

Bluetooth IEM Adapter User Manual

Turn-On

Modules turn on automatically when removed from their charging case. Press and hold button for 1 second.

Turn-Off

Place modules in charging case. Press and hold 1 module button for 5 seconds to turn off that module while the other module remains on and connected. Press and hold both buttons for 3 seconds to turn off both modules.

LT/RT Pairing

Both modules enter Left/Right pairing when turned on. Initial pairing mode follows and takes no longer than 3 minutes. Left/Right pairing ensures stereo listening.

Device Pairing

When modules are off, press and hold button 5 seconds to enter device pairing mode. If not paired with any device within 3 minutes, modules automatically shut off. Once device is paired, device will automatically connect to modules next time it is turned on.
