OUR FOLDING CHAIRS**

**Folding, Resin, and Polycarbonate Chairs...
Designed for Durability**

Our folding chairs are the best in the industry. Made of annealed steel, our folding chairs are incredibly strong and lightweight, weighing only 6lbs. Stackable up to 50 chairs on a cart, these chairs are easily portable and low-maintenance.

**Constructed from the finest-quality materials, our
chairs are designed to last.**

Our chairs have an environmentally-friendly powder-coat finish, interstack with most competitors chairs, and use slide track rivets that will not fall out, unlike screws.
