

POWER DISTRIBUTION CENTERS

Custom-Designed & Engineered

A LEADING PROVIDER OF **ENGINEERED PRODUCTS**

Layco Electric Innovations' Power Distribution Centers are custom-designed and engineered in our state-of-the-art manufacturing facility. We provide the engineering, design, and fabrication of modular power and control buildings. Whatever your housing need, be it low voltage or medium voltage equipment, LEI can provide the most complete turnkey solution on the market. Prior to shipment, we will install and test the entire package, from incoming power to each device installed in the building.
