# X.II ROCA

Our X.II Roca is a textured porcelain with a bush hammered surface. With its striking taupe-coloured base this slab is sure to make a statement in any design project.

The textured finish of the X.II Roca slab creates a unique surface that adds depth and dimension to any space. This natural-looking finish brings the beauty of the outdoors inside, making it a perfect choice for those seeking a warm and inviting atmosphere.

# ADVANTAGES

## **NATURAL STONE AESTHETIC**

Our porcelain resembles the look and feel of natural marble, with none of the hassle. Our collection contains 14 different colours with several finishes and a wide range of patterns available to suit any project.

## **HIGHLY SCRATCH RESISTANT**

Porcelain is close to being completely indestructible. However, the material is not impossible to scratch. We strongly suggest not dragging any heavy items like ceramic pots over your porcelain surfaces and to clean any sandy grit when spotted.

## **STAIN RESISTANT**

No surface is 100% stain-proof but porcelain comes very close. Being a non-porous material, liquids are unable to penetrate into the surface. The rare stain is on the surface only and easily cleaned off with soap and warm water.

## **IMPACT RESISTANT**

Porcelain is an extremely strong material ideal for workspaces, home design and high traffic atmospheres such as hotels, shops and restaurants.

## **RESISTANT TO ICE & FROST**

Our porcelain is ideal to use in environments that reach below freezing temperatures. Due to the immense strength and absorbent qualities of these slabs they are impossible for snow or ice to penetrate and crack due to the cold.

## **RESISTANT TO ULTRA VIOLET RAYS**

Our porcelain will not fade or change colour if exposed to direct natural sunlight. The glazes that are used during the manufacturing process strengthen the stone and permanently lock the pigment into the stone.

## **HEAT RESISTANT**

Our porcelain slabs are fired in a kiln at extremely high temperatures, making them incredibly heat resistant. Any heat near/on the slab will not damage, crack, or discolour the slab - making porcelain the perfect choice for fireplace designs!

## **UNIQUE BENDING STRENGTH**

Porcelain slabs carry a unique quality that makes them possible to bend with the correct tools and techniques. This makes design possibilities truly endless.

# APPLICATIONS

## Interior Applications:

- Countertops
- Vanities
- Shower walls and floors
- Bathtub surrounds
- Fireplace surrounds
- Flooring
- Stair treads
- Wall cladding
- Backsplashes
- Tabletops

- Walkways
- Stairs
- Facades
- Roofing
- Siding
- Garden paths
- Outdoor kitchens
- Wall cladding
- Fountains and water features
- BBQ islands

A photograph of a white ceramic bowl filled with several green apples, placed on a dark, textured surface. To the right of the bowl is a white ceramic vase with a green leaf pattern, containing green leaves. The lighting is soft, creating subtle shadows.

# MAINTENANCE

Trusted worldwide for their incredible low-maintenance qualities, porcelain slabs are perfect for busy households, commercial spaces, and high-traffic areas. Requiring little to no maintenance to keep your surfaces looking brand new for years to come. They are highly durable, long-lasting, and require very little upkeep, making them an excellent investment for any project.

[Download Care & Maintenance Manual](#) for more information on porcelain surface maintenance.

# WARRANTY

## RESIDENTIAL APPLICATION

25 year protection.

Applies to the repair or replacement of defective material due to any manufacturing defects.

Transferable once registered online.

Material must be installed with a certified fabricator.

## COMMERCIAL APPLICATION

10 year protection.

Applies to the repair or replacement of defective material due to any manufacturing defects.

Non-transferable. Any associated repair or replacement cost other than the product will be the original purchaser's responsibility.

Material must be installed with a certified fabricator.
