## Rolling Ring - Assembly Instructions

### EDROLL/1

Ages 3-8

Our Rolling Ring is a great activity product and will provide young children with many hours of fun.

Assembly is simple. Firstly, position the padded fabric on end to form a circle. Next, position one of the hoops on top of the circle and then peel apart each of the hook and loop strap fasteners. Now position the strap over the hoop and then through the plastic eye and pull back firmly towards you in order to secure it to the hook section of the strap. As you progress, the fabric will become quite taut and you will need to pull it towards you to secure each of the final straps. This tight fit is necessary to ensure that the hoops stay in place when in use.

Once all the straps have been secured on both sides, push each of the hoops towards the middle of the padded ring as this provides cushioning for the hoops. The edge of the hoop should now be level with the fabric. It is recommended that you re-check the straps and give them a final adjustment if necessary.

Well done and enjoy!

## Warning!

Please ensure that this product is used in a safe and contained area.
