

SUSPENSION TRAUMA RELIEF STRAP

The Suspension Trauma Relief Strap is a premium trauma strap designed to reduce the effects of prolonged fall suspension. Without trauma straps, blood can be restricted to the brain and other organs that could result in unconsciousness and even death if not rescued promptly.

Malta Dynamics newly designed suspension trauma relief strap can be attached to most make and model body harnesses available on the market today. The strap can be pre-set and customized for a specific worker. Simply connect the strap using the quick connect and the system is ready to use. The design of the Malta Dynamics Suspension Trauma Relief Strap gives both workers and employers peace of mind in the event of a fall.
