Bulk Mulch

Premium Hardwood Mulch		Prices subject to change without notice	
28947	This is a 100% hardwood product that has been triple ground and aged into a fine naturally dark mulch. Aged bark will break down into an enriching soil additive more quickly and uniformly than traditional wood mulches. This is a very hard-to-find product, as most shredded hardwood mulches on today's market contain a large percentage of wood. Excellent for discriminating property owners who don't want to deal with a build up of wood mulch over years of gardening.		1-19 yards \$37.75 20+ yards \$35.75
28942	Color Enhanced Black Mulch Ground from mixed hardwoods. These products hold their fresh color longer than other types of mulches. Suitable for situations where a long term well-groomed look is desired or where mulch colors are used to compliment or accent the color scheme of the property.		1-19 yards \$39.25 20+ yards \$37.25
28943	Color Enhanced Brown Mulch Ground from mixed hardwoods. These products hold their fresh color longer than other types of mulches. Suitable for situations where a long term well-groomed look is desired or where mulch colors are used to compliment or accent the color scheme of the property.		1-19 yards \$39.25 20+ yards \$37.25
28944	Color Enhanced Red Mulch Ground from mixed hardwoods. These products hold their fresh color longer than other types of mulches. Suitable for situations where a long term well-groomed look is desired or where mulch colors are used to compliment or accent the color scheme of the property.		1-19 yards \$39.25 20+ yards \$37.25
28968	Screened Topsoil Our topsoil is screened and shredded. Afterwards it is stored inside to ensure that you will always receive consistently fine, stone free, dry soil ready for immediate use year round.		1-19 yards \$47.75 20+ yards \$45.75
28948	Playground Material Bulk This is a clean, light colored wood chip ideal for use in playgrounds and pathways. There is a high demand for this product from schools and parks. IPEMA certification available		1-19 yards \$40.99 20+ yards \$38.99
28969	Mushroom Soil Compost This soil additive is a mixture of decomposed straw and horse manure. It is used to raise pH of soils and is especially useful in loosening clay soils. Can be used with flowers, vegetables and bedding plants, ornamental shrubs. Cultivate into the top 3" of soil.		1-19 yards \$38.50 20+ yards \$36.50
