

MOCCAMASTER BREW GUIDE

CLANDESTINO COFFEE

MoccaMaster

A lot has changed for filter coffee since the questionable taste of coffee sitting around in the American diners. Quick and easy to supply you with 1 litre of coffee at a time, it's perfect for a bottomless cup when you need fuel all day. Enjoy your brew straight up or with a bit of milk, it tastes great every way.

What you will need:

- MoccaMaster
- Paper filter
- Freshly ground coarse coffee
- Filtered water

How to brew using MoccaMaster

1. Fill reservoir with 1 Ltr of filtered water.
2. Get a paper filter and place it inside the brew basket.
3. Pour 60g of freshly ground coffee into a paper filter and lightly tap sides so that the coffee bed is flat.
4. Replace the brew basket and ensure the drip stop lever on the filter basket is up in the top open position.
5. Turn on the MoccaMaster.
6. Watch as the water boils and starts making your brew (we know you want to!).
7. Keep refilling your mug or supply a whole team.

Tip: Plug the MoccaMaster into a wall timer and set before going to bed so that it starts brewing when you wake up. Roll out of bed and your coffee is ready.
