

MOTOR REPAIR

AC & DC MOTORS

Source from the Experts

A LEADING PROVIDER OF MOTOR REPAIR

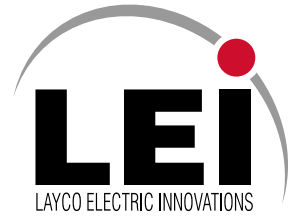

LEI is an authorized service center for most major manufacturers of AC/DC motors. Our factory trained personnel along with large inventories and relationships with the major manufacturers enable us to service your equipment rapidly.

Our AC/DC electric motor repair services include disassembly, detailed inspections, and measurements to identify electrical and mechanical damage. Each repaired motor is tested for correct electrical and mechanical operation. Voltage, current, bearing temperature, and vibration are closely monitored and documented.

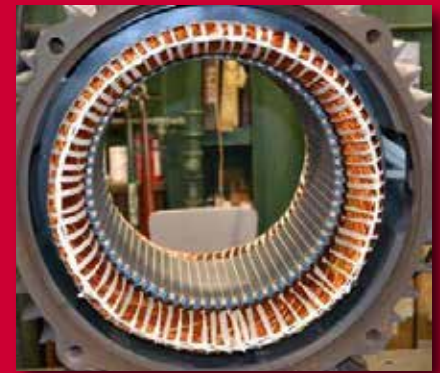

- ✓ Exceptional Quality
- ✓ Extended Equipment Life
- ✓ Cost Savings
- ✓ 50 Years of Combined Motor Experience
- ✓ Highly Trained Technical and Engineering Staff

COMMITTED TO: EXCELLENCE, EXPERIENCE, KNOWLEDGE & RESOURCES

Our Repair Process

- All mechanical repairs on shafts, bearing journals, end bells, and other equipment are handled in-house by experienced machinists.
- Failed motor windings are removed using a temperature-controlled oven to prevent efficiency loss from lamination damage.
- Motors are rewound using the highest-quality wire, insulation, and varnish materials guaranteeing long-lasting reliability in the most severe industrial environments.
