

Edge Profile Details

Square Lay-in

Design hangs directly on the suspended ceiling grid.

Square Tegular

Design hangs 1/4" below the grid, so the ceiling looks like a field of protruding squares.

Angled Tegular

Design has angled corners on the hanging tiles to create a softer look.

Beveled Tegral

Design has rounded corners on the hanging tiles to create a softer look.

Flush Tegral

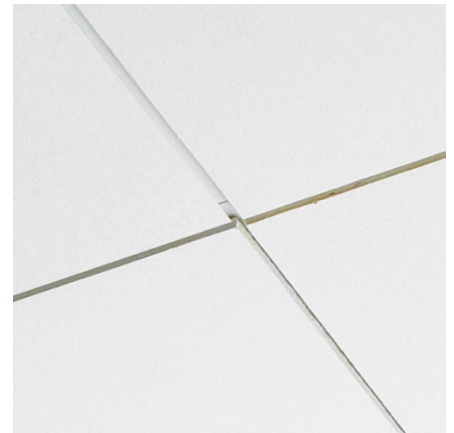

Design hangs flush with the ceiling grid to create a smooth surface.

Vector

Design creates a clean, grid-hiding visual effect.

Tongue & Groove

Design provides a seamless, uninterrupted, grid-less look.
