3001 *SIMPLY WHITE*

Our 3001 Simply White quartz, a vision of pure luminosity and refined beauty. This extraordinary quartz slab showcases the brightest and whitest surface in our collection, creating an unparalleled sense of freshness and purity that instantly transforms any space.

With its polished finish, the 3001 Simply White quartz radiates a dazzling brilliance that captivates the eye. The polished texture enhances its pristine white surface, accentuating its inherent clarity and creating a mirror-like reflection that amplifies the sense of elegance and sophistication.

Immerse yourself in the crisp and clean aesthetics of the 3001 Simply White quartz as it effortlessly complements any design style. Whether used as kitchen countertops, bathroom vanities, or other interior surfaces, its bright and radiant appearance breathes new life into your living spaces, creating an atmosphere of timeless beauty.

ADVANTAGES

NATURAL STONE AESTHETIC

Our quartz resembles the look and feel of natural marble, with none of the hassle. Our collection contains over 30+ colours and several finishes with a wide range of patterns available to suit any project.

EASY TO CLEAN & CARE FOR

Unlike natural stone that requires constant upkeep, the durability and non-porous qualities of quartz and porcelain make clean up and maintenance easy! All you need is soap and water & never worry about needing to reseal!

STAIN RESISTANT

No surface is 100% stain-proof but quartz comes very close. Being a non-porous material, liquids are unable to penetrate into the surface. The rare stain is on the surface only and easily cleaned off with soap and warm water.

FULL BODIED VEINING

Full bodied veining means that the colouring and pattern run through the thickness of the slab. If a chip does occur this ensures the surface will still maintain the same colouring & pattern.

IMPACT RESISTANT

Quartz is an extremely strong material ideal for workspaces, home design and high traffic atmospheres such as hotels, shops and restaurants. Quartz can withstand high impact without cracking thanks to the polymers that make it!

HIGHLY SCRATCH RESISTANT

Quartz has impressive durability and is highly scratch resistant. However, the material is not impossible to scratch. We strongly suggest not dragging any heavy items like ceramic pots over your quartz surfaces and to clean any sandy grit when spotted.

RESISTANT TO WEAR & TEAR

You do not have to worry about your quartz countertops overtime due to their resistance to wear & tear! Made from one of the hardest minerals on Earth, quartz is an extremely tough surface ready to take on everyday use.

HEAT RESISTANCE

While our quartz is heat resistant, placing hot pots or pans directly on the countertop can lead to discoloration or cracking. Always use trivets or heat-resistant pads to maintain the pristine appearance of your quartz.

APPLICATIONS

- Kitchen Countertops
- Bathroom Vanity Tops
- Backsplashes
- Tub Surrounds
- Flooring
- Wall Cladding & Feature Walls
- Furniture Tops
- Bar Tops
- Office Desks and Counters
- Retail Displays

TECHNICAL INFORMATION

FABRICATION

The fabrication process of quartz surfaces for interior applications is a complex and precise procedure that involves advanced machinery and skilled craftsmanship. We have established partnerships with trusted fabricators in various areas around the GTA, that are equipped with the expertise and tools necessary to bring your quartz surface visions to life.

Our team can guide you through the fabrication process, ensuring that your quartz surfaces are meticulously crafted to perfection. From the initial selection of materials to the final installation, we strive to deliver quartz surfaces that exhibit unparalleled craftsmanship, durability, and aesthetic appeal.
