Lynette chair

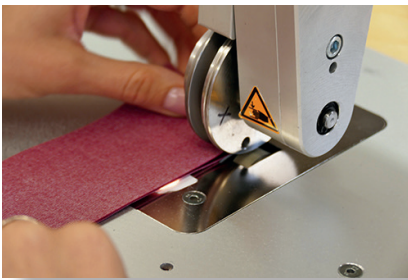

The chair is equipped with 3 motors

A beautiful Dutch product.
The Lynette Lift Recliner chair is produced in the Netherlands.

With the Afikim Lynette chair comfort is guaranteed. The chair is made to set your measurements, using sustainable materials. The Lynette Lift Recliner chair

offers the best seating solution for everyone who needs it. Our goal is to offer solution for every seating problem, where quality, comfort and service comes first.

Ergonomic sitting solutions!

The Lynette Lift Recliner chair is electrically adjustable and has a unique tilt adjustment that you will not find on any other Lift Recliner chair. The moment you tilt the chair to use the relax position

for example, the armrests will tilt together with the chair. This ensures that your entire body remains in the correct position and you can totally relax.

Fabric

Radars

Water
resistant

Radars is a water resistant fabric with a leather-look appearance. The fabric is 100% synthetic and feels pleasant and very soft, thanks to the combination of artificial leather and microsuede. The Radars fabric is available in several colours to match it with your interior.

Characteristics

- » Rich and matt appearance
- » Soft fabric with good grip
- “ Very strong
- » Combination of artificial leather and micro suede
- » Leather look
- “ Water resistant
- » Robust
- » Standard for Lynette Lift Recliner chair
- » BS5852:1979 Flame retardant

Taupe

Fabric

Mine

Fabric Mine consists of two groups of threads that cross each other at right angles. Chenille yarn is woven through the fabric, which is naturally soft and voluminous. This makes the fabric feel firm and soft.

Extra
soft fabric
