

MALTA DYNAMICS

# TEMPORARY GUARDRAIL POST

The Malta Dynamics Temporary Guardrail System is a user-friendly and lightweight solution to prevent workers from possibly falling over an edge when operating in work environments at heights of 6' or higher. The unibody carbon steel design makes posts durable and easy to install on the jobsite. When disassembled, the posts can be easily stacked and transported by hand. The OSHA Compliant Temporary Guardrail Posts are easy to configure around the leading edges in your workspace and can be placed to suit unique jobsite applications. Perfect for use on wood or concrete.

The Malta Dynamics temporary, reusable, and portable guardrail is a reliable and cost-effective tool to keep your crew safe and can be quickly disassembled once the job is done and stored for future use.
