Important: Measure the 1" scale with a ruler to make sure this guide was printed to the correct size.

Stretch Zone: Length representing a comfortable fit that accounts for the extra length you get from a slight product stretch. Products may stretch further after being worn-in.

Before printing, set your document margins to zero. Your document will print across the full width of the 8.5" x 11" standard sheet of paper, as long as your printer's settings are set similarly.
