7. Overview

In most cases, the machine will ask you to apply the effects 3 times.

A. Insertion Effect
(How the message will appear to the center)
B. Reservation Effect
(Once the message appears in the center, what will message do)
C. Release Effect
(Once the message do the effect, how will the message disappear off the screen)

Function Guide

In the menu, there are 12 main options. In each option, there are numerous sub-options.

To navigate the options, press menu, then use up and down arrow keys in the middle of the remote control.
To enter each option, press OK.
To exit and go back to the previous option, press ESC.

[1]	Add Contents	adding messages and contetns
[2]	Modify Contents	modify the messages you programmed already
[3]	Insert Contents	insert more messages
[4]	Index Contents	choose designated messages to be displayed
[5]	Delete Contents	you can delete all or some messages
[6]	Stop Watch	stop watch function
[7]	Password	set bios password
[8]	Set Time	set current time

[9] Setting Up — sign's general setting

[10] CDMA — not supported

[11] TPEG News — not supported

[12] Manager — this option is for the engineers

[1] Add Contents

1. Add Message

You can input single line message.

2. Add Dual Message

You can input 2 line message.

3. Add Image

You can add preloaded images (with foreign wording available).

4. Add Pictures

You can add preloaded images (without wording).

5. Add Video

You can add preloaded active images (without wording).

6. Display Date

You can use this option to dislay date.

7. Display Time

You can use this option to display time.

8. Add Dday

You can use this option to display countdown (in days) with any input messages. Example Special Sale D-012

9. Add Dtime

You can use this option to display count down (in time) with any input messages. Example Special Sale It is before 2 hour 31 min.

10. Add Temperature

This option only displays temperature of the modules (microchip) inside the machine. Note. Outside temperature sensor is only available for computer programming interface.

11. Add Humidity

This option only displays humidity of the modules (microchip) inside the machine. Note. Outside temperature sensor is only available for computer programming interface.

12. Add Event

Not Available.

[2] Modify Contents

When you enter this option, you will be able to modify programmed messages. To navigate the contents use Up and Down keys in the middle of the remote control. (Note. When you press OK to modify certain messages, the system will require you to set insertion effect, preservation effect, and release effects again)

[3] Insert Contents

You can use this option to insert messages (contents) between programmed messages. For instance, if you have No.1 message, No.2 message, and No.3 message programmed, you can select No.2 message and program new message. The new programmed message will be inserted between No.1 and No.2 messages.
(Note. When you program messages with [1] Add Contents, it only stores the messages in order you program)

[4] Index Contents

When you enter this option, you will be able to navigate all the contents you programmed. Use Up and Down keys in the middle of the remote control to view all programmed messages.

[5] Delete Contents

1. Delete Option

You can select certain (each) message to be deleted.

2. Delete All

You can delete all messages.

[6] Stop Watch

1. Increment Mode

You can start stop watch function from ***0:00:00 00*** to ***12:59:59 99*** upward

2. Decrement Mode

You can start stop watch function anywhere from ***12:59:59 99*** to ***0:00:00 00*** downward.

[7] Password

This is Level 2 Bios Password. You can set a password to secure the information on the sign. Once the password is set, the system will require you to input password for the menu.

[8] Set Time

You can set the current time. You can display the time by [1] Add Contents in the main menu.

[9] Setting Up

1. Reservation

To activate or deactivate "auto on & off"

2. Sound

Turn on & off "beep" menu sound.

3. Direction

Press OK to display messages horizontally or vertically.

4. Password

Activate or deactivate level 2 bios password for entering menu.

5. Brightness

Adjust the brightness of the sign. Note. You can set different brightness for different time.
