

## Bendant Overview

### *Customizable Light Fixture*

Material and process guide the Bendant Lamp's design, making it a true example of eco-centric design. The Bendant Lamp is a flat-packed chandelier composed of a series of leaf-like shades surrounding a central fixture. Bend the shades up or down to create unique light and shadow arrangements.

**Materials** Bendant shades are made from laser-cut, power coated steel.

**UL Listing** Electrical components in this product are UL listed.

**Installation** The shades can be bent and adjusted easily by hand. No tools are required. The shades are made from steel that is thin enough to bend, but thick enough to hold its shape.

To avoid damaging or breaking the shades, we recommend that you do not bend them in opposite directions more than five times. Although it is possible to bend them further, we are not responsible for damage to the coating or for material fatigue.

**Hardwiring** All of our bendant lamps can be hardwired. Hardwiring kits are sold separately.

# Bendant Environmental

**Origin** Bendant Lamps are made in the USA from locally sourced materials.

## Recycled Content

The steel alloy used to make the metal components of these products has recycled content ranging between 30% and 40% depending on the production batch.

## Recyclable

These products can be recycled to make more steel products of similar quality, once again avoiding the landfill. Existing recycling infrastructure makes it easy for customers to close the recycling loop and have an impact.

## Environmentally Preferable Finish

The metal components in this product are powder coated. Powder coating is a durable, low volatile organic compound (VOC) finish. This means that the paint, once cured on the products, does not emit any particles into the air. This improves indoor air quality, eliminates strong odors, and decreases the possibility of introducing unhealthy air particles into a living space.

## LEED Credits

MR Credit 4.1: Recycled Content: 10% (post-consumer + 1/2 pre-consumer) (1 Point)

MR Credit 4.2: Recycled Content: 20% (post-consumer + 1/2 pre-consumer) (1 Point in addition to MR Credit 4.1)

MR Credit 5.1: Regional Materials: 10% Extracted, Processed & Manufactured Regionally (1 Point)

Site specific: Contact us for additional information

MR Credit 5.2: Regional Materials: 20% Extracted, Processed & Manufactured Regionally (1 Point in addition to MR Credit 5.1)

## Bendant Lamp

Bendant is a lamp that's like a flower bouquet arranged by you. The flat-packed chandelier is composed of a series of leaf-like shades surrounding a central fixture. Bend the shades up or down and create unique light and shadow arrangements that are custom. No two lamps are exactly alike, which means the final design is up to you! Bendant Lamps are great centerpieces in dining rooms, bedrooms, conference rooms and commercial spaces.

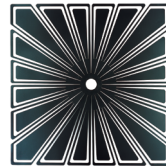

## Bendant Lamp

### Design

Manufactured to ship flat, maximize material yield and eliminate cutting waste, the Bendant Lamp is a truly eco-centric design. Inviting the user to participate as co-designer, the Bendant Lamp redefines the relationship between products and users and the relationship between designers and customers. The interaction created by the lamp also works as a catalyst in establishing a dialogue about the virtues and opportunities in locally made and sustainably designed products.

### Philosophy

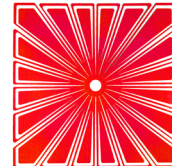

Material and process guide the Bendant Lamp's design, making it a true example of eco-centric design. The size of the lamp, shape of the cuts and flat packaging are a result of material and manufacturing efficiencies. In addition, the lamp welcomes the user as co-designer pushing the boundaries of design and tool-free assembly.

## Bendant Mini

Sometimes nice things come in smaller packages. The Bendant Lamp Mini is a smaller version of our Bendant Lamp. Just like its larger sibling it can be arranged like a flower bouquet. Bendant Minis are great accent lamps by themselves or in clusters.
