

# Oregon Myrtle - Side Grain

Last Revised 2/18/2019 - A&D

## PRODUCT DESCRIPTION

Oregon Myrtle Side Grain tabletops are built with the edge grain facing up in parallel strips typically measuring between 3/4" and 1-1/4" wide. Side grain construction makes a hard and stable surface ideal for tables, islands and counter tops. Oregon myrtle has a color range from blonde to golden browns. At times a darker mineral staining in black or dark brown is evident with an occasional curl or burl figure.

## SPECIFICATIONS

### STANDARD SIZING

1 1/2" thick

Sized to your specifications

Rounding, shaping, and cutouts are available upon request

### MATERIAL AND SURFACE

Janka hardness scale of 1270

Side grain tops are built with the edge grain facing up in parallel strips typically measuring 3/4" to 1-1/4" with random staggered butt joints

Finished top and side surfaces sanded to 220 grit

Straight edges with 1/8" ease on all edges (standard)

Holes and cracks filled down to 1/32" on the top surface

### FINISHES, ADHESIVES AND FILLERS

Clear/Top Coat VOC: 213 g/l

Clear OSMO Polyx Oil Top Coat VOC: <270 g/l

Wood Glue VOC: 0 g/l

### POTENTIAL LEED CREDITS

Materials and Resources Credit 5:

Regional Materials (Within 500 miles of Tumwater, WA)

Indoor Environmental Quality Credit 4.1:

Low-emitting Materials-Adhesives

Indoor Environmental Quality Credit 4.2:

Low-emitting Materials-Paints and Coatings
