Attaching Center Panel and Body Together

Lay the Textured Body Piece flat and fold in the sides, set the center cable panel between the two sides. At the bottom of the panel *insert your hook through the edge of the body and the side edge of the center panel, yo from underneath and pull through loop on hook*; repeat from * to * to attach each side panel. This will create a slip stitch detail for a nice looking join. If preferred, sewing the Textured Body Piece and Center Panel together is an option.
