INTRODUCTION

Join the Evolution

We are changing the game.
Put your team ahead of the
rest with KPI Sports.

We believe that in order to thrive, you need to out-perform the competition. At KPI Sports we are taking product, service and customer partnerships to a new level.

We specialise in the delivery of complex customised orders to sporting clubs that demand high quality, performance sportswear on time, every time.

KNOWLEDGE

We make sure we know our product better than anyone else. We have decades of experience in performance sports apparel, garment design and technology.

PERFORMANCE

We deliver on time and on our promises. Our mission is to consistently deliver a product and service that exceeds our customers' expectations.

INNOVATION

We create smarter ways of working to stay ahead. Continuous improvement is at the heart of what we do. We develop, test and sample new products each year.

CUSTOM KITS

A PERFECT FIT

Design your own sports kits with our in-house experts at your side.

CUSTOM SPECIALISTS

Create a unique uniform and merchandise range for your team.

FABRIC TECH

Technically superior sports apparel fully customised for your club or team.

We have been customising teamwear for more than 20 years. Our design team are specialists in apparel design. Whatever your design idea, we can bring it to life.

SUBLIMATION

Custom apparel is made to order and sublimation is the predominate technology used, due to its flexibility of design and print accuracy. The flexibility of design, customisation and accuracy makes sublimation the preferred technology in custom apparel. Sublimation also allows small production runs not available through other customisation technology.

CUSTOM CUT & SEW

Custom Cut & Sew is the process of selecting specific piece-dyed fabrics to create a unique garment. Cut & Sew refers to the process of cutting the fabrics selected and then producing the final garment through sewing. Cut & Sew provides customers a wide range of fabric options and is best suited to large orders.

FABRICS

Our fabrics are constructed with advanced fibres that incorporate years of development for high performance in sports environments. Fabrics used in KPI On field apparel are lightweight, flexible and durable. The KPI Sports Off field fabric range is extensive and covers lightweight woven materials to thermal fleece. We continuously source new innovations in fabric technology to deliver the best product for our customers.

DESIGN PROCESS

Technical Design

Outstanding sportswear design is more complex than creating an image that looks good on paper. Your uniform needs to look good on real people – on your team.

Sports Expertise

We create sportswear designs that make you feel proud and comfortable when you're playing, training or on the sidelines.

Choose your design

Choose a design from one of our templates or create your own. Our designers can bring your ideas to life. Send us your design concept and we will apply it to your garment of choice, or across a complete club range.

Design Specs

Provide your club and sponsor logos, plus information about size and positioning. Confirm your club colours, or advise which colours you want to match. Tell us about any personalisation, such as numbers or names required in your design.

Mock Up

Our design team will provide a mock up design for approval. The mock up is the visual representation of the design and is the base for developing final Production Artwork.

Production

Once the order is confirmed, the mock up is converted to Production Artwork. Production Artwork is the high-resolution print-ready file that is used in factory to create your uniforms. Production Artwork is approved by you before production commences and includes all details needed to complete your order.

Custom Football

COLOUR CODES

**The colours shown are KPI Standard colours for sublimation.
If your club has a specific colour requirement, we can visually match or match through pantone colours.
For custom Cut N Sew colours, please contact your Account Manager*

DuraLite

Highly versatile, lightweight and durable sports fabric. Applications: non contact sports, jerseys, shirts, shorts.

CoolMesh

Breathable sports mesh providing airflow and comfort. Applications: trim for shirts, jerseys, shorts.

DriMesh

Ultra lightweight linear mesh with elastane. Applications: full garment or trim, non-contact sports. Pro-range.

ProTek

Sports jersey weave with elastane for flexibility and a close body fit. Applications: all sports, full garment, Pro-range.

AeroMax

Micro-perforated fabric to maximise breathability and comfort. Applications: singlets, dresses, polo shirts.

CoolWeave

Classic pique look with a lightweight and moisture wicking construction. Applications: polo shirts.

ProFlex

Multi layer jersey with bonded fleece interior for warmth and comfort. Applications: Qtr Zip Pullover.

Active Weave

Robust, tight weave fabric with light water resistancy. Applications: casual shorts, athletic shorts, gym shorts.

ThermaLite

Interlock fabric construction providing flexibility and light warmth. Applications: track jackets and pants.

MaxDri

Tight weave lightweight shower proof fabric. Application: Dri Jackets, Parkas.

ThermaSoft

Exterior interlock with brushed back fleece interior providing superior garment warmth. Applications: Jackets.

Therma Active

Tricot fabric with smooth outer and lightweight fleece lining. Applications: Jackets, sublimation.

PowerFlex

A versatile fabric with excellent strength and durability for contact sports. Application: shorts, jerseys.

PowerMax

Premium fabric strength and resistance for performance contact conditions. Applications: short, jerseys. Prorange.

DuraJersey

Knitted polycotton jersey fabric with the classic jersey look and cotton hand feel. Applications: school leaver jerseys.

ProStretch

Maximum stretch and comfort with elastane for a firm body fit. Applications: short and long tights, skorts.

IN-STOCK

READY TO GO

The quickest way to get a kit, or just a part of your kit on your team, in your colours.

Our extensive range of Playing and Casual apparel and equipment offers everything your club needs to win, every season.

We have been producing quality sports apparel for more than 20 years. From jerseys, shorts, socks, singlets, jackets and more, we have a product to make your team stand out on and off the pitch.

QUALITY

KPI Sports products are tested in the unforgiving Australian climate and are built to last. Have the confidence your club is investing in a quality, reliable high performance product.

CONSISTENCY

Our colours, sizing and styles are consistent across seasons so your club can have certainty your uniforms will stand out year after year. Have confidence in selecting products that will last multiple seasons.

CUSTOMISE

All KPI Sports in-stock items can be customised by adding club logos, sponsor logos and numbers. Decoration options include vinyl heat seal, embroidery and screenprinting.
