

Sealed, Automatic, Multi-Roll, Patented Toilet Paper Dispenser

BIOtouchless TP-100 **When Safety Matters**

The BIOtouchless TP-100 is the world's first truly touchless toilet paper dispenser. It is built with ATM-class reliability to help keep your patrons safe in a COVID-19 world.

Intelligent electronics and sensors
keep the unit operational
and your reputation sound

Exclusives

Reliably Touchless

- Place a hand over the sensor area to dispense paper - users never need to touch the dispenser
- Users have a sanitary experience with certainty that toilet paper is available

Supply Saving

- Each time a user activates the sensor, the unit dispenses a pre-set amount of paper (ADA compliant mode also available)
- Selectable dispense length
- Metered paper delivery reduces waste, often by 50% or more

Ultra Sanitary

- Eliminates the spread of restroom biohazards, reducing liability
- Enclosure keeps dual, standard rolls covered & fully protected from contamination

Reduced Maintenance

- Battery operation requires no AC power connection
- Easy and efficient upkeep improves brand reputation in your facility
- Mounts quickly and uses all standard toilet paper roll types
