Battle of the Supermodel Baby Bumps: Candice Swanepoel vs. Behati Prinsloo

First, there were the barely there lounge-about looks, in which each model shared shots of her slightly growing, bikini-clad belly. A variation on the pose was the maternal take on the "hot dog legs" snapshot, which gave each orblike tummy a full-focus view with an ocean or poolside backdrop. (Bonus points go here to Prinsloo, who added a touch of whimsy by decorating her photo with a slew of cheeky emojis.)
