WATER CLOSET MECHANISM & INTERNAL PARTS
CISTERN - Inlet Valve & Flushing Device ■

B3800E

Application

- Can be installed in surface-mounted cistern
- Cistern bottom connection
- Delay water-inlet function

Characteristics

- For water pressure range : 0.3-10 (Kgf/cm²)
- Plastic connection available : G1/2 & G3/8 & 15/16
- Brass connection available : G3/8
- Primer provided, refilling ratio is 0-31%

B4220

Application

- Can be installed in 3-inc surface-mounted cisterns
- Barrel-shape flush valve

Characteristics

- Height of overflow pipe can be adjustable
- For 240-370mm height floor standing water closet
- Full flush & half flush available
- Fit for various buttons
- Fit for one piece water closet & close coupled watercloset
- Mental lock extends the using lifetime

B4900

Application

- Can be installed in 2-inc surface-mounted cisterns
- Barrel-shape flush valve

Characteristics

- Height of overflow pipe can be adjustable
- For 240-420mm height floor standing water closet
- Full flush & half flush available
- Fit for various buttons
- Fit for one piece water closet
- Mental lock extends the using lifetime

UF SEAT COVER - Urea-formaldehyde Technology ■

- Ultra Violet Resistance ensures the Seat & Cover does not discolour
- Scratch Resistant
- Easy to Clean
- Durable & Lasting

WATER SAVING ATTACHED FEATURES

LEADING THE FASHION,
CREATE LIFE INSPIRATION!

WIDEST RANGE OF DESIGNS

Make Believe

Leading the fashion, create life inspiration !

ABAGNO

Establish since 1989 and providing the widest range of sanitary fittings such as faucets, shower systems, shower fittings, bathroom accessories, and others necessary items where your bathroom would need it! We are focusing on durability, designs, hygienic and most important with much choices for your needs to create quality living style from day to days!

The Productions

Design . Quality . Profession

The quality is always our main concern. The designs for modern living style. The profession for giving the quality life to the users' need.

CREATIVITY

Thank you to our professional design team who always work out with creative, trendy and practical products for the needs of the users.

RAW MATERIAL

The raw material (brass) is just right to produce a quality product to ensure it is safe to use and worth owning it.

TECHNOLOGY

With the advanced technologies, congratulations that we could managed to provide a high efficiency productions with every single piece of product in correctly and perfectly.

FINISHING

Hidden defect's check and surface polishes before electro plating to ensure the product is just right at its standard and to confirm the outcome perfectly.

QUALITY CHECK

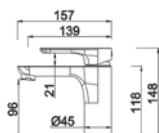

Every single piece of product will be at its final quality check before packing to achieve the "the finest products to the users".

URINAL FLUSH VALVE

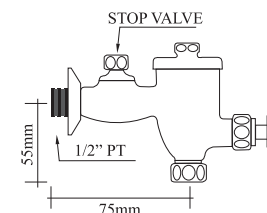

WELS - 2 Ticks

Code : UFV 300S (straight pipe)

PRODUCT SPECIFICATIONS

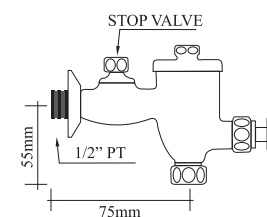

Product : Manual operated exposed urinal flush valve
 Description : Exposed type (wall mounted) flush valve with finger press activation. Chrome plated brass construction with integral stop valve, straight flush pipe and urinal spud activation. Chrome plated brass construction with integral stop valve.
 Operation : Finger press activation via 20mm chrome plated brass push button. (0.8 litre flush). Consistent flush volume irrespective of water pressure.
 Features : Integral stop / check valve. Adjustable flush volume.
 Installation : Inlet from behind. Outlet from below. Suitable for top inlet urinals.
 Materials : Chrome plated brass.
 Pressure range : 0.7 - 6.0 bar pressure range
 Volume discharge : 0.7 - 2.0 litres per discharge

Code : UFV 300B (bend pipe)

PRODUCT SPECIFICATIONS

Product : Manual operated exposed urinal flush valve
 Description : Exposed type (wall mounted) flush valve with finger press activation. Chrome plated brass construction with integral stop valve, straight flush pipe and urinal spud activation. Chrome plated brass construction with integral stop valve.
 Operation : Finger press activation via 20mm chrome plated brass push button. (0.8 litre flush). Consistent flush volume irrespective of water pressure.
 Features : Integral stop / check valve. Adjustable flush volume.
 Installation : Inlet from behind. Outlet from below. Suitable for top inlet urinals.
 Materials : Chrome plated brass.
 Pressure range : 0.7 - 6.0 bar pressure range
 Volume discharge : 0.7 - 2.0 litres per discharge

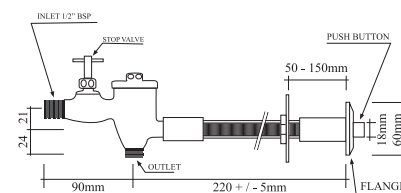

WELS - 2 Ticks

Code : UFV 301 (mechanism)

PRODUCT SPECIFICATIONS

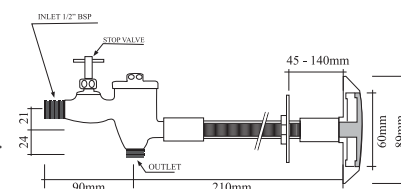

Product : Manual operated recessed duct type urinal flush valve (Without Spud)
 Description : Recessed duct type flush valve with push button activation. The push button flange is flush to the wall. The flush valve is within the service duct.
 Operation : Push button activation via 18mm diameter chrome plated brass push button. (0.8 litre flush). Consistent flush volume irrespective of water pressure.
 Features : Hand operated stop / check valve. Adjustable flush volume.
 Installation : Concealed duct type for solid walls 45-150mm thick. Inlet from behind. Servicing from duct.
 Materials : Brass. Flange & push button chrome plated
 Pressure range : 0.7 - 6.0 bar pressure range
 Volume discharge : 0.7 - 2.0 litres per discharge

Code : UFV 305P (palm press)

PRODUCT SPECIFICATIONS

Product : Manual operated recessed duct type urinal flush valve (Without Spud)
 Description : Recessed duct type flush valve with palm press activation. The palm press button flange is flush to the wall. The flush valve is within the service duct.
 Operation : Palm press activation via 60mm diameter stainless steel push button. (0.8 litre flush). Consistent flush volume irrespective of water pressure.
 Features : Hand operated stop / check valve. Adjustable flush volume.
 Installation : Concealed duct type for solid walls 45-150mm thick. Inlet from behind. Servicing from duct
 Materials : Brass - Flange & Palm press button are chrome plated.
 Pressure range : 0.7 - 6.0 bar pressure range
 Volume discharge : 0.7 - 2.0 litres per discharge

WELS - 2 Ticks

URINAL FLUSH VALVE

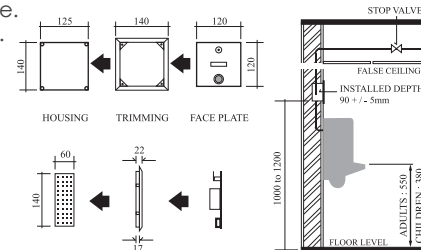

Code : UFV 301C (mechanism)

WELS - 2 Ticks

PRODUCT SPECIFICATIONS

- Product : Manual operated recessed urinal flush valve (Box Type)
 Description : Recessed box type flush valve with push button activation. The face plate is flush to the wall. The entire housing is of stainless steel material. Hinged face plate with lock facilitates servicing.
 Operation : Push button activation via 40mm diameter chrome plated brass push button. (0.8 litre flush). Consistent flush volume irrespective of water pressure.
 Features : Integral stop / check valve. Adjustable flush volume.
 Installation : Concealed box type for solid wall >120mm thick. Inlet from left side. Servicing from front panel.
 Materials : Stainless steel, Brass.
 Overall size : 145mm x 145mm
 Pressure range : 0.7 - 6.0 bar pressure range
 Volume discharge : 0.7 - 2.0 litres per discharge

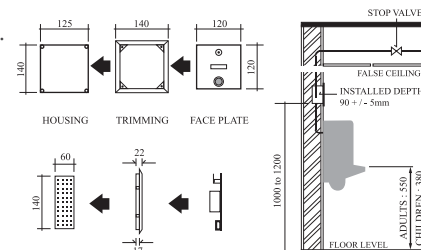

Code : UFV 305CP (palm press)

WELS - 2 Ticks

PRODUCT SPECIFICATIONS

- Product : Manual operated recessed urinal flush valve (Box Type)
 Description : Concealed box type flush valve with palm press activation. The face plate is flush to the wall. The entire housing is of 304 stainless steel material. Hinged faceplate with lock facilitates service.
 Operation : Push button activation via 55mm diameter stainless steel push button (0.8 litres flush). Consistent flush volume irrespective of water pressure.
 Features : Integral stop / check valve. Adjustable flush volume.
 Installation : Concealed box type for solid wall >120mm thick. Inlet from left side. Servicing from front panel.
 Materials : Stainless steel, Brass.
 Overall size : 145mm x 145mm
 Pressure range : 0.7 - 6.0 bar pressure range
 Volume discharge : 0.7 - 2.0 litres per discharge

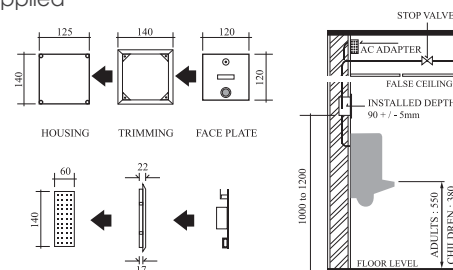

Code : USR 500 (sensor)

WELS - 3 Ticks

PRODUCT SPECIFICATIONS

- Product : Sensor operated recessed type urinal flush valve (Box Type)
 Description : A recessed sensor urinal flush valve with manual over-ride and lockable faceplate. Flushes automatically after every use. The unit is flush to the wall. Face plate and trimming are of stainless steel material. Mains powered but stepped down to 12 volts DC for safety.
 Operation : The user is detected by an infra-red sensor & urinal is flushed immediately upon departure. Water volume, flow rate, sensing range are adjustable.
 Features : Manual over-ride function (by electrical). Fuzzy logic water saving functions. Diagnostic functions. Cam lock.
 Installation : Concealed box type for solid wall > 100mm thick. Inlet from left side. Servicing from front panel.
 Electrical : 230vac/12vdc. 500mA. British Std AC adaptor supplied
 Materials : Stainless steel, Brass, FRP, ABS.
 Overall size : 145mm x 145mm
 Pressure range : 0.7 - 6.0 bar pressure range
 Volume discharge : 0.5 litres per discharge

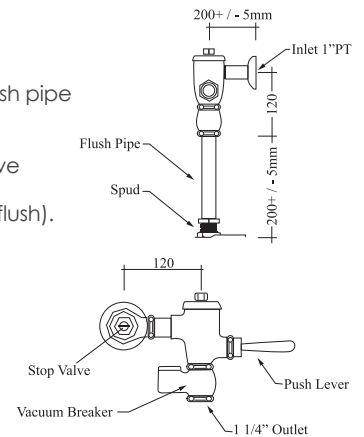

W.C. FLUSH VALVE

Code : UFV 400

PRODUCT SPECIFICATIONS

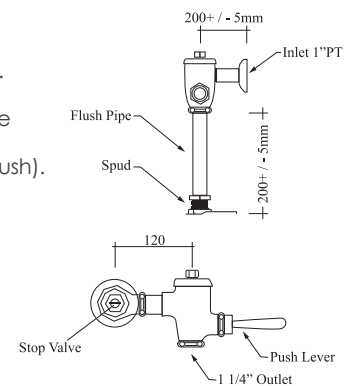

- Product : Exposed manual WC flush valve c/w vacuum breaker & flush pipe (Without Spud)
- Description : Exposed type W.C. flush valve with lever activation. Chrome plated brass on construction with integral stop valve and vacuum breaker.
- Operation : Activation via a 70 mm long chrome plated lever. (4.5 litre flush). Consistent flush volume irrespective of water pressure
- Features : Integral stop / check valve. Adjustable flush volume.
- Installation : Inlet from above, behind or below. Suitable for top inlet pedestal and oriental squatting pans.
- Materials : Brass - chrome plated.
- Pressure range : 0.7 - 6.0 bar pressure range
- Volume discharge : 4.5 litres per discharge

Code : UFV 400-1

PRODUCT SPECIFICATIONS

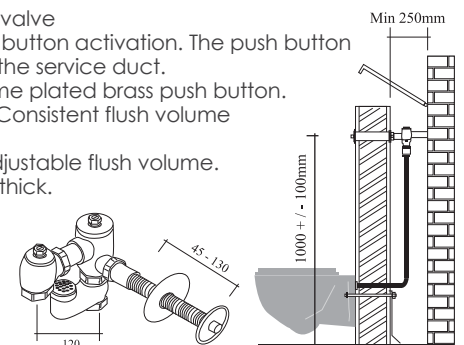

- Product : Exposed manual WC flush valve & flush pipe (Without Spud).

SENSOR OPERATED BASIN TAP

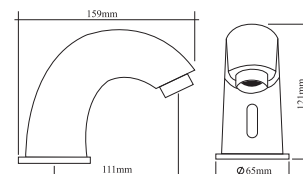

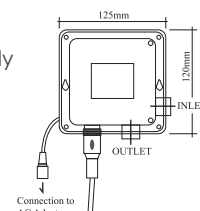

Code : UTS 800 CARIBBEAN

PRODUCT SPECIFICATIONS

- Product** : Sensor Operated Basin Tap
Description : A sensor tap that automatically releases water when the user's hands are placed under the aerator spout. This unit is deck mounted. The entire body is chrome-plated brass. Main or battery operated.
Operation : User is detected by an infrared sensor. Water is released when the user's hands are placed under the spout.
Features : Split unit design, "Auto range" calibration, unique "in water" operation, smart power switching management system.
Model Available : DC only (Battery Operated) or AC only (Main Operated)
Installation : The unit is basin or counter-top mounted.
Power Source : 4 x 1.5 Volt Alkaline Batteries.
 (1 to 1½ year life at 300 cycles per day), 6V AC Adaptor
 (*Option – 6V AC backup with 4 x 1.5 volt alkaline batteries)
Materials : Brass - chrome plated.
Pressure range : 0.7 - 7.0 bar. Water temp 5-60 deg. centigrade.
Flow rate / Minute : 2 litres per flow rate.

Installation : The unit is basin or counter-top mounted.
Power Source : 4 x 1.5 Volt Alkaline Batteries.
 (1 to 1½ year life at 300 cycles per day), 6V AC Adaptor
 (*Option – 6V AC backup with 4 x 1.5 volt alkaline batteries)
Materials : Brass - chrome plated.
Pressure range : 0.7 - 7.0 bar. Water temp 5-60 deg. centigrade.
Flow rate / Minute : 2 litres per flow rate.

WELS - 3 Ticks

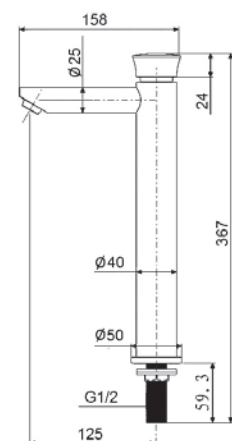

SELF-CLOSING / DELAY ACTION BASIN TAP

Code : UTS 701

PRODUCT SPECIFICATIONS

- Product** : Manual self-closing delay action tower basin tap
Description : An exposed self-closing tap for salad bowl. Push button operated, delayed self-closing. The entire body is made of chrome plated brass.
Operation : Water is released when the user pushes the button. Water stops after a pre-set time.
Features : Fully integral cartridge mechanism. 6 litre / min flow rate. Vandal resistant aerator.
Installation : The unit is basin mounted. Pipe connection via ½" braided stainless steel hose (not supplied).
Materials : Brass - chrome plated.
Pressure range : 3 second flow duration / 0.5 - 6.0 bar pressure range
Flow rate / Minute : 2 - 4 litres per minute flow rate

SELF-CLOSING / DELAY ACTION BASIN TAP

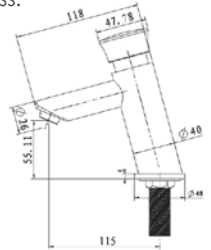

WELS - 2 Ticks

Code : UTS 700

PRODUCT SPECIFICATIONS

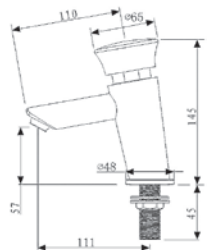

- Product : Manual self-closing delay action tap
 Description : An exposed self-closing tap. Push button operated, delayed self-closing. The unit is basin mounted. The entire body is made of chrome plated brass.
 Operation : Water is released when the user pushes the button. Water stops after a pre-set time.
 Features : Fully integral cartridge mechanism. 6 litre / min flow rate. Vandal resistant aerator.
 Installation : The unit is basin mounted. Pipe connection via 1/2" braided stainless steel hose.
 Materials : Brass - chrome plated.
 Pressure range : 3 second flow duration / 0.5 - 6.0 bar pressure range
 Flow rate / Minute : 2 - 4 litres per minute flow rate

Code : UTS 705

Product : Flush valve bend pipe
Size : 400mm x 1000mm
Materials : Stainless Steel - Chrome

SPUD & PISTON (FITTINGS)

Code : SU-380

Product : Urinal Spud (for top inlet)
Materials : Brass - Chrome

Code : SP-400

Product : W.C. Internal Piston
Materials : Brass

Code : SC-342

Product : W.C. Spud (for top inlet)
Materials : Brass - Chrome

Code : SP-400-1

Product : W.C. Piston Top Gasket
Materials : Rubber - Black

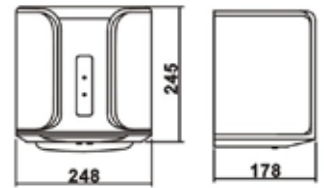

AUTOMATIC HAND DRYER

Code : UHD 1000

PRODUCT SPECIFICATIONS

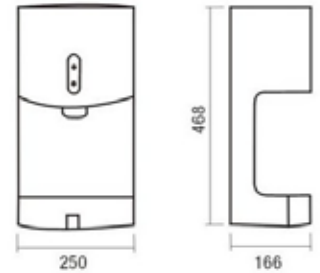

Product : Sensor operated hot air hand dryer.
 Operation : The user's hands are detected by an infrared sensor.
 Warm air released. Drying time 10-12s
 Specification : Power Capacity 1100W | Air Speed 90 m/s
 Waterproof grade - IPX1 | Time protect 60s
 Electrical : Voltage 220-240V / 50Hz | Current 10A
 Materials : ABS housing with white color coating.
 Sizes : W248 x H245 x D178 mm.

Code : UHD 4000

PRODUCT SPECIFICATIONS

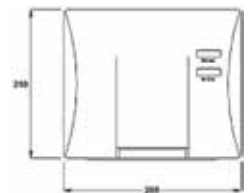

Product : Sensor operated hot air hand dryer with plastic tray.
 Operation : The user's hands are detected by an infrared sensor.
 Warm air released. Drying time 10-12s.
 Specification : Power Capacity 1400W | Air Speed 95 m/s
 Waterproof grade - IPX1 | Time protect 60s
 Electrical : Voltage 220-240V / 50Hz | Current 10A
 Materials : ABS housing with white color coating.
 Sizes : W250 x H468 x D166 mm.

Code : UHD 7000

PRODUCT SPECIFICATIONS

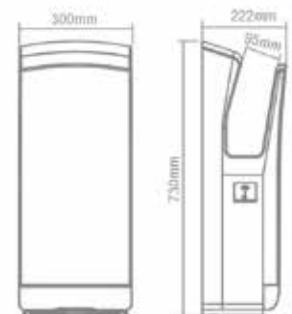

Product : Sensor operated hot air hand dryer.
 Operation : The user's hands are detected by an infrared sensor.
 Warm air released. Drying time 10-12s.
 Specification : Power Capacity 1750W | Air Speed 85 m/s
 Waterproof grade - IPX1 | Time protect 60s
 Electrical : Voltage 220-240V / 50Hz | Current 10A
 Materials : Aluminum housing with white color powder coating.
 Sizes : W275 x H230 x D200 mm.

Code : UHD 9000 W

PRODUCT SPECIFICATIONS

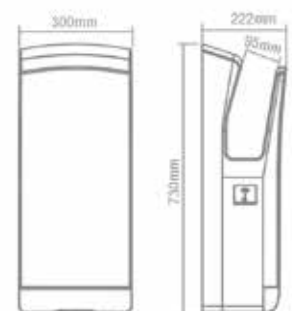

Product : Sensor operated hot air hand dryer. DC Brushless Motor.
 Operation : The user's hands are detected by an infrared sensor.
 Warm air released. Drying time 5-7s.
 Specification : Power Capacity 650W | Air Speed 95 m/s
 Waterproof grade - IPX1 | Time protect 60s
 Electrical : Voltage 220-240V / 50Hz | Current 10A
 Materials : Stainless steel housing with white color coating.
 Sizes : W300 x H730 x D222 mm.

Code : UHD 9000 SB

PRODUCT SPECIFICATIONS

CARE & MAINTENANCE

1. Clean with mild soap and water or a mild liquid detergent. All purpose cleaners are generally considered safe to use.
2. After every use or cleaning, it is always best to wipe dry with a soft cloth to prevent water spotting and mineral build-up. Faucet manufacturers recommend that you clean and wax regularly. You may use an aerosol furniture polish, appliance wax or auto paste wax for this purpose.
3. Do not use cleaners containing ammonia, bleach, abrasives, or other strong chemicals, as these can damage some faucet finishes.
4. Avoid products that state on the label that they remove tarnish and rust, and those containing hydrofluoric, hydrochloric and/ or phosphoric acids or caustic agents.
5. Avoid industrial cleaners and abrasives cleaners, such as those used for toilet bowls, heavy-duty scrub sponges or scouring pads. These will scratch and damage the finishes.

Hardwater Deposits:

1. To remove hard water deposits and soap scum, use a 50/50 mix of vinegar or all purpose cleaners and water.
2. For stubborn stains and/ or mineral deposits, a mild abrasive cleaner can be used.

LEADING THE FASHION,
CREATE LIFE INSPIRATION!

WIDEST RANGE OF DESIGNS

Make Believe

Leading the fashion, create life inspiration !

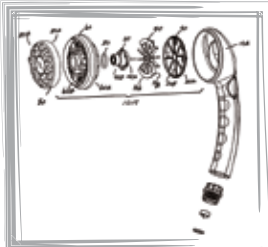

ABAGNO

Establish since 1989 and providing the widest range of sanitary fittings such as faucets, shower systems, shower fittings, bathroom accessories, and others necessary items where your bathroom would need it! We are focusing on durability, designs, hygienic and most important with much choices for your needs to create quality living style from day to days!

The Productions

Design . Quality . Profession

The quality is always our main concern. The designs for modern living style. The profession for giving the quality life to the users' need.

CREATIVITY

Thank you to our professional design team who always work out with creative, trendy and practical products for the needs of the users.

RAW MATERIAL

The raw material (brass) is just right to produce a quality product to ensure it is safe to use and worth owning it.

TECHNOLOGY

With the advanced technologies, congratulations that we could managed to provide a high efficiency productions with every single piece of product in correctly and perfectly.

FINISHING

Hidden defect's check and surface polishes before electro plating to ensure the product is just right at its standard and to confirm the outcome perfectly.

QUALITY CHECK

Every single piece of product will be at its final quality check before packing to achieve the "the finest products to the users".

* For Basin & Sink Mixer

1/2" x 125mm MIXER BASE EXTENSION

Code : **LS-ME-3130**

* Only For Series T-8000

CARE & MAINTENANCE

1. Clean with mild soap and water or a mild liquid detergent. All purpose cleaners are generally considered safe to use.
2. After every use or cleaning, it is always best to wipe dry with a soft cloth to prevent water spotting and mineral build-up. Faucet manufacturers recommend that you clean and wax regularly. You may use an aerosol furniture polish, appliance wax or auto paste wax for this purpose.
3. Do not use cleaners containing ammonia, bleach, abrasives, or other strong chemicals, as these can damage some faucet finishes.
4. Avoid products that state on the label that they remove tarnish and rust, and those containing hydrofluoric, hydrochloric and/ or phosphoric acids or caustic agents.
5. Avoid industrial cleaners and abrasives cleaners, such as those used for toilet bowls, heavy-duty scrub sponges or scouring pads. These will scratch and damage the finishes.

Hardwater Deposits:

1. To remove hard water deposits and soap scum, use a 50/50 mix of vinegar or all purpose cleaners and water.
2. For stubborn stains and/ or mineral deposits, a mild abrasive cleaner can be used.

Authorized Dealer:

Optional Accessories :

Composite Granite Kitchen Sink

Before you choose, something you should know about Granite Kitchen Sink !

Granite kitchen sinks are made of ultra durable granite composite material and virtually fade proof and solid color throughout. The longwearing, non-porous, non-absorbent granite surface resists scratching, chipping and staining and is heat resistant up to 200 degrees Celcius.

LOW MAINTENANCE

STAIN & BACTERIA RESISTANT

HEAT RESISTANT

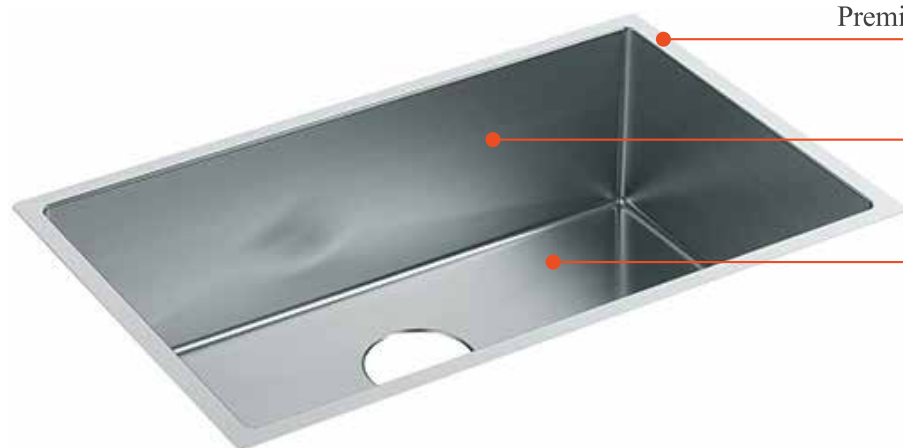

COLOUR OPTION

EASY CLEANING

DURABLE SURFACE

Premium SUS-304 Stainless Steel Construction

Durable Thickness 1.0mm to 1.2mm

Channel Engineered For Optimum Drainage

Commercial-grade Undercoating Provides An Extra Level Of Soundproofing & Protect The Sink From Condensation Buildup

Extra-Thick Rubber Dampening Pads

Top Quality Soundproofing
Rubber Dampening Pads absorb Noise & Vibration

FULLFILL YOUR KITCHEN ESSENTIAL

Small tips !!!

Stainless steel must be cleaned to keep it looking beautiful and to maintain its ability to resist corrosion. The beautiful surface of stainless steel is protected from corrosion by a thin layer of chromium oxide. Oxygen from the atmosphere combines with the chromium in the stainless steel to form this passive chromium oxide film that protects the stainless steel surface from further corrosion. When the surface is contaminated by dirt, sand, or other materials, this passivation process is hindered and corrosive agents are trapped, allowing corrosion to occur.
