

TELL US YOUR MEASUREMENTS

If your measurements DO NOT MATCH our stock system, please see instructions below on how to measure your plenum for a customized system specific to your RV. Please email these measurements to *Katherine@rpicomponents.com*, as well as the year, make, and model of your RV and the air conditioner brand.

Thank you!

RV Airflow Team

Measurement Guide

Measurement A: From the top of the plenum to the top of the duct opening.

Measurement B: From the top of the duct opening to the bottom of the duct opening.

Measurement C: From the bottom of the duct opening to the top of the mounting bracket.

Measurement D: From the top of the plenum to the top of the mounting bracket (overall plenum depth.)

Circle one below

Mounting Bracket- ON or OFF

+

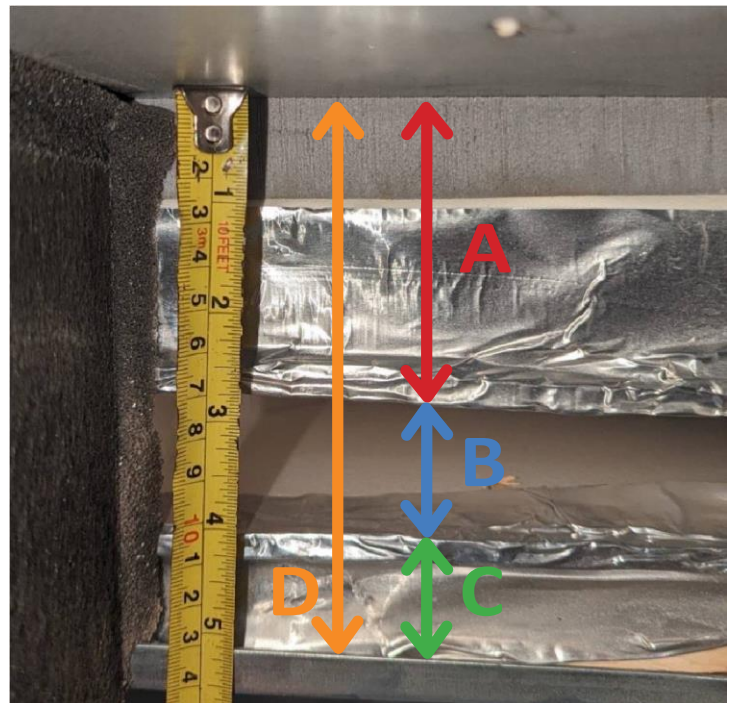

+

=

$$A+B+C=D$$

If the Metal Mounting bracket (4 Long Lag bolts) is removed when the measurements are taken please let us know. Either way is fine we just need to know if it was on or off.

A customized system will only take us 24 hours from the time the measurements are sent to us.

(Not including weekends)
