

# STRING OF HEARTS

---

*Scientific Name : Ceropegia Woodii*

There is a lot to love with the String of Heart vine! Their plump, heart shaped leaves are a deep green and speckled with silver. They grow in pairs along a thin vine that can reach up to 13 feet long. Beautiful hanging from the top of a window, the vine creates a beaded curtain effect.

They also love to climb and wrap well around any trellis. The blooms are white-lavender in color and have a tubular shape with deep purple petals along the top. (We think it resembles the head of a flamingo!)

>> **FUN FACT** *Also known as the Rosary Vine or the Sweetheart Vine, because of the heart shaped leaf!*

**LIGHT**

Very bright filtered light to direct morning sun

**WATER**

Saturate once the soil has dried out completely: Approx once a week

**BLOOM**

Small flowers form along the vine in late summer and fall.

**SOIL**

Well draining potting mix. Additives could include perlite

**PROPAGATE**

Take a stem cutting and coil the vine on top of soil making sure the nodes (in between the two leaves) are touching the soil. Mist every 3-4 days.
