

DW400 Pump Module

2014-2018 GM Truck

PN: 9-401-7014

The DW400 14-18 GM Truck Module is a complete drop in replacement for the OE unit. The module incorporates the DW400 pump which out flows the OE module by more than 50%. This module also integrates seamlessly with the OE wiring harness and level sender. The module also utilizes a venturi fed surge bucket for consistent fueling at low tank levels and high G conditions.

- Powered by the 415LPH DW400 Bosch pump
- Supports 750+ HP (pump gas)
- Venturi bucket for low level pick up
- Integrated filtration pre and post pump
- Retains OE-compatible fuel level sender

Comparative Flow Data

Note: On some Installations, the clocking tab will need to be removed to install module in tank

Module Testing Notes: All testing performed by DeatschWerks at 13.5v on calibrated equipment. In-module flow rates are lower than pump alone due to parasitic losses of venturi system, check valves and plumbing.
