

Introducing the Primegrip Roofer's Soldering Iron Kit, the professional's choice for powerful and precise soldering on the job site. This kit harnesses the reliable heat of propane to deliver unwavering performance for all your roofing needs. It's the ideal solution for new installations, intricate flashing work, and critical repairs where a powerful and reliable flame is essential for a perfect, long-lasting seal. Elevate your craftsmanship and invest in a tool that works as hard as you do.

- Built-in piezo ignition and adjustment knob. Heats up in seconds and maintains a consistent, high temperature, making quick work of copper, tin, galvanized steel and other roofing metals.
- Connects directly to a standard propane tank, providing a continuous, high-temperature flame for fast and effective soldering.
- The rugged, heavy-duty iron is constructed to withstand the demanding conditions of a roofing environment. Its robust design ensures a long service life, giving you a tool you can depend on.
- The ergonomic handle provides a secure and comfortable grip, reducing hand fatigue during long hours of work. The folding kickstand allows you to safely rest the hot iron, preventing damage to the roof or other materials.
- Every kit comes with a carrying case, copper turbo tip, diamond turbo tip, adjustable regulator, quick connect coupler and 10' (3 m) hose — all the essentials required for a professional finish.

SPECIFICATIONS	
Heat Output	4,400 BTU
Regulator Pressure	0-58 psi (0-4 bar)
Gas Consumption @ 30 psi (2 bar)	0.2 lb / hr (94 g / hr)
Max Temperature	680°C (1,256°F)

Part #	Product Weight	Case Qty
73-503	6.00 lb	6
