

WILL THIS FIT MY UNIT?

INSTRUCTIONS FOR DETERMINING PRODUCT COMPATABILITY

Remove air conditioning ceiling assembly. Remove all components unit you have full access to the plenum area.

Measure the plenum depth. It must measure between 5-1/4" and 5-1/2".

Verify the plenum width. Standard 14" (13-3/4" minimum requirement).

Check ducting dimensions. Measure the opening size of the ducting—should measure 1-1/2" x 7-1/2" for optimal performance.

Verify vertical location of the ductwork. The upper opening of the ducting must be 2 3/8" - 2 1/2" from the bottom of the air conditioner.
