

UNISYNC

We are thrilled with the opportunity to partner with Ryerson University's Formula S.A.E. team. The team will be outfitted in our Hammill brand Coveralls and Shopcoats which will provide them with a unified professional look throughout the entire process from build to race, throughout their 2013-2014 season. We wish them the best of luck!

Mississauga, ON L4W 5S7

To Carmin Garofalo and Unisync Group Limited:

Thank you for your generous sponsorship of Ryerson Formula Racing, the Formula S.A.E. team at Ryerson University. We are so excited at the opportunity to have you as a sponsor of our team for the 2013-2014 season. We would also like to extend our thanks to your Marketing Co-ordinator, Amanda Brown for working so faithfully with us on this project.

Ryerson Formula Racing is an engineering design team operating under the Faculty of Engineering and Architectural Science at Ryerson University that strives to involve students from various programs in the Formula S.A.E. challenge. In addition to support from the university we rely on sponsors to provide our team with the resources needed to extend our team members' education from labs and course work into an applicable, involved project and create an innovative and professional atmosphere. Your contribution of twenty embroidered shop coats and twenty embroidered coveralls from the Hammill Workwear catalogue not only provides physical protection to our students when manufacturing our vehicle but it develops our team culture and image within the university and will continue to do so abroad as we attend competitions.

Formula S.A.E. is a division under the Society of Automotive Engineers (S.A.E.) that creates the rules, regulations and several competitions for Formula S.A.E. teams at universities across the world. Each year, we look to attend two to three select Formula S.A.E. (United States of America), Formula Student (United Kingdom) or otherwise sanctioned competitions where we compete against other universities and are critiqued by a panel of industry professionals. For the 2013-2014 season we will be looking towards Formula S.A.E. Michigan held at the Michigan International Speedway and/or Formula S.A.E. Lincoln held at the Lincoln Airpark in Nebraska. We also plan to register for two Canadian events attended in the past: Formula North in Barrie, organized by the not for profit organization Formula North, and the U of T Shootout, a day of racing trials at the Canadian Tire Motorsports Park organized by the University of Toronto. Your shop coats and coveralls will be proudly worn at all events Ryerson Formula Racing attends.

We appreciate your willingness to sponsor our team with items so essential to our operation. Ryerson Formula Racing will certainly feel much more like a unified team with your contribution.

Sincerely,

Gregory Lister
