

Cascades Cladding

PRODUCT DESCRIPTION

Named for the nearby Cascades mountain range and made from the Pacific Northwest's regional Red alder, Cascades Cladding is comprised of three thicknesses in a tongue and groove profile. With rounded edges and a silky smooth face, the cladding is available in 10 translucent colors which allow the natural features to shine through. Two low-VOC finishes are offered, dead flat and satin, which enliven the wood. Designed with tongue and groove edges for easy installation with standard tools and techniques.
