THE MINIRAIL PICTURE RAIL SYSTEM

The Australian made Minirail System is currently the smallest picture rail tracking available worldwide, the moulded aluminium profile is just 16.0mm high, 8.5mm thickness and has a load bearing capacity of 25.0 kgs per lineal metre.

The Minirail picture rails are made of the highest quality T5 Grade aluminium and are manufactured in right here in Australia.

Designed for a discreet unobtrusive picture hanging style, the Minirail System fits neatly under plaster cornices or finishes off the top of the wall as a sharp detail with square set plaster.

The Minirail tracking sections are available in 120cm / 150cm / 180cm / 200cm / 300cm lengths, with a virtually seamless connector to allow continuous installation. The standard tracking is available in powder-coated white or we can custom coat the tracking to any Dulux powder coat colour.

Cables for this system are available in clear nylon [10 kgs per cable max] or stainless silver, white or black-coated steel [25kg per cable max]. Adjustable hooks for the cables range from 4.0 kg to 25.0 kg.

All of our products are covered by a 5 year full replacement warranty.
