBRID**

Cienfuegos literally means "100 fires", but you should consider that this variety is 200,000 to 300,000 fires (scoville units) – a very hot pepper. Fruit are 1.5 by ¾ inches. This hybrid is earlier than open pollinated habaneros and has bigger yields. Make your favorite salsa or hot sauce using this pepper. 80 - 85 days. 🌱🍴

#9898 (20 seeds) \$3.45

**CIENFUEGOS RED HYBRID**

Step the heat up a notch with the Cienfuegos Red, packing 300,000 to 400,000 scoville units. Break new ground and make a hellfire chili that only a true chilihead can appreciate. 2 x 1 inch fruit turn a brilliant red and complement the Cienfuegos series of kicking hot habaneros. And like the others, you will be impressed by the yield and early maturity.

80 - 85 days. 🌱🍴
#9899 (20 seeds) \$3.45

**MAMMOTH HYBRID**

This pepper is big, with thick flesh - 4.5 x 1 inch. Pungency is 2000 to 5000 scoville units and perfect for poppers, stuffed with cheese and fresh cilantro. They tend to set fruit for an extended period. Resistant to PVY and TMV. 70 - 75 days. 🌱🍴

#9905 (20 seeds) \$4.15

**TWILIGHT**

This ornamental pepper has green foliage. It is similar to Autumn Time, with the exception of the foliage color. Each plant produces multiple upright multi-colored pods. The contrasting fruit colors offer an attractive display. Plants reach up to 22 inches in height. 65 - 85 days. 🍴

#9523 (20 seeds) \$2.95

**DRAGON CAYENNE HYBRID**

We love hot peppers, and we hope you will love the Dragon Cayenne. It can be used for fresh or dried fruit. It offers that kind of kick that lingers on your tongue. Strong plants produce an abundance of fruit, that are fiery finger-size pods. Good production over a long growing season. 15,000 to 25,000 scoville units. 65 - 70 days. 🌱🍴

#9903 (20 seeds) \$3.75

**AUTUMN TIME**

This ornamental pepper has dark purple foliage. It is similar to Twilight pepper, with the exception of the foliage color. Each plant produces multiple upright multi-colored pods. The contrasting fruit colors and foliage color provide an attractive display. Plants reach up to 22 inches in height. 65 - 85 days. 🍴

#9895 (20 seeds) \$2.89

**ANCHO RANCHERO HYBRID**

Ancho Ranchero offers large fruit that are 5 - 5.5 inch, by 3 - 3.5 inch fruit. The plants are large with plenty of cover to protect the fruit. The dark green fruit ripen to bright red. You can use either color for fresh cooking (poblano), and the red fruit can be dried for making powder (ancho). Pungency is 1000 to 2000 scoville units – which is a mild heat. TMV resistant. 70 - 77 days. 🌱🍴

#9896 (20 seeds) \$3.10

**TAM JALAPENO**

This jalapeno has less pungency than most jalapenos. The scoville heat units are 1000 to 1500 when not under stress. Most jalapenos have 3000 to 6000 scoville units. The 3" fruits are shiny and dark green, and early to mature. Tam jalapeno also has disease resistance thanks to Texas A&M university breeding. Enjoy the jalapeno flavor without as much heat. 70 days. 🍴

#9911 (20 seeds) \$2.95

ANTIGUA

This beautiful heirloom eggplant is white with streaks of violet that fade to soft lavender. Eggplants grow to about 8 inches long and 3 inches across and have creamy white flesh that is tender and very mild tasting. 75 days. 🌱 🍷

#7012 (20 seeds) \$3.95

BLACK BEAUTY

This variety is nearly 100 years old, and still well-loved as the classic big-fruited black eggplant. Glossy fruits become quite large but are well shaped, and perfect for slicing into thick eggplant steaks for grilling or eggplant Parmesan. 80 days. 🌱 🍷

#7047 (30 seeds) \$3.15

CASPER

Compact plants bear lots of pure white 7 inch long eggplant with tender, mild flesh. Plants seem to perform well even in cool weather, so gardeners in short-season areas can also expect large harvests. You will be pleasantly surprised how sweet and delicately textured they are. Let their mild flavor and meaty texture stand out in dishes where vegetables are the centerpiece. 70 days. 🌱 ❄️

#7148 (30 seeds) \$3.10

FAIRY TALE HYBRID

ALL AMERICA SELECTIONS WINNER. Expect early harvests of these stunningly attractive, elongated lavender fruit with white stripes. The white-fleshed, non-bitter eggplant is best picked when about 4 inches long and while the skin is still shiny. Dwarf, 18 to 24 inch plants are ideal for containers as well as for planting in the garden. 50 days. 🌱 🍷

#7500 (15 seeds) \$4.45

EPIC HYBRID

One of the most popular eggplants on the market. The high quality, large size, teardrop shaped fruit sport an attractive glossy black color, and are 7 inches by 3 inches. Plants average 2 feet in height and are very productive. TMV tolerant. 62 days. 🌱 🍷

#7701 (20 seeds) \$3.65

FENGYUAN PURPLE

This slender Asian eggplant is one of the longest available. Its beautiful purple skin is so thin that peeling is unnecessary and creamy white flesh is reliably mild with no bitterness. Plants produce an abundance of fruit that can grow well over a foot long. Easy to grow and wonderful for grilling or adding to stir-fries. 65 days. 🌱 🍷

#7951 (30 seeds) \$3.85

FLORIDA HIGH BUSH

This is an old variety bred in Florida in the 1940's for use in commercial fields. Named for its large upright plants that keep fruit off the ground, the truly special thing about this variety is its enormous eggplant. Glossy blackish-purple eggplants can easily become 10 inches long. Fruit sets throughout a long season and are perfect for grilling, frying, stuffing, or baking. 85 days. 🌱 🍷

#7157 (30 seeds) \$3.55

GRETTEL HYBRID

AAS AWARD WINNER. The third in a series of petite varieties, these beautiful, shiny white eggplants grow in clusters on compact plants that can fit into smaller gardens or large containers. Despite its size, you can expect big harvests of these mild, tender fruit that are perfect for grilling or sauteing in olive oil. Pick eggplant at 3 to 4 inches long for the finest quality, and harvest often to encourage more fruit set. 55 days. 🌱 🍷

#7817 (15 seeds) \$4.65

ORIENT EXPRESS HYBRID

Slender, glossy-black Asian eggplant is 8 to 10 inches long with thin skin, mild flesh, and delicate flavor. It matures very quickly and sets fruit in a wide range of temperatures, which makes harvests last even longer. Enjoy these versatile eggplant grilled, roasted, or stir-fried. 58 days. 🌱

#7166 (30 seeds) \$4.45

LITTLE FINGERS

These little eggplants grow in clusters of 3 or more slim fruit, and can be harvested when no longer than your little finger. However, you can also let them grow longer at no sacrifice to their mild, sweet taste. 68 days. 🌱 🍷

#7033 (30 seeds) \$3.65

LISTADA DE GANDIA

This Italian heirloom eggplant is rightfully considered one of the most beautiful of all eggplants for its rich purple striping on creamy white skin. It also has a graceful teardrop to round shape with fruit that can grow to 6 inches long. Mild white flesh is delicious and sweet with absolutely no hint of bitterness. 75 days. 🌱 🍷

#7255 (30 seeds) \$3.25

LOUISIANA LONG GREEN

A Southern heirloom variety that produces some of the mildest, sweetest eggplant there is. If you have never tried eggplant that is pale green when ripe, you may be surprised by its tender white flesh and rich, nutty flavor that is delicious. Fruits grow abundantly in warm weather and become 7 to 9 inches long and 3 inches wide. 80 days. 🌱

#7416 (30 seeds) \$3.65

NADIA HYBRID

Glossy, dark, purple-black skin and outstanding production are what make this variety really special. Its classic Italian shape is an elongated oval up to 9 inches long and fruit has a very firm flesh with a slow seed development, prolonging fruit quality. Sets well even under cool conditions. 70 days. 🌱🌸🌧️
#7172 (30 seeds) \$4.45

PATIO BABY HYBRID

AAS WINNER. This compact variety yields an abundance of personal-sized, 2 to 3-inch long eggplants that are thornless for easy harvesting. The small fruits mature very early but continue bearing for a long season. Deep purple to black in color with a teardrop shape, this variety is just perfect for growing in containers or small garden spaces. Very early maturity time is great for impatient gardeners. 45 days. 🌱
#7246 (15 seeds) \$4.45

PINGTUNG LONG

Named after its town of origin in Taiwan, this slender violet-purple eggplant becomes at least 12 inches long and has an excellent, mild flavor and tender white flesh. Produces continuous, large harvests despite summer heat and humidity. 65 days. 🌱🌧️🌧️
#7469 (30 seeds) \$3.15

ROSITA

Large size and lovely pink-lavender skin is part of what make Rosita special. Another characteristic is some of the whitest, mildest flesh of any eggplant available. Large fruits have a teardrop shape and become 8 to 9 inches long. Developed in Puerto Rico in the 1940's. 70 days. 🌱🌧️
#7248 (15 seeds) \$2.95

ROSA BIANCA

Prized by chefs and gardeners alike for its creamy, mild flesh and lovely appearance, this is an Italian heirloom eggplant. Round-to-teardrop-shaped fruit is white with soft lavender streaks outside, and inside flesh is white and sweet with no trace of bitterness. 75 days. 🌱🌧️
#7436 (30 seeds) \$2.95

WHITE STAR HYBRID

Classic teardrop-shaped eggplant is about 5 to 7 inches long with a beautiful, glossy white skin and pure white, mild flesh inside. White eggplant is well known for having no trace of bitterness whatsoever, so it has become a favorite of many gardeners. Tall, vigorous plants provide a protective canopy for the developing large harvest of eggplant. 75 days. 🌱🌧️
#7490 (30 seeds) \$3.65

SHIKOU HYBRID

Slender Asian eggplant is 6 to 8 inches long and dark purple with a purple calyx to match. Very few seeds, tender skin, and white flesh make this eggplant easy to prepare. No peeling or salting is necessary and fruit can be easily sliced and sauteed, stir-fried, or cooked on the grill. The Japanese word Shikou means "supreme" and we think that is a fitting name for this very high-quality eggplant. Medium-sized plants are quite productive. 70 days. 🌱🌧️
#7160 (30 seeds) \$4.45

HANSEL HYBRID

ALL AMERICA SELECTIONS AWARD. This gorgeous non-bitter eggplant can be harvested all the way from a tiny 2 inches up to a more mature 10 inches long, while staying mild with few seeds. Glossy, deep-purple finger-shaped eggplants appear throughout an extended season, so there is plenty of tender fruit for casseroles, grilling, or even stuffing. Compact plants grow no more than 3 feet tall. 55 days. 🌱🌧️
#7385 (15 seeds) \$4.25

BLACK QUEEN HYBRID

This new hybrid eggplant combines improved yield, better eating quality, and earlier maturity than other varieties in the Black Beauty class. Attractive black oval 1 to 1.5 pound fruit are perfect for grilling, stir fry, baba ganoush, roasting or baking. Makes fruit with fewer seeds. 74 days. 🌱🌧️
#7302 (20 seeds) \$3.75

ROUND MAUVE

This beautiful eggplant is spherical, about 4 inches across, with rosy-lavender thin skin and a pure white interior. We love to cook with this variety as its size is ample without being overwhelming, and the flesh is mild and meaty with no trace of bitterness. Earliness and great productivity add to the attributes of this terrific eggplant. 65 days. 🌱🌧️
#7442 (30 seeds) \$3.65

MILLIONAIRE HYBRID

A Japanese type with good flavor and attractive 7 ounce fruit that reach 8 to 10 inches in length. Plants are vigorous and normally do well in the heat. Perfect for stir fry, grilling, or veggie Thai curry. Never bitter. 55 days. 🌱🌧️
#7837 (20 seeds) \$2.95

PROSPEROSA

Round, deep-violet fruit comes from Tuscany and is an Italian heirloom. Eggplant are about the size of a Rosa Bianca, but are a beautiful jewel-toned purple with white, mild-tasting flesh inside. This very productive variety offers wonderful color and shape for the eggplant grower. 73 days. 🌱🌧️
#7240 (20 seeds) \$2.95

POT BLACK

Compact variety bred especially for container growing produces an abundance of 2 to 3 oz. glossy, oval, black fruit over a long growing season. Early maturity and plenty of vigor make this a great variety for any garden, including those growing in containers. Attractive plants produce tender, very attractive and tasty fruit. 60 days. 🌱🌧️
#7007 (10 seeds) \$4.25

GALAXY OF STARS

Attractive purple and white stripes adorn the exterior of the 3 to 4 inch fruit. Some people say this eggplant is too beautiful to eat. But once you taste them, you will gladly grill them, or you might stuff them with chopped tomatoes, basil and cheese before baking them. Plants reach 24 to 28 inches and can be grown in a container. 57 days. 🌱🌧️
#7850 (20 seeds) \$2.95

CUCUMBERS

**SWEET GWYNDOLIN
LONG ENGLISH HYBRID**

According to historical records, the Romans were the first to grow cucumbers in greenhouses. The goal was to provide cucumbers for Emperor Tiberius throughout the year on the Isle of Capri. In time, these long cucumbers were grown throughout Europe. The fruits reach up to 14 inches in length, and are sweet and crisp. As with any large cucumber, you will want to trellis them if you want them to be straight. 68 days. 🌿🍷
#C107 (20 seeds) \$4.25

CRISPY CRUNCHY HYBRID

This cucumber is popular in Europe where gardeners love the true "Comishon" type pickle. The petite 3 to 5 inch fruit has very small white spines and are very crispy and flavorful. Short season areas will appreciate Crispy Crunchy's ability to set fruit without pollination. That means you don't need to have any honey bees working the flowers. Yields are impressive, and the vigorous vines keep growing. 44 days. 🌿🍷
#C102 (20 seeds) \$4.25

SPACEMASTER 80

Made for small garden spaces or containers, this prolific producer provides an abundance of 7 to 8 inch non-bitter, dark green fruit that are great for salads, sandwiches and pickles (when small). The vines are three feet in length and offer resistance to cucumber mosaic, scab, and mildew. Widely adapted and plants do well in the heat. 60 days.
#C172 (30 seeds) \$2.49

STRAIGHT EIGHT

Long popular in the South, this is an heirloom that won the AAS award more than 80 years ago. The deep green fruit grow up to 8 inches in length, boasting crispy flesh, and a mild-sweet flavor. Yields are prolific and plants have mosaic virus tolerance. Can be used for salads, for slicing, or for pickling. 63 days.
#C166 (30 seeds) \$2.49

BIG TASTY HYBRID

For a compact plant, Big Tasty produces plenty of 8 to 10 inch long cucumbers that are dark green in color. They are crisp and delicious and perfect for salads or a refreshing cucumber sandwich. Because the vine is smaller, you can plant closer together, maximizing your use of garden space. 62 days. 🌿🍷
#C110 (20 seeds) \$3.95

SWEET SLICE HYBRID

A non-bitter, early-maturing, disease resistant cucumber that is one of the best tasting cucumbers we have ever eaten. With thin skin (no need to peel) and large fruit size ~10 to 12 inches, this disease-resistant variety will provide fruit that you just can't buy in a store. 61 days. 🌿🍷
#C105 (15 seeds) \$3.25

MARKETMORE 76

Produces dark-green fruit up to 9 inches in length, with a crisp and sweet flavor that persists even under stress. Multiple disease resistances keep plants vigorous and productive over a long picking season. Developed at Cornell University. 65 days.
#C160 (30 seeds) \$2.49

ASHLEY

Well adapted for hot and humid climates, where disease resistance is important. Dark green fruit are 7-8 inches in length and are slightly tapered. The vine is a heavy producer. Pick frequently to prolong harvest. 65 days.
#C154 (30 seeds) \$2.49

DIVA HYBRID

Believed to have originated in India, spreading to North Africa and beyond, this All American winner is one of the best tasting of the Persian types. Now more and more people in North America are eating these burpless, bitter-free, thin-skinned fruit. The fruit are parthenocarpic and don't need bees for pollination. Vines are particularly productive, with impressive yields, plus plenty of disease resistance. 58 days. 🌿🍷
#C115 (20 seeds) \$2.95

LEMON CUCUMBER

Fruit are about the size of lemons, and are perfect for salads or pickling. They offer a sweet citrusy flavor along with crispy flesh. This heirloom dates from the 1800's, has a sprawling plant habit and vigorous vines. Best to keep picking the prolific fruit to prolong the harvest period. 65 days. 🌿🍷
#C118 (20 seeds) \$2.69

MUNCHER BITTER FREE

Crispy, sweet and juicy flesh are not the only reasons to plant the Muncher. It works as a pickling cucumber when small, and as a slicing cucumber at 9 inches in length and 3 inches in diameter and it is still bitter free. The medium green skin is thin and so it can be eaten without peeling. The productive plants produce abundantly on compact vines. 60 days.
#C163 (30 seeds) \$2.95

MARKETER

Heirloom, AAS winner that is broadly adapted, and very productive. Plants are heat resistant, produce slender dark green fruit that reach 8 to 9 inches in length and 2 -2.5 inches in diameter with some stippling. The fruit are perfect for salads or slicing and taste mild and sweet. 67 days.
#C157 (30 seeds) \$2.49

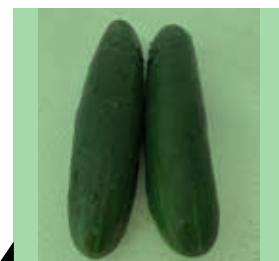

ARMENIAN

Sometimes called yard long cucumbers, or snake melons, with thin skin that is burpless, - without bitterness, allowing the fruit to be eaten without peeling. Fruit are pale green on the outside with white sweet flesh on the inside. It tastes like a cucumber even though it is a melon. The fruit can reach over 2 feet in length, but they taste best harvested from 12 to 14 inches. Trellis for straight fruit. Very heat tolerant. 70 days.
#C151 (30 seeds) \$2.79

STRIPED ARMENIAN

Another variation of the Armenian cucumber is the one that alternates with light and dark green stripes, and is slightly fuzzy. Harvest from 8 to 12 inches and enjoy the mild, sweet and crunchy flesh. Grows well in warm weather. 70 days.
#C169 (30 seeds) \$2.79

CALYPSO HYBRID

Developed by North Carolina State University, this widely adapted pickling cucumber was bred for high yield, and disease resistance including ANT, ALS, CMV, DM, PM, and scab. Blocky fruits are medium green and measure 3 inches in length by 1 inch in diameter. Plants are primarily female, to allow greater yield potential. 50 days. 🌿
#C122 (20 seeds) \$2.79

ARMENIAN LIGHT GREEN

Another variation of the Armenian cucumber is the light green type. Harvest from 10-12 inches and enjoy the mild, sweet and crunchy flesh. Grows well in warm weather. 60 - 70 days.

#C175 (30 seeds) \$2.89

DOUBLE YIELD

Developed in 1924, this pickle is said to produce two to three fruits for every one that is harvested. The four to six inch long light green fruit are great for eating fresh and they make delicious pickles. A garden favorite for nearly 100 years. 52 days.

#C126 (30 seeds) \$2.79

SWEETER YET HYBRID

Sweeter Yet is known for great flavor and it has been popular for many years. It is early to mature and can be harvested between 10 and 12 inches. It is completely non-bitter with a thin skin, and it is burpless. In order to have straight fruit the plants should be grown on a trellis, but they can also be grown on the ground. 48 days.

#C171 (15 seeds) \$3.25

COUNTY FAIR IMPROVED

Non-bitter fruit with few seeds and beautiful crunchy pickles. Vines bear an impressive amount of 6-8 inch blocky, dark green fruits. Resistant to bacterial wilt. 50 days.

#C124 (20 seeds) \$2.79

PALACE KING HYBRID

Palace King hybrid is a rare sooyow type pickling cucumber that originated in Asia and was introduced to America. Plants are vigorous, with many tendrils to support the vines. Because the fruit grow up to 10" long, it is best to trellis them if you want straight fruit. Plants are early to mature, and fruit have ribbing and small white spines that can be removed by washing. It is a burpless type with very good flavor, and thin skin that you don't need to peel. 50 - 60 days.

#C177 (15 seeds) \$3.45

NATIONAL PICKLING

An heirloom that produces tasty dark green tapered fruit, measuring 6 inches by 2 1/2 inches, on medium-large vines that are very productive. Black spined. Great for pickling and for salads. 55 days.

#C132 (30 seeds) \$2.49

WHITE WONDER

Originally discovered in New York state in the 1890's, this 7 to 9 inch long cucumber starts as ivory white and turns more of a cream color at full maturity. The deliciously crisp fruit are produced on vigorous vines. Grows well in hot weather. 60 days.

#C134 (30 seeds) \$2.79

EUREKA HYBRID

Our favorite for dual use – pickling and slicing. Harvest at 2 to 4 inches for pickles or up to 7 inches for using fresh. Dark green fruit are sweet and crisp. Plants are vigorous with abundant production. The most disease resistant cucumber we offer. 57 days.

#C128 (30 seeds) \$3.25

HOMEMADE PICKLES

Harvest small for baby sweet pickles (2 inches) or let them grow up to 5 or 6 inches for crunchy dill pickles. Excellent disease package allows large harvests of great tasting cucumbers that are crispy and solid. 59 days.

#C130 (30 seeds) \$2.49

WISCONSIN SMR 58

Super productive heirloom produces massive amounts medium green, 6 inch cucumbers that are mild, and superb for pickling. Developed for Northern short season areas. Resists scab and mosaic. 57 days.

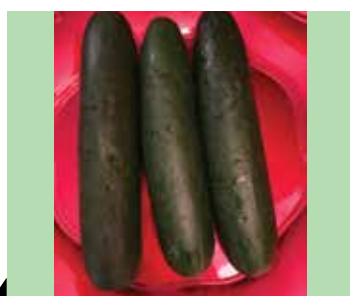

#C136 (30 seeds) \$2.49

ARKANSAS LITTLE LEAF

Developed by the University of Arkansas, this compact plant produces 3 to 4 inch fruit that are crispy and delicious, even under stress. They produce fruit over a long period in just about any climate. The multiple disease resistances allows them to keep growing. Pollinators are not required to set fruit. 59 days.

#C120 (30 seeds) \$2.79

EARLY PRINCE HYBRID

This commercial cucumber was developed for early maturity, strong disease resistance, and high yield potential. The 7 to 8 inch dark green fruit are smooth and attractive for roadside markets. Resistance includes anthracnose, scab, and cucumber mosaic virus. The vigorous plants offer multiple picks, and the gynoecious fruiting quality offers greater yield potential because of the increased percentage of female flowers. 52 days.

#C181 (15 seeds) \$3.25

GOURDS

CUSHAW WHITE

A sibling of Green Stripe, Cushaw White is a true American squash, and was being cultivated by Native Americans thousands of year ago. Fruit reach up to 30 pounds and have sweet flesh. 110 days.

#G373 (20 seeds) \$2.79

CUSHAW GREEN STRIPED

These attractive fruit sport green stripes over a creamy white background, and weigh between 12 to 20 pounds, and measure 18 to 20 inches in length. The hard rinds and firm sweet flesh, and are good for baking, canning or boiling. 110 days.

#G340 (20 seeds) \$2.79

SQUASH

SUMMER SQUASH

BENNINGS GREEN TINT SCALLOP

Scallop squash are highly prized when the fruit are small, particularly in expensive restaurants. Sunburst can be harvested as a baby squash or full size if you like. Buttery and nutty in flavor, squash lovers grow very fond of this delicious, All America winning treat which ensures wide adaptability and superior performance. Plants continue to produce over a long period of time. 55 days. 🌱🍷
#S124 (15 seeds) \$3.95

SPINELESS BEAUTY HYBRID

Some zucchini varieties have spines that scratch your arms as you try to harvest the fruit. Not Spineless Beauty. Picking will be a breeze, and yields are impressive. The proven adaptation will help you have the success that so many gardeners have enjoyed when growing Spineless Beauty. The dark green fruit are best harvested before they reach 8.5 inches in length. 44 days. 🌱🍷
#S127 (15 Seeds) \$3.85

SUMMER SQUASH

COMMANDER HYBRID

This All America winning deep green zucchini leads a double life. Most people allow Commander to grow from 7 to 8 inches in length. But some clever gardeners harvested petite 4 inch fruit, in order to eat tender "baby" squash. Have it any way you like. Compact vines are open for easy picking. 54 days. 🌱🍷
#S167 (15 seeds) \$3.45

PINK BANANA JUMBO

This large vining squash produces cylindrical fruit that grow as long as 48 inches, 12 inches in diameter, and up to 70 pounds. Fruit are pink-orange at full maturity with yellow orange flesh. Harvest at 30 inches or less for the best quality firm, dry and sweet flesh. 115 days.
#S159 (20 seeds) \$2.89

WALTHAM BUTTERNUT

This AAS winning butternut squash is one of the most popular of the winter squash varieties. The large fruit are tan in color with average weights of three to five pounds. The fruit have thick cylindrical necks, a small seed cavity, and thick yellow flesh with a sweet nutty flavor. The vigorous vines produce high yields of fruit that store well. 93 days.
#S100 (20 seeds) \$3.19

BLUE HUBBARD

A favored Heirloom that is very popular in New England states. Produces blue-gray fruit that are slightly ridged and can weigh more than 25 pounds. The interior flesh is firm and yellow-orange and very sweet. Storage is excellent. Can be used for pies, baking, boiling, or freezing. 100 days. 🌱🍷
#S106 (20 seeds) \$3.19

VEGETABLE SPAGHETTI

Vigorous spreading vines produce rounded cylindrical fruit that weigh 2 to 3 pounds, and are ready to harvest when they change color from cream to buff. They can keep many months after harvest when properly stored. When cooked, the flesh break into spaghetti-shaped pieces that can be used as a low calorie substitute for spaghetti, with or without the sauce. 95 days. 🌱🍷
#S114 (20 seeds) \$3.19

WINTER SQUASH

SWEET DUMPLING

A compact vine producing 8 to 10 fruit per plant, that weigh up to ½ pound. When fully ripe, the delicious golden-orange flesh is sweet and delightful and can be baked, or stuffed. The fruit has an attractive green and white exterior with the color of delicate squash, but the shape is more like a tea cup. 90 to 105 days.
#S164 (20 seeds) \$2.89

RED KURI

This hubbard squash has bright reddish-orange teardrop shaped fruit weighing 4 to 10 pounds. The smooth textured flesh has an exceptional nutty flavor and can be used for cakes, cookies, pies, or just steamed, or sautéed in butter. 95 days. 🍂
#S111 (20 seeds) \$3.19

BURGESS BUTTERCUP

Fruits are dark green and firm, with a blossom end button. Flesh is orange and sweet, with a very smooth and distinctive flavor. Vines can grow more than 10 feet and produce up to 20 fruits per plant. Very popular in New England states. 95 days. 🍂
#S116 (20 seeds) \$3.19

TABLE QUEEN

This popular heirloom squash produces dark green fruit that are four to six inches in length and are acorn shaped. Fruit can weigh up to 2 pounds. The yellow-orange flesh is sweet and firm. The vines are very vigorous and prolific, producing an abundance of fruit that store well and get sweeter over time. 85 days.
#S103 (20 seeds) \$3.19

SWEET MAMA HYBRID

A buttercup type with a bush growing habit, producing 4 to 5 pound fruit with dark green skin and thick yellow flesh which is sweet and mild due to a more compact plant. Perfect for a smaller garden. All America Winner. 95 days. 🍂
#S120 (10 seeds) \$3.39

PUMPKINS

SPOOKTACULAR HYBRID

Fruit are bright orange, measuring 5 by 6 inches, and weighing 3 to 4 pounds. The fine grained flesh makes delicious pies, and the fruit keep for a long time after harvest. A strong stem attachment and small size, provides the perfect pumpkin for younger kids in the pumpkin patch. Early maturity allows you to plant later than other pumpkins. 85 days. 🍂
#P131 (10 seeds) \$3.65

JACK BE LITTLE

These miniature pumpkins have small yet vigorous vines that produce between 8 and 20 flattened, deeply ribbed fruits, averaging 2 inches tall and 3 to 6 inches in diameter, and weigh 3 to 8 ounces. The attractive orange rind is appealing and edible. Often used for decoration in holidays, the fruit will keep for up to 12 months if cured on the vine. 110 days.
#P531 (10 seeds) \$2.79

CASPER

This white skinned ornamental pumpkin has thick orange flesh with excellent eating quality. Fruit weigh between 10 and 16 pounds, and are 9 to 12 inches in diameter. Casper has less bluing than other white varieties. The handle is tan with a corky texture. 90 days.
#P431 (10 seeds) \$2.79

BIG MAX

This is the largest pumpkin we sell, with fruits weighing up to 100 pounds or more. Fruit diameters reach 16 to 18 inches, with rough orange-red skin. Flesh is bright yellowish-orange and averages 3-4 inches in thickness. Good for pies or canning, and for contests. 110 – 120 days.
#P331 (10 seeds) \$2.79

ORANGE SMOOTHIE HYBRID

This beautiful bright orange pumpkin has smooth skin with fruit weighing 5 to 8 pounds. Vines do not spread as much as other varieties, requiring less space in the garden. It is easy to grow from seed, and is good for carving, painting, and decorating. The meat is also good for homemade pumpkin pies. All America Winner. 90 days. 🍂
#P231 (10 seeds) \$3.65

HOWDEN

Developed by John Howden in the 1970s, this pumpkin is one of the most popular varieties for gardeners. Weighing 20 to 25 lbs, and having a deep orange color, with uniform sizes, it is a classic size and perfect shape for carving. Strong handles. 110 days.
#P631 (20 seeds) \$2.75

JACK-O-LANTERN

This medium size pumpkin (10 – 18 lbs) is great for carving and also good for making pie due to sweet, fine grained flesh. Skin is smooth with a medium orange color. 110 days.
#P731 (20 seeds) \$2.75

ROUGE VIF D ETAMPES

Also known as Cinderella, because it looks like the pumpkin that turned into a carriage in the folk classic written by Charles Perrault. The brilliant scarlet color of this pumpkin is sensational. Deep ribs and flattened shape make it a great ornamental fruit, but it is also edible. The flesh is used in France to make a base for soups. 10 to 20 lb fruit. 15 ft. vines. 100 days.
#P831 (20 seeds) \$2.75

ATLANTIC GIANT

It is not unusual to grow a giant 300 pound pumpkin from this seed, originally selected by Howard Dill of Nova Scotia. It is also the pumpkin seed that broke the 1000 pound record in 1996. And today, the record stands at 2,624 pounds. Direct seed after the last frost in your area. Space 3 to 5 feet apart. 115 - 125 days.
#P931 (10 seeds) \$2.95

CINDERELLA'S CARRIAGE HYBRID

The first hybrid Cinderella type pumpkin is now available. This hybrid produces large reddish orange fruits ranging from 22 to 35 pounds, on vigorous vines. For the princess in your family, try out the Cinderella's Carriage and allow her dreams to come true. She will likely agree it is all worth it. 100 days. 🍂
#P310 (10 seeds) \$4.75

LETTUCE

BUTTERCRUNCH

This plant is heat tolerant, and slow to bolt. The small rosette heads are compact and firm, with a yellow white heart that is very crisp and sweet. All America winner. 60 days. 🌱
#L247 (500 seeds) \$3.39

GOURMET BLEND

A mixture of five different lettuce varieties selected for flavor and tenderness. This colorful blend looks attractive in the garden, and tastes great in a salad mix. Popular among chefs and market gardeners. 40 to 55 days. 🌱
#L209 (500 seeds) \$3.39

ROYAL OAKLEAF

Leaves are long and oak leaf shaped, dark green and very flavorful. This heat resistant strain has thick midribs and maintains flavor and sweetness in heat better than others in this class. 45 days. 🌱
#L155 (500 seeds) \$3.39

NEW RED FIRE

The frilly red-tipped laves provide a beautiful contrast to a green interior. At full maturity the head is heavy and crisp - perfect for a salad, or in a sandwich. Harvest at full size, or at the baby leaf stage. 45 days. 🌱
#L255 (500 seeds) \$3.85

PRIZEHEAD

Upright leaves are deeply curled, light green in color, with bronze color in the margins. It is fast growing with good bolting tolerance. Superior flavor and non-bitter taste makes this a favorite of farmers markets and your own garden. 50 days. 🌱
#L182 (500 seeds) \$3.39

TOM THUMB

This mini-butterhead has a delicious and creamy yellow center, while sporting a light green exterior. Can be served whole as a salad or cut up in a salad mix. You can plant Tom Thumb in the garden but it will also do well in containers. Popular in the 1860's, this type of lettuce is a treat you won't find at the supermarket today. 57 days. 🌱
#L225 (500 seeds) 3.39

SIMPSON ELITE

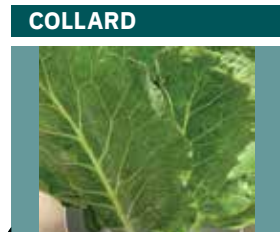

This is one of the greatest improvements in Simpson lettuce in the last 30 years. It has the same tasty leaves, light green in color, and delicate sweet flavor as Black Seeded Simpson. But now it gives you an extra 30-40 days to harvest due to the bolting resistant nature of this selection. Going away on vacation for two weeks? Don't worry about it. Simpson Elite will be waiting for you to return, and it won't be bitter that you took a little break. 42 days. 🌱
#L100 (500 seeds) \$3.45

BRUSSELS SPROUT

SYLVIA HYBRID

Sylvia has a compact plant that can grow in small spaces in your garden - 18 to 24 inches in height. And surprisingly, those compact plants produce up to 50 sprouts per stalk. Roasted, grilled or sauteed, you can't beat the flavor of this powerhouse. A cup of them will give you nearly all of the vitamin C & K that you need in a day. Harvest after the first fall frost for best flavor. 140 - 145 day. 🌱
#BU17 (25-30 seeds) \$3.15

COLLARD

CHAMPION

Champion is an improved Vates type collard. It holds quality 2 weeks longer, and has improved bolting tolerance, and is more cold tolerant. Cook them in a stir-fry, add them to chili, put them in salads and slaws. Or just cook in oil with some black pepper and your favorite meat dish. 75 days. 🌱
#CL23 (800-1000 seeds) \$3.15

ASPARAGUS

MARY WASHINGTON

Asparagus was depicted in Egypt nearly 3000 years ago. It was a common vegetable early in European history. It is a perennial crop that can live as long as 20 years once it becomes established. Plant your seeds inside and put plants out after the last frost in your area. Start the seeds about 14 weeks before the last frost and allow up to 3 weeks for the germination process. Harvest begins in year 3. Mulch them well in the fall, and allow them to grow without harvesting during the first 2 growing seasons. They can be grown in zones 2 - 11, but they prefer temperate climates. Space 2 - 3 feet apart. 3 years.
#A108 (25-30 seeds) \$2.89

RADISH

WATERMELON RADISH

Asian heirloom with a white exterior and pink to red interior. It is sweet and crisp, in contrast to most radish varieties. Great for garnish, salads, or even pickling. The large tops make picking easy. 59 days.
#R506 (175-200 seeds) \$2.75

FIESTA BLEND RADISH

It is nice to have a surprise now and then, and with 5 different colors of radish, you will have the best of 5 different radish types. They range from mild to zesty. A nice way to surprise your family and dress up a salad tray. 30 days.
#R567 (175-200 seeds) \$2.75

CHERRY BELLE RADISH

AAS Winner. One of the most popular garden varieties, it is bright red, round and firm with crisp white flesh. Tops average 3 inches. Keeps well. Early maturity - 25 days.
#R540 (175-200 seeds) \$2.75

GERMAN GIANT RADISH

Well liked in Germany, this heirloom radish can grow as large as a baseball and not become woody, staying crisp. You can begin harvest at the size of a marble and then experiment up to the larger sizes. If you want larger roots, thin to two inches or more to create your own Giant radish. 30 to 40 days.
#R558 (175-200 seeds) \$2.75

CONFETTI MIX

This interesting mix of red, white, and bicolor radishes has wonderful flavor and make your salad light up with bright colors that are perfect for gardeners or growers. 28 days. 🌱
#R514 (175 to 200 seeds) \$2.95

BLACK MAGIC

A favorite of those trained in the culinary arts. The narrow dark green savoyed leaves are delicious when harvested small for baby leaves, and can be harvested up to 20 inches for a more robust flavor. Sometimes called Tuscan kale, this selection can grow as tall as 30 inches. 60 days 🌱🍷
#K325 (300 seeds) \$3.95

SIBERIAN

Extremely hardy, rapid growing, with large blue green slightly curled feather shaped leaves. Non heading plants are vigorous and productive. You can sow in the spring or fall. Light frost improves tenderness and flavor. 60 days 🌱🍷
#K399 (300 seeds) \$3.45

WHITE RUSSIAN

Leaves have white stems with dark green leaves sporting ruffled edges. Leaves sweeten after frost, and can be harvested at the baby leaf stage or fully mature for bunching. Cold tolerant. 50 days 🌱🍷
#K405 (300 seeds) \$3.15

KALE BLEND

A mix of three easy to grow kale varieties, offering beautiful contrasting colors, and flavors. Experience the deliciousness of this blend from baby leaf, to bunching size. Blanched, braised, or fresh in salads, you can't go wrong. 55 to 65 days.
#K413 (300 seeds) \$2.75

BLUE CURLED SCOTCH

Tender and sweet, the finely curled leaves grow up to 20 inches in height, and have good flavor when cooked or eaten fresh. Light frost improves the flavor without yellowing. Plants are slow to bolt. 57 days. 🌱🍷
#K343 (300 seeds) \$2.95

LACINATO

Grown in Italy for centuries, it is used in many Italian dishes, including minestrone and ribollita. The 10 inch leaves are dark grey-green, with sweet and rich flavors. Harvest typically is taken from the bottom of the stem. Height 24 to 36 inches. 54 days. 🌱🍷
#K351 (300 seeds) \$2.95

PRIZM HYBRID

You can now grow this All America winner in containers as well as in-ground beds. The attractive short plants have tight ruffle-edged leaves, and almost stemless stalks that are quick to re-leaf. Harvest early and often for a continual supply throughout the season. Sweet nutty flavored leaves are tender enough to enjoy in fresh salads but also hold up well when cooked. 40 days. 🌱🍷
#K367 (50 seeds) \$3.65

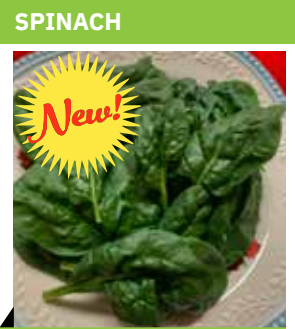

RED RUSSIAN

Leaves are flat and oak leaf in shape, with a dark green color. The stems are reddish purple and intensify in color after the fall frost. Red Russian is more tender than most kale and can be used fresh or cooked. 55 days. 🌱🍷
#K379 (300 seeds) \$3.25

SCARLET

This frilly-leaved kale has sturdy leaves that are heavily curled and have a deep red-purple color which grows more vibrant as the weather cools down. A great choice for baby leaf or bunching. The attractive plants grow up to 3 feet tall. 50 days. 🌱🍷
#K384 (300 seeds) \$3.25

SPINACH

BLOOMSDALE LONGSTANDING

Bloomsdale Longstanding spinach was selected for slow bolting plants and good flavor. The deep green leaves make a tasty salad or spinach smoothie. Whip up a mushroom stuffing dip with chopped spinach, mozzarella, olive oil, and a touch of cayenne pepper. Start directly in the soil when soil temperatures reach 50 degrees. Plant every 7 days for prolonged harvest. 40 to 47 days. 🌱🍷
#SP42 (100 seeds) \$2.95

CABBAGE

GUNMA HYBRID

This huge flat headed cabbage has many admirable qualities including early main season maturity. It can grow to 1 foot in width, and 5-7 pounds in weight, or even larger. It is ideal for the at home chef who wants to make sweet mild cabbage wraps (blanch them). But don't limit yourself to wraps, shred, mix for a salad, make kraut or kimchi. Interesting for roadside stands. Resistant to tip burn. 83 days. 🌱🍷

#CA20 (50 seeds) \$3.25

EMIKO HYBRID

Napa cabbage just got better – these mild tasting leaves are perfect as wraps, or in Napa cabbage soup, or even a salad. Early harvest, good keeping ability both in the field and after harvest put this variety in front of others. Heads weigh up to 6 pounds. Disease resistance to clubroot, fusarium yellows, tip burn, and bolting. 60 days from transplant. 🌱🍷

#CA28 (50 seeds) \$3.25

BAJONET HYBRID

This attractive cabbage has dark green color. The 6 pound heads are great for fresh use. Known to maintain size under stressful conditions even in the south. Resistant to Clubroot, Fusarium Yellow and resists Tip Burn. 75 days. 🌱🍷

#CA35 (50 seeds) \$3.25

BOPAK HYBRID

AAS WINNER - When choosing Pak Choi (Bopak) you are selecting one of the new super foods. Judged by nutrient density, Pak Choi is a rich source of vitamin A, C, K, B6 and folate. Crisp shoots have great cabbage flavor with a hint of sweetness, it is perfect for stir fry, soups stews, and also for grilling. The compact plants allows for close spacing in the garden. You can even grow it in a pot. 40 to 45 days. 🌱🍷

#CA23 (50 seeds) \$3.25

PRIMERO HYBRID (RED)

Great for the home garden, but also a productive commercial variety in the early segment of maturity. Resists bursting. The 7 ½ inch, 3 to 4 pound heads are deep red in color. Leaves are tightly wrapped, and have a excellent sweet flavor.

72 days. 🌱🍷

#CA39 (25 - 30 seeds) \$3.25

BROCCOLI

ARTWORK HYBRID

Stem broccoli has been around for some time, but until recently it has not been available to home gardeners. In the past it was found in gourmet markets and upscale restaurants. Artwork looks like a normal broccoli as it starts to grow, but as soon as you harvest the first crown, delicious and tender side shoots start to grow. And due to some heat tolerance, you can harvest multiple side shoots for an extended period. Side-shoot stems measure 6-8" in length. Maturity 55 days from transplant. 🌱

#BR24 (30 seeds) \$2.99

LIEUTENANT HYBRID

Lieutenant produces high quality heads that are medium green, smooth and highly domed. Many people remember Packman broccoli, and this variety is about as close as you can get to Packman. It has great flavor, good heat tolerance, early maturity, and wide adaptability. Matures 55 to 60 days from transplant. 🌱

#BR29 (30 seeds) \$2.99

WALTHAM 29

Compact 20 inch plants offer attractive and tasty blue-green medium size heads. This variety has good cold tolerance going into the fall and has been a longtime favorite in the eastern us. Good to eat fresh and frozen. 67 days.

#BR36 (100 seeds) \$2.95

DICICCO

This Italian heirloom produces a small head that is 3 inches in width. Side shoots begin to grow after harvesting the main head. Abundant side shoots can be harvested over time. Growth of side shoots is extended by harvesting the shoots that are ready for harvest. The leaves are edible and taste like kale. Height 2 to 3 feet. 50 days.

#BR39 (100 seeds) \$2.89

CAULIFLOWER

DOLCE VITA CAULIFLOWER HYBRID

Until recently stem cauliflower was only available in upscale restaurants and fancy markets. Fortunately, we are able to offer the latest innovation in gourmet cauliflower. This new stem cauliflower is one of the best tasting we have trialed. As the flowering head opens, the stems are exposed to sunshine and the color of the stem changes from white to green. At the same time the stem grows increasingly sweet. The 8" flowering shoots will delight your taste buds and enrich your dining experience. Due to adaptation in a wide range of growing regions, you are likely to have success growing Dolce Vita. Only one harvest, so it is best to stagger your plantings. 65 day maturity from transplant. 🌱

#CF20 (25-30 seeds) \$3.25

DEPURPLE HYBRID

Put some variety in your salad or stir-fry, with this new purple cauliflower. Heads are a purple/lavender color, that will not change when cooked. Heads are 7 to 8 inches in width, self wrapping and taste great. 68 days. 🌱🍷

#CF44 (15 - 20 seeds) \$4.95

SNOWBALL Y IMPROVED

Home gardeners and growers love this open-pollinated cauliflower. The 6 to 7 inch heads are self-blanching, smooth and Plant size is larger than Early Snowball, and more productive. Can be frozen for a big crop, or eaten fresh. Most suited to fall and winter harvest. Good frost tolerance. 70 - 75 days. 🍷

#CF41 (90 - 100 seeds) \$2.95

CLANCY HYBRID

This is the very first potato seed to win the All America Selections national award. Until now, potatoes have only been available as tubers. These new seeds are easy to store and plant. Start the potato seed just like you would a tomato seed, and plant them at the same time (after frost). In time you will have healthy dark green plants with attractive blue flowers. And beneath the soil you will find a beautiful mix of spuds ranging from red to rose with interiors that are creamy white to yellow. Tubers measure 4 to 5 inches, and 3 to 4 ounces. They are perfect for baked, mashed or boiled potatoes. 90-105 days from transplant. 🌱🍷
#PT40 (25 – 30 seeds) \$2.95

MISC.

BEAN

LIANA YARDLONG BEAN

Yardlong beans arose in Africa, and were domesticated in Asia. Their ability to thrive in sandy soils with low moisture made them an important crop in hot arid regions. They do not tolerate cold, so be sure and plant in warm soil – above 65 degrees. Plant 1 inch deep, and 4 to 5 inches apart. The vines grow up to 3 feet and do best on a trellis. Yardlong beans can reach 25 inches, but they taste better when harvested at 19 inches. Unlike green beans, the tender, stringless pods taste the best when sauteed, stir-fried, or deep-fried. Harvest in 70 to 80 days. 70 - 80 days.
#BN14 (20-25 seeds) \$2.95

ASIAN YARDLONG

This Yard Long bean is a flavorful addition to Asian cuisine, with robust and productive pods growing as long as 30 inches. Plant when soil temperature is above 65 degrees. Requires full sun exposure and best grown on a trellis. Red seeded 80 days. 🍷
#BN38 (20 seeds) \$2.95

CARROTS

YELLOWSTONE

This yellow carrot has a vigorous root and strong top. It works as a cooking carrot, or fresh carrot that looks beautiful in a salad or just on a fresh vegetable platter. The flavor is that of a sweet classic carrot. Harvest 7 to 8 inches in length for best quality. 75 days. 🍷
#CR15 (475 - 500 seeds) \$3.75

BANGOR HYBRID

Bangor is a berlicum type carrot which is very popular in Europe. Large 7 to 9 inch roots have good flavor and are perfect for juicing or storing. Intermediate resistance to Alternaria, Cercospora Leaf Blight, and Black Storage Rot. Also, a winner of the Royal Horticultural Society award for garden excellence. Main season maturity 75 - 90 days. 🌱🍷
#CR25 (190 - 200 seeds) \$3.35

COVENTRY HYBRID

Coventry is an orange, 3 to 4 inch chantenay carrot which is a popular item in farmers markets and select upscale markets when harvested at full maturity. It is often compared to the Caracas carrot which you can plant in containers, baskets or planter boxes. Also, you can harvest "true" baby carrots – just pick earlier. Coventry has excellent flavor and a sweet crunchy texture. 70 days direct seeded. 🌱🍷
#CR32 (200-250 seeds) \$3.95

MELON

FARMER'S GIANT HYBRID

Fruits are oblong with light skin and delicious red flesh that is very sweet. Plants are productive, with strong vines and good leaf cover. Large fruit reach 20 to 30 pounds each. Resistant to anthracnose and fusarium wilt. 85 days. 🌱🍷
#W150 (10 seeds) \$2.89

ATHENA HYBRID

Both a home garden favorite and a commercially preferred cantaloupe for those who pick and ship fruit. The thick netting, and a strong rind provides good shelf life. The 5 to 6 pound fruit are delicious and aromatic with beautiful bright orange flesh. Disease resistance to fusarium (0-2) and powdery mildew, gives Athena an ability to perform well in many environments. Harvest when the melon easily slips from the vine with a light pull. 75 days. 🌱🍷
#ML28 (10 seeds) \$2.95

CRIMSON SWEET

Crimson Sweet is a long-time favorite due to wonderful flavor, texture, and sweetness. This melon can reach up to 9 x 12 inches and weigh between 15 to 25 pounds. Vines grow 6 to 9 feet, and are normally planted 2 to 5 feet apart in the row. Direct seed when soil temperatures are 70 to 75 degrees. 80 days. 🍷
#W180 (20 seeds) \$2.95

OKRA

CLEMSON SPINELESS

AAS Winner, and the most popular variety for the south. Plants grow 3 to 6 feet in height, and produce an abundance of light green pods that measure up to 8 inches. Harvest at 3 to 4 inches for best flavor and texture. 55 days.
#KR61 (50 – 60 seeds) \$2.75

COW HORN

French explorers probably brought this okra to America in the early 1700s. Plants reach more than 7 feet in height and produce an abundance of large, light green, curled pods 8 to 10 inches in length. Harvest at 6 inches for best flavor and texture. Great for your favorite jambalaya dish. 55 to 60 days.
#KR57 (50 – 60 seeds) \$2.75

GENOVESE BASIL

This Italian heirloom is very popular when cooking and for making pesto. The tender, dark green leaves are very fragrant and the plant is relatively slow to bolt, giving you additional harvest time. The plant grows 24 to 30 inches tall. 68 days.

#H016 (100 seeds) \$2.95

LEMON BASIL

Intense lemon fragrances come from the delicate leaves which can be used for making tea or can be dried in a pleasant potpourri. Attractive plants reach 24 inches in height. 60 days.

#H017 (100 seeds) \$3.25

ARUGULA ROQUETTE

Sometimes called garden rocket, this variety can be harvested in just 35 days. It contains a peppery flavor and adds an appealing zest to salads. For a more nutty flavor, harvest when the leaves are small. Many people add it as a topping for pizza, or add it to sauces and pasta. Plant grows to be 8 to 10 inches tall. 35 days.

#H012 (100 seeds) \$2.59

DILL MAMMOTH

Aromatic leaves are used to flavor many foods, such as soups, vegetable dishes, and dill pickles. Mixed with sour cream or butter it can top potato dishes and it is also often mixed in salads. Best if used fresh. Plants reach 36 inches. 70 days.

#H015 (100 seeds) \$2.69

NEWTON BASIL

Fast growing and highly resistant to fusarium, you can have an advantage over similar varieties. Newton is very mild in flavor and has no licorice aftertaste and many consumers prefer it. Performs well in the ground, hydroponics and in a container. The large, bright green, crinkled leaves are perfect for a mozzarella basil bruschetta, and in your favorite soup, or fresh chopped herb. 60 days.

#H011 (100 seeds) \$3.95

CILANTRO - CORIANDER SLOW BOLTING

Cilantro is a popular addition to salsa, Mexican, Asian and Caribbean foods. This selection is slow to bolt even under some heat stress. Sow every two weeks for a continual harvest. 52 days.

#H014 (200 seeds) \$2.69

CATNIP

Many cats have a great affection for catnip. The essential oils of catnip can turn a lazy cat into a very excited cat as they are seduced by the chemical nepetalactone. The excitement is short-lived, and those who are susceptible will need to recuperate before indulging again. Keep in mind, not all cats like catnip. Transplant after the last frost in your growing area. Some people have recommended soaking the seed in water the night before planting.

#M100 (95-100 seeds) \$2.95

SWEET LARGE LEAF THAI

The large tender leaves have a anise flavor when fresh and a cinnamon scent after cooking. The pungent aroma is perfect for soup, stir-fry and green and red curries. This flavor is popular in many Asian chicken, pork, and seafood dishes. 64 days.

#H010 (100 seeds) \$3.95

GARLIC GEISHA CHIVES

This All American winner boasts rich green leaves that grow up to 16 inches in height, with somewhat flat leaf stems. The distinct garlic flavor is used in soups, garnishes, and stir-fry chives, creamy sauces, and omelettes. Harvest chives at the base of the stem. 80 to 90 days.

#H013 (100 seeds) \$2.95

CINNAMON BASIL

These fast growing basil plants have a unique flavor that makes for an excellent tea leaf, poultry or seafood herb spice. If you really like the flavor, use in place of basil in your other menu items. Can be grown in containers and reaches 24 to 28 inches. 75 - 80 days.

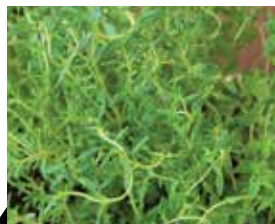

#H022 (100 seeds) \$2.89

OREGANO ITALIAN

Italian oregano is very aromatic, and is used as a flavoring around the world, particularly for Mediterranean dishes from Italy and Greece. Can be used dried or fresh. 90 days.

#H018 (200 seeds) \$2.69

THYME VULGARE

Easy to grow and somewhat drought tolerant, thyme flavors sauces, soups, stews, rice dishes, vegetables and even fresh bread. Very popular in Italian, French and Mediterranean cuisine. In some climates it grows as a perennial between 6 and 12 inches in height. 90 days.

#H019 (200 seeds) \$2.69

DILL FERNLEAF

This beautiful dwarf dill plant has frilly leaves and reaches 16 to 18 inches. Yellow flowers add color to your vegetable garden and attract Yellow Swallowtail butterflies. The leaves, stem and seeds can be used for seasoning. 60 days.

#H020 (100 seeds) \$2.75

TALL UTAH

These tall celery stalks (18- 24 inch) are dark green, and have delicious stalks reaching 10- 12 inches in length. Selected for market growers, but perfect for home gardeners. 100 days.

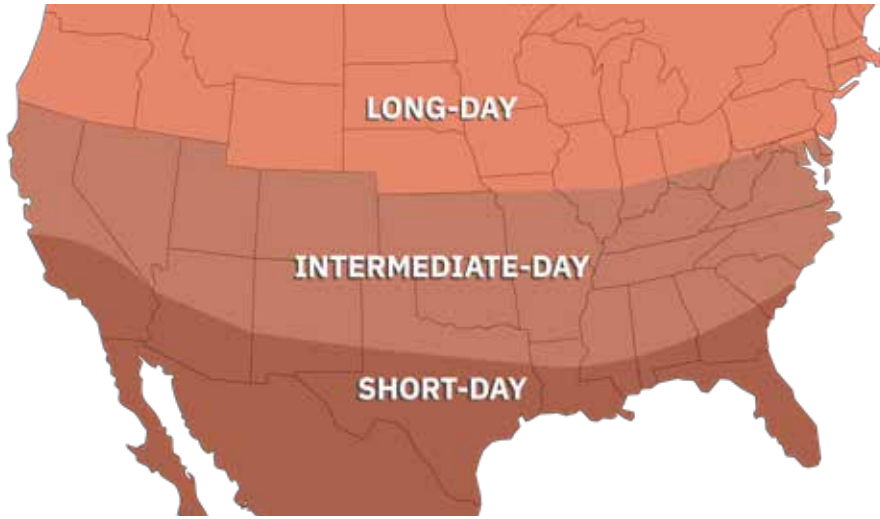

#CE31 (200 seeds) \$2.75

ARUGULA WILD

This Italian herb is more pungent than typical arugula. You can call this one the arugula lovers arugula. Holds up well in heat and humidity. 30 days for baby leaf, 50 days for full maturity.

#H023 (100 seeds) \$2.75

LONG-DAY OR SHORT-DAY? WHICH ONIONS TO PICK

Onions have different day length requirements depending on the type of onion seed you plant. A long day onion requires more hours of light to produce a bulb. People in the North should plant long day onions, and people in the South should plant short day onions. Most people in zone 6 or colder should plant long day onions. People in zone 7 or warmer should plant short day onions.

If you draw a line across the US from San Francisco to Myrtle Beach, South Carolina you would plant short day onions below that line and long day onions above that line.

LONG-DAY

WALLA WALLA SWEET

Consistently sweet and crisp, this variety has been grown in Washington state for a century. Bulbs weigh up to 2 pounds. Great for fresh use. Store in the refrigerator. Best when grown in northern parts of the country. 100 days. 🌱

#U111 (200 seeds) \$2.95

YELLOW SWEET SPANISH

Good sweet flavor and bulbs up to 1 pound. Great for fresh use, or in soups, or any cooking needs. One of the most popular onions for gardening and commercial use. 15 days. 🌱

#U190 (200 seeds) \$2.95

DAY-NEUTRAL

EVERGREEN BUNCHING

Long sweet green stems are non-bulbing, and are perfect for bunching. Can overwinter, or can be planted in the spring for a summer harvest. Sow them over a two to three week period in order to harvest over a longer period of time. Perfect for salads, or stir fry. 70 days.

#U108 (500 seeds) \$2.95

SCARLET BANDIT

Scarlet Bandit is a bunching variety that you will enjoy growing and eating. Some call it the most beautiful onion in the world. Scarlet bulbs with red and white speckles that will dazzle and impress you when dressing up a salad. The bandit can overwinter in mild climates. Direct seed just after final frost, or seed indoors and transplant. 69 days direct seeded. 🌱

#U203 (200 seeds) \$2.89

CRÈME BRÛLÉE (BGS270) HYBRID

This is the first-ever All America winning echalion shallot. It has a beautiful copper-pink outer skin, and an even more attractive rosy-purple inner skin. French chefs love this type of shallot because they are easy to peel, have more interesting flavors, and caramelize easily when heated. Perfect to plant in the garden, or sell at a farmers market. Plants reach 24 to 30 inches, and the bulb is 4-5 inches in length. Can be grown in a container as well. Space 3 to 4 inches apart. Transplant in March, or direct seed in April or May. 90 - 100 days. 🌱

#U205 (50 - 60 seeds) \$3.25

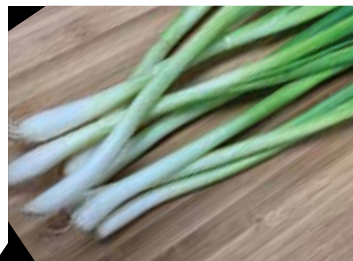

SHORT-DAY

YELLOW GRANEX HYBRID

Just about everyone has heard of Vidalia onions which are grown in Georgia, and are perhaps the sweetest in the country. They are low in pungency, with a flattened shape with light yellow skin. Planted in the fall in the South for early summer harvest. 125 days. 🌱

#U134 (200 seeds) \$2.95

PORTHOS BUNCHING

Planted in the spring for a summer harvest, this vigorous blue-green bunching onion has tremendous vigor. Sow repeatedly over a two to three week period in order to harvest over a longer period of time. Perfect for salads, omelets, and soups. Plants can grow to larger sizes in the Northern areas, so harvest when young for bunching. 70 days.

#U142 (500 seeds) \$2.95

RED CREOLE

A short-day, mid-sized onion that is great on burgers, salads, sandwiches, and any dish that requires a spicy and pungent onion. Widely adapted and with impressive productivity. 110 days. 🌱

#U197 (200 seeds) \$2.95

INTERMEDIATE-DAY

CABERNET HYBRID

Intermediate day onions like Cabernet can grow in latitudes from 35 to 45 degrees and provide medium to large size bulbs. They offer earlier harvest than long day onions. Direct seed early spring when soil is workable, or transplanted in late February to March in short season areas, the bulbs reach up to 8 ounces and can store for up to 4 months. Perfect for burgers, salads, or soups. 93 days. 🌱
