

European Standards Certified Cleaners & Sanitisers

European Standards is an expression of conditions for products, processes or services to meet the prerequisites of suitability for a particular purpose.

Our Nilco antibacterial products all pass numerous standards for the effectiveness of chemical disinfectants and antiseptics against various bacteria, viruses and fungi.

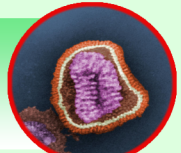

The product has effective bactericidal properties, and is successful in killing common bacteria such as *Pseudomonas Aeruginosa*, *E. Coli*, *Staphylococcus Aureus*, and *Enterococcus Hirae*.

Staph Aureus

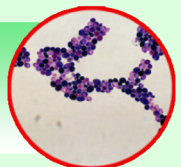

The product has effective virucidal properties, and is successful in eliminating viruses, such as the H1N1 Influenza Virus.

H1N1

The product has effective bactericidal and fungicidal properties, and is successful in eliminating bacteria and fungi such as *Aspergillus Niger* and *Candida Albicans*.

Candida Albicans

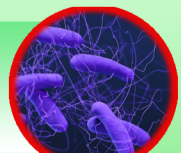

The hygienic handrub product has effective bactericidal properties, and is successful in eliminating bacteria such as *E. Coli* on the hands and skin.

E. Coli

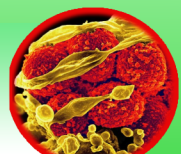

The product has effective sporicidal properties, and is successful in eliminating highly resistant spore-forming bacteria such as *Clostridium Difficile*.

C. Difficile

The product has effective bactericidal properties against antibiotic resistant bacteria such as MRSA.

MRSA
