## About Us

**Built on the trusted business values created by Phil and Julie Middleton over 30 years ago, Equine America continues to pioneer our range of products into the 21st Century. Together with world-leading equine nutritionist Deborah Leabeater, MSc, CBiol, MRIB, we strive to achieve excellence in the quality and formulation of each and every one of our products, all manufactured in the UK and mainland Europe.**

We are immensely proud of the high standard of all our products and the results achieved by our customers. From the original Cortaflex® to an extensive selection of highly effective feed supplements and external applications for horses, pets and people, we aim for excellence throughout our portfolio.

## Quality Assured

All our products are manufactured in food industry standard factories, using only the freshest, most innovative and effective ingredients available from approved suppliers. We use state of the art, unique, fingerprint laser quality testing on every single ingredient to ensure a uniform strength and quality, along with an exclusive mixing process to ensure that each scoop contains equal amounts of active ingredients.

**CLEAN  
SPORT**

As a member of the UFAS\* scheme, Equine America takes Clean Sport extremely seriously and takes every measure we can to prevent contamination by harmful substances.

With our products being used by riders across the globe, it is important to us that our customers can be reassured by the high level of certification and measures we take to ensure consistency of quality, and know that our products do not contain prohibited substances. We use only approved suppliers and have full traceability at all stages of our manufacturing process.

In the UK we comply with the regulations administered by the UK Veterinary Medicines Directorate and the Food Standards Agency. Products made in Europe comply with the GMP+ Feed Certification scheme.

## Money back?

Our “30-day money back guarantee” serves to reinforce the total confidence that we have in our products.

*“We use Cortaflex® on all of our horses for the joint support. It gives our horses good support throughout the length of the shows, for the joints, and also extends the time of their careers. We really believe in this product and think it’s a very healthy product, and important for the care of our horses.”*

Harrie Smolders – Olympic Showjumper

# HORSES

In order to maintain peak health and performance, it's important that horses have a balanced diet with the correct mix of vitamins and nutrients. Most concentrate feeds are fortified with minerals and vitamins, however some horses may have higher nutritional needs, so the best course of action is to incorporate supplements into your horse's diet.

From joint care and respiratory care to digestive supplements, skin care and hoof care ranges, we have the products to support your horse. We provide a 30-day money back guarantee for your peace of mind, as well as being on hand to offer advice and guidance should you wish to discuss any of our products.

*"It is incredibly important to us to make sure our horses are feeling comfortable as they compete. Feeding Cortaflex® ensures our horses have the support they need to be at their best, and maintain their peak performance."*

Geir Gulliksen  
Olympian, International Showjumper  
*Equine America Grandino H*

*“We use Equine America’s Apple Lytes to help prevent dehydration in my horses, helping to maintain performance and keep them comfortable, especially when at the competitions”*

**Victoria Gulliksen**  
International Showjumper  
Equine America Papa Roach

*“We feed Uls Gard to support our horses’ gastric health through the year. It’s especially important when we are travelling abroad for shows and want the horses to continue to feel happy and comfortable in themselves.”*

**Johan-Sebastien Gulliksen**  
International Showjumper  
Equine America It’s Me des Saules

*“I use the So Kalm liquid with Equine America Verdiamo Z, to help when they can be a bit stressed on the first days of an event, in new arenas. It helps them to stay calm, focussed and has helped improve our performance.”*

**Jordy van Massenhove**  
International Showjumper  
Equine America Verdiamo Z

## WHAT IS CORTAFLEX®?

Cortaflex® supplements are unique in the marketplace, and often misrepresented when compared with other joint supplements! Cortaflex® provides the building blocks to help the specialised cells in cartilage called chondrocytes maintain joint health. These building blocks include:

- **Collagen** – an important compound needed by the chondrocytes to produce the water-based matrix of the cartilage. Collagen helps to give cartilage its strength. (We utilise a sustainable and ethical source of marine-derived collagen.)
- **Amino acids** such as **glutamic acid** – converted in the horse's body to provide glutamine, which combines with glucose to form glucosamine – which itself then combines with other compounds to help give cartilage its flexibility and shock-absorbing properties.
- **Hyaluronic acid (HA)** – is a key component of joint fluid, which bathes the joint and acts as a lubricant and shock absorber.
- **Copper, manganese** and **silicon** – are important trace elements which are all needed to help the horse produce his own chondroitin, (another important structural compound in cartilage), collagen and hyaluronic acid.

More recently, as well as providing these vital building blocks, MSM has been added to the Cortaflex® supplements, to provide a bio-available source of sulphur, which is important in the repair process of the sulphur-containing bonds in the cartilage matrix. MSM which also supports a normal inflammatory response.

*“One thing I never compromise on is the health and wellbeing of my horses and that’s why we have been using Equine America products for over 20 years! Cortaflex®, is always top of my list.”*

William Funnell  
International Showjumper –  
Gold medalist, European Championships

*“All of our top eventing horses are on Cortaflex® HA to help support their joints. Joint health is super important to us – with our horses flying around 5\* events, it’s crucial they have all the correct joint support they need. We can rest assured our eventers are getting that support with the unique combination of collagen, hyaluronic acid, amino acids as well as Boswellia and MSM that CortaFlex offers!”*

Jesse Campbell – International Event Rider

*“I find Cortaflex® HA Super Fenn really helps my horses, providing them with the support they need to compete at their best. It’s essential in the preparation and recovery, especially when at a three day event.”*

Zara Tindall MBE  
British Equestrian &  
Olympic Silver Medallist

## CORTAFLEX® HA

### REGULAR STRENGTH

Cortaflex® HA Regular provides key nutritional building blocks for joint support including collagen, amino acids, MSM, hyaluronic acid and trace elements. Formulated for horses in light to moderate work or older horses who need extra mobility support.

**Sizes:** Solution: 1L, 5L  
Powder: 250g, 500g, 900g, 3.6kg

## CORTAFLEX® HA SUPER FENN

### SUPER STRENGTH

Providing powerful joint support for performance, racing and competition horses, or older horses with significant levels of wear and tear. Contains a unique combination of collagen, amino acid, hyaluronic acid and trace elements, delivering the important nutritional building blocks to support joint health. Also contains Boswellia and MSM to support a normal inflammatory response, promoting joint and muscle comfort in hard-working horses.

**Sizes:** Solution: 1L, 5L, 20L  
Powder: 500g, 4.5kg

*“Cortaflex® is one of my favourite Equine America products. For one, it definitely gives the horses extra mobility in their body. This is obviously very important in our field given how fine the margins are nowadays.”*

**Joe Stockdale** – International Showjumper  
Equine America Don Diego De Plata

*“The proof is in the pudding. Both Welham and Gammon won the Derby at over 20 years with the help of Cortaflex®, it is exceptional and I’ve been using it ever since! I even take the Human Cortaflex® myself to keep me going!”*

**John Whitaker MBE**  
British Equestrian & Olympic Medallist

## CORTAFLEX® RECOVERY

### POWERFUL SUPPORT FOR JOINTS AND MUSCLES

Intense training, racing and competition programmes place considerable demands on the horse's musculo-skeletal system. Cortaflex Recovery provides premium strength, targeted nutritional support for joints and muscles, promoting optimum performance and enhanced recovery.

Cortaflex Recovery is designed to support the horse's own anti-inflammatory processes, as well as providing high levels of chondro-protective ingredients and antioxidants, to aid in recovery after intense training, competition and racing.

**Sizes:** 1.5kg, 4.5kg, 12kg

Chondro-protective ingredients include: hydrolysed collagen, hyaluronic acid, key amino acids, chelated manganese and copper.

Natural anti-inflammatory and antioxidant processes are supported by: High AKBA Boswellia, Curcumin, omega 3 fatty acids, black pepper, Vitamin E, Vitamin C, Vitamin B12, Beetroot powder, glycine, Rosemary, grape seed extract.

*"I have been very impressed with Cortaflex Recovery, they ate it straight away and are all feeling really good in their muscles and joints. I am very happy with how the horses look in their coats and their general well-being."*

**Dan Skelton**  
Leading National Hunt Trainer

## BUTELESS® SUPER STRENGTH POWDER

### XXXTREME COMPETITION FORMULA FOR JOINT AND MUSCLE

**SUPPORT YOUR HORSE'S HEALTH** – A blend of natural, plant-based ingredients to help maintain joint and muscle comfort and support mobility in high-performance horses and ponies.

**NATURAL INGREDIENTS** – A rapid-action botanical blend of boswellia, MSM, yucca and turmeric that helps maintain a healthy inflammatory response. It supports joints, aids in muscle function and supports collagen structures and muscle recovery.

**Sizes:** 1.5kg, 5.5kg

**ESSENTIAL FOR JOINT HEALTH** – Rich in antioxidants Vitamin C, Vitamin E and MSM. These essential antioxidants play a leading role in a horse's defence systems to protect joints and muscles from the damaging effects of free radicals.

**FEEDING GUIDE** – A 1.5kg tub should last an average horse 30 days when fed as part of a balanced diet. Generally, for a 500kg horse, feed 50g per day. Do not exceed 100g per day. 50g (approx) measure enclosed.

## BUTELESS® PASTE

### SUPPORT MOBILITY AND COMFORT IN HORSES

A palatable blend of three key plant-based ingredients to help maintain joint and muscle comfort and support mobility in all horses and ponies. Includes **Boswellia**, **Yucca** and **Marshmallow** extracts to help maintain a normal inflammatory response.

**Size:** 30ml

*"I feed Buteless® to all my horses, especially when I am away at a show to make sure their muscles and joints feel the best they can."*

Ellen Whitaker – European Champion  
Equine America Spacecake

*"Buteless® makes my horses feel well during the high level competitions, it takes care of my horses health. For me, that is the number one priority when competing."*

Victoria Gulliksen – International Showjumper  
Equine America Papa Roach

## BUTELESS® ORIGINAL HIGH STRENGTH POWDER

### FOR JOINT AND MUSCLE SUPPORT

Buteless® Original Strength Powder is a palatable blend of natural, plant-based antioxidants, formulated to help maintain joint and muscle comfort and support mobility in all horses and ponies.

Contains boswellia, MSM, turmeric (and black pepper), Vitamin E, Vitamin C, yucca, rosemary and grapeseed extracts, on a linseed base, to provide important omega 3 fatty acids. To support a normal inflammatory response.

**Sizes:** 1kg, 3kg

## KENTUCKY™ JOINT SUPER STRENGTH POWDER

**POWERFUL EQUINE JOINT SUPPORT FOR PERFORMANCE HORSES**

Kentucky Joint Super Strength powder is formulated using the latest scientific research, including high levels of key chondro-protective compounds plus natural ingredients to support the horse's anti-inflammatory processes, to support optimum performance and soundness in all performance horses.

This highly palatable supplement contains two sources of glucosamine - Glucosamine HCl and N-Acetyl-D-Glucosamine together with chondroitin sulphate, to help support and maintain the vital elasticity and shock absorbing properties of healthy cartilage.

Kentucky Joint Super Strength Powder also provides high levels of Hyaluronic Acid (HA) help to lubricate the joint, promoting the viscosity and health of the joint fluid. HA is key in providing nutrition to the joint as well as also acting as a further shock absorbing material.

Vitamin C and other antioxidants, together with bioavailable, organic sources of key trace minerals including copper, zinc and manganese are also included and play important roles in many enzyme systems important in maintaining joint health.

High quality Boswellia and MSM help to support the horse's own anti-inflammatory processes, to help limit ongoing wear and tear, promoting joint comfort and mobility.

**Sizes:** 350g, 700g, 1.115kg

## KENTUCKY™

**LIQUID JOINT SUPPLEMENT**

Kentucky™ liquid joint supplement has been carefully formulated and includes glucosamine hydrochloride, collagen and hyaluronic acid, to provide nutritional support to maintain healthy cartilage and synovial (joint) fluid. Also has added MSM, boswellia and Vitamin C, all known to support joint health and mobility.

**Size:** 1L

## GLUCOSAMINE™ HCl 12,000 – PREMIUM QUALITY

**FOR EQUINE JOINT HEALTH**

A potent combination of glucosamine (from hydrochloride or HCl), fortified with MSM and hyaluronic acid, on a palatable dextrose base, providing great value joint and mobility support for all horses and ponies.

Glucosamine™ HCl 12,000 provides 12g of glucosamine plus HA per 30g loading dose to provide nutritional support for cartilage and to help maintain synovial fluid, which lubricates and nourishes the joint.

**Size:** 1kg, 5kg

## MSM POWDER™

**FOR THE NUTRITIONAL SUPPORT OF HEALTHY JOINTS, SKIN & HOOVES**

MSM (Methylsulphonylmethane) is a high quality, bio-available form of organic sulphur, which is found naturally in fresh forage, but is largely lost by processing feed and the drying process of preserved forage (hay and haylage).

This means that many stabled competition horses and ponies may not receive enough of this essential nutrient. Sulphur plays many important roles in the horse's body. It is a vital component of some amino acids and certain vitamins, and crucially, sulphur also plays a very important role in the production of collagen – a key component of connective tissue (ligaments and tendons) and cartilage – the “shock absorbing” layer in joints.

All these specialised tissues are made from proteins, bonded by flexible sulphur compounds, which gives these important structures their vital elasticity.

MSM is a powerful antioxidant and helps support a normal inflammatory response.

**Size:** 500g

*“Xtra Boost Paste is great for our horses’ energy levels just before cross country. It helps make sure energy levels are as high as we can get them for peak performance!”*

Zara Tindall MBE  
British Equestrian &  
Olympic Silver Medallist

## APPLE LYTES™

### REPLENISHES LOST ELECTROLYTES AFTER EXERCISE

An increase in body temperature, either as a result of exercise, travelling or high environmental temperature, will cause the horse to sweat. The evaporation of this sweat helps the horse to cool down and regulate his body temperature. Sweating causes fluid loss, together with the loss of body salts called electrolytes, contained in the sweat. A horse in moderate work, trotting and cantering, can lose as much as 5-7 litres of fluid and 50-70g electrolytes in an hour, and this will increase as the work intensity or duration increases, and even more in hot, humid weather.

Apple Lytes™ has been carefully formulated to begin to replace the key electrolytes: sodium, chloride, potassium, calcium and magnesium and to encourage drinking to help prevent dehydration and maintain peak performance. Research has shown that just 1% dehydration can adversely affect a horse's performance so maintaining hydration, and replacing lost electrolytes is important not only for elite competition horses, but for all horses and ponies.

Apple Lytes™ is palatable, low in sugar and suitable for all horses and ponies. It is available in powder and liquid forms as well as a convenient, easy to administer syringe, handy for travel and shows.

**Sizes:** 2.5kg, 1Ltr, 5Ltr, 20Ltr, 10kg

*“Keeping my horses hydrated is essential for optimum performance, especially in eventing. I’ve trusted Equine America to deliver the best nutrition for my horses for over twenty years”.*

Pippa Funnell MBE  
Olympic Silver Medalist

## LIVER FLUSH™

### TO SUPPORT HEALTHY LIVER FUNCTION

A unique combination of natural ingredients which support the vital functions performed by a healthy liver. Includes plant extracts milk thistle and dandelion together with other antioxidants.

**Size:** 500ml

## FORMULA 1™

### THE ULTIMATE COMPETITION SUPPLEMENT

Elite performance horses undertaking rigorous training, travelling, competition or racing schedules may require additional support for their joints and muscles, digestive system, immune system and to maintain peak energy levels. Feeding several different supplements to meet these needs can be costly and time-consuming. Formula 1™ can solve this problem, combining key ingredients from Equine America's top performance products into one palatable, easy to feed pellet to provide nutritional support for gastric health, joints, muscles, bones, hooves and the immune system, as well as a broad-spectrum mineral and vitamin supplement and probiotic.

**Sizes:** 3.6kg, 10kg

## XTRA BOOST HEMOGEN®

### SUPPORT HEALTHY BLOOD PRODUCTION FOR HORSES IN HARD WORK, TRAINING OR COMPETITION

Blood transports oxygen and nutrients around the body – the more blood cells, the more oxygen and nutrients are available to the muscles and tissues, enabling the horse to work harder and for longer. Xtra Boost Hemogen® contains a specialist and highly absorbable form of iron, essential in the production of red blood cells, supported by B vitamins and accompanied by active, water-soluble vitamins and minerals to maximise energy and stamina.

**Sizes:** 1L, 30ml paste

*“We use Equine America Apple Lytes to replenish lost electrolytes, help keep the horses hydrated and therefore able to maintain optimum performance throughout the whole competition. Also importantly, the horses like the taste!”*

**Boyd Exell**  
Six-time World Champion, Four-in-Hand Driving

*“Xtra Boost Hemogen® is helping to keep my horses fresh when competing a lot in hot weather. It makes them feel lighter in the body whilst working and gives fantastic results!”*

**Jordy van Massenhove**  
International Showjumper  
Equine America Verdiamo Z

## MAGNITUDE™

### FOR A MORE RELAXED HORSE

Magnesium has many roles within the body, including the health of nerve endings and fibres, and a lack of magnesium may show in a horse as tension or nervousness. Magnitude is a highly absorbable form of magnesium that should be fed daily to horses or ponies to promote healthy nerve tissue and reduce nervous tension.

For very young, excitable or overzealous horses requiring focus, increased concentration and calming, a product from the So-Kalm® range will be more suitable. Either Super So-Kalm® or So-Kalm® Paste may also be used as a pre-competition addition alongside Magnitude.

Size: 1kg

## NO MORE MOODS™

### FOR MOODY MARES & TEMPERAMENTAL STALLIONS

Hormone imbalances in mares can lead to 'stropy', unwilling behaviour, sometimes making a horse difficult to handle and resulting in a reduction in performance. No More Moods™ contains liquid chaste berry, a plant which has been recognised for many years for its benefits in supporting correct hormone levels.

Use No More Moods™ daily to turn your 'nightmare into a nice mare'. May also be used for stallions.

Size: 1L

*"This has been a game changer! It complements the mares natural oestrus cycle and includes ingredients to help with their hormone balance. I wish I knew about it earlier."*

Liz Diegutis – International Dressage Rider

## SHAKER GARD™

### ADVANCED NUTRITIONAL SUPPORT FOR SEASONAL AND HEAD DISCOMFORT

This discomfort may be seasonal or can occur all year round and may be triggered by exposure to sunlight, wind, pollen and dust. Shaker Gard™ provides a potent blend of minerals, vitamins, antioxidants, omega 3 fatty acids and phytochemicals from plants to support nerve health, as well as the respiratory, immune and endocrine systems.

Size: 1.5kg

## SO-KALM®

### TO SUPPORT CONCENTRATION AND FOCUS

Horses can experience nervousness and tension before exercise or competition causing them to misbehave. So-Kalm® contains a premium grade magnesium with L-tryptophan, an essential amino acid associated with the production of serotonin, to calm and focus the horse. Fed daily, this can aid concentration and willingness to work, without removing the edge required for competition.

Sizes: 1L, 30ml paste

*"So-Kalm has become a routine part of our training and competition programme, as not only does it help reduce stress and improve concentration, but also supports our horse's health by keeping stress levels down so we know we're getting the best out of our eventers."*

Georgie Campbell – International Event Rider

## SUPER SO-KALM®

### REDUCE STRESS, PROMOTE CALMING, IMPROVE CONCENTRATION

Horses are fright and flight animals, and can be prone to excitability and nervousness in unfamiliar surroundings (such as a new competition or training venue), which can cause them to lose concentration and focus. Super So-Kalm® powder provides three key micronutrients to help the horse to maintain a calm outlook and concentrate on his work. Magnesium – plays many important roles in the body, including muscle function, and is a key cofactor in enzymes, which are important in nerve transmission. A lack of magnesium in the diet can result in neuro-muscular excitability. Calcium – interacts closely with magnesium and also plays important roles in maintaining correct muscle and nerve function. Vitamin B1 (thiamine) – plays a key role in nerve impulse transmission, as well as in energy production. Super So-Kalm® also provides tryptophan, a key amino acid which can be converted in the horse's liver to produce the important B vitamin niacin. For rapid support, use Super So-Kalm® Paste in a handy syringe on show day – for best results always give 2-3 hours before the event.

Sizes: 1kg powder, 30ml paste

*“I use Super So-Kalm® for my horses before they go in the ring. It helps them concentrate and do their best performance under pressure!”*

**Katy Green**  
Showing Rider & Producer

*“We use the Super So Kalm, I prefer horses with a bit of blood, but they are often a bit stressed, the Super So Kalm helps them to relax and focus in the arena which gives the better results.”*

**Maikel Van Der Vleuten**  
Olympic Silver Medalist

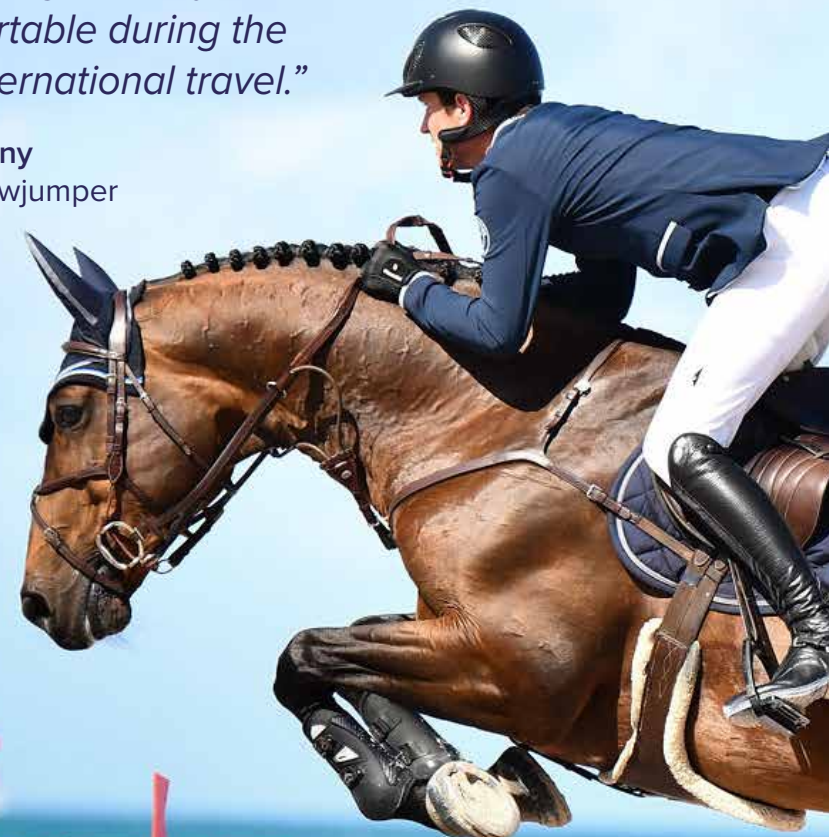

*“I couldn’t do without Pro-Gut®.  
I feed it to all my horses when  
travelling abroad to help with  
the stress of travelling.”*

**William Funnell**  
International Showjumper  
Gold Medalist, European Championships  
*Equine America Diamo*

*“We use Equine America Uls-  
Gard Pellets to ensure that  
my horses digestive systems  
are comfortable during the  
regular international travel.”*

**Darragh Kenny**  
Olympic Showjumper

*“My vet recommended Uls-Gard and I have found that it really helps support all my horses’ gastric health and wellbeing, keeping them in top condition, and able to perform to their best at both National and International shows.”*

**Shane Breen** – European Silver Medallist

## ULS-GARD™

### TO SUPPORT GASTRIC HEALTH IN HORSES & PONIES

Competition horses are subjected to many stresses from intense training, travelling and competitions. Combined with meal feeding and often restricted access to forage, this can result in gastric discomfort and a loss of condition and performance.

Uls-Gard™ contains key ingredients to help support gastric health, including pectins, lecithin, aloe vera, marshmallow root, glycine and liquorice with added pre and probiotics to support a healthy gut microbiome. Uls-Gard™ should ideally be fed 3 times daily for optimum support and is suitable for all competition horses and ponies, especially those on high-concentrate diets. Uls-Gard™ can continue to be fed whilst the horse is in competition.

**Sizes:** Pellets: 3kg, 10kg  
Solution: 1L, 5L

## PRO GUT BALANCER

### UNIQUE COMBINATION OF PREBIOTICS, PROBIOTICS AND MOS

Pro Gut Balancer is a unique combination of pre and probiotics, together with a mannan oligosaccharide (MOS), to help maintain the health of the gut microbiome in the light of the many challenges faced by modern performance horses to:

- Promote optimum digestive function and energy production from dietary fibre sources (about 60-70% of the energy the horse needs comes from microbial fibre digestion)
- Promote synthesis of vital B vitamins and Vitamin K by the gut microbiota
- Prevent colonisation by undesirable microorganisms which may result in a drop in hindgut pH leading to further metabolic dysfunction.
- Boost immunity

All of which are vital to maintain optimum health and performance in equine athletes.

**Sizes:** 450g, 900g, 2.7kg

## SANDOUT™ PELLETS

### A DIGESTIVE AID FOR HORSES OR PONIES GRAZING SANDY PASTURES

Sandout™ Pellets contains over 90% psyllium husk – from the seeds of the *Plantago ovata* plant. Psyllium husk contains around 70% soluble fibre, and is known to absorb water rapidly (increasing in size by tenfold) and forming a gelatinous compound containing glycosides and mucilages. Because of the abrasive nature of sand as it moves through the digestive system, the gut lining may be affected, upsetting the balance of the vital microbiome (“gut bugs”) which normally adheres to the gut lining. So Sandout™ Pellets also contains a probiotic to help restore a healthy microbiome.

**Size:** 2.6kg

*“We use Equine America Pro Gut Balancer and it is an essential product for my horses, especially as they are travelling to shows regularly. Cortaflex® is also a fabulous joint supplement to help keep the more mature horses, like Equine America Valmy de Lande, competing at 5\* level.”*

**Jack Whitaker**  
International Showjumper  
Equine America Elucar V.E

*“When staying away, travelling and stabled I support my horses respiratory system with Airways powder to help with the respiratory function and general wellbeing. I really notice the difference, they are happier all round and more comfortable in their work.”*

**Louise Bell**  
International Dressage Rider

## AIRWAYS®

### SUPPORTS HEALTHY AIRFLOW

Airways® Solution contains a powerful blend of natural, plant-derived essential oils, known for their role in maintaining respiratory function, in a palatable solution with added honey and cider vinegar. Eucalyptus oil is well known for its ability to help clear the respiratory tract of a build-up of mucus caused by constant exposure to dust and spores. Peppermint oil and its active ingredient, menthol, have been used in humans and animals for centuries to help open the airways and clear excess mucus. Many of the compounds found in peppermint oil will provide nutritional support to help the horse's own respiratory defenses.

**Size:** 500ml

## AIRWAYS® XTRA STRENGTH

### SUPPORTS RESPIRATORY HEALTH & ENCOURAGES MAXIMUM AIRFLOW

Stabled horses are subjected to a constant respiratory challenge from fungal spores and dust in their immediate environment, which can affect their respiratory health and function. Targeted nutritional support can help support the horse's natural defence against such challenges. Airways® Xtra Strength Powder contains a powerful blend of natural, plant-derived essential oils, known for their role in maintaining respiratory function.

**Size:** 500g, 2.5kg

## VENTILATOR™

### FOR HEALTHY RESPIRATION... NATURALLY

A plant-based supplement specially formulated using a unique combination of herbs and natural ingredients to support respiratory health.

**Sizes:** 500g

## COFF-LESS™

### SUPPORT FOR A HEALTHY RESPIRATORY SYSTEM

There are occasions when your horse or pony's healthy respiratory system is overwhelmed, and they cough to try to clear their airways. Targeted nutritional support can help support the horse's natural defences against such challenges. Coff-Less™ Powder contains a powerful blend of natural herbs and phytochemicals (active compounds from plants), known for their role in maintaining respiratory function.

Coff-Less™ also contains echinacea and MSM to help support the immune system.

**Sizes:** 1kg

## POLLEN EZE™

### TO SOOTHE AND COMFORT HORSES AND PONIES AFFECTED BY POLLEN

Horses and ponies can be adversely affected by pollen, resulting in anxiety, nervousness and discomfort. Pollen Eze™ contains a unique blend of natural ingredients and herbs designed to mop up harmful free radicals and to soothe and comfort horses and ponies affected by pollen.

**Size:** 500g

## BLEADER GARD™

### ESSENTIAL SUPPORT TO THE LUNGS AND BLOOD VESSELS

Bleader Gard™ Super Strength Powder is a powerful blend of antioxidant vitamins and plant-based compounds (phytochemicals) to provide nutritional support for lungs and blood vessels.

Key features include a potent combination of antioxidants, bioflavonoids and nitric oxide (NO) pre-cursors to support respiratory health. Also provides magnesium and Vitamin B1 to help support the nervous system during times of stress, such as during fast work and on race or competition days.

**Sizes:** 1kg, 6kg  
30ml paste, also in pellets

## PRO-PELL PLUS®

### A HIGH SPECIFICATION, GENERAL PURPOSE DAILY TONIC

New, improved formulation – with an energy dense glucose-fructose complex to ensure Pro-Pell Plus® is appetising and palatable when horses need a pick-me-up!

High levels of work, and an intense competition programme can leave some horses feeling fatigued and a little “flat”. This can also occur when horses are recovering from an illness and struggling to return to their original workload.

Pro-Pell Plus® is a daily tonic, designed to provide vital micronutrients, which are important in key areas for optimum health and performance:

High levels of B vitamins: for energy production and appetite stimulation.

Bio-available trace minerals: key trace elements important in muscle function and blood-building are supplied attached to amino acids or peptides to ensure optimum absorption, including copper, manganese, zinc and a controlled level of iron.

Antioxidants: Vitamin E and selenium are important antioxidant micronutrients to help support muscle cell membranes from free radicals and oxidated damage, which occur naturally during work.

Pro-Pell Plus® can be safely fed at the recommended levels in conjunction with most typical feed regimes when horses need that little extra boost!

**Sizes:** 1L, 5L

## EVERYDAY VITAMIN & MINERAL SUPPLEMENT™

### BROAD SPECTRUM FORMULA

Providing over 25 key vitamins, minerals and trace elements, together with probiotics and prebiotics, Everyday Vitamins and Minerals are the ideal way to help ensure optimum health and performance in horses and ponies on forage-based diets, or low intakes of concentrate feed. Forage should form the basis of all equine diets, but many pastures are low in key minerals, and preserved forages such as hay and haylages can lose much of their vitamin content with drying and storage. Many horses and ponies do not need the extra calories from fortified concentrate feed, and this can mean that their forage-based diet may be low in key minerals and vitamins.

Everyday Vitamins and Minerals provide a cost-effective, simple way to provide important micronutrients, such as vitamin A for the immune system, healthy skin and vision, Vitamin D for strong bones, the antioxidant Vitamin E for muscle health and B complex vitamins for blood health, immune boosting and helping body cells to work correctly. Important minerals including calcium and phosphorus help build and maintain strong bones and muscles, and magnesium helps support the nervous system.

Trace elements including copper, zinc, manganese, iodine, selenium and iron all play important roles in bones, muscles and maintaining health and vitality.

Probiotics and prebiotics included in Everyday Vitamins and Minerals help maintain a healthy gut microflora, which is vital for supporting the immune and digestive systems.

Everyday Vitamins and Minerals are carefully blended on a palatable alfalfa base, which also provides important amino acids, together with seaweed, a natural source of many nutrients.

**Size:** 1.5kg

## VITAMIN C

### ADDITIONAL ANTIOXIDANT SUPPORT

Vitamin C is involved in the transfer of iron and is vital to the normal formation of collagen, an essential structure of skin and connective tissue including tendons and ligaments. Vitamin C also supports the immune system.

Healthy horses synthesise their own Vitamin C and this, along with Vitamin C gained through green leafy forage, is normally considered sufficient. However, horses in hard work with little access to fresh green forage or recovering from illness or injury may benefit from additional Vitamin C.

**Size:** 1kg

## VITAMIN E & SELENIUM™

### ANTIOXIDANT SUPPORT FOR HEALTHY MUSCLE FUNCTION

Vitamin E is a fat-soluble, antioxidant vitamin and plays a vital role in many important functions in the body, including the immune system, reproduction and the correct functioning of nerves and muscles.

Selenium is an important antioxidant trace element. It plays vital roles in the correct functioning of the immune system and is a key component of a number of selenoproteins. Selenium and Vitamin E play particularly important roles in maintaining muscle health.

**Size:** 1kg

## COPPER-PLUS™

### SUPPLEMENTAL COPPER AND VITAMIN B12

Copper is a key trace mineral and plays many important roles in the body including red blood cell production. Copper is also a key component in antioxidant enzymes helping to protect muscles from free radicals and oxidative damage. Copper also plays an important role in bone development and the production of healthy skin and coat. Copper interacts closely with zinc and Vitamin B12 and both these micronutrients are provided in Copper Plus. Key antioxidants Vitamin E and controlled levels of selenium are also provided.

**Size:** 1kg

## LAMIGARD™ TRT SOLUTION

### NUTRITIONAL SUPPORT FOR HEALTHY LAMINAE

Lamigard™ Regular is a carefully formulated blend of ingredients to provide nutritional and antioxidant support for horses and ponies, and can be used both at higher levels for short-term benefit, and maintenance levels for long-term health. Use Lamigard™ Regular Solution in conjunction with a fibre-based, low starch and sugar diet, which provides a broad spectrum mineral and vitamin supply for optimum health.

Contains:

- A unique source of key antioxidant enzymes
- Vitamin E – one of the best known antioxidant vitamins
- Magnesium – to support carbohydrate and insulin metabolism
- Folic acid – to support vascular health in the hoof
- Milk thistle – to provide antioxidants and support for a normal inflammatory response
- Marshmallow root extract – to provide support for a normal inflammatory response

**Size:** 1L

## LAMIGARD™ ADVANCED CARE PELLETS

### NUTRITIONAL SUPPORT FOR HORSES AND PONIES, ESPECIALLY DURING SPRING AND AUTUMN GRASS FLUSHES

Lamigard Advanced Care Pellets deliver a unique approach to the nutritional management and metabolic support for horses and ponies. Lamigard Advanced Care pellets are low in sugar and starch, high fibre, easy to feed and suitable for horses and ponies on very low, or no other concentrate feed, and provide:

- Potent Antioxidant support from key vitamins and minerals, as well as plant-based extracts
- Pre and Probiotics for hindgut support, as well as a MOS (mannan oligosaccharide) to bind undesirable microbes, and take them out of the gut
- A combination of minerals and plant extracts including magnesium and cinnamon to support the endocrine (insulin) system
- Folic acid to support the vascular system
- High levels of biotin, plus MSM and zinc to support hoof quality and growth

Lamigard Advanced Care Pellets contain a potent blend of key nutrient and plant extracts to help in long-term nutritional management of horses and ponies prone to both SIRS laminitis and those with endocrine dysfunction.

**Size:** 1.5kg

## SUPER HOOF PELLETS™ PLUS

FOR STRONG AND HEALTHY HOOVES

Super Hoof Pellets™ Plus has been formulated to provide key nutrients, scientifically proven to be important in the production and maintenance of sound, healthy hooves. An ultra-high specification to support optimum hoof growth and quality. Containing 30mg biotin per 100g daily serve, in an easy to feed palatable pellet, which also provides key sulphur-containing amino acid methionine plus MSM. Also contains key plant-based antioxidants including milk thistle together with a probiotic to support gut health.

**Sizes:** 500g, 1kg, 3kg (pellets)

## HOOF BALM™

EVERYDAY HEALTH AND SHINE, NATURALLY

Equine America Hoof Balm™ is a super concentrated blend of natural oils that shine, moisturise and nourish the hoof, whilst still letting it breathe. These oils are beneficial to the health and nourishment of the hooves and enable the delivery of moisture and nutrients, deep into the inner layers.

Equine America Hoof Balm™ is the ideal product to use all year round – in dry conditions, it provides excellent moisturising properties, whilst in winter it provides a water barrier against wet conditions while continually letting the hoof breathe.

**Size:** 500ml

*“Hoof care is so important. As a farrier I see the damage that competing or being ridden on roads can do to a horse’s hooves. To help keep hooves healthy and strong I advise all my clients to feed Super Hoof Pellets which contain high levels of biotin, zinc and sulphur, and to use Hoof Balm™ which works wonders on cracked and damaged hooves”*

Jeremy Hazeltine  
Farrier

## BIOTIN XTRA™

TO SUPPORT STRONG HEALTHY HOOVES

Biotin Xtra™ Powder provides a full 20mg biotin per 50g daily dose, as well as zinc and the sulphur-containing amino acid, methionine, to help promote strong, healthy hooves. Biotin Xtra™ Powder also contains MSM, an additional source of bio-available sulphur to help promote hoof wall strength and integrity.

Calcium is also an important nutrient for hoof health and growth, and is provided from two sources in Biotin Xtra™ Powder – naturally present in alfalfa, and also from calcium carbonate.

Brewers yeast is also included, to provide a natural source of B vitamins, which play many important roles in hoof, skin and coat health.

**Sizes:** 2.5kg

## FUNGATROL HOOF DRESSING

MOISTURISING & CONDITIONING HOOF OIL

100% natural hoof care oil with valuable care formula containing nourishing avocado oil as well as oregano oil which is known for its antibacterial and antifungal properties.

Fungatrol Hoof Dressing helps to keep the hoof horn healthy, elastic and promotes horn stability.

**Sizes:** 450ml (Brush included), 2.5L Refill

## MORE MUSCLE™

### TO SUPPORT MUSCLE GROWTH AND DEVELOPMENT

Scientifically formulated to support muscle development during periods of intense training when muscle turnover is increased, rehabilitation work, sales preparation or in underdeveloped horses of any age. Contains key amino acids including lysine and leucine from high quality protein sources including whey, spirulina, linseed and soya. Also contains rice bran to provide additional oil-based calories. Contains important antioxidants including Vitamin E and Selenium, rosemary and grape extract to support muscle function and health. Provides a probiotic to support gut health.

**Sizes:** 3kg, 10kg

*“We use More Muscle to help support the development of our young horses as well as supporting the older horses through intense training and competition periods!”*

**Johan-Sebastian Gulliksen**  
International Showjumper  
*Equine America It's Me des Saules*

## TYE-GARD®

### FOR HEALTHY MUSCLE FUNCTION

Contains high levels of key ingredients to support healthy muscle function. Provides high levels of Vitamin E together with controlled levels of Selenium and Copper in addition to potent plant-based antioxidants including melon pulp. A highly bioavailable source of calcium is also included to help maintain healthy muscle cell membranes.

Use Tye-Gard® daily for horses in high levels of training or competition to ensure optimum muscle health.

**Sizes:** 1L, 5L

## BETTER BONES™

### TO SUPPORT HEALTHY MUSCULOSKELETAL DEVELOPMENT

Better Bones™ Pellets are a carefully researched combination of key minerals, Vitamin D3, collagen and amino acids, to support correct bone growth and development in young, growing horses, including young racehorses and performance horses entering training, as well as broodmares.

The skeletal development and health of a young horse begins in utero, and ensuring the broodmare receives the correct intake of key nutrients will be critical to the growth of the unborn foal. Producing high quality milk places a significant drain on the nutrient reserves of the mare, and maintaining mineral intakes during peak lactation is vital to ensure the foal receives the best nutrition to support the rapid skeletal development in the early weeks and months of growth.

Mineral and other nutrient imbalances in growing youngstock have been recognised for some time as a potential factor in the incidence and severity of developmental skeletal abnormalities, and although genetics and environmental factors can also play a significant role, breeders and trainers can exert a significant degree of control over the nutrition of the horses in their care, ensuring they receive optimum levels of key nutrients.

**Size:** 3.5kg

## CUSHINS™ PELLETS

### TO SUPPORT HORMONE BALANCE

Cushins pellets are formulated to provide significant nutritional support for the endocrine (hormone) system, also providing important nutrients and plant-based ingredients to support a healthy carbohydrate metabolism including Agnus castus (chaste tree berries), cinnamon and magnesium.

Providing pre and probiotics, to support a healthy gut microbiome. Palatable and suitable for all horses and ponies. Supporting hoof health with 20 mg biotin plus methionine. Low sugar and starch formula. Providing natural plant-based antioxidants plus MSM.

**Size:** 1kg

## EMUNE

### SUPPORTING THE IMMUNE SYSTEM

A concentrated solution of echinacea and astragalus formulated to support the immune system. Recommended when a horse is fatigued or stressed from travelling and competition.

**Size:** 1L

## TURMERIC XTRA

### FOR HORSES TO SUPPORT GENERAL HEALTH

Ready to use, with linseed (flax) oil and black pepper already included!

Equine America Turmeric Xtra is a unique blend of high quality turmeric, typically providing at least 3% of active curcumin, with highly palatable, cooked, full fat linseed meal, so there is no need to add further linseed (flax) oil! Ground black pepper, providing the active compound piperine is also already included, at levels thought to enhance the absorption of the curcumin.

- Full fat linseed meal contains high levels of oil to help absorption of the curcumin, as well as providing important omega 3 fatty acids
- Black pepper contains the active compound piperine, and as well as enhancing the absorption of curcumin and other nutrients, may help support immune function
- Turmeric Xtra – the natural, easy way to help support general health and mobility in all horses and ponies

**Size:** 3kg

*"I love the Supreme Omega Oil and have fed it for a while now for all my horses – I have noticed a massive difference in their coats, they are all super shiny. They all look great since using it!"*

**Amy Inglis**  
Seven youth European medals

## EA SUPREME OMEGA OIL

Essential omega 3 fatty acids for a glossy, coat, healthy skin and overall wellbeing.

Provides a ratio of 3:1 omega 3: omega 6 fatty acids.

A complementary feed for horses, as part of a balanced diet for the nutritional support of:

- A glossy coat
- Healthy skin
- Digestive health
- Joint mobility
- Immune function

**Size:** 1L, 5L

## IN MEMORY OF RORY GILSENAN

In April 2020, our great friend and top showing producer, Rory Gilsean passed away after a short battle with brain cancer.

Among Rory's many achievements in the show ring was winning the Cuddy Working Hunter of the Year title at the 2018 Horse of the Year Show with Atlantic Slim, which he won shortly before his diagnosis. Then in 2019, less than three months after having chemotherapy and radiotherapy, the combination won the working hunter championship at the Royal International Horse Show. Rory was awarded the 2019 Roger Stack Award at Hickstead's showtime ball in recognition of the top performances.

Rory had been a close family friend of Lee's for over 28 years as well as an Ambassador for the brand, so in 2019, Equine America launched EA Bloom & Condition™ Pellets with 50% of the money raised from every sale going directly to Rory and his family to support them during such a difficult time.

### EA BLOOM & CONDITION™ PELLETS

#### PELLETS AS USED BY THE LATE RORY GILSEAN

- Energy-dense with high levels of omega 3 to enhance skin and coat condition
- Slow-release energy for improved condition and stamina without excitability
- Suitable for all types of horses and ponies needing extra condition
- Especially suited to show horses, older horses, poor doers, underweight fillies out-of-training, competition horses and hunters who struggle to maintain condition during the season, fussy feeders and horses with weight loss following illness or injury
- Fortified with added calcium to ensure a balanced calcium:phosphorus ratio
- Palatable and easy to mix in feed

**Size:** 18kg

## FUNGATROL™ RANGE

The effects that mud and rain can have on the horse's skin can be distressing for both horse and owner. The Fungatrol™ range with its powerful properties will condition and protect your horse's skin against all of the elements.

### FUNGATROL™ CREAM

Horses are often subjected to rain, mud and scab formation on their legs. Our Fungatrol™ Cream supports supple healthy skin. A unique blend of natural ingredients including chamomile, tea tree, mineral oil, clove bud essential oil and petroleum jelly.

**Size:** 400ml

### FUNGATROL™ SPRAY

A 'leave on' water-based spray containing a unique blend of plant-based ingredients with added coat conditioners. After washing, apply the Fungatrol Spray all over to maintain healthy, supple skin.

**Size:** 500ml

### FUNGATROL™ NO-RINSE BODY WASH

Fungatrol™ No-Rinse Body Wash is a non-irritant no-rinse wash, with powerful plant-based ingredients. Perfect during the winter months if your horse has dry or flaky skin.

**Size:** 500ml

*"We always use Green Ice Gel™ after every event to refresh their tendons and joints. The smell of witch hazel is amazing!"*

Jesse Campell  
International Event Rider

### GREEN ICE GEL™

#### REFRESH TIRED TENDONS AND JOINTS

A soothing, cooling and easy to apply gel to refresh tired tendons and joints after exercise or competition. Contains Witch Hazel and Arnica.

**Size:** 1.5L

### LIKE ICE™

#### COOLING AFTER EXERCISE

Sorboplex™, the special ingredient in Like Ice™, begins working on contact to tighten and cool hot, tired legs after strenuous exercise. The 24-hour kaolin base cools the leg, while aloe vera and melaleuca soothes and moisturises. Like Ice washes off easily, making it ideal for the busy yard.

**Sizes:** 2.7kg, 11kg

## DERMA GEL® & SPRAY

### PROTECTION AND SKIN CARE

The number one herbal skin hydrogel, for intensive and rapid skin care, plus a protective barrier effective against foreign contaminants. Derma Gel® provides and maintains a moist, epidermal environment with the ability to help clean the surface, encourage natural hair re-growth and maximise skin smoothness. Derma Gel® does not contain steroids and is completely safe to use on a mare in foal and competition horses.

**Sizes:** 100ml tube, 20ml & 50ml easy to use spray (ideal for sensitive areas)

## SOOTH-ITCH™

For horses and ponies to soothe itching and encourage hair to grow back naturally. The product is completely natural and not harmful and can be applied directly to the skin of horses and ponies. Contains lavender oil, tea tree oil and chamomile oil.

**Size:** 500ml

Grooming is an essential part of equine care. Our range of horse grooming products includes everything from shampoos and sheath cleaners to body washes, glosses and detanglers. Whether you are getting your horse or pony ready for competition or just doing your usual care routine, we offer a range of high-quality products for every type of grooming.

## EA NATURAL EQUINE SHAMPOO

**A RICH LATHERING SHAMPOO THAT RINSES OFF EASILY**

A gentle blend of cruelty-free, paraben-free and sulphate-free ingredients. EA Natural Shampoo is a great addition to every yard, it's great for removing tough stains and leaving your horse or pony looking show ready!

**Size:** 5L

## EA WHITENING SHAMPOO

**COLOUR ENHANCING WITH CHARCOAL VIOLET**

A whitening and colour enhancing shampoo with charcoal violet, argan oil and coconut cleansers that naturally highlight the coat, bringing out the brilliance in light coloured coats, leaving white socks whiter than white and darker coats with a deep rich colour.

**Size:** 1L

## NO-RINSE WASHES

**PRACTICAL, RAPID AND SMELLS AMAZING**

A completely natural, no-rinse coat wash which offers the ultimate care for your horse. It has a gentle blend of cruelty-free, paraben-free and sulphate-free ingredients.

The Equine America No-Rinse washes are perfect for using as a hot cloth on your horse or pony after clipping, or to give a deeper clean if needed, especially in the summer months to keep the flies away!

During the summer months, it's great for lifting sweat and grease without having to give a full bath! It can be used undiluted for a quick clean, or you can also dilute it and use as a full body wash by mixing 50ml in 4.5 litres of water. The best part: no need to rinse afterwards!

- Leave your horse looking super shiny and smelling great
- Three amazing variations: lavender, peppermint & spearmint and citronella
- One bottle contains up to 10 washes

**Size:** 500ml

## CITRONELLA SUMMER SPRAY

**FOR ALL HORSES AND PONIES**

An effective coat conditioner containing lanolin and aloe vera with essential oils including citronella, eucalyptus and cedar wood. Citronella Summer Horse Spray will leave your horse's coat and skin healthy and supple with a pleasant citronella aroma.

**Size:** 1L

## CITRONELLA SUMMER SPRAY TRIPLE STRENGTH

**WITH CALMING CHAMOMILE FOR SENSITIVE SKIN**

A completely natural, citronella summer spray which offers the ultimate care for your horse. It has a gentle blend of cruelty-free, paraben-free and sulphate-free ingredients. Perfect for horses with sensitive skin.

**Sizes:** 1L, 5L

## SILKY TAIL DETANGLER

Our new improved formula is a non-greasy tail conditioner that detangles and leaves a silky sheen. Silky Tail Detangler contains hydrolysed silk, and coconut oils for healthy, beautiful grooming. Silky Tail Detangler does not contain silicon, will not leave the hair brittle and contains natural silk. A non-greasy mane and tail conditioner that detangles and leaves a silky sheen. Suitable for every day and competition use.

Size: 1L

## WINKY WASH

A gentle cleanser for mares, geldings and stallions with extracts of coconut.

Size: 500ml

*"I run a sheath cleaning company called Diamond Winky Wash & have been using Equine America's Winky Wash for the past two years. It is simply the best off-the-shelf sheath cleaner that you can buy! It cleans gently but effectively when used with warm water, and doesn't cause any swelling or inflammation post-clean like some other products can. My clients love the fact that it is made from completely natural ingredients & contains no parabens, sulphates or perfumes, all of which are detrimental to the delicate natural ph balance within the sheath area."*

Hannah  
Diamond Winky Wash

## STINGER® FLY & INSECT REPELLENT

**FOR THE RELIEF OF FLYING AND BITING INSECTS**

An effective repellent for flying and biting insects, including midges. Each application is effective for up to seven hours depending on the weather conditions, which negates the need for constant reapplication.

**Size:** 750ml spray (in easy to hold bottle)

*“I use Equine America Stinger® because it’s the only fly repellent that lasts all day for my ponies whilst they are in the field. It’s super easy to use and an essential care product for our yard!”*

Alfie Diaper  
Shetland Grand  
National Jockey

## FORGET FLIES IN-FEED SOLUTION

**INNOVATIVE NEW TECHNOLOGY DERIVED FROM NATURAL INGREDIENTS**

Forget Flies In-Feed Solution combines uniquely standardized polysulphides, naturally produced from garlic, MSM and methionine, using a specialised patented technology removing the significant variations found in straight garlic to ensure optimum results every feed.

These compounds are absorbed into blood stream, released through the skin and are detected by the insects’ sensory receptors. This deters the insects from landing on the horse. Forget Flies In-Feed Solution contains no harmful chemicals and is environmentally friendly!

**Size:** 1L

## FORGET FLIES SPRAY

**INNOVATIVE TECHNOLOGY TO REPEL FLIES AND BITING INSECTS.**

Forget Flies Silent Spray has a revolutionary spray application with a significantly reduced ‘hiss’ which makes it the fly spray of choice for horses who resent conventional spray applicators. It combines uniquely standardised polysulphides, naturally produced from garlic using specialised patented technology. This removes the significant variations found in straight garlic, to ensure consistent levels of active compounds in every spray. The unique molecular fingerprint polysulphides applied to the coat release the volatile compounds into the air around the horse and stimulate an adverse reaction in the sensory receptors of the flies and other biting insects so they are repelled and don’t land on the horse! Naturally derived product with unique technology, no harmful chemicals and is environmentally friendly, with an attractive lemongrass aroma.

**Size:** 500ml

## THRUSH GARD

### ANTI-BACTERIAL AND ANTI-FUNGAL HOOF DISINFECTANT SPRAY

Thrush Gard combats the detrimental effects of bacteria and fungi on the hoof. It has been tested for use in the veterinary industry for hoof disinfectant and manufactured to medical grade standard. Available in an easy to apply spray bottle to help maintain year-round healthy hooves.

**Size:** 500ml

## WATER TREATMENT

### HELPS TO ELIMINATE BACTERIA AND ALGAE FROM WATER TROUGHS

Water treatment is an effective, environmentally friendly water cleaner with a natural cleaning action - disinfecting the water through the process of oxidation. The Water Treatment leaves no chemical residue as it degrades to oxygen and water in a few minutes. It removes the biofilm where bacteria can grow, leaving the water clean and fresh for your horse.

**Size:** 1L

## HAT GARD

### RIDING HAT ODOUR ELIMINATOR

Hat Gard is an anti-bacterial and anti-fungal spray to help eliminate riding hat odours by eliminating odour causing bacteria. It is fabric friendly and non-corrosive, perfect to keep your hat clean and fresh!

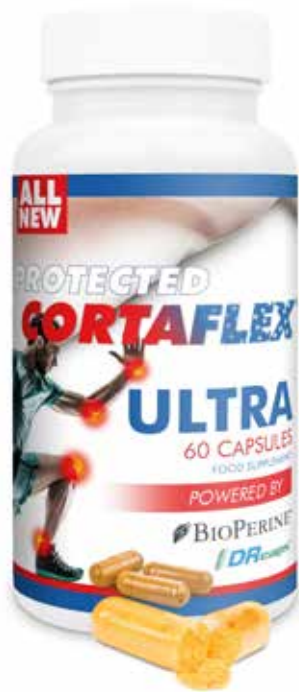

**Size:** 100ml

# PEOPLE

We often spend so much time considering the nutrients that our horses require that we forget about our own needs as a horse rider and an athlete. We offer a selection of health supplements to support you as well as your horses. In order to perform at your best and be in top condition for competitions, it's vital that you get the correct balance of vitamins, minerals and nutrients.

Wellbeing supplements are an important part of any athlete's diet. They can be beneficial in maintaining healthy joints, and supporting overall wellbeing. We offer an advanced version of our popular Cortaflex® human supplement, as well as a vegan version to cater to dietary needs. Our products come with a 30-day money-back guarantee for your peace of mind. For more information about our products, please get in touch and we'll be happy to help.

## CORTAFLEX® ULTRA / HUMAN CORTAFLEX®

### ESSENTIAL FOR JOINT HEALTH

**HEALTH SUPPORT** – Cortaflex® Ultra is a supplement that helps support the health of every joint in your body against life's daily stresses and strains. The supplement improves the feeling of mobility in your joints.

**NATURAL INGREDIENTS** – Cortaflex® Ultra is a unique blend of high-quality natural botanicals like turmeric extract, Aqualox® boswellia and Boswellia serrata to help maintain joint health and flexibility.

The combination of glucosamine, chondroitin and hyaluronic acid work together for structural and functional support. Vitamin C reinforces functional cartilage, whilst manganese contributes to the formation of connective tissue.

**Size:** 60 capsules

## VEGAN PROTECTED CORTAFLEX®

### 100% VEGAN ALTERNATIVE TO OUR BESTSELLING CORTAFLEX®

Contains 800mg of glucosamine for joint function which contributes to the synthesis of essential glucosaminoglycans (GAGs) and cartilage formation. Also provides high grade boswellia serrata extract, standardised to an impressive 65% boswellic acids. These are the key actives that support a normal inflammatory response and improved mobility, helping you move more freely. Antioxidants are also key to any premium joint formula, and Vitamin C – an essential co-factor for collagen formation – is also included.

**Size:** 60 capsules

# PETS

Our pet supplements are market leading and include joint and skin care ranges, which have been developed using the same innovative methods as our equine and human supplements – with your pet’s wellbeing in mind. With *years of experience* creating affordable and effective animal supplements and topical products, our canine products consistently offer your dog the best support available.

Cortaflex® is our highly popular and effective joint supplement for dogs of all ages with mobility problems and can help prevent the effects of ageing on joints. Derma Gel™ is a fantastic skin care product for dogs, and is also suitable for many other pets, including reptiles. Derma Gel™ also comes in a handy spray version.

We provide a 30-day money back guarantee, as well as being on hand to offer advice and guidance should you wish to discuss any of our products.

### CANINE & FELINE CORTAFLEX® CAPSULES

SUPPORT YOUR PET'S HEALTH

Dogs' and cats' active lifestyles lead to their joints experiencing wear and tear over time. Canine & Feline Cortaflex® is specially formulated for pets to help support joint health and mobility. Containing key ingredients to help support collagen, cartilage and connective tissue health, this supplement will leave your pet's joints feeling healthy and strong.

**Size:** 60 capsules

### CANINE INFLAMEX™

FOR WORKING AND ACTIVE DOGS

Hard-working and active dogs endure tremendous stress to the connective tissues of the body. Over a lifetime, a dog may expect to become less mobile as the body's regenerative mechanisms become less effective, potentially losing some of the early vigour of life. Inflammex™ contains Aqualox® – a highly potent concentrated source of active Boswellia serrata to support a normal inflammatory response to promote joint health and comfort. Suitable for dogs of all ages and breeds.

**Size:** 500ml

*“My 11 year old Labrador/ spaniel cross, Charlie has been on Cortaflex® Working Dog powder for the last two weeks after changing from another very well-known vet prescribed joint supplement. I have noticed a good improvement in his agility and even my friends have remarked that he has a spring back in his step. I shouldn't really have been surprised as our 20 year old horse, Otis has Cortaflex® Super Fenn for his joints which also is a fantastic product. Well done, Equine America!”*

Richard Baldwin

### CORTAFLEX® WORKING DOG POWDER

FOR ULTIMATE JOINT SUPPORT

A highly potent blend of key ingredients to support joint health and mobility for the hardest working dogs. Contains key ingredients including Aqualox® – a unique highly concentrated source of Boswellia serrata together with a patented source of collagen for optimum joint comfort and support.

**Size:** 90g

## EA NUTRA

Equine America would like to introduce our sister brand EA Nutra which enables us to make a new range of premium, innovative products for the domestic and international market.

### EA NUTRA BUTELESS® HIGH STRENGTH SOLUTION

*JOINT MOBILITY SUPPORT NOW WITH AquaLOX*

**SUPPORT YOUR HORSES JOINTS** – Highly palatable solution, providing nutritional support for joint and muscle comfort in competition horses and older horses and ponies.

**NATURAL INGREDIENTS** – Contains an equine-exclusive Boswellia extract providing a market leading 78% AKBA\* to support a normal inflammatory response. Also providing Yucca and Marshmallow extracts to support joint health and comfort.

**BATCH TESTED** – By independent laboratories in the UK and Europe, ensuring our products do not contain prohibited substances and are suitable for horses competing under FEI regulations and the rules of racing.

**FEEDING RECOMMENDATION** – For 500kg horses, For initial 10 days: 30ml per day. Thereafter gradually reduce to maintain desired response, typically 15ml per day. Maximum 30ml per day.

**Sizes:** 1Ltr, 5Ltr

## Cortaflex®

The Cortaflex® range were amongst the first joint supplements to be widely and successfully used in all types of horses and ponies in America, and were introduced to the UK some 25 years ago. They included then, and still include now, vital trace elements and precursors (or building blocks) of key compounds such as glycosaminoglycans and proteoglycans, which are necessary for the production and maintenance of healthy cartilage and joint fluid, which also plays an important role in shock absorbing and lubrication within the joint.

## CORTAFLEX® RECOVERY

### POWERFUL SUPPORT FOR JOINTS AND MUSCLES

Intense training, racing and competition programmes place considerable demands on the horse's musculo-skeletal system. Cortaflex Recovery provides premium strength, targeted nutritional support for joints and muscles, promoting optimum performance and enhanced recovery.

Cortaflex Recovery is designed to support the horse's own anti-inflammatory processes, as well as providing high levels of chondro-protective ingredients and antioxidants, to aid in recovery after intense training, competition and racing.

Chondro-protective ingredients include: hydrolysed collagen, hyaluronic acid, key amino acids, chelated manganese and copper.

Natural anti-inflammatory and antioxidant processes are supported by: High AKBA Boswellia, Curcumin, omega 3 fatty acids, black pepper, Vitamin E, Vitamin C, Vitamin B12, Beetroot powder, glycine, Rosemary, grape seed extract.

**Sizes:** 1.5kg, 4.5kg, 12kg
