

TEMPLATE INSTRUCTIONS

- To make a tracing, we suggest to use 4 mil plastic from a home improvement or hardware store. Lay the current carpet on the plastic and trace all pieces with a permanent marker, including any cutouts for tables or chairs.
 - Please label bow direction and carpet side up on all pieces.
 - Please do not cut out any of the pieces from the plastic.
 - The tracing on the plastic is directly used to cut the carpet. What is on the plastic is exactly the shape and size the carpet will be.
- If you do not have carpet for your boat and we do not have your template, a tracing can still be made. Take the 4 mil plastic (found at home improvement or hardware stores) and lay it out on the boat where the carpet should lay. Trace the area where the carpet should go.
 - Be sure to trace around any hatch doors, handles, table bases, and chair bases.
 - Please label bow direction and carpet side up on all pieces.

TEMPLATE INSTRUCTIONS

- Please do not cut out any of the pieces from the plastic.
- The tracing on the plastic is directly used to cut the carpet. What is on the plastic is exactly the shape and size the carpet will be.

Mail the sheet of plastic with all tracings on it or the current carpet from the boat to:
