THE FORTIS WALL PICTURE RAIL SYSTEM

The Australian made Fortis Wall Picture Hanging System rails are rated for a maximum load carrying capacity of 45.0 kg per lineal metre. This system is especially useful when hanging mirrors and very large or heavy artworks.

This picture hanging system is available with either 10.0 kg transparent nylon or 30.0 kg steel cables.

This hanging system is useful in older homes where the wall surfaces may be uneven such as exposed brick or Victorian and Edwardian hard plaster. It is also commonly used as a gallery system for commercial art galleries and other retail spaces due to its high weight capacity and easy cable insertion T-Lock System.

This gallery style system picture rail is available in 200 cm and 300 cm lengths in standard powder coat white. The Fortis art hanging system range is available as a ceiling mounted version with our Fortis Ceiling System, rated at 25.0 kg per lineal metre.

The cables for this system are available in either nylon [10kg max rated] or steel [30.0 kg max rated]. Adjustable hooks for the cables range from 4.0 kg up to 30.0 kg.

All of our products are covered by a 5 year full replacement warranty.
