

# Western Maple - Side Grain

Last Revised 8/12/2019 - A&D

## PRODUCT DESCRIPTION

Western Maple Side Grain tabletops are built with the edge grain of the wood facing up in parallel strips typically measuring between 3/4" and 1-1/4". Western Maple is a Pacific Northwest native species which varies in color from reddish white with a grayish cast to a light pinkish-brown. The grain is most often straight with occasional wavy, quilted, fiddleback, or birds-eye patterns.

## SPECIFICATIONS

### STANDARD SIZING

1 1/2" thick

Sized to your specifications

Rounding, shaping, and cutouts are available upon request

### MATERIAL AND SURFACE

Janka hardness scale of 850

Side grain tops are built with the edge grain facing up in parallel strips typically measuring 3/4" to 1-1/4" with random staggered butt joints

Finished top and side surfaces sanded to 220 grit

Straight edges with 1/8" ease on all edges (standard)
