Product Size: 1.8cm (W) x 4.2cm (D) x 2.2cm (H)  
Net Weight: 85gm

## WARRANTY

1 Yr

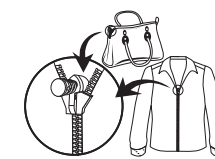

# FIXNZIP™ NICKEL ZIPPER SLIDERS

Instant zipper repair without tools, sewing or angst.

### STEPS TO FIX OPEN END ZIPPERS (ex.: jackets)

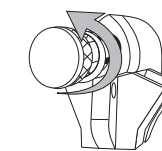

#### STEP 1

The screw on the FixnZip® slider should be toward the outside of the item.

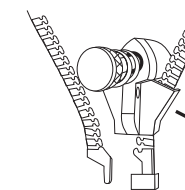

#### STEP 2

Loosen the screw on the slider.

#### STEP 3

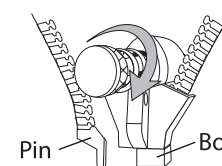

Slip the slider over one row of zipper teeth.

Continue on to alternate steps for luggage.

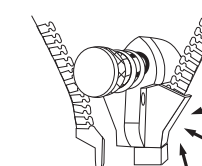

#### STEP 4

Place slider close to zipper box. Tighten the screw all the way down, then loosen 1/4 turn.

#### STEP 5

Slider should now be tightly secured to one row of teeth, like you would find on an unzipped jacket.

#### STEP 6

Insert zipper into the slider, and zip up the jacket.

### STEPS TO CLOSED END ZIPPERS (ex.: tents and bags)

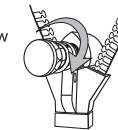

#### STEP 4

Feed both rows of teeth into the slider. Position as close to the retaining box as possible.

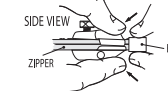

#### STEP 5

Tighten thumbscrew all the way down.

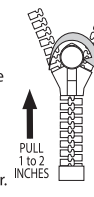

#### STEP 6

Squeeze the top and bottom of slider at the same time. With your other hand, firmly grasp the zipper box.

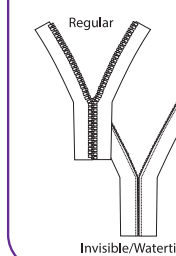

#### STEP 7

While still squeezing the slider, pull it up the zipper 1 to 2 inches. Then, retighten thumbscrew if needed and continue up zipper.

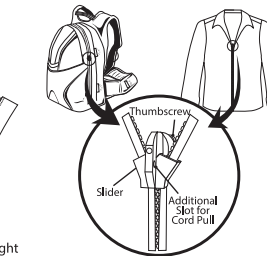

### STEPS FOR INVISIBLE/WATERTIGHT ZIPPERS

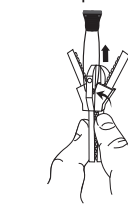

Determine if you have an invisible/watertight zipper.

When applying the FixnZip® slider to invisible/watertight zippers, the thumbscrew should face the inside of the item.

Use the additional slot on the underside of the slider to attach the cord pull.
