

# What's Living on your Toothbrush?

We tested to see how effective DioxiRinse® Mouthwash was in keeping your toothbrush clean

Five used toothbrushes were collected from volunteer's homes. The bristle portion of each toothbrush was cut in half vertically.

Each half was placed into a separate sterile test tube.

One half submerged in **DioxiRinse** and other half submerged in **Saline (control)** for 1 minute.

## Results - After One Minute Dunk in DioxiRinse

Control

**Conclusion: DioxiRinse Works Effectively & Fast**

**IN JUST ONE MINUTE**, DioxiRinse Mouthwash is highly effective at reducing, and in some cases eliminating, large numbers (tens of thousands) of microorganisms found on the average toothbrush.
