

Holographic & Chrome Pigments

Step-by-Step Instructions

1. Sanitize and prep nails with Artisan Equalizer.
2. Brush on a thin, single coat of Artisan GelEfex Base Gel. Cure for 30-60 secs in a UV/LED lamp.
3. Apply Artisan GelEfex Black Knight Gel Nail Polish. Feel free to experiment with other gel colors with holographic pigment, but we strongly recommend a black gel polish for best results. Cure for 30-60 secs in a UV/LED lamp.
4. Apply Artisan Chrome & Holographic 2-in-1 Top & Base Coat. Cure for 60 secs.
5. Buff holographic or chrome pigment onto the nail using the sponge applicator.
6. Dust off excess with a small acrylic brush.
7. Apply Artisan Chrome & Holographic 2-in-1 Top & Base Coat. Cure for 60 secs. DON'T WIPE! This is a no-wipe top coat.
