

## USB CD PLAYER Installation Instructions

STEP 1 Turn your radio on

STEP 2 Connect the USB CD Player chord to the USB port

**\*THIS CD PLAYER HAS TO PAIR WITH YOUR VEHICLE. IT WILL NOT WORK UNTIL YOU LOCATE THE "SOURCE" or "USB ICON" ON YOUR RADIO SCREEN TO CONNECT IT.\***

STEP 3 Depending on the make of your vehicle,  
**Press *Media, or Source, or Aux, or Audio, or Media then Source* on your dashboard screen. Next, look for "SOURCE" or USB 1 or USB 2**

STEP 4 **Wait 20-30 seconds for the USB symbol to appear,**  
then select the USB option that will connect the CD player to your vehicle.  
**Select USB 1 or USB 2** (depending on which port you plugged into)

***Having trouble connecting your USB CD Player?***

***Call your local car dealership and ask for the Service Department.***

***Ask them to help you connect an external device through the USB port.***

STEP 5 **Insert a disc in CD Player** (The unit may not be found by your vehicle's radio until a CD has been inserted into the CD player. This can take 20-30 seconds)

STEP 6 **INDEXING Process - Wait 30 seconds** for the USB processing hub to completely acquire the CD information. Even if the CD has begun playing, you ***must wait 30 seconds for the indexing to be completed*** to avoid potential issues.

STEP 7 **Congratulations! Your CD Player will now operate through the factory radio display on the dashboard and with the controls on your steering wheel.**

**PLEASE NOTE:** Some USB Hubs are sensitive to this procedure.

**If you have interrupted the process, simply remove the disc and insert a different disc. Repeat the instructions above. This will reset the vehicle's USB Hub memory.**

***Should you have any issues with your USB CD player, please contact AutoPartsToys for further assistance***  
**Any problems? No worries- We will provide a no charge replacement**
