An easy-to-fit ferrule designed to improve your walking aid

Flexyfoot gives you better grip for everyday adventures

Flexyfoot's uniquely designed bellows help absorb shock, which can relieve pain and discomfort in the upper body. The patented, flexible bellows allow the tread to remain in full contact with the ground, even over the roughest terrains. Flexyfoot ferrules offer over 50% more grip than traditional ferrules to help reduce slips, trips and falls. Their spring action also helps to aid walking efficiency, reducing user fatigue. Easy to fit to most crutches, canes and walking sticks, available in black or grey.

Wheelchair Cushions

Harley

The Harley range of wheelchair cushions is designed and made in the UK to meet a wide variety of pressure relief and comfort requirements.

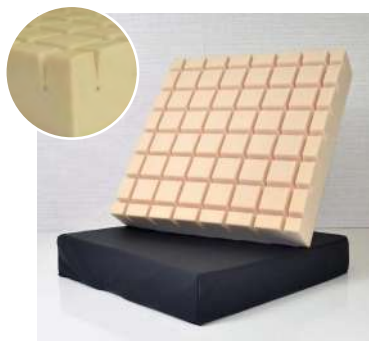

◀ VISCO-TEX CUSHION

The base of high density polyurethane foam is coupled with profiled memory foam designed to provide comfort, pressure relief and support. Each module operates independently, distributing the load and keeping the skin cool; reducing the risk of pressure issues developing.

RAMPS ►

Standard aluminium threshold ramps are heavy, often slippery when wet and difficult to angle correctly. The lightweight, modular Secucare system is quick and easy to assemble and can be used in - and outdoors. The anti-slip studs make it incredibly safe to use and it can be adjusted to fit a range of heights for both thresholds and small steps.

The system is built to last - durable, UV resistant and maintenance free. That said, it is also 95% recyclable to support ongoing sustainability.

EMS TECHNOLOGY
DRUG FREE | CLASS IIa
MEDICAL DEVICE

REVITIVE Advanced is designed to:

- ▶ Reduce pain in legs and feet
- ▶ Reduce swollen feet and ankles
- ▶ Alleviate tired, aching legs & feet
- ▶ Actively improve circulation

When you sit or stand for prolonged periods, the feet and leg muscles are inactive and blood flow may reduce significantly, which can result in tired, aching legs & feet, swelling and discomfort. REVITIVE uses Electrical Muscle Stimulation (EMS) to stimulate these muscles - thereby actively improving circulation & relieving these symptoms.

Easy to use remote-control operation, a typical session lasts 20-30 minutes. Sit back, relax and let REVITIVE go to work.

Get even more from REVITIVE

Foot & Leg Cream - well-moisturised feet will increase conductivity which may increase the benefits of REVITIVE.

Gloves - designed to help improve the circulation in the hands and arms.

Electrode Body Pads - allow for targeting of other areas of the body, for example the lower back, upper back, knees, thighs & arms.

Unsuitable if you are: Fitted with a heart pacemaker or AICD, Being treated for, or have the symptoms of, an Existing Deep Vein Thrombosis (DVT), or you are pregnant. Always read the label. Breathe easier with
**AEROSURE
MEDIC⁺**

Aerosure Medic provides drug free relief to make day to day life that little bit easier.

Everyone finds themselves huffing and puffing at some point. Whether it comes out of the blue or is there more often, it can be an uncomfortable experience. Breathe easier knowing you have the UK's only dual function respiratory device.

AEROSURE works on two well-established systems - **inspiratory muscle training (IMT)** effects and **oscillatory positive expiratory pressure (OPEP)**.

IMT: This technique is designed to directly affect the functioning of respiratory muscles which are responsive to training.

OPEP: Designed to interrupt the expiratory airflow, which results in the airways vibrating.

In a recent clinical study in 23 people with COPD, daily use of Aerosure at home over an 8 week period resulted in a significant improvement in their breathlessness.

AEROSURE is a CE marked medical device intended to reduce breathlessness in patients with **COPD (Chronic Obstructive Pulmonary Disease)**.

"I have COPD and used to have to have my inhaler when I started wheezing about 3am in the morning, since using Aerosure twice a day I can now sleep all through the night. It took about 3 weeks of use before I felt the benefits. Best money I have ever spent and would highly recommend it!"

Aerosure Medic is a Class I Medical device registered with the MHRA. If you are unsure of the cause of your symptoms, please consult your healthcare professional. Always read the user's manual before use. For the full list of contraindications please refer to the product packaging or www.aerosure-medic.com. Aerosure Medic does not replace the need for medication already supplied by your doctor. Inspiratory Muscle Training (IMT) is a technique used to correct or increase respiratory function by improving the performance of the muscles involved in inhalation. Positive Expiratory Pressure (PEP) devices help inhaled air get behind the mucus in the lungs and helps keep the airways open, so mucus can be expelled through coughing/huffing.

FLIGHT AND TRAVEL COMPRESSION SOCKS

Providing graduated compression from 14-18mmHg to help improve circulation on long journeys and during periods of inactivity.

Maximum compression starts at the ankle and gradually decreases up the leg. This helps aid circulation when stationary for long periods and helps provide relief for tired, aching or swollen legs.
